

# CITY OF DALY CITY

## Regular Meeting - PLANNING COMMISSION

### AGENDA

Tuesday, February 7, 2023 - 7:00 PM

City Hall Council Chambers - 2nd Floor  
City Hall 333 - 90th Street  
Daly City, CA 94015

*To Watch the Live Telecast:*

<https://www.youtube.com/DalyCityVideoMeetings> or <https://www.dalycity.org/agendas>

### AGENDA

#### Public Participation:

There are three ways to submit public comments: (1) email your comment directly to the Planning Division; (2) submit written comments via the City's website, and (3) attend the meeting in person.

1. To email your comment, simply email a comment to the planner identified in the public hearing notice or send the email to [mvanlonkhuysen@dalycity.org](mailto:mvanlonkhuysen@dalycity.org). Public Comments may also be emailed to [cityclerk@dalycity.org](mailto:cityclerk@dalycity.org) by including "Planning Commission Public Comment" in the subject line.
2. To submit a comment via the City's website, please visit [www.dalycity.org/agendas](http://www.dalycity.org/agendas) and complete the Public Comment form. In the comment field box, include the item number and/or title of the item as well as your comments.
3. To speak at the meeting in person, please complete a Speaker Card located at the entrance to the Council Chambers and submit it to a staff member as early in the meeting as possible.

Please note: All written comments received by 4:00 pm on meeting day will be provided to the Planning Commission prior to the meeting. Comments are not read aloud into the record. Any written comments received after 4:00 p.m. on the meeting date are not guaranteed to be received by the Planning Commission prior to the meeting.

Persons with disabilities who require auxiliary aids or services in attending or participating in this meeting should call the office of the City Clerk at 991-8078 as soon as possible.

#### AVAILABILITY OF PUBLIC RECORDS:

*All public record to an open session item on this agenda, which are not exempt from disclosure pursuant to the California Public Records Act, that are distributed to a majority of the legislative body will be available for public inspection at the City Clerk's Office, City Hall located at 333 90<sup>th</sup> Street, Daly City, CA during normal business hours, at the same time that the public records are distributed or made available to the legislative body.*

OPENING OF MEETING:

PLEDGE TO THE FLAG:

ADMINISTRATION OF OATH OF OFFICE:

1. Oath of Office - Planning Commissioner Reigil Paniza

SELECTION OF CHAIR AND VICE CHAIR:

ROLL CALL:

APPROVAL OF MINUTES:

2. Approval of October 4, 2022 Planning Commission Minutes

PUBLIC HEARINGS:

3. **General Plan Amendment GPA-8-20-14643, Zone Change ZC-8-20-14633, Major Subdivision SUB-8-20-15634, Use Permit UPR-8-20-14642 and Design Review DR-8-20-14636** - 141 3rd Avenue - 14 three-story townhomes on a 0.71-acre site.

**STAFF:** Michael VanLonkhuysen VanLonkhuysen

**RECOMMENDATION:** Motion to approve

PUBLIC APPEARANCES, STAFF COMMUNICATIONS:

ACQUISITIONS, VACATIONS, ETC. - SECTION 65402(A)

ADJOURNMENT:

**CITY OF DALY CITY  
PLANNING COMMISSION  
MEETING  
(Virtual)  
Draft  
MINUTES**

**Tuesday, October 4, 2022 – 7:00 PM**

<http://bit.ly/dalycityoct4>

**OPENING OF MEETING:**

**PLEDGE TO THE FLAG:**

**ROLL CALL:**

**PRESENT:** R. Crump, G. Pacheco, T. Proaño, R. Satorre, V. Villanueva

**MINUTES:** Approval of Minutes of July 5, 2022

**PUBLIC HEARING:**

1. **Variance VARC-5-22-15962.** The applicant, Yan Ping Zhao, requests a parking variance to allow the operating of a day care center at 92 Hill Street. A variance is possible due to the proposed center's proximity to transit (Colma BART). The project is exempt from CEQA per CEQA Guidelines Section 15061(b)(3) – Review for Exemption. APN 006-354-050.

Staff report presented by: Brian Paland, Assistant Planner

On October 4, 2022, the Planning Commission voted 5-0 to recommend that the City Council approve Variance VARC-5-22-15962. The Planning Commission had no questions about the proposal.

Moved by Commissioner Crump seconded by Commissioner Pacheco to close the public hearing. Motion carried 5-0.

Moved by Commissioner Crump, seconded by Commissioner Pacheco to adopt the findings as outlined in the staff report of October 4, 2022. Motion carried 5-0. (Unanimous roll call vote).

Moved by Commissioner Crump, seconded by Commissioner Villanueva, to recommend approval of Variance VARC-5-22-15962 subject to the Findings and Conditions outlined in the staff report of October 4, 2022. Motion carried 5-0 (unanimous roll call vote).

2. **Variance VARC-5-22-15680** – The applicant requests a parking variance to allow the expansion of an existing restaurant at 6540 Mission Street. A variance is possible due to the proposed center’s proximity to transit (Daly City BART/SamTrans).

Staff report presented by: Brian Paland, Assistant Planner

On October 4, 2022, the Planning Commission voted 5-0 to recommend that the City Council approve Variance VARC-5-22-15962.

Moved by Commissioner Crump seconded by Commissioner Pacheco to close the public hearing. Motion carried 5-0.

Moved by Commissioner Crump, seconded by Commissioner Villanueva, to recommend approval of **Variance VARC-5-22-15680**. Motion carried by 5-0 (unanimous roll call vote).

3. **Zone Change ZC-09-21-015237** – The applicant requests to amend certain provisions of Planned Development Zone \$47 related to the parking plan for the center and mandated delivery times for Manila Market.

Staff report presented by Michael Van Lonkhuysen, Planning Manager

On October 4, 2022, the Planning Commission received the staff report and conducted a public hearing on a proposal by Tammy Ho to amend the text of Planned Development Zone 47 (PD-47) pertaining to King Plaza Shopping Center and approve a parking management plan and Declaration of Covenants, Conditions, and Restrictions (“CC and Rs”) for the center (see Attachment A – Planning Commission Staff Report). After receiving testimony from the applicant, legal counsel representing King Plaza Shopping Center, Classic Bowling Alley, and Manila Market, and approximately 25 members of the public, the Planning Commission voted 4-1 to table the proposed zoning amendment until the shopping center and bowling alley owners had resolved their legal dispute concerning this matter and a third-party parking consultant could complete a study.

Moved by Commissioner Crump, seconded by Commissioner Satorre to recommend that the City Council approve Zone Change ZC-09-21-01537 subject to the Findings and Conditions outlined in the staff report of October 4, 2022. Motion carried 4-0

**PUBLIC APPEARANCES, STAFF COMMUNICATIONS:**

**ACQUISITIONS, VACATIONS, ETC. - SECTION 65402(A):**

**ADJOURNMENT:** Moved by Commissioner Crump, seconded by Commissioner Proaño to adjourn the meeting at 10:32 p.m.

**For further information regarding the above projects or to obtain staff report for any of the above projects, please contact Carmelisa Morales at [cmorales@dalycity.org](mailto:cmorales@dalycity.org).** Persons with disabilities who require auxiliary aids or services in attending or participating in this meeting should notify the Office of the City Clerk at 991-8078 as early as possible.

**Availability of Public Records:** All public records relating to an open session item on this agenda, which are not exempt from disclosure pursuant to the California Public Records Act, that are distributed to a majority of the legislative body will be available for public inspection at the City Clerk's Office, City Hall located at 333 90<sup>th</sup> Street, Daly City, CA during normal business hours, at the same time that the public records are distributed or made available to the legislative body.

# Daly City Planning Commission Agenda Report

333 - 90th Street ♦ Daly City ♦ California ♦ 94015 ♦ 650-991-8033

Meeting Date: February 7, 2023

Application: General Plan Amendment GPA-8-20-14643, Zone Change ZC-8-20-14633, Major Subdivision SUB-8-20-15634, Use Permit UPR-8-20-14642, and Design Review DR-8-20-14636

Project Planner: Michael Van Lonkhuysen, Planning Manager

Project Location: 141 3rd Avenue (APNs 006-254-020 and -030)

Project Description: 14 three-story townhomes on a 0.71-acre site

Applicant/Property Owner: Clarum Homes  
412 Olive Avenue  
Palo Alto, CA 94306

Environmental Assessment: Mitigated Negative Declaration

Applicable Daly City Municipal Code Sections: Title 16 – Subdivisions  
Chapter 17.12 – R-3 Multiple Family Residential District  
Chapter 17.37 – Condominiums and Condominium Conversions  
Chapter 17.44 – Use Permits  
Chapter 17.45 – Design Review  
Chapter 17.47 – Affordable Housing

## Site Information

| Property Sizes | Existing Use                                 | Proposed Use    | General Plan Designation         | Current Zoning        |
|----------------|----------------------------------------------|-----------------|----------------------------------|-----------------------|
| 0.71-acres     | Vacant with small detached home (unoccupied) | Townhouses (14) | Residential – Low Density (R-LD) | Interim District (ID) |

## Area Information

| Land Use                            | Zoning                        |
|-------------------------------------|-------------------------------|
| North: Single Family Detached Homes | R-1 Single-Family Residential |
| South: Single Family Detached Homes | R-1 Single-Family Residential |
| West: Single Family Detached Homes  | R-1 Single-Family Residential |
| East: Single Family Detached Homes  | R-1 Single-Family Residential |

## Background

The applicant, Clarum Homes, proposes to amend the Daly City General Plan and rezone a 0.71-acre site located at 141 3rd Avenue for the purpose of constructing 14 three-story townhomes (see Attachment A – Location Map). The project site, which is largely vacant aside from an unoccupied home on the northwest corner of property, is presently designated Residential – Low Density (R-LD) in the General Plan and is zoned I-D Interim District.

The project as proposed requires the following entitlements:

1. Certification of a Mitigated Negative Declaration;
2. Amendment of the General Plan land use designation for the property to Residential – Medium Density (R-MD);
3. Rezoning of the property to R-3 - Multiple-Family Residential District;
4. Approval of a use permit to allow an airspace subdivision, i.e., condominiums, as required by the Zoning Ordinance;
5. Approval of the Tentative Subdivision Map (Major Subdivision) creating 14 airspace condominium unit and common areas, including driveway and stormwater treatment measures; and
6. Approval of the townhouse architectural design (Design Review).

## Discussion

Each of the 14 proposed townhomes would be approximately 2,055 square feet and would include a two-car tandem garage. Each unit would also include a minimum of 150 square feet of open space. Units directly adjacent to 3rd Avenue would include private front and rear yards, while units set back from 3rd Avenue would only have private rear yards. Each unit would also include a second-story covered patio. All units would contain three bedrooms. The townhomes would have a minimum setback of 15-feet from the property line on 3rd Avenue and a minimum setback of ten-feet from the eastern property line. The townhomes along the 3rd Avenue frontage would have a 4.5-foot setback from the north property line and an approximately eight-foot setback from the south property line. The rear townhomes would have a three-foot setback from both the north and south property lines. The townhomes would reach a maximum height of 35 feet above ground level.

The project would include green building measures to reduce energy use and project-generated greenhouse gas emissions. The green building measures proposed by the project include rooftop solar panels, all-electric buildings, water-efficient landscaping, and EV-ready electrical within each garage.

As required by the R-3 Multiple Family Residential District, the project provides a minimum of 150 square feet of private open space for each townhome in the rear yard of each unit. Because normally private open space is fully improved as a project amenity area, staff has proposed a Conditions of Approval that the developer shall fully develop these private open space areas with patio and groundcover acceptable to the City.

### Site Access and Parking

The project would include one, 26-foot-wide driveway along 3rd Avenue, that is proposed to be access-controlled by the electronic gate. The project driveway would lead to a 120-foot internal access road perpendicular to the driveway. Each townhome would include a private driveway extending from the internal access road. Townhome driveways would range from approximately five to 13 feet long. Parking would be provided for each unit by a two-car tandem garage in each townhome, as required by the Zoning Ordinance. Each unit would include at least one electric vehicle (EV) ready space. Additionally, there are seven existing street parking spaces in front of the project site along 3rd Avenue.

Pedestrian access would be provided to the front townhomes via private, gated walkways extending from the 3rd Avenue sidewalk. A five-foot wide, gated sidewalk would run adjacent to the project driveway and provide pedestrian access to the remainder of the townhomes. Although the project proposes an access-controlled electronic vehicular gate, staff has mandated that the gate include an independently controlled pedestrian access for this gate. Staff also is proposing that the applicant install three pedestrian-scale light fixture adjacent to the court to facilitate nighttime pedestrian access of the court.

### Design Review

Axonometric drawings submitted by the project sponsor show the building's architecture, which reflects modern architecture including glass and concrete walls with clean, vertical and horizontal lines. The architectural features are mostly functional where decoration is achieved only through the blend of façade materials of different colors and textures. While staff is overall satisfied with the proposed building design, staff has recommended a Condition of Approval that all buildings within the project incorporate an aluminum window system and an enhanced garage door design.

### Landscaping

The project would include landscaping throughout the project site. Landscaping would include streetscape planting with bioretention areas and street trees along 3rd Avenue, low hedges and accent shrubs/trees between the townhomes, vines along either side of the driveway, a screen planting along the northern end of the internal access road, and a bioretention planting along the southern end of the internal access road. Streetscape fencing and internal neighbor fences would also be included. Staff has proposed a Condition of Approval requiring high quality fencing, possibly made from material other than wood, that is of a design and color that integrates architecturally to the townhouses.

