#### Violation/Evaluation Summary

**Note:** NO RECORDS: As of May 2020, there are no Compliance Monitoring and Enforcement (violation) records associated with this facility (EPA ID).

#### Handler Summary

**Importer Activity:** No  
**Mixed Waste Generator:** No  
**Transporter Activity:** No  
**Transfer Facility:** No  
**Onsite Burner Exemption:** No  
**Furnace Exemption:** No  
**Underground Injection Activity:** No  
**Commercial TSD:** No  
**Used Oil Transporter:** No  
**Used Oil Transfer Facility:** No  
**Used Oil Processor:** No  
**Used Oil Refiner:** No  
**Used Oil Burner:** No  
**Used Oil Market Burner:** No  
**Used Oil Spec Marketer:** No

#### Hazardous Waste Handler Details

**Sequence No:** 1  
**Receive Date:** 19861006  
**Handler Name:** P A R AUTO BODY REPAIR  
**Federal Waste Generator Code:** 1  
**Generator Code Description:** Large Quantity Generator  
**Source Type:** Notification

#### Hazardous Waste Handler Details

**Sequence No:** 1  
**Receive Date:** 19960901  
**Handler Name:** P A R AUTO BODY REPAIR  
**Federal Waste Generator Code:** 2  
**Generator Code Description:** Small Quantity Generator  
**Source Type:** Implementer

#### Hazardous Waste Handler Details

**Sequence No:** 2  
**Receive Date:** 20100209  
**Handler Name:** SIDELINE AUTO BODY  
**Federal Waste Generator Code:** 2  
**Generator Code Description:** Small Quantity Generator  
**Source Type:** Notification

#### Waste Code Details

**Hazardous Waste Code:** D001  
**Waste Code Description:** IGNITABLE WASTE

DALY CITY CA 94014-2664

**EPA Handler ID:** CAL000256995  
**Gen Status Universe:** No Report  
**Contact Name:** KINGSTON WONG  
**Contact Address:** 7232 MISSION ST , , DALY CITY , CA, 94014 ,  
**Contact Phone No and Ext:** 650-756-1334  
**Contact Email:** DJAUTOBODY@SBCGLOBAL.NET  
**Contact Country:**  
**County Name:** SAN MATEO  
**EPA Region:** 09  
**Land Type:**  
**Receive Date:** 20020802

#### Violation/Evaluation Summary

**Note:** NO RECORDS: As of May 2020, there are no Compliance Monitoring and Enforcement (violation) records associated with this facility (EPA ID).

#### Handler Summary

**Importer Activity:** No  
**Mixed Waste Generator:** No  
**Transporter Activity:** No  
**Transfer Facility:** No  
**Onsite Burner Exemption:** No  
**Furnace Exemption:** No  
**Underground Injection Activity:** No  
**Commercial TSD:** No  
**Used Oil Transporter:** No  
**Used Oil Transfer Facility:** No  
**Used Oil Processor:** No  
**Used Oil Refiner:** No  
**Used Oil Burner:** No  
**Used Oil Market Burner:** No  
**Used Oil Spec Marketer:** No

#### Hazardous Waste Handler Details

**Sequence No:** 1  
**Receive Date:** 20020802  
**Handler Name:** D & J AUTO BODY  
**Source Type:** Implementer  
**Federal Waste Generator Code:** N  
**Generator Code Description:** Not a Generator, Verified

**EPA Handler ID:** CAL000341787  
**Gen Status Universe:** No Report  
**Contact Name:** AUGUSTO C PERALTA  
**Contact Address:** 525 SYLVAN ST , , DALY CITY , CA, 94014-2725 ,  
**Contact Phone No and Ext:** 650-756-6360  
**Contact Email:** AUGPERALTA@YAHOO.COM  
**Contact Country:**  
**County Name:** SAN MATEO  
**EPA Region:** 09  
**Land Type:**  
**Receive Date:** 20090402

#### Violation/Evaluation Summary

**Note:** NO RECORDS: As of May 2020, there are no Compliance Monitoring and Enforcement (violation) records associated with this facility (EPA ID).

#### Handler Summary

**Importer Activity:** No  
**Mixed Waste Generator:** No  
**Transporter Activity:** No  
**Transfer Facility:** No  
**Onsite Burner Exemption:** No  
**Furnace Exemption:** No  
**Underground Injection Activity:** No  
**Commercial TSD:** No  
**Used Oil Transporter:** No  
**Used Oil Transfer Facility:** No  
**Used Oil Processor:** No  
**Used Oil Refiner:** No  
**Used Oil Burner:** No  
**Used Oil Market Burner:** No  
**Used Oil Spec Marketer:** No

#### Hazardous Waste Handler Details

**Sequence No:** 1  
**Receive Date:** 20090402  
**Handler Name:** CAR SOLUTIONS  
**Source Type:** Implementer  
**Federal Waste Generator Code:** N  
**Generator Code Description:** Not a Generator, Verified

CHRISTINE ABRIL  
492 FLORENCE ST  
DALY CITY CA 94014-2106

RCRA  
NON GEN

EPA Handler ID: CAC003034579  
Gen Status Universe: No Report  
Contact Name: CHRISTINE ABRIL  
Contact Address: 492 FLORENCE ST , , DALY CITY , CA, 94014-2106 ,  
Contact Phone No and Ext: 650-296-4729  
Contact Email: SARA.GOMEZ@SYNERGYCOMPANIES.ORG  
Contact Country:  
County Name: SAN MATEO  
EPA Region: 09  
Land Type:  
Receive Date: 20190918

#### Violation/Evaluation Summary

**Note:** NO RECORDS: As of May 2020, there are no Compliance Monitoring and Enforcement (violation) records associated with this facility (EPA ID).