### General Plan and Zoning Consistency

The project site has a General Plan land use designation of Residential (R-LD) and is zoned I-D Interim District. To develop the proposed project on the 0.71-acre site, the applicant proposes to amend the General Plan land use designation to Residential – Medium Density (R-MD) and rezone the site to R-3 Multiple-Family Residential.

Under the proposed Residential – Medium Density land use designation, the number of required units on the site would be between 20.1 and 35 units per acre, or between 14 and 25 units. Although the proposal for 14 townhomes is at the lower end of this range, staff feels that the proposed project integrates well into an existing neighborhood of detached single-family homes of a slightly less density (approximately 17.5 units to the acre). Furthermore, the entire block situated to the west of the project site is designated both Residential – Medium Density and Residential – High Density.

The proposed R-3 Multiple-Family Residential zoning generally corresponds to the proposed Residential – Medium Density land use designation. The project conforms to all of the zoning regulations identified by the Zoning Ordinance for this district, including setbacks, lot coverage, and building height. For the purpose of the Zoning Ordinance, the townhomes proposed are regulated as “Multiple-Dwelling Residential, including condominiums” for parking and are required to provide two parking spaces each. The project conforms to this requirement with the two-car tandem garage provided at the first floor of each unit.

Although the three-story townhomes proposed in the project would be surrounded by primarily two-story detached homes, the surrounding R-1 Single-Family Residential zone allows all homes in this district to be three stories in height, to a maximum of 30 feet in height. The R-3 Multiple-Family Residential zoning proposed for the subject site would allow a maximum height only six feet taller. The proposed maximum height of the townhomes is 35 feet. Similarly, with regard to maximum lot coverage, the adjacent R-1 Single-Family Residential zone allows 55 percent lot coverage, where the project proposed only a 37 percent coverage factor.

### Affordable Housing Plan

The City’s Affordable Housing Ordinance requires that developers of for-sale development projects that are less than 20 units pay the required in lieu fees established in the City’s Affordable Housing Fee Schedule, which is currently \$45 per habitable square foot of every unit constricted. This requirement has been added as a Condition of Approval.

### Subdivision Requirements

Pursuant to Section 66474 of the Subdivision Map Act, a legislative body of a city or county may approve a subdivision map if it makes the following findings:

1. The proposed subdivision and/or design or improvement must be consistent with applicable general and specific plans.
  - Under the proposed Residential – Medium Density land use designation, the number of required units on the site would be between 20.1 and 35 units per acre, or between 14 and 25 units. 14 units are proposed.

2. The site must be physically suitable for the type and density of the proposed subdivision.
  - The subject site is situated on Third Avenue, between East Market Street and Castle Street. This area is characterized by a mixture of single-family residences and apartments near the project vicinity. Given the size and shape of the subject property, together with adjacent land uses, a medium density development consisting of 14 townhouse units is the highest and best use of the subject property.
3. The design of the proposed subdivision or improvements must not cause substantial environmental damage or injure fish or wildlife or their habitat.
  - Staff has determined that the proposed subdivision will not cause significant environmental damage or injure fish, wildlife, or their habitat. The proposed project would be constructed in a fully urbanized area. An Initial Study completed for the project and has determined that, pursuant to the requirements of the California Environmental Quality Act (CEQA), any environmental impacts associated with the project could be mitigated to a level of insignificance.
4. The design of the proposed subdivision must not cause serious public health problems.
  - The proposed project consists of 14 townhouses, all of which will be subject to Building Code requirements that set forth minimum safety standards for new construction. Other City and State regulations will assure that public health is not at risk.
5. The design of the proposed subdivision or improvements must not conflict with any easements, acquired by the public at large, for access through or use of, property within the proposed subdivision.
  - Access to the proposed new lots and utilities for the lots would be available from existing adjacent roads. No structures of any kind will be built over the property lines. Where necessary, permits for utility connections for the newly created lots would be obtained from the City of Daly City.

### Utility Providers

The subject property is located within a fully urbanized area with all public services capable of serving the proposed building. Any upgrades in the system deemed necessary will be the applicant's responsibility. This requirement has been included as Conditions of Approval for this project.

| Utility                              | Provider                               |
|--------------------------------------|----------------------------------------|
| Water, Sanitary Sewers, Storm Drains | City of Daly City                      |
| Gas & Electric                       | PG&E                                   |
| Telephone                            | AT&T                                   |
| Cable Television                     | Astound!                               |
| Fire/Police Protection               | North County Fire Protection Authority |

### Airport Influence Area

The project site is located within the Airport Influence Area (AIA) of the San Francisco International Airport (SFO). Properties within the AIA may be subject to some of the annoyances or inconveniences associated with proximity to airport operations (e.g., noise, vibration, and odors). The airport/land use compatibility of a proposed development or land use policy action is determined by comparing the proposed development or land use policy action with the safety compatibility criteria, noise compatibility criteria, and airspace protection/height limitation criteria in the Airport Land Use Compatibility Plan (ALUCP). Any proposed land use policy actions, including the proposed General Plan amendment/rezoning, that affect properties within the ALUCP Airport Influence Area B boundary in Daly City (such as the project site), must be referred to the C/CAG Board for an ALUCP consistency review and determination.

On December 8, 2022, the Board considered the ALUC recommendation and evaluated the consistency of the project with the relevant airport/land use compatibility policies and criteria contained in the adopted ALUCP. The C/CAG Board determined the proposed General Plan amendment and rezoning, and related project entitlements were consistent with relevant ALUCP policies with a required Condition of Approval related to real estate disclosure requirements regarding the site's location within the AIA which has been added to this project.

### Environmental Assessment

David J. Powers and Associates, under contract with the Planning Division, has completed an Initial Study for the project and has determined that, pursuant to the requirements of the California Environmental Quality Act (CEQA), a Mitigated Negative Declaration is the appropriate level environmental review (see Attachment C – Initial Study/Mitigated Negative Declaration). The public review period is from January 25, 2023, to February 10, 2023. The Initial Study found minimal environment impacts associated with the project, including mitigable air quality, biological, and hazards and hazardous materials impacts (see Attachment D – Mitigation Monitoring and Reporting Program).

### Findings

Staff recommends that the Planning Commission find that the proposed General Plan Amendment GPA-8-20-14643, Zone Change ZC-8-20-14633, Major Subdivision SUB-8-20-15634, Use Permit UPR-8-20-14642, and Design Review DR-8-20-14636 are in accordance with Chapter 17 (*Zoning*) of the Daly City Municipal Code. Staff has determined that approval of the proposed project will not be detrimental to the health, safety, morals, comfort, and general welfare of persons residing or working in the vicinity. Staff has furthermore determined that the proposed project would not be injurious or detrimental to property and improvements in the neighborhood or result in substantial environmental damage or disturbance, given the mitigation measures outlined in the Mitigation Monitoring and Reporting Program. Staff recommends that the Planning Commission adopt the following findings:

1. In accordance with Title 17 of the Daly City Municipal Code, as well as applicable State zoning enabling legislation, the Planning Commission conducted a public hearing on

- February 7, 2023. Legal public notice of said hearing was provided by newspaper publication on January 26, 2023, posting and via first class mailing to property owners within 300 feet of the site;
2. Under the proposed Residential – Medium Density land use designation, the number of required units on the site would be between 20.1 and 35 units per acre, or between 14 and 25 units. Although the proposal for 14 townhomes is at the lower end of this range, the Planning Commission finds that the proposed project integrates well into an existing neighborhood of detached single-family homes of a slightly less density (approximately 17.5 units to the acre).
  3. The Planning Commission finds that the project conforms to all of the zoning regulations identified by the Zoning Ordinance for the R-3 Multiple-Family Residential District, including setbacks, lot coverage, and building height.
  4. Although the three-story townhomes proposed in the project would be surrounded by primarily two-story detached homes, the surrounding R-1 Single-Family Residential zone allows all homes in this district to be three stories in height, to a maximum of 30 feet in height. The R-3 Multiple-Family Residential zoning proposed for the subject site would allow a maximum height only six feet taller. The proposed maximum height of the townhomes is 35 feet. Similarly, with regard to maximum lot coverage, the adjacent R-1 Single-Family Residential zone allows 55 percent lot coverage, where the project proposed only a 37 percent coverage factor.
  5. The Planning Commission further finds that it is in the public interest to allow the construction of rental housing and that the construction of such housing provides a critical need in the community.
  6. The proposed project has been reviewed by various City departments, including the Fire Department, the Building Division, the Engineering Division, and the Department of Water and Wastewater Resources. Each of these agencies, comprised of persons qualified to render professional opinions concerning the project, have confirmed that the proposed project poses no threat to the public health, safety, and welfare. There furthermore exists no evidence in the public record to demonstrate that the project would be detrimental to the public health, safety, and general welfare.
  7. The proposed subdivision and/or design or improvement are consistent with applicable general and specific plans because, under the proposed Residential – Medium Density land use designation, the number of required units on the site would be between 20.1 and 35 units per acre, or between 14 and 25 units. 14 units are proposed.
  8. The site is physically suitable for the type and density of the proposed subdivision. The subject site is situated on Third Avenue, between East Market Street and Castle Street. This area is characterized by a mixture of single-family residences and apartments near the project vicinity. Given the size and shape of the subject property, together with adjacent land uses, a

medium density development consisting of 14 townhouse units is the highest and best use of the subject property.

9. The design of the proposed subdivision or improvements will not cause substantial environmental damage or injure fish or wildlife or their habitat. Staff has determined that the proposed subdivision will not cause significant environmental damage or injure fish, wildlife, or their habitat. The proposed project would be constructed in a fully urbanized area. An Initial Study completed for the project and has determined that, pursuant to the requirements of the California Environmental Quality Act (CEQA), an environmental impacts associated with the project could be mitigated to a level insignificance.
10. The design of the proposed subdivision will not cause serious public health problems. The proposed project consists of 14 townhouses, all of which will be subject to Building Code requirements that set forth minimum safety standards for new construction. Other City and State regulations will assure that public health is not at risk.
11. The design of the proposed subdivision or improvements will not conflict with any easements, acquired by the public at large, for access through or use of, property within the proposed subdivision. Access to the proposed new lots and utilities for the lots would be available from existing adjacent roads. No structures of any kind will be built over the property lines. Where necessary, permits for utility connections for the newly created lots would be obtained from the City of Daly City.
12. General landscape considerations of Chapter 17.41, Landscaping, have been provided to insure visual relief, to complement buildings and structures and to provide an attractive environment for the enjoyment of the public.
13. General architectural considerations have been incorporated in order to ensure the compatibility of this development with its design concept and the character of other adjacent buildings. These considerations include, but are not limited to, the character, scale and quality of the design, the architectural relationship with the site and other buildings, building materials, and colors.
14. The Planning Commission has reviewed the proposal under the requirements of the California Environmental Quality Act (CEQA) and, based on the Initial Study prepared by a qualified professional consultant, has determined that there is no substantial evidence, in light of the whole record, that the project may have a significant impact, given the mitigation measures outlined in the Mitigation Monitoring and Reporting Program prepared for the project. Therefore, a Mitigated Negative Declaration is appropriate for the project in accordance with the California Environmental Quality Act.
15. The project will minimize the risk to existing public improvements and adjacent private property by providing controlled stormwater runoff from the site to City facilities in full compliance with Order R-2 NPDES Permit No. CAS612008 and Order No. 2010-0014-DWQ, NPDES No. CAS000002, the statewide National Pollutant Discharge Elimination System (NPDES) General Construction Activity Storm Water Permit.

### Conditions of Approval

Staff recommends approval General Plan Amendment GPA-8-20-14643, Zone Change ZC-8-20-14633, Major Subdivision SUB-8-20-15634, Use Permit UPR-8-20-14642, and Design Review DR-8-20-14636 based on the following conditions as specified by each Department and Division. These conditions shall be complied with prior to, or as part of, any building permit for the proposed improvements and on-going operations.

#### **A. PLANNING DIVISION**

1. The project shall be valid only in conjunction with the detailed plans submitted with this project. Any modifications required, due to the Conditions of Approval, and minor changes to the plan, must be reviewed and approved by the Planning Division prior to the change. Major site or architectural modifications shall be treated as an amendment and shall be subject to review by the Planning Commission and City Council.
2. The tentative subdivision map approval granted herein shall be valid for a period of two years. If a final map has not been approved within this timeframe, the applicant shall apply for a time extension.
3. The use permit and design review approval granted herein shall be valid for a period of two years. If building permits have not been issued within this timeframe, the applicant shall apply for a time extension.
4. The applicant shall comply with the requirements of the Mitigation Monitoring and Reporting Program adopted by the City Council.
5. Prior to the issuance of a building permit, the applicant shall pay all fees required by the Affordable Housing Ordinance.
6. The applicant shall pay park-in-lieu fees, in compliance with DCMC Chapter 16.30 Parkland Dedications. In-lieu fees are required to be paid prior to approval of the Final Map.
7. The applicant and property owner shall comply with the real estate disclosure requirements outlined in Policy IP-1 of the Comprehensive Airport Land Use Compatibility Plan for the Environs of San Francisco International Airport (SFO ALUCP).

### Site Design

8. The applicant shall install decorative pavers at the project entry from the back of sidewalk to the private control gate. The design of the pavers shall be approved by the Planning Division. The paver location and design shall be supplied at the of building permit submittal.

9. The developer shall fully develop these private open space areas with patio and groundcover acceptable to the City. The design of these areas shall appear in construction drawings submitted to the Building Division and shall be installed to the satisfaction of the Planning Division prior to final occupancy.
10. The applicant shall submit detail drawings and manufacturer's specification sheets for the proposed vehicular and pedestrian gates at building permit submittal. Review and approval of the gate designs by the Planning Division is required prior to building permit issuance.
11. The applicant shall install three pedestrian-scale light fixture adjacent to the court and at the access to facilitate nighttime pedestrian use. The lighting location and design shall be supplied at the of building permit submittal.
12. The applicant shall construct an all-weather cover above the gang mailboxes with down lighting. The design of the cover shall be approved by the Planning Division. The cover location and design shall be supplied at the of building permit submittal.
13. The applicant shall install high quality fencing, possibly made from material other than wood, that is of a design and color that integrates architecturally to the townhouses. The fencing location and design shall be supplied at the of building permit submittal.
14. Backflow preventers, check devices, and other visible mechanical equipment shall be painted black, dark green, red (if required by the Fire Department), or other color complementary to the building design.
15. Backflow preventers shall be concealed and/or screened from public view to the satisfaction of the Daly City Community and Economic Development Director prior to issuance of building permit.

#### Building Design

16. All buildings within the project shall incorporate an aluminum window system. Vinyl windows in the residential portion of the project shall not be permitted unless such windows incorporate an aesthetic quality comparable to aluminum windows.
17. The applicant shall install enhanced garage doors that reflect the contemporary architectural style of the townhouses. The exact specification of the doors shall be identified in the building permit submittal for the project.
18. All stucco applications to the building shall be medium dash stucco finish and this requirement shall be detailed on all construction drawings submitted to the Building Division for review.

### Landscaping

19. Prior to the issuance of building permits, a detailed landscape and irrigation plan shall be submitted for review by the Planning Division, which shall comply with DCMC Chapter 17.41 (*Water Conservation in Landscaping*). New landscaping required for the project shall incorporate Bay Area Friendly species that are drought tolerant and the irrigation systems shall incorporate water efficiency measures. Alternative plant and tree species may be approved by the Planning Division if it can be shown they would be more appropriate for the site.
20. All landscaping shall be installed, inspected and approved prior to the issuance of occupancy permits.
21. All trees adjacent to the City sidewalk shall be box-specimen and shall provide a root-barrier acceptable to the City.
22. The landscape plan shall identify an excavation plan for all screen-trees which provide a sufficient trench allowing for root expansion, as determined by the City. Tree trenches shall be inspected by the City for size prior to tree installation.
23. The applicant shall provide long-term irrigation to all trees, shrubs, and groundcover.
24. The applicant shall triple-stake all trees and this staking shall be subject to initial inspection by the City. Trees shall remain triple-stake through the establishment period and tree staking shall be subject to the annual inspection identified above.

### Homeowners Association

25. The applicant shall establish a Homeowners' Association (HOA) for the purpose of landscape maintenance within any easement areas created, any retaining walls required to be built as part of new development, permanently installed stormwater treatment systems, and any infrastructure related to the respective systems. The HOA membership shall consist of all residential lot owners. The HOA shall be professionally managed and the HOA bylaws and initial annual operating budget shall be reviewed and approved by the Planning Division/City Attorney's Office prior to submittal to the California Department of Real Estate.
26. Prior to the recordation of a Final Map, the developer shall submit a maintenance plan, which clearly specifies methods and standards for performance of common responsibilities and maintenance for all common areas and equipment and fees to be assessed for such purposes. The maintenance plan shall include a budget acceptable to the City for major repairs and extraordinary expenses, and shall be incorporated into HOA bylaws.
27. The developer shall submit to the City Attorney, for review and approval, a copy of the covenants, conditions, and restrictions (CC&Rs) that will apply to the development prior to recordation of the Final Map.

28. The HOA shall enter into a Maintenance Agreement with the City of Daly City to ensure long-term maintenance and servicing by the Property Owner of stormwater site design and treatment control measures according the approved Maintenance Plan.

#### Stormwater Treatment

29. The applicant shall develop and submit a stormwater management plan that illustrates full compliance with Section C.3 of Order R-2-2009-0074 NPDES Permit No. CAS612008. The project must comply with Order No. 2010-0014-DWQ, NPDES No. CAS000002, the statewide National Pollutant Discharge Elimination System (NPDES) General Construction Activity Storm Water Permit.
30. The applicant shall receive approval of the stormwater management plan from a third-party reviewer appointed by the City prior to building permit submittal. The applicant shall pay the entire cost of the third-party reviewer.
31. All stormwater treatment facilities shall be inspected during construction to ensure eventual compliance with the stormwater management plan. The applicant shall pay the entire cost of these inspections.
32. The applicant shall enter into a Operation and Maintenance Agreement with the City to ensure long-term maintenance and servicing by the Property Owner of stormwater site design and treatment control measures according the approved Operation and Maintenance Plan.
33. The applicant shall arrange and pay for final inspection of installed treatment measure by the City's Special Inspector within 45 days of installation or project construction completion, whichever comes first.

### **B. PUBLIC WORKS DEPARTMENT**

#### General

34. The applicant shall comply with the applicable requirements of the City of Daly City General Conditions of Approval: Use Permits, Variances, Design Reviews, Planned Developments, and Subdivisions, in effect at the time of subdivision and design review application submittal, final map submittal and/or at the time of building permit application.
35. Plans submitted for building or grading permit shall show all existing and proposed utilities, on-site and in the street, including water, sanitary sewer, and storm drain mains.
36. The applicant shall comply with the applicable requirements of the City of Daly City Standard Details and Specifications.
37. Applicant and/or contractor shall provide at least one large project sign that includes basic project information and a phone number where members of the public may report concerns

such as off-site tracking, dust control, noise complaints, ground shaking and any related construction activities and obtain information or assistance as needed. The complaints and responses shall be logged, and copies provided to the City Engineer with action status on a weekly basis.

38. A Final Map shall be prepared for the merging of the existing lots and creation of the proposed airspace parcels.
39. Prior to Final Map approval, the applicant shall enter into a Landscape Maintenance Agreement in a form acceptable to the City Attorney to ensure the Property Owner will provide long-term maintenance of all street trees, landscaping, irrigation, and pedestrian-scale lighting installed in the public right-of-way. Design of planting and irrigation system shall minimize the extent of irrigation lines, controllers, and valves in the public right-of-way and shall be reviewed and approved by the City Engineer.
40. No permanent building encroachment including but not limited to: awnings, canopies, marquees, signs, windows, balconies, architectural features and mechanical equipment shall be allowed in the Right-of-Way without the written authorization of the City Engineer.
41. Prior to requesting approval for the Final Map, all improvements, including on- and off-site improvements, and all public service and utility facilities required to serve the development, shall be completed by the applicant, or the applicant shall enter into a Subdivision Improvement Agreement with the City to complete the improvements within the time limit specified by the City.
42. All subdivision Conditions of Approval and subdivision improvements shall be satisfied and constructed to the satisfaction of the City Engineer or bonded for prior to approval of the Final Map.
43. Prior to issuance of first permit (Grading, Site Improvement, and Building, etc.), existing structures on the property shall be demolished, and all existing utility service connections shall be abandoned per City standards.
44. The applicant shall provide “will serve letters” from all applicable utility agencies.
45. Concurrent with each demolition, grading and drainage permit submittal or as a part of the Improvement Plan package, the Applicant shall prepare a dust control plan. The plan shall conform to the City Standards and comply with the requirements of the Bay Area Air Quality Management District (BAAQMD) Best Management Practices (BMP) for dust control. The Applicant shall post a publicly visible sign with the telephone number and person to contact regarding dust complaints. The person shall respond and take corrective action within 48 hours when notified of dust complaints.
46. Securities for all public improvements, including off-site improvements, and all private facilities serving the development, shall be filed with the Final Map for approval.

47. All improvements shall be completed and functioning, and as-built record plans of all improvements submitted in a form acceptable to the City before any occupancy permit is issued or public service improvements are accepted by the City for maintenance.
48. All improvements, including on-site and off-site improvements, and all public service and utility facilities required to serve the project, shall be completed by the applicant prior to issuance of a Building Permit. The improvements shall be consistent with the plans approved by the City Engineer and the Conditions of Approval. All construction shall meet the latest California Building Code, California Fire Code, Daly City Municipal Code and the City Standard Specifications and Drawings. Securities for all required improvements, and applicable fees and charges, shall be submitted to the City for approval. The applicant shall obtain all required permits before commencing work. All required improvements shall be constructed at no cost to the City except where specifically agreed to by the City under the provisions of a written agreement.
49. Grading and improvement plan review and approval by the City Engineer are required before any City Permit is issued. The improvement plans shall include details for on-site and off-site improvements for vehicular and pedestrian access, parking, traffic signs and markings, utility service connections, modifications and extension of the City's sewer, water, storm drain, safety lighting, landscaping, and other public service facilities. All utility services shall be underground. Said improvements shall conform to Daly City and affected Agency's standards. Plans shall be accompanied by all required calculations and studies including geotechnical and impact studies to justify design. Submit photo-mylar reproducible (24"x36"), electronic files (to City AutoCAD Standards) and blueprints as required for City's inspection and filing before permits are issued for construction of improvements. All required improvements shall be constructed at no cost to the City except where specifically agreed to by the City under the provisions of a written agreement.
50. The project Covenants, Conditions, and Restrictions ("CC&Rs") shall be reviewed and approved by the City Engineer prior to recordation of the Final Map.

#### Site

51. The applicant shall replace curb, gutter, curb ramp, and sidewalk over the entire frontage of the development to the nearest expansion joints or score lines. Sidewalk width shall be 5' minimum measured from the back of curb to the back of sidewalk (5.5' including the curb). All curb, gutter, and sidewalk improvements in the public right-of-way shall be designed to meet current ADA standards and Daly City Standards at no cost to the City.
52. Republic Services shall review and approve the anticipated solid waste collection plan. Will serve letter from Republic Services required.
53. All project improvements shall be ADA compliant. This includes the sidewalk and driveways within private property.

54. The segment of Third Avenue between Castle St. and E. Market St. has an existing Pavement Condition Index of 75. Due to the multiple utility street trench cuts it will be necessary to provide a Type II slurry seal across the development frontage. The slurry seal shall be for the entire street width.
55. All proposed landscaping and street trees shall be maintained by the property owner in perpetuity. Irrigation shall be tied to and maintained by the property owner.
56. All retaining walls shall be maintained by the HOA with appropriate easements reserved for such maintenance. Retaining walls shall not be constructed within public right of way or public easements. Maintenance responsibilities shall be addressed in the CC&Rs for the property.
57. The pervious pavement on the private road shall be maintained by the HOA with appropriate easements reserved for such maintenance. Maintenance responsibilities shall be addressed in the CC&Rs for the property.

#### Grading

58. Grading exceeding 50 cubic yards shall require approval of plans and a grading permit. A licensed Civil Engineer shall prepare the grading plans and erosion control plan in conformance with a soil report prepared by a licensed soil engineer or qualified civil engineer in compliance with the NPDES requirements prior to any development on the property.
59. Provide erosion and storm water pollution plan incorporating best management practices, including operation and maintenance provisions per the requirements applicable at the time of construction permit application. During the wet/rainy season (October 1 to April 30) the developer shall submit a revised erosion control plan as necessary (every five working days) or as required by the City Engineer and/or his representative.
60. The applicant shall provide fail-safe conditions for catastrophic events such as 100-year storms, seismic events, system overflows or failures. Drainage swales shall be provided at the top, intermediate and bottom of slopes and embankments to prevent erosion and degradation of slopes. The project geotechnical report shall include appropriate recommendations regarding the protection of existing and proposed slopes.
61. The Engineer or Geologist, of record, shall be present on-site during the excavation and grading phases of the project and shall submit a written certification that the project grading plans has been implemented as approved.

#### Stormwater

62. Runoff calculations along with a letter from the engineer of record shall be provided verifying that post development stormwater runoff from the site does not exceed the pre-development stormwater runoff. Additional stormwater runoff generated as a result of this

development shall be retained on-site. The stormwater retention shall be designed for at least a 10-year storm frequency, with a duration of two hours.

63. Include the calculations and stormwater retention plans on the site plan.
64. The 141 3rd Avenue Tentative Map does not provide the City's required stormwater retention for the project. Revised stormwater retention systems shall be provided for the City's review and approval as part of the project's Site Improvement Plans.
65. Measures to control stormwater runoff are not provided in the Tentative Map. Measures shall be provided to ensure stormwater runoff shall not exceed pre-development flow rates.
66. All stormwater retention, treatment system or other C.3 or LID improvements shall be located outside of the public right-of-way and maintained by the Homeowners Association (HOA). There shall be no private improvements within the public right-of-way. Stormwater compliance and detention facilities shall include provisions for full trash capture in the catch basins. A Storm Water Treatment Measures Maintenance Agreement will be required and must be included in the CC&R's.
67. Storm drain laterals and mains shall be CCTV'ed at the end of construction. Owner is responsible for providing videos of laterals/mains prior to the City Engineer's permit signoff/acceptance. If cleanouts are utilized instead of manholes or drainage inlets, it is up to the owner to make required changes to provide camera access if access is not available via cleanouts.
68. Full trash capture devices approved by the City Engineer shall be installed on the drainage system.
69. The applicant shall submit stormwater pollution prevention plans at the time of each building permit submittal.