#### Handler Summary

Importer Activity: No  
Mixed Waste Generator: No  
Transporter Activity: No  
Transfer Facility: No  
Onsite Burner Exemption: No  
Furnace Exemption: No  
Underground Injection Activity: No  
Commercial TSD: No  
Used Oil Transporter: No  
Used Oil Transfer Facility: No  
Used Oil Processor: No  
Used Oil Refiner: No  
Used Oil Burner: No  
Used Oil Market Burner: No  
Used Oil Spec Marketer: No

#### Hazardous Waste Handler Details

Sequence No: 1  
Receive Date: 20190918  
Handler Name: CHRISTINE ABRIL  
Source Type: Implementer  
Federal Waste Generator Code: N  
Generator Code Description: Not a Generator, Verified

#### Owner/Operator Details

Extracted from Gribi Associates' November 16, 2007 SITE CONCEPTUAL MODEL AND WORKPLAN TO CONDUCT SOIL BORING INVESTIGATION, San Mateo County does not take responsibility for the accuracy of the statements made or any professional interpretations made in the referenced report. The Site is located on the west side of Mission Street, approximately halfway between Vale Street to the north and west Market Street to the south, in Daly City, California. The site is located in a mixed-use commercial and residential area of Daly City, with commercial/industrial land use generally along Mission Street, and residential land use further away from Mission Street. The Site consists of a nominally rectangular land parcel currently occupied by a nominally rectangular building measuring approximately 75 feet by 125 feet located on the east side of the parcel. The Site building is currently occupied by Golden Auto Muffler & Brake, Inc. The remaining western portion of the Site is an undeveloped yard area and is situated approximately eight feet lower in elevation than the site building on the east side of the Site. In preparing this summary, Gribi Associates reviewed documents from SMCHD files and from the client. Note that, due to their distant history, some of the site investigative records were only partially, or were not, available for review. Thus, the following summary is, in some cases, based on second-hand summaries provided in more current reports. SMCHD files for the Site indicate that the SMCHD was notified in December 1986 by a prospective purchaser of the Site (Travis Pendergrass) of the presence of an underground redwood structure in the Site yard measuring approximately 10 feet by 12 feet by 8 feet. This UST, which was located in the northeast corner of the Site yard area on the west half of the Site, was subsequently pumped, resulting in the removal of approximately 750 gallons of waste oil. The wooden UST was apparently demolished in mid-December 1986, and soil was excavated down to about 14 feet in depth. Soil samples collected at approximately 13 feet in depth apparently showed elevated concentrations of primarily semi-volatile hydrocarbons (diesel/Stoddard solvent). Approximately 38 55-gallon drums were filled with hydrocarbon-impacted soil, oil sludge, and wood from the removal activities. On July 9, 1987, two soil borings, Boring 1 and Boring 2, were drilled by Cooper Engineering, with Boring 1 located in the former UST overexcavation cavity and Boring 2 located immediately west of the overexcavation cavity. Soil samples from former UST excavation Boring 1 showed elevated levels of motor oil range hydrocarbons down to approximately 15 feet in depth, and no detectable concentrations of TPH-MO and TPH-G at 20 feet in depth. In May 1988, L & W Environmental drilled and sampled six soil borings, "1" through "6", at the site, including one boring, "1", on the north side of the former UST excavation cavity, one boring, "5", near the south edge of the former excavation cavity, and four borings, "2", "3", "4", and "6", on the west, southwest, and south sides of the former excavation cavity. Elevated TPH concentrations (20,000-35,000 milligrams per kilogram) with detectable concentrations of halogenated volatile organic hydrocarbons (HVOs) and polychlorinated biphenyls (PCBs) were encountered soil samples in excavation borings "1" and "5" and in west boring "6" down to approximately 15 feet in depth. In March 1989, Uriah, Inc. drilled and sampled one soil boring, AB-1, approximately 50 feet west-southwest from the former UST excavation cavity and two soil borings, A-EB-1 and B-EB-1, immediately north of the former UST excavation cavity, on the adjacent northeast property. A Uriah, Inc. report dated May 26, 1989 apparently includes no lab data or boring log for the onsite boring, AB-1, but states that "data acquired during the course of this boring indicated no evidence of contamination". The closest of the offsite borings, A-EB-1 located about five feet north of the former UST overexcavation cavity, showed elevated concentrations of TPH-G, some BTEX constituents, Total Oil and Grease (TOG), and PCBs in soil samples at nine feet and 14 feet in depth, but no significant impacts at 19 feet in depth. The more distant offsite boring, BEB-1 located approximately 15 feet north from the former UST excavation cavity, showed no significant hydrocarbon impacts in a soil sample collected at 19 feet in depth. Note that the boring log for this boring indicates no hydrocarbon staining and odors in soils in the boring, and the only sample analyzed from this boring was at 19 feet in depth. In July and August 1989, L & W Environmental conducted soil removal in the former UST source area. Soil removal was conducted by augering 34 discrete overlapping 4.5-foot diameter auger borings. These remediation activities were reported in Report of Contamination Remediation. The typical boring depth was approximately 35 feet below surface grade, with the depths ranging from approximately 22.5 feet to 59 feet below surface grade. The borings were backfilled with lean (1.5 sack) cement-sand slurry. Approximately 1,320 tons of augered soil was disposed of at Chem Waste Management Class I landfill in Kettleman City, California. Soil samples from the 34 borings indicated that the removed soil was heavily hydrocarbon-impacted. Soil samples collected at the bottom of each of the 34 borings showed essentially nondetectable or near-nondetectable hydrocarbon concentrations except in a single boring (SB-1), which showed concentrations of several hydrocarbon constituents, including 21,430 mg/kg of TOG, 1,080 mg/kg of TPH-G, 565 mg/kg of TPH-D, 0.16 of benzene, 1.2 mg/kg of tetrachloroethene (PCE), and 0.13 of trichloroethene (TCE). The bottom sample for SB-1 was collected at about 22.5 feet in depth, and photographs included in the Hageman-Aguilar, Inc. report indicate that SB-1 may have been located in the approximate middle of the former UST overexcavation area. In November 1995, Eichleay Engineers, Inc. drilled and sampled five soil borings at the site. The borings included three vertical borings, SB-1, SB-2, and SB-3, and two angle borings, AB-1 and AB-2, beneath the site building. Boring SB-1, located in the middle of the former overexcavation cavity, was drilled to about 50 feet in depth. Borings SB-2 and SB-3, located on the respective south and west sides of the former UST cavity, were drilled to respective depths of approximately 20 feet and 37 feet below surface grade. Soil samples from the five borings were nondetect for all hydrocarbon analytes except a single detection: 0.0098 mg/kg of chlorobenzene in SB-3 at 15 feet in depth.