#### Utilities

70. Following new utility installation, the applicant shall replace areas of street pavement, sidewalk, curb and gutter damaged by construction. Such repair shall be per City standard specifications.
71. All new electrical and telecommunications services shall be provided through underground connections. There shall be no overhead drops.
72. The project's electrical transformer shall not be installed within the public right-of-way. The transformer, including the door swing of the panel doors, shall be within private property.
73. The applicant shall underground all electrical and telecommunications services, including adjacent property services as may be necessary to ensure that existing overhead drop services do not traverse the newly proposed development. The applicant shall provide

verification, in writing, that all existing overhead utilities relocation have been reviewed and approved by each utility company. All existing facilities and supporting poles shall be removed at the applicant's expense.

74. Disconnect all sewer laterals and water services at the main in the street prior to installation of new services. Inspections shall be required by the Department of Water and Wastewater Resources.

#### Permits Required

75. Encroachment permits and/or a site improvement permit shall be required to be issued by the Public Works Department for all work proposed within the public right-of-way.

#### **C. FIRE DEPARTMENT**

76. Daly City Municipal Code 15.32.080 requires an additional fire hydrant on the premises in a location approved by NCFA.
77. No Parking Signs and red curbs shall be extended to include the entire west curb where the roadway narrows from 26 feet.
78. The entrance gate shall be equipped with a Knox Box key as approved by NCFA.
79. The entrance gate design shall conform to CFC Appendix D. No curbs or operating devices may obstruct the turning radius and access roadway. The design shall be approved by NCFA.
80. A fire sprinkler system is required. The applicant shall submit plans to NCFA under separate fire permit.
81. The applicant shall provide fire flow information per CFC, Appendix B.
82. A key box is required. The applicant shall apply for approved hardware at NCFA Administration.
83. Portable fire extinguishers(s) are required. The applicant shall mount fire extinguishers 3-5 feet above floor.
84. Illuminated address identification is required.
85. Utility identification is required.

## **D. DEPARTMENT OF WATER AND WASTEWATER RESOURCES**

### Water

86. All costs associated with any water system improvements required by the City, shall be borne by the applicant.
87. The water system within the private property shall be private. The project will be supplied via a city master meter and a private RP type back flow device.
88. The existing irrigation well shall be abandoned, with county permit sign off, prior to the commencement of any onsite or offsite earthwork.
89. The offsite and onsite water system shall be installed in its entirety and approved, and an all-weather road system shall be in place, prior to any combustibles being brought on site.

### Sewer

90. All costs associated with any sewer system improvements required by the City, shall be borne by the applicant.
91. The sewer system, until connection to the district main, shall be private.
92. Each home shall have a check valve and clean out that is to be located 18 to 24 inches outside of the building foundation per detail SS-10
93. The inlet to the manhole connecting the private sewer system to the district's collection system shall be plugged until approval from the district manager.

### Storm

94. The stormwater treatment and collection areas shall not be constructed over or fenced off by the future property owners. The treatment areas shall be free to inspect, without physical restriction, at any time.

## **STAFF RECOMMENDATION**

Staff recommends that the Planning Commission take the following actions:

1. Adopt the Findings as outlined herein;
2. Recommend that the City Council adopt the Mitigated Negative Declaration and Mitigation Monitoring and Reporting Program prepared for the project; and

3. Recommend that the City Council approve General Plan Amendment GPA-8-20-14643, Zone Change ZC-8-20-14633, Major Subdivision SUB-8-20-15634, Use Permit UPR-8-20-14642, and Design Review DR-8-20-14636, subject to the Conditions of Approval identified herein.

Staff is available to provide any additional information desired by the Planning Commissioners.

Respectfully submitted,

Michael Van Lonkhuysen  
Planning Manager

Tatum Mothershead  
Director of Economic and Community  
Development

| GENERAL NOTES                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | | <p>1. THE CONTRACTOR IS SOLELY RESPONSIBLE FOR THE CONSTRUCTION MEANS, METHODS, TECHNIQUES, SEQUENCES AND PROCEDURE AND FOR ALL SAFETY PROGRAMS AND PRECAUTIONS IN CONNECTION WITH THE PROJECT. NEITHER THE OWNER NOR THE ARCHITECT IS RESPONSIBLE FOR THE CONTRACTOR'S FAILURE TO FOLLOW PROPER SAFETY PROCEDURES.</p> <p>2. ALL CODES HAVING JURISDICTION ARE HEREBY MADE A PART OF THIS DOCUMENT AND ARE TO BE STRICTLY OBSERVED BY THE CONTRACTOR IN THE CONSTRUCTION OF THE PROJECT. IN THE EVENT OF CONFLICT BETWEEN THESE DOCUMENTS AND THE CODE, THE CODE SHALL PREVAIL. ANY CONFLICT OR DISCREPANCY SHALL IMMEDIATELY BE BROUGHT TO THE ATTENTION OF THE ARCHITECT.</p> <p>3. ALL WORK, TO BE ACCEPTABLE, MUST BE IN COMPLIANCE WITH THESE DRAWINGS AND SPECIFICATIONS, AND MUST BE OF A QUALITY EQUAL OR BETTER THAN THE STANDARD OF THE TRADE. FINISHED WORK SHALL BE FIRM, WELL-ANCHORED, IN TRUE ALIGNMENT, PLUMB, LEVEL, WITH SMOOTH, CLEAN, UNIFORM APPEARANCE.</p> <p>4. CONTRACTOR SHALL AT ALL TIMES PROVIDE PROTECTION AGAINST WEATHER, RAIN, WINDSTORMS, OR HEAT SO AS TO MAINTAIN ALL WORK, MATERIALS, EQUIPMENT AND APPARATUS FREE FROM INJURY OR DAMAGE.</p> <p>5. CONTRACTOR SHALL VISIT THE SITE OF THE PROJECT, EXAMINE FOR HIMSELF/HERSELF THE NATURE OF THE EXISTING CONDITIONS AND ALL OTHER CONDITIONS RELEVANT TO THE SATISFACTORY COMPLETION OF THE PROJECT. SUBMISSION OF A BID FOR CONSTRUCTION SHALL BE CONSIDERED EVIDENCE OF SUCH EXAMINATION BY THE CONTRACTOR.</p> <p>6. BEFORE ORDERING MATERIAL OR COMMENCING WORK WHICH IS DEPENDENT FOR THE PROPER SIZE AND INSTALLATION UPON COORDINATION WITH CONDITIONS IN THE BUILDING, THE CONTRACTOR SHALL VERIFY ALL DIMENSIONS AND SHALL BE RESPONSIBLE FOR THE CORRECTNESS. ANY DISCREPANCIES BETWEEN THE DOCUMENTS AND THE EXISTING CONDITIONS SHALL BE REFERRED TO THE ARCHITECT FOR ADJUSTMENTS BEFORE ANY WORK BEGINS OR MATERIALS ARE PURCHASED.</p> <p>7. MATERIALS, PRODUCTS AND EQUIPMENT SHALL ALL BE NEW, EXCEPT AS SPECIFICALLY NOTED OTHERWISE.</p> <p>8. CONTRACTOR SHALL BE RESPONSIBLE FOR LOCATING ALL DEBRIS IN A LOCATION OF THE PROPERTY APPROVED BY THE OWNER AND SHALL REMOVE SAME IN A TIMELY MANNER DURING THE COURSE OF WORK.</p> <p>9. CONTRACTOR SHALL REMOVE FROM SITE ANY IMPROVEMENTS NECESSARY FOR COMPLETION OF THE PROJECT, PROTECT FROM DAMAGE OR INJURY ALL EXISTING TREES, LANDSCAPING AND IMPROVEMENTS INDICATED BY THE ARCHITECT.</p> <p>10. EXCAVATE ALL FOOTINGS AS INDICATED ON THE DRAWING TO REACH SOLID, UNDISTURBED SOIL. BOTTOMS OF EXCAVATIONS SHALL BE LEVEL, CLEAN AND DRY AND AT THE ELEVATIONS INDICATED ON THE STRUCTURAL DRAWINGS.</p> <p>11. PROVIDE FINISH GRADES TO DRAIN AWAY FROM THE FOUNDATIONS ON ALL SIDES OF THE BUILDING.</p> <p>12. CONTRACTOR TO PRECISELY LOCATE ALL UTILITIES PRIOR TO ANY CONSTRUCTION AND/OR EXCAVATION.</p> <p>13. WORK HOURS: CONSTRUCTION, DELIVERIES, AND OR SERVICING OF ANY ITEM ON SITE SHALL BE PROHIBITED BEFORE 8:00 AM AND AFTER 5:00 PM, WEEKDAYS, ALL DAY SATURDAY, SUNDAY AND HOLIDAYS.</p> <p>14. CONSTRUCTION PARKING IS PERMITTED ONLY ON THE SITE AND ONLY ON THE SIDE OF THE STREET FRONTING THE PROPERTY FOR WHICH THE PERMIT IS ISSUED.</p> <p>15. NO PERSON SHALL CAUSE AND NO PROPERTY OWNER SHALL PERMIT ON SUCH OWNERS' PROPERTY, A NOISE PRODUCED BY ANY PERSON, MACHINE, ANIMAL OR DEVICE, OR ANY COMBINATION THEREOF, IN EXCESS OF THE SOUND LEVEL LIMITS SET FORTH IN LOCAL MUNICIPAL CODES TO EMANATE FROM ANY PROPERTY, PUBLIC OR PRIVATE, BEYOND THE PROPERTY LINE. ANY SOUND IN EXCESS OF THE SOUND LEVEL LIMITS SET FORTH IN LOCAL MUNICIPAL CODES SHALL CONSTITUTE A NOISE DISTURBANCE. FOR PURPOSES OF DETERMINING SOUND LEVELS, SOUND LEVEL MEASUREMENTS SHALL BE MADE AT ANY LOCATION ON THE RECEIVING PROPERTY. PROFESSIONAL CERTIFICATION OF MEETING THIS REQUIREMENT MAY BE REQUIRED PRIOR TO FINAL INSPECTION.</p> <p>16. SURVEYOR IS REQUIRED TO PROVIDE LETTERS VERIFYING THE STRUCTURE IS LOCATED AS APPROVED ON THE PLANS FOR SETBACKS PRIOR TO POURING ANY CONCRETE AND VERIFYING THE HEIGHT OF THE STRUCTURE IS AS SHOWN ON THE PLANS AT FRAME INSPECTION.</p> <p>17. THE GEOTECHNICAL ASPECTS OF THE CONSTRUCTION, INCLUDING EXCAVATION OF FOUNDATIONS, PIER DRILLING, UNDERPINNING, PREPARATION OF SUBGRADE BENEATH SLABS-ON-GRADE, PLACEMENT AND COMPACTION OF ENGINEERED FILL, AND SURFACE DRAINAGE INSTALLATION SHOULD BE PERFORMED IN ACCORDANCE WITH THE ORIGINAL GEOTECHNICAL REPORT PREPARED BY EARTH SYSTEMS PACIFIC, DATED JUNE 23, 2020. EARTH SYSTEMS PACIFIC SHOULD BE PROVIDED AT LEAST 48 HOURS ADVANCE NOTIFICATION OF ANY EARTHWORK OPERATIONS AND SHOULD BE PRESENT TO OBSERVE AND TEST, AS NECESSARY, THE EARTHWORK AND FOUNDATION INSTALLATION PHASES OF THE PROJECT.</p> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

# REACH CODE

## 1. ENERGY EFFICIENCY AND ELECTRIFICATION

Note: All projects must comply with mandatory elements of the Building Energy Efficiency Standards as well as the local requirements specified in the Ordinance No.1448. **Effective Date: July 19<sup>th</sup>, 2021**

- ☒ All-Electric
- ☒ No natural gas appliances or propane appliance
- ☒ No gas meters or propane infrastructure
- ☒ Compliance with energy efficiency standards required by the State (no additional local energy efficiency requirements)
- ☐ Exception(s):
  - ☐ Projects with planning entitlements approved prior to effective date.
  - ☐ 100% affordable housing for 80% AMI or less
  - ☐ ADUs & IADUs
  - ☐ Prescriptive or performance pathway under the Energy Code is not feasible.