Extracted from Gribi Associates' November 16, 2007 SITE CONCEPTUAL MODEL AND WORKPLAN TO CONDUCT SOIL BORING INVESTIGATION, San Mateo County does not take responsibility for the accuracy of the statements made or any professional interpretations made in the referenced report.

The Site is located on the west side of Mission Street, approximately halfway between Vale Street to the north and west Market Street to the south, in Daly City, California. The site is located in a mixed-use commercial and residential area of Daly City, with commercial/industrial land use generally along Mission Street, and residential land use further away from Mission Street. The Site consists of a nominally rectangular land parcel currently occupied by a nominally rectangular building measuring approximately 75 feet by 125 feet located on the east side of the parcel. The Site building is currently occupied by Golden Auto Muffler & Brake, Inc.

The remaining western portion of the Site is an undeveloped yard area and is situated approximately eight feet lower in elevation than the site building on the east side of the Site.

In preparing this summary, Gribi Associates reviewed documents from SMCHD files and from the client. Note that, due to their distant history, some of the site investigative records were only partially, or were not, available for review. Thus, the following summary is, in some cases, based on second-hand summaries provided in more current reports. SMCHD files for the Site indicate that the SMCHD was notified in December 1986 by a prospective purchaser of the Site (Travis Pendergrass) of the presence of an underground redwood structure in the Site yard measuring approximately 10 feet by 12 feet by 8 feet. This UST, which was located in the northeast corner of the Site yard area on the west half of the Site, was subsequently pumped, resulting in the removal of approximately 750 gallons of waste oil. The wooden UST was apparently demolished in mid-December 1986, and soil was excavated down to about 14 feet in depth. Soil samples collected at approximately 13 feet in depth apparently showed elevated concentrations of primarily semi-volatile hydrocarbons (diesel/Stoddard solvent). Approximately 38 55-gallon drums were filled with hydrocarbon-impacted soil, oil sludge, and wood from the removal activities.

On July 9, 1987, two soil borings, Boring 1 and Boring 2, were drilled by Cooper Engineering, with Boring 1 located in the former UST overexcavation cavity and Boring 2 located immediately west of the overexcavation cavity. Soil samples from former UST excavation Boring 1 showed elevated levels of motor oil range hydrocarbons down to approximately 15 feet in depth, and no detectable concentrations of TPH-MO and TPH-G at 20 feet in depth. In May 1988, L & W Environmental drilled and sampled six soil borings, "1" through "6", at the site, including one boring, "1", on the north side of the former UST excavation cavity, one boring, "5", near the south edge of the former excavation cavity, and four borings, "2", "3", "4", and "6", on the west, southwest, and south sides of the former excavation cavity.

Elevated TPH concentrations (20,000-35,000 milligrams per kilogram) with detectable concentrations of halogenated volatile organic hydrocarbons (HVOCs) and polychlorinated biphenyls (PCBs) were encountered soil samples in excavation borings "1" and "5" and in west boring "6" down to approximately 15 feet in depth.

In March 1989, Uriah, Inc. drilled and sampled one soil boring, AB-1, approximately 50 feet west-southwest from the former UST excavation cavity and two soil borings, A-EB-1 and B-EB-1, immediately north of the former UST excavation cavity, on the adjacent northeast property. A Uriah, Inc. report dated May 26, 1989 apparently includes no lab data or boring log for the onsite boring, AB-1, but states that "data acquired during the course of this boring indicated no evidence of contamination". The closest of the offsite borings, A-EB-1 located about five feet north of the former UST overexcavation cavity, showed elevated concentrations of TPH-G, some BTEX constituents, Total Oil and Grease (TOG), and PCBs in soil samples at nine feet and 14 feet in depth, but no significant impacts at 19 feet in depth. The more distant offsite boring, BEB-1 located approximately 15 feet north from the former UST excavation cavity, showed no significant hydrocarbon impacts in a soil sample collected at 19 feet in depth. Note that the boring log for this boring indicates no hydrocarbon staining and odors in soils in the boring, and the only sample analyzed from this boring was at 19 feet in depth.

In July and August 1989, L & W Environmental conducted soil removal in the former UST source area. Soil removal was conducted by augering 34 discrete overlapping 4.5-foot diameter auger borings. These remediation activities were reported in Report of Contamination Remediation. The typical boring depth was approximately 35 feet below surface grade, with the depths ranging from approximately 22.5 feet to 59 feet below surface grade. The borings were backfilled with lean (1.5 sack) cement-sand slurry. Approximately 1,320 tons of augered soil was disposed of at Chem Waste Management Class I landfill in Kettleman City, California. Soil samples from the 34 borings indicated that the removed soil was heavily hydrocarbon-impacted. Soil

| Map Key | Number of Records | Direction | Distance (mi/ft) | Elev/Diff (ft) | Site | DB |
|---------|-------------------|-----------|------------------|----------------|------|----|
|---------|-------------------|-----------|------------------|----------------|------|----|

samples collected at the bottom of each of the 34 borings showed essentially nondetectable or near-nondetectable hydrocarbon concentrations except in a single boring (SB-1), which showed concentrations of several hydrocarbon constituents, including 21,430 mg/kg of TOG, 1,080 mg/kg of TPH-G, 565 mg/kg of TPH-D, 0.16 of benzene, 1.2 mg/kg of tetrachloroethene (PCE), and 0.13 of trichloroethene (TCE). The bottom sample for SB-1 was collected at about 22.5 feet in depth, and photographs included in the Hageman-Aguilar, Inc. report indicate that SB-1 may have been located in the approximate middle of the former UST overexcavation area.

In November 1995, Eichleay Engineers, Inc. drilled and sampled five soil borings at the site. The borings included three vertical borings, SB-1, SB-2, and SB-3, and two angle borings, AB-1 and AB-2, beneath the site building. Boring SB-1, located in the middle of the former overexcavation cavity, was drilled to about 50 feet in depth. Borings SB-2 and SB-3, located on the respective south and west sides of the former UST cavity, were drilled to respective depths of approximately 20 feet and 37 feet below surface grade. Soil samples from the five borings were nondetect for all hydrocarbon analytes except a single detection: 0.0098 mg/kg of chlorobenzene in SB-3 at 15 feet in depth.

**Violation/Evaluation Summary**

**Note:** NO RECORDS: As of May 2020, there are no Compliance Monitoring and Enforcement (violation) records associated with this facility (EPA ID).

**Handler Summary**

**Importer Activity:** No  
**Mixed Waste Generator:** No  
**Transporter Activity:** No  
**Transfer Facility:** No  
**Onsite Burner Exemption:** No  
**Furnace Exemption:** No  
**Underground Injection Activity:** No  
**Commercial TSD:** No  
**Used Oil Transporter:** No  
**Used Oil Transfer Facility:** No  
**Used Oil Processor:** No  
**Used Oil Refiner:** No  
**Used Oil Burner:** No  
**Used Oil Market Burner:** No  
**Used Oil Spec Marketer:** No

**Hazardous Waste Handler Details**

**Sequence No:** 1  
**Receive Date:** 20140605  
**Handler Name:** MIDAS DALY CITY  
**Source Type:** Implementer  
**Federal Waste Generator Code:** N  
**Generator Code Description:** Not a Generator, Verified

**Owner/Operator Details**

EPA Handler ID: CAC002987397  
Gen Status Universe: No Report  
Contact Name: RUBEN BASCO  
Contact Address: 565 SYLVAN STREET , , SAN FRANCISCO , CA, 94014 ,  
Contact Phone No and Ext: 650-392-5027  
Contact Email: RBASCO2007@YAHOO.COM  
Contact Country:  
County Name: SAN FRANCISCO  
EPA Region: 09  
Land Type:  
Receive Date: 20181031

#### Violation/Evaluation Summary

Note: NO RECORDS: As of May 2020, there are no Compliance Monitoring and Enforcement (violation) records associated with this facility (EPA ID).

#### Handler Summary

Importer Activity: No  
Mixed Waste Generator: No  
Transporter Activity: No  
Transfer Facility: No  
Onsite Burner Exemption: No  
Furnace Exemption: No  
Underground Injection Activity: No  
Commercial TSD: No  
Used Oil Transporter: No  
Used Oil Transfer Facility: No  
Used Oil Processor: No  
Used Oil Refiner: No  
Used Oil Burner: No  
Used Oil Market Burner: No  
Used Oil Spec Marketer: No

#### Hazardous Waste Handler Details

Sequence No: 1  
Receive Date: 20181031  
Handler Name: RUBEN BASCO  
Source Type: Implementer  
Federal Waste Generator Code: N  
Generator Code Description: Not a Generator, Verified

#### Owner/Operator Details

| migration control. However, operation of the system for migration control was never proposed or justified to LOP, nor did O&M reports indicate system operation was achieving migration control (if that was the objective). Also, why do you need air sparging and vapor extraction for migration control? |                                                                                                                               |           |                  |                |            |    |

**Received Issue Date:** 6/25/2014  
**Action:** Staff Letter - #20140625  
**Doc Link:** [https://geotracker.waterboards.ca.gov/view\\_documents?global\\_id=T0608101090&enforcement\\_id=6209637&temptable=ENFORCEMENT](https://geotracker.waterboards.ca.gov/view_documents?global_id=T0608101090&enforcement_id=6209637&temptable=ENFORCEMENT)  
**Title Description Comments:**

LOP staff comments on 2/26/14 response letter, unsolicited 4/23/14 revised MTBE fate and transport analysis, and 6/13/14 status report. LOP staff rescinded the 3/5/13 directive to re-start the remediation system by 12/31/13. LOP required a workplan to assess the vertical extent of MTBE in soil beneath the intersection and the potential impact to regional groundwater immediately downgradient of the intersection. LOP also indicate they can support quarterly sampling of Vale and Jefferson wells if this sampling is performed by the RP and not the City. LOP also reminded RP that 3electronic files for 1Q13 and 1Q14 monitoring of MW-23 have not been uploaded.

**Action Type:** Other Regulatory Actions  
**Action Date:** 2/6/2014  
**Received Issue Date:** 2/6/2014

| <b>Title Description Comments:</b> |                   | LOP staff comments on 8/31/12 assessment report and 2/4/13 addendum. LOP directed RP to install and hook-up to the former remediation system an appropriate number of extraction wells to remediate the NAPL and MTBE beneath the intersection and to commence operating the remediation system by 12/31/13. LOP also directed RP to semi-annually monitor MW-23 for 2 years. UPDATE - LOP 6/25/14 letter rescinded directive to re-start remediation system |                  |                |      |    |

LOP staff email extending well installation report deadline from 6/26/12 to 8/31/12 so it can include 3Q12 groundwater monitoring data

**Action Type:** Other Regulatory Actions  
**Action Date:** 2/16/2012  
**Received Issue Date:** 2/16/2012  
**Action:** Staff Letter - #20120216  
**Doc Link:** [https://geotracker.waterboards.ca.gov/view\\_documents?global\\_id=T0608101090&enforcement\\_id=6113479&temptable=ENFORCEMENT](https://geotracker.waterboards.ca.gov/view_documents?global_id=T0608101090&enforcement_id=6113479&temptable=ENFORCEMENT)

**Title Description Comments:**

LOP comments on 9/7/11 MTBE leaching report, 11/14/11 groundwater monitoring report, and 12/22/11 unsolicited leaching model workplan. LOP directed RP to install a well near B-22 to monitor perched groundwater and did not approve the leaching workplan. LOP approved reducing the monitoring frequency of MW-4S and MW-5S to annual gauging and biennial sampling and indicated the 3Q11 EDF has not been uploaded to GeoTracker as required. LOP indicated it expects RP (ConocoPhillips) to implement all actions necessary to prevent migration of MTBE to regional groundater (an actively used drinking water resource).