## 2. GREEN BUILDING

- ☒ The permit application includes a completed CALGreen checklist

## 3. ELECTRIC VEHICLE (EV) CHARGING AND READINESS

- ☒ Complies with California Green Building Standards Code 4.106.4; **AND**
- ☒ Complies with local EV charging requirements as specified below; **AND**
- ☒ Meets required minimum electrical capacity

Single Family/Duplex/ Townhouses

**28** Total Number of Parking Spaces

- ☐ At least 1 parking space per dwelling unit has Level 2 EV Ready Space (for all projects)
- ☒ At least 1 parking space per dwelling unit has Level 1/Level 2 EV Ready Space (for projects with 2 parking spaces)
- ☐ Exception:
  - ☐ ADU w/o new panel or panel upgrade

Low Rise Multifamily

Complies with local EV charging requirements as specified below. (All % requirements are to be rounded up to the nearest whole number. All percentages should reflect percentage of total parking spaces on site.)

|  |                                                                                                                                                  |
|--|--------------------------------------------------------------------------------------------------------------------------------------------------|
|  | Total number of dwelling units with parking spaces *                                                                                             |
|  | Number of Level 1 EV-Ready Spaces                                                                                                                |
|  | % Level 1 EV-Ready Spaces (90% for >20 units)                                                                                                    |

|  | % Level 2 EV Ready Spaces (100% of units for projects with ≤ 20 units OR 10% for projects with >20 units OR 10% for affordable housing projects) |

\* Definitions

- New construction as defined in Section 110.1(b).
- EV Capable Parking Space: Parking space is linked to a listed electrical panel with sufficient capacity to provide a minimum of 110/120v and 20 amps to designated parking space. Raceways only though spaces to be inaccessible in future. Raceways must be 1" min conduit. Panel shall identify spaces reserved for EV charging as "EV Capable."
- EV Level 1: A minimum 110V, 20 amp circuit
- EV Level 2: A minimum 208V/240V, 40 amp circuit
- EV Level 1 Ready Space: A parking space served by a completed circuit with a minimum of 110/120v, 20 amp capacity including electrical panel capacity, overprotection device. Raceways shall be a minimum of 1" diameter. Wiring shall include receptacle labeled "Electric Vehicle Outlet" or electric vehicle supply equipment (EVSE)
- EV Level 2 Ready Space: A parking space served by a completed circuit with a minimum of 208/240v, 40 amp capacity including electrical panel capacity, overprotection device. Raceways shall be a minimum of 1" diameter. Wiring shall include receptacle labeled "Electric Vehicle Outlet" or electric vehicle supply equipment (EVSE) with a minimum output of 30 amps.
- EV Charging Station (EVCS): A parking space with installation of electric vehicle supply equipment (EVSE) with a minimum of 30 amps connected to a level 2 EV Ready Circuit. EVCS installation may be used to satisfy Level 2 EV Ready Circuit Equipment.
- Automatic Load Management System (ALMS): A control system that allows multiple EV chargers or EV-ready circuits to share an electrical circuit and automatically reduce power at each charger.

## 4. SOLAR PHOTOVOLTAIC

- ☒ Installed photovoltaic system
  - ☐ High Rise Multifamily Minimum Must Be 15% Or Greater
- |  |                             |
|--|-----------------------------|
|  | Roof Area (Square Feet)     |
|  | PV Coverage (Square Feet)   |
|  | % Roof Area Covered with PV |

Exemptions

- ☐ 35% Roof Has Green Roof
- ☐ Reduced Pv System Size Due to Excessive Shading, < 200 Contiguous Square Feet, Over Generation.
- ☐ Excessive Shading and/or Insufficient Roof Space), And Therefore Includes: Compliance With Exceptions Under The 2019 Building Energy Efficiency Standards (Exception 6 To Section 110.10(B)1a, Or Exception 4 To Section 110.10(B)1b):
  - ☐ Demand Responsive Thermostat(S) Plus One Of The Following:
    - ☐ Energystar Dishwasher
    - ☐ Home Automation System
    - ☐ Greywater Irrigation
    - ☐ Rainwater Catchment System

## 5. VERIFICATION

This form has been completed by

This form has been completed by CHRIS (name) of \_\_\_\_\_ (company), the Qualified green building rater for the above listed project who verifies that it accurately represents the project plans.

# ENGINEERING CONDITIONS OF APPROVAL

1. All improvements, including on-site and off-site improvements, and all public service and utility facilities required to serve the project, shall be completed by the applicant, or shall be incorporated into an Improvement Agreement(s) before issuance of a Building Permit. The improvements shall be consistent with the plans approved by the City Engineer and the Conditions of Approval. All construction shall meet the latest California Building Code, California Fire Code, Daly City Municipal Code and the City Standard Specifications and Drawings. Securities for all required improvements, and applicable fees and charges, shall be submitted with the Building Permits, or submission of the development agreement for approval. The applicant shall obtain all required permits before commencing work. All required improvements shall be constructed at no cost to the City except where specifically agreed to by the City under the provisions of a written agreement.

2. Grading and improvement plan review and approval by the City Engineer are required before any City Permit is issued. The improvement plans shall include details for on-site and off-site improvements for vehicular and pedestrian access, parking, traffic signs and markings, utility service connections, modifications and extension of the City's sewer, water, storm drain, safety lighting, landscaping, and other public service facilities. All utility services shall be underground. Said improvements shall conform to Daly City and affected Agency's standards. Plans shall be accompanied by all required calculations and studies including geotechnical and impact studies to justify design. Submit photo-mylar reproducible (24"x36"), electronic files (to City AutoCAD Standards) and blueprints as required for City's inspection and filing before permits are issued for construction of improvements. All required improvements shall be constructed at no cost to the City except where specifically agreed to by the City under the provisions of a written agreement.

3. All improvements shall be completed and functioning, and as-built record plans of all improvements submitted in a form acceptable to the City before any occupancy permit is issued or public service improvements are accepted by the City for maintenance.

4. An encroachment permit shall be required to be issued by the Public Works Department for all work proposed within the public right-of-way.

5. Grading exceeding 50 cubic yards shall require approval of plans and a grading permit. A licensed Civil Engineer shall prepare the grading plans and erosion control plan in conformance with a soil report prepared by a licensed soil engineer or qualified civil engineer in compliance with the NPDES requirements prior to any development on the property.

6. The Engineer or Geologist, of record, shall be present on-site during the excavation and grading phases of the project and shall submit a written certification that the project grading plans has been implemented as approved.

7. Concurrent with each demolition, grading and drainage permit submittal or as a part of the Improvement Plan package, the Applicant shall prepare a dust control plan. The plan shall conform to the City Standards and comply with the requirements of the Bay Area Air Quality Management District (BAAQMD) Best Management Practices for dust control. The Applicant shall post a publicly visible sign with the telephone number and person to contact regarding dust complaints. The person shall respond and take corrective action within 48 hours.

8. The applicant shall provide fail-safe conditions for catastrophic events such as 100-year storms, seismic events, system overflows or failures. Drainage swales shall be provided at the top, intermediate and bottom of slopes and embankments to prevent erosion and degradation of slopes. The project geotechnical report shall include appropriate recommendations regarding the protection of existing and proposed slopes.

9. Provide "will serve letters" from all applicable utility agencies.

10. Applicant and/or contractor shall have a project sign with Project contact information for public concern such as off-site tracking, dust control, noise complaints, ground shaking and any related construction activities. The complaints and responses shall be logged, and copies provided to the City Engineer with action status on a weekly basis.

11. Applicant and/or contractor shall have a project sign with Project contact information for public concern such as off-site tracking, dust control, noise complaints, ground shaking and any related construction activities. The complaints and responses shall be logged, and copies provided to the City Engineer with action status on a weekly basis.

12. Disconnect all sewer laterals and water services at the main in the street prior to installation of new services.

13. All existing buildings shall be demolished, and all existing utility service connections shall be abandoned prior to the recordation of the final map.

14. The applicant shall comply with the applicable requirements of the City of Daly City Standard Details and Specifications.

15. All proposed landscaping and street trees shall be maintained by the property owner in perpetuity. Irrigation shall be tied to and maintained by the property owner.

16. The segment of Third Avenue between Castle St. and E. Market St. has an existing Pavement Condition Index of 75. Due to the multiple utility street trench cuts it will be necessary to provide a Type II slurry seal across the development frontage. The slurry seal shall be for the entire street width.

17. Provide erosion and storm water pollution plan incorporating best management practices, including operation and maintenance provisions per the requirements applicable at the time of construction permit application. During the wet/rainy season (October 1 to April 30) the developer shall submit a revised erosion control plan as necessary (every five working days) or as required by the City Engineer and/or his representative.

18. Full trash capture devices approved by the City Engineer shall be installed on the drainage system.

19. Storm drain laterals and mains shall be CCTV'ed at the end of construction. Owner is responsible for providing videos of laterals/mains prior to the City Engineer's permit signoff/acceptance. If cleanouts are utilized instead of manholes or drainage inlets, it is up to the owner to make required changes to provide camera access if access is not available via cleanouts.

20. The applicant shall underground all electrical and telecommunications services, including adjacent property services as may be necessary to ensure that existing overhead drop services do not traverse the newly proposed development. The applicant shall provide verification, in writing, that all existing overhead utilities relocation have been reviewed and approved by each utility company. All existing facilities and supporting poles shall be removed at the applicant's expense.

21. The project's electrical transformer shall not be installed within the public right-of-way. The transformer, including the door swing of the panel doors, shall be within private property.

22. Sidewalk width shall be 5' minimum measured from the back of curb to the back of sidewalk (5.5' including the curb). All curb, gutter, and sidewalk improvements in the public right-of-way shall be designed to meet current ADA standards and Daly City Standards at no cost to the City. The limits of the curb, gutter, and sidewalk shall span the entire frontage of the proposed development to the nearest expansion joints or score lines.

23. All stormwater retention, treatment system or other C.3 or LID improvements shall be located outside of the public right-of-way and maintained by the Homeowners Association (HOA) (no private improvements in public right-of-way). HOA documents shall include the required maintenance provisions and attach final agreement for stormwater as required.

24. All retaining walls shall be maintained by the HOA with appropriate easements reserved for such maintenance. Retaining walls shall not be constructed within public right of way or public easements. Maintenance responsibilities shall be addressed in the CC&R for the property.

25. All project improvements shall be ADA compliant. This includes the sidewalk and driveways within private property.

26. Provide unrestricted access for inspection of the storm water treatment areas.

27. Water: All costs associated with any water system improvements required by the City shall be borne by the applicant.

28. Sewer: All costs associated with any sewer system improvements required by the City shall be borne by the applicant.

# FIRE CONDITIONS OF APPROVAL

1. Daly City Municipal Code15.32.080 requires an additional fire hydrant on the premises in a location approved by NCFA. Proposed fire hydrant location to be provided by NCFA and shown next to Unit#4 on the Preliminary Utility Sheet, TNT-4.

2. No Parking Signs and red curbs to be extended to include the entire west curb where the roadway narrows from 26'. "No parking" signs and red curb to be extended to west curb of the narrowing roadway, TNT-4.

3. N/A (no vehicular gate in scope of project)

4. N/A (no vehicular gate in scope of project)

5. Fire sprinkler system is required. Submit plans to NCFA under separate fire permit.

6. Provide fire flow information per CFC, Appendix B.

7. Key Box is required. Apply for approved hardware at NCFA Administration.

8. Portable fire extinguishers(s) are required. Mount fire extinguishers 3-5 feet above floor.

9. Illuminated address identification is required.

10. Utility identification is required.

## RETAINING WALL NOTES

- TW/FG REPRESENTS FINISHED EARTHEN GRADE OR PAVEMENT ELEVATION AT TOP OF WALL. NOT ACTUAL TOP OF WALL MATERIAL. BW/FG REPRESENTS FINISH EARTHEN GRADE OR PAVEMENT ELEVATION AT BOTTOM OF WALL NOT INCLUDING FILL FOUNDATION. GRADES INDICATED ON THESE PLANS REFER TO THE FINISHED GRADES ADJACENT TO THE RETAINING WALL, NOT INCLUDING FOOTING, FREEBOARD, ETC.
- DIMENSIONS SHOWN IN BRACKETS SHOWN AS [X.X"] DENOTE THE EFFECTIVE WALL HEIGHT ONLY. THE ACTUAL WALL HEIGHT AND DEPTH MAY DIFFER DUE TO CONSTRUCTION REQUIREMENTS.
- REFER TO SPECIFIC WALL CONSTRUCTION DETAIL FOR STRUCTURAL ELEMENTS, FREEBOARD, AND EMBEDMENT.
- REFER TO ARCHITECTURAL, LANDSCAPE ARCHITECTURE, AND/OR STRUCTURAL PLANS FOR DETAILS, WALL ELEVATIONS, SUBDRAINAGE, WATERPROOFING, FINISHES, COLORS, STEEL REINFORCING, MATERIALS, ETC. PROVIDE CLIPS OR OTHER MEANS OF SECURING FINISH MATERIALS AS NECESSARY (WET SET INTO THE WALL).
- ALL RETAINING WALLS SHOULD HAVE A BACK-OF-WALL SUB-SURFACE DRAINAGE SYSTEM INCLUDING WEIPEHOLES TO PREVENT HYDROSTATIC PRESSURE.
- SEE DETAIL SHEET FOR SPECIFIC INFORMATION.
- PROVIDE GUARDRAIL (WHERE APPLICABLE AND DESIGNED BY OTHERS) AS REQUIRED FOR GRADE SEPARATION OF 30 INCHES OR MORE MEASURED 5' HORIZONTALLY FROM FACE OF WALL, PER CBC.