**Action Type:** Response Requested - Workplans  
**Action Date:** 12/23/2011  
**Received Issue Date:** 12/22/2011  
**Action:** Soil and Water Investigation Workplan

| LOP comments on 7/28/10 workplan. LOP conditionally approved assessment portion of workplan, but did not approve proposed modeling. Required RP to either upload an addendum for the modeling or perform it and ensure the resulting report justifies the modeling as appropriate to evaluate the leaching and groundwater transport exposure pathway. Reminded RP that the elevation issues discussed in Feruary 2010 LOP letter have not been addressed. |                   |                                                                                                                                                                                                                                                                               |                  |                |      |    |

| LOP comments on 7/9/08, 1/19/09, and 10/15/09 assessment reports and 10/15/09 groundwater monitoring report. LOP directed RP to destroy the air sparging wells, all "D" series wells except MW-8D, and to destroy MW-8S, MW-10S, MW-13S, MW-14L, MW-16, and MW-17. Also directed RP to upload a workplan to assess residual hydrocarbons near B5 and to determine a site-specific groundwater leaching screening level for MTBE in soil below the perched groundwater interval and to resolve the errors in cited well elevation datums. LOP also reduced the gauging and monitoring frequency of all MWs downgradient of MW-6S, MW-7S, and MW-8D to annual and reduced the sampling frequency of MW-4S and MW-5S to annual. |                   |                                                                                                                                                                                                                                                                               |                  |                |      |    |

| LOP email responding to consultant's 7/21/09 email proposing to drill two deep borings instead of installing the two previously proposed offsite regional groundwater monitoring wells if hydrocarbons are not reported in sample of onsite regional groundwater. LOP approves recommendation providing registered professional can show boring locations and samples will be sufficient to intersect potential cascading of perched groundwater from site towards Vale and Jefferson wells.                                                                                                                                                                                                                                 |                   |                                                                                                                                                                                                                                                                               |                  |                |      |    |

**Title Description Comments:**

LOP letter clarifying the releases and LUFT case numbers opened for the subject site. LOP indicated that 8/17/05 letter incorrectly indicated case 220008 was opened for a waste oil release (it was opened for a gasoline vent line release). LOP also required assessment in the vicinity of the waste oil UST removed in September 1997 based on findings in 11/4/97 report. LOP stated Case 220051 opened on 4/30/98 is the main regulatory driver for the subject site.

LOP email to consultant indicating LOP will accept 3Q07 monitoring GeoReport if 2Q07 GeoWell file is uploaded and 2Q07 data is included in data table of 1Q08 monitoring report.

**Action Type:** Other Regulatory Actions  
**Action Date:** 12/20/2007  
**Received Issue Date:** 12/20/2007  
**Action:** Staff Letter - #20071220  
**Doc Link:**  
**Title Description Comments:**

LOP comments on 3/14/07 workplan and GeoTracker files uploaded in response to LOP letters dated 11/16/06, 1/17/07, 4/25/07, and 7/26/07. LOP indicated workplan did not include required work to assess regional groundwater or residual hydrocarbons in Mission Street, and therefore, required RP to upload an addendum for these tasks. However, LOP conditionally approved the utility survey, subsurface vapor sampling, and soil boring portions of the workplan. LOP did not concur with proposed slug testing. LOP reduced groundwater monitoring frequency of MW-18 and MW-19 to semi-annual and indicated air sparge wells should be added to semi-annual monitoring program. LOP also specified required GeoTracker files still have not been uploaded and may have been uploaded in error.

**Action Type:** Other Regulatory Actions  
**Action Date:** 12/19/2007  
**Received Issue Date:** 12/19/2007  
**Action:** Technical Correspondence / Assistance / Other - #20071219  
**Doc Link:**  
**Title Description Comments:**

LOP email responding to consultant's 12/18/07 email. LOP approves consultant's request to terminate quarterly monitoring of MW-18 and MW-19.

**Action Type:** Other Regulatory Actions

**Action Date:** 11/16/2006  
**Received Issue Date:** 11/16/2006  
**Action:** Staff Letter - #20061116  
**Doc Link:**  
**Title Description Comments:**

LOP comments on revised SCM dated 2/21/06 and new consultant's 10/16/06 comments on SCM; remedial system evaluation report dated 10/16/06; and 4/15/06, 7/20/06, and 10/20/06 Remedial System O&M reports. Required RP to upload a workplan for work proposed in 10/16/06 SCM comment letter and to additionally assess regional groundwater, assess sub-slab vapors beneath station building, install an 'S' zone well in Mission Street, and determine if significant residual hydrocarbon mass remains below the perched water table. LOP notes that SCM did not justify any cleanup standards as required and that LOP will likely require a workplan indicating how these will be established following the implementation of the work in the required workplan. LOP reiterates they cannot recommend the UST Fund reimburse the cost of operating the remediation system since March 2004 except for the 5 month test recommended in 7/6/04 report. LOP indicates 2006 Remedial system O&M reports continued a trend of errors and omissions, lack of historical data, and lack of data evaluation. Required RP to revise the 3Q06 O&M report if the system was shut-down during 3Q06. LOP indicates a significant amount of files have not been uploaded to GeoTracker as required, including the data required in 1/24/06 letter, and specifies the files needed. LOP indicates it is no longer necessary to upload City EDFs for Vale and Jefferson well as long as results listed in monitoring report.

**Title Description Comments:**

LOP comments on 5/31/05 and 10/18/05 monitoring reports; 5/27/05, 8/12/05, and 10/18/05 remedial system O&M reports; and 10/11/05 remedial system evaluation report. Required RP to upload missing Geotracker data and correct versions of denied files. LOP indicates they cannot support for UST reimbursement the operation of the SVE between March and October 2004 and the operation of the entire remedial system following the February through September 2005 remedial system evaluation testing. LOP rescinds requirement to sample groundwater in SVE wells based on proximity of other wells. LOP again questions 'S' and 'D' water-bearing zones. Reminded RP that required SCM is 6 months overdue.

Staff Letter - #20050511

**Doc Link:**

**Title Description Comments:**

LOP comments on 3Q04 and 4Q04 groundwater monitoring reports, letter dated 10/8/04, unsolicited aquifer testing workplan dated 10/19/04, and 1/4/05 site conceptual model. LOP required RP to revise SCM and reduce the non-remedial system groundwater monitoring frequency to semi-annual. LOP rejected the groundwater monitoring reports as inadequate and indicated the aquifer testing workplan did not contain sufficient detail to evaluate its value. LOP again questioned the existence of the 'S' and 'D' groundwater zones.

| <p>LOP comments on 7/6/04 remedial system evaluation report and 7/23/04 groundwater monitoring report. LOP conditionally approved recommendation to operate SVE system for one month, then SVE and air sparge system for one month, then SVE, air sparge, and groundwater extraction system for three months in order to evaluate effectiveness of remedial system. LOP also required preparation of a detailed site conceptual model. LOP considered monitoring report inadequate because it contained many of the deficiencies previously reported in the 7/7/04 LOP letter.</p> |                   |                                     |                  |                |      |    |

| <p>LOP comments on reports dated 2/13/04 and 5/27/04 assessment reports and 4/28/04 monitoring report. Required workplan to install a monitoring well through the onsite conductor casing to assess regional groundwater and to either justify MW-18 and MW-19 yield representative samples to evaluate impact to the Vale and Jefferson water supply wells or include in the workplan a scope of work to install additional wells to accomplish this objective.</p>                                                                                                               |                   |                                     |                  |                |      |    |

**Title Description Comments:**

Implementation of Leaching Portion of 7/28/10 Workplan - Task only necessary if RP elects to proceed with the leaching study proposed in the 7/28/10 workplan rather than upload a workplan addendum detailing and justifying how the study will be performed. Update - RP elected to upload an addendum to the 7/28/10 workplan; therefore, this task will not be performed.

**Action Type:** Cleanup Action  
**Action Date:** 2/17/2005  
**Received Issue Date:**  
**Action:** In Situ Physical/Chemical Treatment (other than SVE)  
**Doc Link:**  
**Title Description Comments:**

TPE started on 2/17/05, TPE + air sparging started on 4/4/05, and TPE/AS + GWE started on 5/19/05. LOP staff did not support operation of remedial system. RP's consultant said remedial system was operated for plume migration control. However, operation of the system for migration control was never proposed or justified to LOP, nor did O&M reports indicate system operation was achieving migration control (if that was the objective). Also, why do you need air sparging and vapor extraction for migration control?

**Action Type:** Cleanup Action  
**Action Date:** 3/17/2004  
**Received Issue Date:**  
**Action:** Soil Vapor Extraction (SVE)  
**Doc Link:**  
**Title Description Comments:**

LOP staff did not support operation of Remedial System between March and October 2004

| <b>Title:</b>         | LOP STAFF COMMENTS ON 2/26/14 RESPONSE LETTER, UNSOLICITED 4/23/14 REVISED MTBE FATE AND TRANSPORT ANALYSIS, AND 6/13/14 STATUS REPORT. LOP STAFF RESCINDED THE 3/5/13 DIRECTIVE TO RE-START THE REMEDIATION SYSTEM BY 12/31/13. LOP REQUIRED A WORKPLAN TO ASSESS THE VERTICAL EXTENT OF MTBE IN SOIL BENEATH THE INTERSECTION AND THE POTENTIAL IMPACT TO REGIONAL GROUNDWATER IMMEDIATELY DOWNGRADIENT OF THE INTERSECTION. LOP ALSO INDICATE THEY CAN SUPPORT QUARTERLY SAMPLING OF VALE AND JEFFERSON WELLS IF THIS SAMPLING IS PERFORMED BY THE RP AND NOT THE CITY. LOP ALSO REMINDED RP THAT 3ELECTRONIC FILES FOR 1Q13 AND 1Q14 MONITORING OF MW-23 HAVE NOT BEEN UPLOADED. |           |                  |                      |                             |    |

| <b>Title:</b>         | LOP COMMENTS ON 9/7/11 MTBE LEACHING REPORT, 11/14/11 GROUNDWATER MONITORING REPORT, AND 12/22/11 UNSOLICITED LEACHING MODEL WORKPLAN. LOP DIRECTED RP TO INSTALL A WELL NEAR B-22 TO MONITOR PERCHED GROUNDWATER AND DID NOT APPROVE THE LEACHING WORKPLAN. LOP APPROVED REDUCING THE MONITORING FREQUENCY OF MW-4S AND MW-5S TO ANNUAL GAUGING AND BIENNIAL SAMPLING AND INDICATED THE 3Q11 EDF HAS NOT BEEN UPLOADED TO GEOTRACKER AS REQUIRED. LOP INDICATED IT EXPECTS RP (CONOCOPHILLIPS) TO IMPLEMENT ALL ACTIONS NECESSARY TO PREVENT MIGRATION OF MTBE TO REGIONAL GROUNDATER (AN ACTIVELY USED DRINKING WATER RESOURCE). |           |                  |                      |                         |    |

**Status:** Open - Case Begin Date  
**Date :** 12/27/1985

#### LUST Sites from GeoTracker Search - Cleanup Action Report (as of Feb 24, 2020)

**Action Type:** FREE PRODUCT REMOVAL  
**Phase:** Liquid Waste, Water  
**Begin Date:** 4/13/2012  
**End Date:** 9/14/2012

**Contaminant Mass Removed:** 1 Gallons  
**Description:** Removed approximately 0.5 gallon of NAPL from wells U-12, and U-15

**Action Type:** FREE PRODUCT REMOVAL  
**Phase:** Liquid Waste, Water  
**Begin Date:** 10/21/2011  
**End Date:** 3/22/2012  
**Contaminant Mass Removed:** 1 Gallons  
**Description:** Removed approximately 0.6 to 1 gallon of NAPL from wells U-11, U-12, and U-15

**Action Type:** FREE PRODUCT REMOVAL  
**Phase:** Liquid Waste  
**Begin Date:** 5/10/2011  
**End Date:** 9/26/2011  
**Contaminant Mass Removed:** 4 Gallons  
**Description:** Hand-bailed approximately 4.5 gallons of NAPL from U-12 after removing Soakease sock

**Action Type:** FREE PRODUCT REMOVAL  
**Phase:** Liquid Waste  
**Begin Date:** 5/21/2008  
**End Date:** 5/21/2008  
**Contaminant Mass Removed:** 0 Gallons  
**Description:** Removed 1 liter of NAPL from well U-12 during well development

**Action Type:** EXCAVATION  
**Phase:** Soil  
**Begin Date:** 12/26/1997  
**End Date:** 12/26/1997  
**Contaminant Mass Removed:**  
**Description:** Removed approximately 10 cu. yds. of soil during removal of w.o. UST. Excavation was approximately 10 feet deep.

**Action Type:** EXCAVATION  
**Phase:** Soil  
**Begin Date:** 10/2/1997  
**End Date:** 10/25/1997  
**Contaminant Mass Removed:**  
**Description:** Excavated 480 cu. yds. from fuel UST cavity and piping trenches. Excavated up to ~14 fbg beneath fuel UST cavity. Depth of excavation beneath product piping was not indicated, but may have been to 11 fbg based on field notes.