## ESTIMATED EARTHWORK QUANTITIES

| CUBIC YARDS | WITHIN BUILDING FOOTPRINT | OUTSIDE BUILDING FOOTPRINT | TOTAL CUBIC YARDS |
|-------------|---------------------------|----------------------------|-------------------|
| CUT         | 350                       | 550                        | 900               |
| FILL        | 650                       | 790                        | 1,440             |
| IMPORT      |                           |                            | 540               |

### NOTE:

GRADING QUANTITIES REPRESENT BANK YARDAGE. IT DOES NOT INCLUDE ANY SWELLING OR SHRINKAGE FACTORS AND IS INTENDED TO REPRESENT IN-SITU CONDITIONS. QUANTITIES DO NOT INCLUDE OVER-EXCAVATION, TRENCHING, STRUCTURAL FOUNDATIONS OR PIERS, OR POOL EXCAVATION (IF ANY). NOTE ADDITIONAL EARTHWORKS, SUCH AS KEYWAYS OR BENCHING MAY BE REQUIRED BY THE GEOTECHNICAL ENGINEER IN THE FIELD AT TIME OF CONSTRUCTION. CONTRACTOR TO VERIFY QUANTITIES.

## SCHEMATIC RETAINING WALL LAYOUT

SEE STRUCTURAL PLANS FOR DETAIL  
(NOT FOR CONSTRUCTION)

## FEMA NOTE

PROPERTY COMPLETELY OUT OF SPECIAL FLOOD HAZARD AREA (SFHA) PER CURRENT FLOOD INSURANCE RATE MAP

## SITE BENCHMARK

SURVEY CONTROL POINT  
MAG AND SHINER SET IN ASPHALT  
ELEVATION = 129.49' (ASSUMED)  
ADD 70.92' TO ALL ELEVATIONS FOR  
CITY OF DALY CITY DATUM

## EASEMENT NOTE

APN 006-254-030  
THERE ARE NO EASEMENTS LISTED IN TITLE REPORT PREPARED BY FIRST AMERICAN TITLE COMPANY, ORDER NO. 4102-6032945, DATED SEPTEMBER 1, 2020.

EASEMENT FOR MAINTENANCE AND USE OF WATER PIPE AND DRAIN PIPE (1470 O.R. 332) LISTED IN TITLE REPORT PREPARED BY FIRST AMERICAN TITLE COMPANY, ORDER NO. 4102-6123401, DATED SEPTEMBER 1, 2020 DOES NOT LIE WITHIN THE SUBJECT PROPERTY AND THE EXACT LOCATION IS NOT OF RECORD. NEIGHBORING EASEMENTS SHOWN ARE PER SUBDIVISION MAPS (69 PM 15) AND (133 MAPS 2R).

## UTILITY NOTE

ALL UNDERGROUND PIPE TYPES, SIZES AND LOCATION SHOWN ON THIS SURVEY ARE BASED ON VISUAL OBSERVATION. ANY USE OF THIS INFORMATION SHOULD BE VERIFIED, BEFORE ITS USE, WITH THE CONTROLLING MUNICIPALITY OR UTILITY PROVIDER. THIS SURVEY MAKES NO GUARANTEE OF THE INSTALLED ACTUAL LOCATION, DEPTHS OR SIZE.

5 OF 8 SHEETS

POST CONSTRUCTION BMP MAINTENANCE AND/OR  
SOURCE CONTROL MEASURES

FUEL, OIL PETROLEUM PRODUCTS, PESTICIDES, AND OTHER STORM DRAINAGE POLLUTANT SPILLS NEED TO BE CONTAINED. OWNERS SHALL SE ABSORBMENT MATERIAL ON SMALL SPILLS RATHER THEN HOSEING SPILLS DOWN. REMOVE THE ABSORBENT MATERIAL PROMPTLY AND DISPOSE OF PROPERLY, AS REQUIRED BY CITY, STATE AND FEDERAL REGULATIONS.

DRAINAGE INLETS SHALL BE INSPECTED MONTHLY AND KEPT CLEAN OF ANY TRASH THAT MAY HAVE ACCUMULATED. IT IS THE RESPONSIBILITY OF THE PROPERTY MANAGER/OWNER TO HAVE THOSE INSPECTIONS PERFORMED, DOCUMENTED AND ANY REPAIRS MADE.

A. LANDSCAPE MAINTENANCE

LANDSCAPE AREAS SHALL BE COVERED WITH PLANTS OR SOME TYPE OF GROUND COVER TO MINIMIZE EROSION. NO AREAS ARE TO BE LEFT AS BARE DIRT THAT COULD ERODE. MOUNDING SLOPES SHALL NOT EXCEED 2 HORIZONTAL TO 1 VERTICAL.

PESTICIDES AND FERTILIZERS SHALL BE STORED AS HAZARDOUS MATERIALS AND IN APPROPRIATE PACKAGING. OVER SPRAYING ONTO PAVED AREAS SHALL BE AVOIDED WHEN APPLYING FERTILIZERS AND PESTICIDES. PESTICIDES AND FERTILIZERS WILL BE PROHIBITED FROM STORAGE OUTSIDE.

THE LANDSCAPE AREAS SHALL BE INSPECTED AND ALL TRASH PICKED UP AND OBSTRUCTIONS TO THE DRAINAGE FLOW REMOVED ON A MONTHLY BASIS MINIMUM. THIS SITE HAS BEEN DESIGNED WITH EFFICIENT IRRIGATION AND DRAINAGE TO REDUCE PESTICIDE USE. PLANTS HAVE BEEN SELECTED BASED ON SIZE AND ARE SITUATED TO REDUCE MAINTENANCE AND ROUTINE PRUNING.

THE INTEGRATED PEST MANAGEMENT INFORMATION ATTACHED WILL BE PROVIDED TO BUILDING MANAGEMENT.

B. DRAINAGE COLLECTION MANAGEMENT

THE STORM DRAINAGE SYSTEM CONSISTS OF AREA DRAINS, CATCH BASINS, BUBBLERS, COLLECTION AND DISTRIBUTION PIPING, SWALES, AND CLEAN OUTS.

THE STORM DRAINAGE COLLECTION SYSTEM SHALL BE CLEANED YEARLY BY THE PROPERTY MANAGEMENT/OWNER. THE INSPECTION SHALL BE PERFORMED DURING THE DRY SEASON. THIS INCLUDES THE FOLLOWING;

\*ALL TRASH AND OBSTRUCTIONS SHALL BE REMOVED FROM AREA DRAINS, BUBBLERS, CLEAN OUTS, AND CATCH BASINS.

C. BIO-TREATMENT AREA

MAINTENANCE AGREEMENT  
UPON ACCEPTANCE OF THE DESIGN CONCEPT, A MAINTENANCE AGREEMENT WILL BE DEVELOPED REQUIRING THE PROPERTY MANAGER/OWNER TO PROVIDE THE FOLLOWING INFORMATION ON A ROUTINE BASIS. THESE REQUIREMENTS APPLY ONLY TO THE PORTION OF THE FLOW THROUGH PLANTER USED FOR STORM WATER TREATMENT.

MAINTENANCE STANDARDS:

\*SOILS AND PLANTINGS MUST BE MAINTAINED, INCLUDING ROUTINE PRUNING, MOWING, IRRIGATION, REPLENISHMENT OF MULCH, WEEDING, AND FERTILIZING WITH A SLOW-RELEASE FERTILIZER WITH TRACE ELEMENTS. .

\*REMOVE OBSTRUCTIONS AND TRASH FROM FLOW THROUGH PLANTER.

\*ONLY PESTICIDES AND FERTILIZERS THAT ARE ACCEPTED WITHIN THE INTEGRATED PEST MANAGEMENT APPROACH FOR USE IN FLOW THROUGH PLANTERS SHALL BE USED.

\*EROSION AT INFLOW POINTS MUST BE REPAIRED.

FLOW THROUGH PLANTERS SHALL BE INSPECTED AND MAINTAINED MONTHLY TO REVIEW:

\*OBSTRUCTION AND TRASH

\*IF PONDED WATER IS OBSERVED, THE SURFACE SOILS SHALL BE REMOVED AND REPLACED AND SUBDRAIN SYSTEM INSPECTED.

\*CONDITION OF GRASSES.

D. TRAINING PROGRAM

A COPY OF THE STORM WATER MANAGEMENT PLANS (SWMP) WILL BE MADE AVAILABLE TO PERSONNEL IN CHARGE OF FACILITY MAINTENANCE AND WILL BE DISTRIBUTED TO THE SUBCONTRACTOR REPRESENTATIVE ENGAGED IN THE MAINTENANCE OR INSTALLATION OF THE BMP'S.

MATERIAL PRESENTED IN THE INTEGRATED PEST MANAGEMENT PROGRAM WILL BE MADE AVAILABLE TO PERSONNEL IN CHARGE OF FACILITY MAINTENANCE AND WILL BE DISTRIBUTED TO THE SUBCONTRACTOR REPRESENTATIVE ENGAGED IN THE MAINTENANCE OR INSTALLATION OF THE BMP'S.

A COPY OF THE YEARLY INSPECTION REPORTS SHALL BE MANAGED BY THE PROPERTY MANAGER/OWNER.

IDENTIFICATION OF POTENTIAL POLLUTANTS:

POSSIBLE POLLUTANTS FOR THIS SITE INCLUDE TRASH, SEDIMENTS, NUTRIENTS, DUST, CONSTRUCTION DEBRIS, AUTOMOBILE DEBRIS, AND PESTICIDES. THE CONSTRUCTION OF THE PROJECT AND THE LONG TERM MAINTENANCE SHOULD NOT ADD ANY OF THE FOLLOWING: COPPER, NICKEL, DIAZINON, MERCURY, CHLORIDANE, DDT, DIELDRIN, AND PCB'S.

BMP DESCRIPTION

THIS PROJECT USES BMP RECOMMENDATIONS FROM THE SAN MATEO COUNTY CLEAN WATER PROGRAM PUBLIC UTILITIES COMMISSION INCLUDING 8 FLOW THROUGH PLANTERS AND PERMEABLE PAVEMENT.

THE SITE IS APPROXIMATELY 31,140 SF. THE DEVELOPMENT WILL ADD APPROXIMATELY 15,030 SF OF IMPERVIOUS SURFACE. THE SITE WILL RETAIN APPROXIMATELY 10% PERVIOUS SURFACES, INCLUDING LANDSCAPING AREA AND BACK PATIO/YARD.

THE SITE IS DIVIDED INTO 5 DRAINAGE MANAGEMENT AREAS (DMA). DMAS #1 THROUGH #4 UTILIZE BIO-RETENTION TREATMENT PLANTERS PLANTERS. DMA #5 UTILIZES THE SELF-RETAINING PERVIOUS CONCRETE COMMON DRIVEWAY TO RETAIN RUNOFF FROM THE DRIVEWAY AND SURROUNDING SIDEWALKS.

- ABANDON UTILITY

## NOTES:

- SEE SHEET TNT-1 FOR ABBREVIATIONS
- ALL VALVES, BOXES, VAULTS, MANHOLES, ETC NOT DESIGNATED FOR REMOVAL SHALL BE RESET TO THE NEW GRADES.
- ALL EXISTING SEWER LATERALS SERVING THE PROPERTY, WHETHER USED OR NOT, SHALL BE ABANDONED AT THE MAIN PER SECTION 02720, 3.23 OF THE STANDARD SPECIFICATIONS AND DRAWINGS. THIS WILL REQUIRE TELEVISIONING THE MAIN AND IDENTIFYING THEIR LOCATIONS FOR ABANDONMENT. ABANDONMENT OF THESE SERVICES SHALL BE PERFORMED DURING DEMOLITION.
- ALL EXISTING WATER SERVICES FOR THE PROPERTY, WHETHER USED OR NOT, SHALL BE ABANDONED AT THE MAIN PER SECTION 02710, 3.16 OF THE STANDARD SPECIFICATIONS AND DRAWINGS.
- A CERTIFIED DISTRIBUTION SYSTEM OPERATOR MUST BE PRESENT FOR ALL HYDROSTATIC TESTING, CHLORINATION, FLUSHING, BACTERIA TESTING AND CONNECTIONS TO THE EXISTING SYSTEM, PER CALIFORNIA DEPARTMENT OF PUBLIC HEALTH, OPERATOR CERTIFICATION REGULATIONS, SECTION 63770. THE CITY OF DALY CITY ENGINEER MUST RECEIVE THE REQUEST FOR THE CERTIFIED OPERATOR TO BE PRESENT FOR THESE OPERATIONS IN WRITING NO LESS THAN SIX (6) WORKING DAYS PRIOR TO THE ANTICIPATED DATE OF WORK.

## SUBSTRUCTURE VERIFICATION STAMP

### DEVELOPER NOTE AND SIGN

ALL PG&E ENCLOSURES AND BOXES HAVE BEEN SET TO  
GRADE ACCORDING TO GRADE STAKES PROVIDED BY  
DEVELOPER'S ENGINEER. ALL COSTS TO RELOCATE OR  
RE-ADJUST BOXES AT A LATER DATE WILL BE BILLED TO  
THE DEVELOPER. PLEASE HAVE YOUR SUPT. VERIFY THE  
CORRECT GRADE OF ALL ENCLOSURES OR BOXES, AND  
SIGN AND DATE DRAWING.