#### LUST Sites from GeoTracker Search - Regulatory Activities (as of Feb 24, 2020)

Title Description Comments:

LOP staff comments on unsolicited 5/6/13 letters proposing revisions to the 7/9/12 revised workplan conditionally approved in the 12/17/12 LOP letter and an extension of the previously established deadlines. LOP staff approved some recommendations, but not others, and the revision resulted in some additional work required by LOP staff. LOP only agreed to extend the assessment completion deadline to 8/30/13 and the CAP completion deadline to 9/30/13.

Title Description Comments:

LOP staff comments on 5/15/12 and 11/14/12 monitoring reports, 6/26/12 QA/QC letter, 7/9/12 revised workplan, 7/26/12 revised pilot testing report, and 11/19/12 extension request. LOP staff indicated some of the work reported was not the standard of care expected (required future figures and tables to be accurate and reasonable). LOP staff instructed RP to upload various GeoTracker files, repair the well boxes of U-10 and U-11, and verify the NAPL drum is grounded. LOP directed RP to submit a letter from the laboratory indicating the 2011 assessment results are accurate (previous letter was not sufficient). LOP staff conditionally approved revised workplan, extended CAP submittal deadline to 6/15/13, and required CAP to contain a RAP if a cost-effective technology is justified in the CAP.

LOP staff comments on 11/15/11 assessment and groundwater monitoring report and 11/15/11 SVE and TPE pilot testing report. GPP staff did not concur with many figures in the assessment report and considered the workplan inadequate. LOP directed RP to upload a revised workplan for site assessment and a letter from the laboratory detailing why the QA/QC problems from the analysis of the site assessment samples are not a problem. LOP also directed RP to verify vapor concentrations listed on Table 3 of the pilot testing report and, if incorrect, to upload corrected tables, figures, and text the incorrect concentrations were based on. LOP directed RP to upload a remedial screening analysis only if the registered professional can justify testing a non-SVE/TPE remedial option, otherwise a corrective action plan is necessary. Directed RP to add SVE and OBS wells to groundwater gauging program and potentially to groundwater sampling program. LOP indicated some GeoTracker files were missing (pilot test EDFs) or require correction (2Q11 NAPL GeoWell, 3Q11 NAPL GeoWell, EDF #6511)

**Title Description Comments:**

LOP comments on the 5/14/10 assessment workplan, groundwater monitoring report, and vapor extraction pilot testing workplan. LOP conditionally approved the workplans and required RP to upload a workplan for offsite assessment. Reminded RP GeoBore that files for SV-8 through SV-11 have not been uploaded as required (refer to action date 6/12/06 for GeoBore deliverable).

| <b>Title Description Comments:</b> |                   | LOP comments on February 2009 investigative report and 11/3/09 monitoring report. LOP did not concur with forensic analysis or vapor risk assessment and indicated an NOV would be issued for not performing assessment offsite and under former product piping. Directed RP to upload a pilot testing workplan to evaluate a promising remedial method and a workplan for additional and completion of previously required assessment. Approved request to pressure grout UV-1. Indicated report tables contained errors and omissions and that GeoMap and GeoBores from February 2009 investigation have not been uploaded as required. Required semi-annual monitoring for UV-1 and wells U-10 through U-13 and to include PIANO analysis results in 1Q10 monitoring report. |                  |                |      |    |

Warm season subsurface vapor sampling - Report dated February 2009 (included in report issued for soil & gw assessment and first round of vapor sampling)

**Action Type:** Other Regulatory Actions  
**Action Date:** 4/23/2008  
**Received Issue Date:** 4/23/2008  
**Action:** Staff Letter - #20080423  
**Doc Link:** https://geotracker.waterboards.ca.gov/view\_documents?global\_id=T0608100567&enforcement\_id=5944887&temptable=ENFORCEMENT  
**Title Description Comments:**

LOP comments on unsolicited 3/20/08 addendum to previously approved workplan dated 1/19/07. LOP did not consider proposed modifications justified and indicated they could not support for Cleanup Fund reimbursement unless modifications can be justified in the report as satisfying the objectives of the previously approved workplan. Also indicated NOV will be issued if proposed modifications do not satisfy objective of previously approved work. LOP agreed to extend the reporting deadline for the proposed dry season subsurface vapor sampling, but not for the wet season vapor sampling or the soil & groundwater sampling tasks. LOP indicated future proposed changes in approved work must be submitted promptly after workplan approval, not near the work completion deadline established in the workplan approval letter.

**Action Type:** Response Requested - Reports  
**Action Date:** 3/28/2008  
**Received Issue Date:** 11/15/2011  
**Action:** Soil and Water Investigation Report  
**Doc Link:** https://geotracker.waterboards.ca.gov/view\_documents\_all?global\_id=T0608100567&doc\_id=5586639  
**Title Description Comments:**

Implementation of 1/19/07 workplan - Report dated February 2009 (ESB-7 through ESB-11, SV-12 through SV-15, SS-1 through SS-3, U-10 through U-13). Task not complete because did not assess beneath dispensers, offsite in street, and offsite toward SW (required work). Considered these tasks somewhat completed by 11/15/11 assessment report, though still no ssessment SW of site.

**Action Type:** Other Regulatory Actions  
**Action Date:** 3/25/2008  
**Received Issue Date:** 3/25/2008  
**Action:** Technical Correspondence / Assistance / Other - #20080325  
**Doc Link:** https://geotracker.waterboards.ca.gov/view\_documents?global\_id=T0608100567&enforcement\_id=6037521&temptable=ENFORCEMENT  
**Title Description Comments:**

LOP email indicating it is not acceptable to submit an addendum to the 1/19/07 workplan three days before the 6 month work completion deadline expires. LOP indicated it will not be able to review the addendum before the planned drilling. LOP indicates it is registered professional's responsibility to ensure the work proposed satisfies the objectives of the previous workplan approved by our 6/26/07 letter and that any deviations are justified in the report.