THANK YOU

SIGNED \_\_\_\_\_  
DATE \_\_\_\_\_

SCALE: N.T.S.  
PM: K. ARATA  
DRAWN BY: E. SMITH  
PG&E QUALIFIED DESIGNER:  
LAST UPDATED: 12-02-2022  
DRAWING NO: JT-1  
SHEET: 1 OF: 3

3. THE PREFERRED TRENCH LOCATION IS IN A PUBLIC UTILITY EASEMENT (P.U.E.).
4. ALL DEPTHS AND RESULTING COVER REQUIREMENTS ARE MEASURED FROM FINAL GRADE.
5. COVER, CLEARANCES, AND SEPARATION SHALL BE AS GREAT AS PRACTICABLE UNDER THE CIRCUMSTANCES, BUT UNDER NO CIRCUMSTANCES SHALL BE LESS THAN THE MINIMUM COVER, CLEARANCE, AND SEPARATION REQUIREMENTS SET FORTH IN GENERAL ORDER 128 AND 49CFR 192.321 OR 49CFR 192.325, AND 49CFR 192.327. ALL FACILITIES SHALL BE PROTECTED IN PLACE PRIOR TO ANY TRENCHING OR OTHER WORK. SOILS SHALL BE TAKEN TO ENSURE NO MOTION OF THE FACILITIES. DIMENSIONAL REQUIREMENTS FOR SHADING, LEVELING, AND BACKFILLING SHALL BE DETERMINED SUBSEQUENT TO COMPACTION.
6. TRENCH DIMENSIONS SHOWN ARE TYPICAL. TRENCH SIZES AND CONFIGURATIONS MAY VARY DEPENDING UPON OCCUPANCY AND/OR FIELD CONDITIONS. TRENCH SIZE AND CONFIGURATION MUST AT ALL TIMES BE CONSTRUCTED IN A MANNER THAT ENSURES PROPER CLEARANCES AND COVER REQUIREMENTS ARE MET. ANY "CHANGE" TO THE TRENCH WIDTH AND CONFIGURATIONS AS SHOWN IN THIS EXHIBIT MUST BE DESIGNED TO ENSURE THIS REQUIREMENT.
7. IT IS PREFERRED TO HAVE NON-PG&E OWNED STREETLIGHTS AT A LEVEL OTHER THAN THE GAS OR ELECTRIC LEVEL. NON-PG&E OWNED STREETLIGHTS MAY BE AT THE ELECTRIC LEVEL OF THE TRENCH AS LONG AS MINIMUM CLEARANCES ARE PROVIDED AND COMPLY WITH ALL SPECIAL NOTES FOR A JOINT TRENCH WITH A SECOND ELECTRIC UTILITY.
8. NON-UTILITY FACILITIES ARE NOT ALLOWED IN ANY JOINT UTILITY TRENCH, E.G., IRRIGATION CONTROL LINES, BUILDING FIRE ALARM SYSTEMS, PRIVATE TELEPHONE SYSTEMS, OUTDOOR ELECTRICAL CABLE, ETC.
9. WHEN COMMUNICATION DUCTS ARE INSTALLED, A MINIMUM OF 12" RADIAL SEPARATION SHALL BE MAINTAINED FROM GAS FACILITIES. EXCEPTION: WITH MUTUAL AGREEMENT, WHEN 4-INCH DIAMETER OR SMALLER GAS PIPE IS INSTALLED, THE SEPARATION MAY BE REDUCED TO NOT LESS THAN 6 INCHES.
10. PROVIDE SEPARATION FROM TRENCH WALL AND OTHER FACILITIES SUFFICIENT TO ENSURE PROPER COMPACTION.
11. MAINTAIN PROPER SEPARATION BETWEEN PG&E FACILITIES AND "WET" UTILITY LINES AS DESCRIBED IN UO STANDARD 55453. THE MINIMUM ALLOWABLE HORIZONTAL SEPARATION BETWEEN COMPANY FACILITIES AND "WET" FACILITIES IS 3' WITH A MINIMUM 1' OF UNDISTURBED EARTH OR THE INSTALLATION OF A SUITABLE BARRIER BETWEEN THE FACILITIES. IF 3' HORIZONTAL SEPARATION CANNOT BE ATTAINED BETWEEN "WET" UTILITIES AND COMPANY DRY FACILITIES, A VARIANCE MAY BE REQUESTED BY THE LOCAL INSPECTION SUPERVISOR AND SUBMITTED TO THE SERVICE PLANNING SUPPORT PROGRAM MANAGER FOR APPROVAL. SEPARATIONS OF 1' OR LESS ARE NOT PERMISSIBLE AND WILL NOT BE ALLOWED. THE COMPANY MAY AGREE TO WAIVE THE MINIMUM 3' SEPARATION REQUIREMENT AT THE REQUEST OF AN APPLICANT IF WARRANTED AND THE NEED IS JUSTIFIED. THE REQUEST FOR A WAIVER MUST:
  - BE MADE IN WRITING AND SUBMITTED TO THE COMPANY ADE DURING THE PLANNING AND DESIGN PHASE OF THE PROJECT.
  - CLEARLY DESCRIBE THE CONDITIONS NECESSITATING THE WAIVER.
  - INCLUDE A PROPOSED DESIGN, AND INCLUDE A DESIGN FOR A BARRIER BETWEEN THE "WET" UTILITIES AND COMPANY DRY FACILITIES IN THE EVENT THAT THE EARTH COVER BE MAINTAINED. NOTE: DRAIN LINES CONNECTED TO DOWNSPOUTS ON BUILDINGS ARE CONSIDERED A "WET" UTILITY FOR THE PURPOSES OF THIS STANDARD.
12. SEPARATIONS SHALL BE MAINTAINED AT ABOVE GROUND TERMINATION POINTS.
13. PROCEDURES FOR APPROVING NATIVE BACKFILL FOR SHADING OF PG&E GAS FACILITIES:
  - RANDOM SOIL SAMPLES SHALL BE TAKEN FROM A MINIMUM OF 3 LOCATIONS PER 1,000' OF TRENCH. 100% OF THE SAMPLE MUST PASS THROUGH A 1/2" SIEVE AND 75% MUST PASS THROUGH A #4 SCREEN. ADDITIONAL SAMPLES MUST BE TAKEN IF EXISTING SOIL CONDITIONS CHANGE AND ARE TO BE TAKEN AT THE DISCRETION OF THE PG&E REPRESENTATIVE ON SITE.
  - THE SOILS MUST NOT CONTAIN ANY ROCKS THAT HAVE SHARP EDGES OR THAT MAY OTHERWISE BE ABRASIVE.
  - THE SOILS MUST NOT CONTAIN CLODS LARGER THAN 1/2" IF TO BE USED AS SHADING, BEDDING, OR LEVELING MATERIALS.
14. COMPACTION REQUIREMENTS MUST MEET ANY APPLICABLE PG&E, FEDERAL, STATE, COUNTY, OR LOCAL REQUIREMENTS. AT NO TIME SHALL THE OVER SATURATION OF NATIVE SOILS BE USED TO ACHIEVE THESE REQUIREMENTS.
  - THE SIEVES AND SCREENS SHALL BE:
    - 1/2" SIEVE: 8" DIAMETER BY 2" DEEP, STAINLESS STEEL MESH SCREEN.
    - #4 SCREEN: 8" DIAMETER BY 2" DEEP, STAINLESS STEEL MESH SCREEN.
15. PROCEDURES FOR APPROVING NATIVE BACKFILL FOR SHADING AT PG&E ELECTRIC FACILITIES:
  - RANDOM SOIL SAMPLES SHALL BE TAKEN FROM A MINIMUM OF 3 LOCATIONS PER 1,000' OF TRENCH. ADDITIONAL SAMPLES MUST BE TAKEN IF EXISTING SOIL CONDITIONS CHANGE AND ARE TO BE TAKEN AT THE DISCRETION OF THE PG&E REPRESENTATIVE ON SITE.
  - SHADING MATERIAL CONTAINING LARGE ROCK, PAVING MATERIAL, CINDERS, SHARPLY ANGULAR SUBSTANCES, OR CORROSIVE MATERIAL SHALL NOT BE PLACED IN THE TRENCH WHERE SUCH MATERIAL MAY DAMAGE THE CONDUITS AND/OR PREVENT PROPER COMPACTION OVER OR AROUND THE CONDUITS.
  - NATIVE SOILS CONTAINING CLODS NOT TO EXCEED 6" IN DIAMETER MAY BE INCLUDED IN THE SHADING MATERIAL PROVIDED THE CLODS ARE READILY UNDOABLE BY HAND. NOTE: SOILS CONSISTING PRIMARILY OF ADOBE, HARD COMPACT (DENSE) CLAY, AND BAY MUDS SHALL NOT BE USED AS SHADING MATERIAL.
  - AT NO TIME SHALL THE OVER SATURATION OF NATIVE SOILS BE USED TO ACHIEVE THESE REQUIREMENTS.
  - REFER TO ENGINEERING DOCUMENT 602288, ITEM 13 ON PAGE 2.
16. COMPETENT NATIVE SOILS ARE PREFERRED TO BE USED FOR SHADING, BEDDING, AND BACKFILLING THROUGHOUT THE TRENCH.
  - WHERE NATIVE SOILS EXCEED 1/2" MINUS AND/OR WHERE GAS IS TO BE PLACED AT THE BOTTOM OF A TRENCH IN AREAS THAT EXCEED 1/2" MINUS SOIL CONDITIONS, OR WHERE THE BOTTOM OF A TRENCH IS CONSIDERED TO CONSIST OF EXCAV FAN, PG&E APPROVED 1/2" MINUS IMPORT MATERIAL SHALL BE USED FOR SHADING AND/OR BEDDING OF GAS FACILITIES.
  - PG&E APPROVED IMPORT MATERIAL IS PER CGT ENGINEERING GUIDELINE 4123.
  - IF A LEVELING COURSE IS REQUIRED FOR GAS FACILITIES, THE USE OF NATIVE SOILS IS PREFERRED, BUT IF 1/2" MINUS CONDITIONS ARE NOT ATTAINABLE WITH THE NATIVE SOILS, THEN THE USE OF PG&E APPROVED IMPORT MATERIALS IS REQUIRED. BEDDING UNDER GAS FACILITIES WILL BE A MINIMUM OF 2" OF COMPACTED 1/2" MINUS NATIVE SOILS OR PG&E APPROVED IMPORT MATERIAL.
  - FOR ELECTRIC FACILITIES, REFER TO NOTE 12. THIS APPLIES TO LEVELING COURSES AS WELL AS SHADING.
  - THE MINIMUM PG&E APPROVED BEDDING MATERIAL MAY BE INCREASED AT THE DISCRETION OF PG&E WHEN WARRANTED.
  - THE USE OF ANY IMPORTED MATERIAL FOR BACKFILLING PURPOSES SHALL BE LIMITED TO THOSE SITUATIONS WHEN NATIVE SOIL DOES NOT ALLOW FOR REQUIRED COMPACTION.
17. THE APPLICANT IS RESPONSIBLE FOR THE REMOVAL OF EXCESS SPOIL AND ASSOCIATED COSTS.
18. SEPARATION BETWEEN GAS FACILITIES AND ELECTRIC FACILITIES MAY BE REDUCED TO 6" WHEN CROSSING.
19. SERVICE SADDLES ARE THE PREFERRED SERVICE FITTINGS FOR USE THROUGHOUT THE JOINT TRENCH PROJECT. ALL PROJECTS WILL BE DESIGNED AND ESTIMATED USING SERVICE SADDLES; HOWEVER, SERVICE TEES MAY BE USED IF ALL CLEARANCES, SEPARATION, AND COVERAGE REQUIREMENTS ARE MAINTAINED.
20. CONTRACTOR TO INCREASE METER SPACING AS NECESSARY WHEN EARTHQUAKE VALVES OR OTHER ADDITIONAL SAFETY EQUIPMENT ARE REQUIRED. EARTHQUAKE VALVES ARE REQUIRED IN SOME AREAS AND ARE NOT PART OF PG&E/VIZION UTILITY PARTNERS SCOPE. THIS INFORMATION CAN BE FOUND ON BUILDING MECHANICAL ENGINEER'S PLANS. PG&E STANDARD METER SPACING REQUIREMENTS DO NOT INCLUDE CLEARANCE FOR EARTHQUAKE VALVES.