| LOP comments on February 2006 assessment report, 3/28/2006 monitoring report, and 6/9/06 subsurface vapor sampling report. Required RP to correct denied GeoTracker files because of reusing previously designated field point names and to upload correct GeoBore files. Also required a letter: 1) explaining the GeoTracker corrections; 2) including the physical soil testing data that was not included in the February 2006 report; 3) explaining the Bench Mark used for surveying; and 4) including corrections to many figures in February 2006 report. LOP also required RP to upload a a corrected version of Table 1 for the 6/9/06 report and a workplan to assess the vertical extent and impact of hydrocarbons beneath the dispenser islands (as previously required) and the NAPL reported in the January 2006 borings. Also required RP to either include in the workplan a scope of work for subslab vapor sampling or upload a separate workplan to test and evaluate the feasibility of reasonable remediation options. |                   |                                                                                               |                  |                |      |    |

| LOP email responding to consultant's 7/27/06 email requesting approval to perform semi-annual groundwater monitoring. LOP approved semi-annual monitoring for U-7 through U-9 for 1Q07 and 3Q07, but kept U-6 on the annual frequency.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                   |                                                                                               |                  |                |      |    |

|---------|-------------------|-----------|------------------|----------------|------|----|

March. LOP agreed to extend the file reporting deadline from 3/29/06 to 5/29/06.

**Action Type:** Other Regulatory Actions  
**Action Date:** 12/19/2005  
**Received Issue Date:** 12/19/2005  
**Action:** Staff Letter - #20051219  
**Doc Link:**  
**Title Description Comments:**

LOP letter to consultant indicating new permits will be necessary to complete the work approved in 6/16/05 because the permits expired on 11/18/05. This was caused by some of the work being performed in August 2005, that they now intended on completing in January 2006.

**Action Type:** Enforcement/Orders  
**Action Date:** 12/6/2005  
**Received Issue Date:** 12/6/2005  
**Action:** Notice of Violation - #20051206  
**Doc Link:**  
**Title Description Comments:**

LOP issued NOV for RP's failure to complete corrective actions approved in LOP letter dated 6/16/05.

**Action Type:** Other Regulatory Actions  
**Action Date:** 12/6/2005  
**Received Issue Date:** 12/6/2005  
**Action:** Staff Letter - #20051206  
**Doc Link:**  
**Title Description Comments:**

LOP comments on 7/7/05 monitoring report, 7/28/05 revised subsurface vapor sampling workplan, 9/30/05 preliminary assessment report, and 9/19/05 Unocal letter. LOP conditionally approved revised vapor sampling workplan, though LOP still considered the workplan deficient in detail. LOP indicated the submission of reports on partial completion of required work do not satisfy regulatory completion dealines. Unocal's argument against angle drilling to assess beneath dispensers (9/19/05 letter) was not considered justified.

**Action Type:** Response Requested - Reports

| LOP comments on 2/25/05 and 3/28/05 letters (the 3/28/05 letter contained three work plans). LOP conditionally approved soil & groundwater investigative workplan, but did not consider the subsurface vapor sampling workplan adequate or the risk assessment workplan necessary at this time. Required RP to submit a revised vapor sampling workplan. Indicated surveyor's site plan still contained incorrect/incomplete information. |                   |                                       |                  |                |      |    |

| <b>Title Description Comments:</b> |                   | <p>LOP comments on 4/23/04 monitoring report, 9/24/04 subsurface vapor sampling report, 10/15/04 soil assessment report, and 11/23/04 receptor survey report. Required RP to: 1) hire a surveyor to prepare an accurate site plan; 2) submit a letter justifying the vapor sampling data and conclusions, and the NAPL saturation conclusion in soil; 3) submit a workplan to assess hydrocarbon extent, verify NAPL, and obtain soil physical testing data useful for remedial evaluation. LOP also required RP to evaluate the construction, use, and potential risk to the the two to three water supply wells identified within 1,000 feet of the site (was not done in receptor survey as required). LOP indicates it does not appear well U-6 has not been surveyed as required in LOP letter dated 11/13/03. Also indicated a current GeoMap and 2004 GeoWell data have not been uploaded.</p> |                  |                |      |    |

**Title Description Comments:**

LOP comments on revised June 2004 workplan for vapor sampling. LOP conditionally approved revised workplan. LOP indicated revised workplan did not include receptor survey or additional soil assessment as required in 11/13/03, 2/24/04, and 4/26/04; indicated an NOV will be issued if not received within 20 days.

**Title Description Comments:**

LOP email responding to consultant's email dated 5/13/04. LOP agrees to consider U-2 through U-5 properly destroyed if excavation surrounding two of these wells indicates the two wells were properly destroyed.

**Action Type:** Enforcement/Orders

**Action Date:** 4/26/2004

**Received Issue Date:** 4/26/2004

**Action:** Notice of Violation - #20040426

**Doc Link:**

**Title Description Comments:**

LOP issued NOV for RP's failure to submit addendum to 2/16/04 for subsurface vapor sampling, receptor survey, and additional soil sampling

**Action Type:** Other Regulatory Actions

**Action Date:** 4/26/2004

**Received Issue Date:** 4/26/2004

**Action:** Staff Letter - #20040426

**Doc Link:**

**Title Description Comments:**

LOP comments on 3/30/04 letter. LOP did not consider simple inclusion of DTSC vapor sampling advisory document as satisfying vapor sampling addendum requirements specified in LOP letter dated 2/24/04. LOP did not approve consultant's request to extend workplan addendum submittal deadline. Required the RP to remove the upper four feet of former wells U-2 through U-5 to verify proper destruction because RP was unable to provide any information on how these wells were destroyed.

**Action:** Soil and Water Investigation Workplan - Addendum

**Doc Link:**

**Title Description Comments:**

Addendum to 2/16/04 workplan for vapor sampling and receptor survey - LOP did not consider 3/30/04 addendum sufficient because it only included DTSC 2003 soil gas advisory and did not propose any of the required receptor survey work. Subsequently received three vapor sampling workplans in

**Title Description Comments:**

LOP comments on January 1998 UST/piping removal report and the 2/16/04 response and workplan. LOP conditionally approved soil investigation portion of the workplan, but not the vapor sampling portion. Also, workplan did not include the required receptor survey work. Required RP to submit an addendum with the drilling permit application that would propose additional soil assessment, and would detail the subsurface vapor sampling and receptor survey. Also required submittal of the report on the March 1992 installation of well UV-1 and for Mr. Al Zgoul to submit a letter indicating where soil excavated from waste oil UST cavity was disposed.