- (E) JOINT POLE
- OH— (E) OVERHEAD LINE
- G— (E) GAS LINE
- GM (E) GAS METER
- EM (E) ELECTRIC METER

- ALL TRENCH, BACKFILLING AND INSTALLATION BY CONTRACTOR MUST COMPLY WITH PG&E STANDARD S5453 (EFFECTIVE DATE 7-5-2006).
2. ALL WORK MUST COMPLY WITH P.G. & E., TELEPHONE, C.A.T.V., STANDARDS AND PRACTICES. ALL WORK MUST BE INSPECTED AND APPROVED BY RESPECTIVE INSPECTORS. RANDOM SOIL SAMPLES SHALL BE TAKEN FROM A MINIMUM OF THREE LOCATIONS PER 1,000' OF TRENCH. 100% OF THE SAMPLE MUST PASS THROUGH A 1/2" SIEVE AND 75% MUST PASS THROUGH A #4 SCREEN. ADDITIONAL SAMPLES MUST BE TAKEN IF EXISTING SOIL CONDITIONS CHANGE AND IS TO BE AT THE DISCRETION OF THE PG&E REPRESENTATIVE ON SITE. THE SOILS MUST NOT CONTAIN ANY ROCKS THAT HAVE SHARP EDGES OR THAT MAY OTHERWISE BE ABRASIVE. THE SOILS MUST NOT CONTAIN CLODS LARGER THAN 1/2" IF TO BE USED AS SHADING, BEDDING OR LEVELING MATERIALS. COMPACTION REQUIREMENTS MUST MEET ANY APPLICABLE P.G.& E. FEDERAL, STATE, COUNTY OR LOCAL REQUIREMENTS. ANY NATIVE SOILS OR IMPORT MATERIALS USED MUST NOT HINDER THOSE EFFORTS.
3. BACKFILL SHALL BE APPROVED BY THE UTILITY COMPANIES AND THE CITY. COMPACTION WILL BE TESTED AND PASSED BY THE SOILS ENGINEER.
4. IF SOIL IS NOT ROCK FREE, ADD 4" DEPTH OF TRENCH FOR SAND BEDDING.
5. VERIFY SPLICE BOX EXCAVATION SIZES WITH SUPPLIER(S).
6. THE TRENCHING CONTRACTOR SHALL COORDINATE THE UTILITY COMPANIES' INSTALLATION. THE TRENCHING CONTRACTOR TO PLACE CONNECTING CONDUIT WITHIN 5' OF BUILDING EXTERIOR WALL.
7. CONTRACTOR SHALL MAKE HIMSELF FAMILIAR WITH THE PROJECT IMPROVEMENT PLANS AND CONDUCT HIS WORK ACCORDINGLY.
8. IT IS THE TRENCHING CONTRACTOR'S RESPONSIBILITY TO PROTECT IN PLACE ALL EXISTING FACILITIES. NO EXTRA PAYMENT WILL BE CONSIDERED FOR CROSSING OTHER SYSTEMS.
9. VIZION UTILITY PARTNERS ASSUMES NO RESPONSIBILITY FOR THE PROJECT CONDITIONS. THESE DRAWINGS WERE PREPARED USING DATA SUPPLIED BY PG&E, TELEPHONE, C.A.T.V., IMPROVEMENT PLANS AND THE CITY'S VARIOUS "AS BUILT" INFORMATION. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO PHYSICALLY REVIEW THE PROJECT PRIOR TO SUBMITTING HIS BID.
10. CONTRACTOR WILL COMPLY WITH ALL LAWS, ORDINANCES AND REGULATIONS. CONTRACTOR SHALL BE FAMILIAR WITH O.S.H.A., INDUSTRIAL SAFETY ORDERS AND SHALL CONDUCT HIS WORK ACCORDINGLY. WHEN WORKING NEAR ENERGIZED OR "HOT" EQUIPMENT, THE UTILITY OWNER SHALL BE NOTIFIED TO SUPPLY THE APPROPRIATE MAN POWER. PUBLIC SAFETY AND TRAFFIC CONTROL MEASURES ARE THE CONTRACTOR'S RESPONSIBILITY.
11. THE CONTRACTOR SHALL PROTECT CONSTRUCTION STAKING. HE SHALL COORDINATE STAKING WITH THE PROJECT'S CIVIL ENGINEER.
12. CONTRACTOR SHALL NOTIFY UNDERGROUND SERVICE ALERT (USA) TWO WORKING DAYS PRIOR TO START OF WORK.
13. CONTRACTOR SHALL NOTIFY INSPECTORS OF ANY POTENTIAL CONFLICTS PRIOR TO START OF WORK.
14. THIS PLAN IS TO BE USED FOR SOLE PURPOSE OF DIGGING THE JOINT TRENCH. SEE PG&E, AT&T, AND COMCAST PLANS FOR EXACT SIZE AND NUMBER OF CONDUITS INSTALLED IN THE JOINT TRENCH. IT IS THE CONTRACTOR'S RESPONSIBILITY TO ENSURE THE CORRECT NUMBER, SIZE AND TYPES OF CONDUITS ARE INSTALLED PER THE ENGINEERED PLANS BY EACH UTILITY COMPANY.
15. NOTE PLANS ISSUED AT THE PRE-CONSTRUCTION MEETING MAY BE SUBJECT TO REVISIONS, IF FINAL PLANS FROM EACH UTILITY COMPANY WERE NOT AVAILABLE AT THE START OF CONSTRUCTION.
16. WATER, SEWER, DRAINS, SANITARY WASTE, FUELS (INCLUDING DIESEL AND GASOLINE), OIL, PROPANE AND OTHER VOLATILE HEAVIER THAN AIR GASES, SPRINKLER, IRRIGATION, STEAM AND OTHER "WET" FACILITIES SHALL MAINTAIN A MINIMUM OF THREE FEET FROM THE NEAREST OUTSIDE SURFACE OF PG&E FACILITIES WITH NO LESS THAN ONE FOOT OF EARTH (SOIL BARRIER) BETWEEN THE ADJACENT SIDES OF THE INDIVIDUAL TRENCHES.
17. IN THE EXTRAORDINARY CASE THAT THE MINIMUM THREE FOOT HORIZONTAL SEPARATION CANNOT BE ATTAINED BETWEEN "WET" UTILITIES AND COMPANY DRY FACILITIES, A VARIANCE MAY APPROVED BY THE LOCAL INSPECTION SUPERVISOR AND SUBMITTED TO SERVICE PLANNING SUPPORT PROGRAM MANAGER FOR APPROVAL.
18. ALL METER PANELS: INDUSTRIAL, RESIDENTIAL OR NONRESIDENTIAL APPLICANTS WITH A METER PANEL RATING OF ANY SIZE, INSTALLED INSIDE A METER ROOM OR OTHER STRUCTURE, MUST FOLLOW ALL OF THE REQUIREMENTS DESCRIBED BELOW.
  - A. INSTALL, OWN, AND MAINTAIN A SEPARATE, NOMINAL, 2-INCH DIAMETER CONDUIT WITH PULL TAPES INSIDE THE CONDUIT AND PULL TAPES MUST EXTEND FROM THE OUTSIDE SURFACE OF THE BUILDING AND TERMINATE OUTSIDE THE METER PANEL OR SWITCHBOARD AT THE TOP OF THE METER SECTION.
  - B. ENSURE THE 2-INCH DIAMETER CONDUIT AND PULL TAPES EXIT THE OUTSIDE OF THE BUILDING A MINIMUM OF 8 FEET AND A MAXIMUM OF 10 FEET ABOVE GROUND. THE OPEN END OF THE CONDUIT THAT IS EXPOSED TO THE OUTSIDE MUST HAVE A REMOVABLE, TEMPORARY CAP OR PLUG.
  - C. DO NOT USE THE CONDUIT. THE CONDUIT IS FOR PG&E'S METERING EQUIPMENT ONLY.
19. THE JOINT TRENCH PLAN WAS PREPARED BASED ON TOPOGRAPHICAL SURVEY AS PROVIDED BY A CIVIL ENGINEER. THE CONTRACTOR IS CAUTIONED THAT EXPLORATORY WORK IS NECESSARY TO DETERMINE THE ACTUAL LOCATION OF ANY EXISTING UTILITY. V.U.P. STRONGLY RECOMMENDS THAT ALL UTILITIES BE PHYSICALLY LOCATED ON THE SITE BEFORE THE ONSET OF SITE WORK. SUBSEQUENT LOCATIONS MAY REQUIRE FIELD ADJUSTMENT TO COMPENSATE FOR ACTUAL EXISTING UTILITY LOCATIONS.
20. SUBSTRUCTURE LOCATIONS MUST BE STAKED BY A LICENSED SURVEYOR PRIOR TO CONSTRUCTION. SEE CONSTRUCTION NOTES ON JOINT TRENCH TITLE SHEET (JT-1) REGARDING EXISTING CONDITIONS.

NOTE: 315' MAX BENDS IN ANY SECONDARY CONDUIT RUN 200' OR LESS.  
300' MAX BENDS IN ANY PRIMARY CONDUIT RUN.

\*WIDTH PER SIZE & NUMBER OF EACH UTILITY. PG&E AND CITY INSPECTOR TO DETERMINE METHOD OF CROSSING

NOTE: TRENCH DEPTH NOT TO EXCEED 5' UNLESS APPROVED BY PG&E INSPECTOR. IN NO CASE SHOULD PLASTIC GAS PIPE BE INSTALLED AT A DEPTH GREATER THAN 10' UNLESS APPROVED BY PG&E SENIOR GAS ENGINEER.

TRENCHING CONTRACTOR SHALL NOT ASSUME THAT EITHER OF THE ABOVE DETAILS WILL BE ACCEPTABLE TO PG&E. YOU ARE REQUIRED TO CONTACT THE LOCAL PG&E ENGINEERING OFFICE WITH ANY ISSUE RELATING TO COVERS LESS THAN MINIMUM OR COVERS REQUIRING SHORING. CONCRETE CAPPING IS ONLY ACCEPTABLE WHERE NO OTHER SOLUTION IS POSSIBLE AND ONLY WHEN CERTAIN CRITERIA ARE MET AND ONLY WITH PG&E APPROVAL.

1. A WARNING TAPE IS TO BE INSTALLED IN OPEN TRENCH INSTALLATION OVER GAS PIPELINES IN BOTH TRANSMISSION AND DISTRIBUTION FACILITIES. THIS INCLUDES TRENCHES, BELL HOLES, EXCAVATIONS FOR REPAIR PURPOSES AND RIGID REPLACEMENTS. THE WARNING TAPE IS VENDED FOR AN EXCAVATOR DIGGING THE "TOLERANCE ZONE" TO STRIKE THE WARNING TAPE PRIOR THAN THE PIPELINE. WHEN THE WARNING TAPE IS EXPOSED AND GRABBED WITH EXCAVATING EQUIPMENT, IT STRETCHES WITHOUT BREAKING, THIS ALERTING THE EXCAVATOR OF THE GAS FACILITY BELOW.
2. INSTALL 6" WIDE WARNING TAPE ABOVE THE GAS PIPELINE AT LEAST 12" BELOW GRADE, AND NO CLOSER THAN 12" FROM THE PIPE. INSTALLATION SHOULD PROVIDE THE GREATEST DISTANCE BETWEEN THE PIPELINE AND THE TAPE AS POSSIBLE. INSTALL THE TAPE ALONG THE LENGTH OF THE EXCAVATION. ENSURE THAT THE TAPE OVERLAPS WHEN TWO OR MORE PIECES OF IT ARE USED. EXCEPTION: WHEN A JOINT TRENCH DESIGN DOES NOT ALLOW FOR INSTALLMENT OF WARNING TAPE WITHIN THE "WARNING TAPE INSTALLATION ZONE", INSTALL THE WARNING TAPE A MINIMUM OF 6" ABOVE THE GAS PIPELINE, AND BELOW THE FACILITY ABOVE THE PIPE.
3. WARNING TAPE SHALL BE BRIGHTLY COLORED YELLOW AND MARKED "CAUTION: GAS LINE BURIED BELOW" OR MARKED WITH A SIMILAR NOTIFICATION.
4. WARNING TAPE SHALL BE STORED IN SUCH A MANNER THAT LIMITS ULTRAVIOLET (UV) EXPOSURE.

**PRELIMINARY  
NOT FOR CONSTRUCTION**

**NOTE:**  
PRIOR TO ENERGIZING THIS PROJECT  
A PSE/PUE WILL NEED TO BE RECORDED FOR  
ALL UTILITIES WITHIN THIS PROJECT. INCLUDING  
THE "WORKING SPACE" REQUIRED AROUND ALL  
EQUIPMENT. THE AREA MUST ALSO BE LEVEL.  
SUBSTRUCTURE LOCATIONS MUST BE STAKED BY A  
LICENSED SURVEYOR PRIOR TO CONSTRUCTION.  
SEE CONSTRUCTION NOTES ON JOINT TRENCH NOTES  
SHEET (JT-2) REGARDING EXISTING CONDITIONS.

**THIS IS NOT A BID DOCUMENT**  
THIS DRAWING HAS NOT YET BEEN REVIEWED BY  
UTILITY COMPANIES AND IS SUBJECT TO CHANGE.

**UTILITIES:**  
PLEASE CONFIRM TIE IN LOCATIONS

|                                                                       |            |

Initial Study

# 141 3rd Avenue Residential Project

Prepared by

In Consultation with

**DAVID J. POWERS**  
& ASSOCIATES, INC.  
ENVIRONMENTAL CONSULTANTS & PLANNERS

January 2023

## MITIGATED NEGATIVE DECLARATION

### I. DESCRIPTION OF PROJECT:

**Date:** January 20, 2023

**File Nos.** GPA-8-20-14643, ZC-8-20-14633, SUB-8-20-15634, UPR-8-20-14642, DR-8-20-14636

**APN:** 006-254-030 and 006-254-020

**Project Title:** 141 3<sup>rd</sup> Avenue Residential Project

**Project Location:** The approximately 0.71-acre site is located at 141 3<sup>rd</sup> Avenue in the City of Daly City.

**Project Applicants:** Clarum Homes, 412 Olive Avenue, Palo Alto, CA 94306

**Project Description:** The project proposes a General Plan amendment to Residential – Medium Density (R-MD) to allow for a rezoning of the project site to R-3, Multiple-Family Residential. The project would construct 14 new three-story townhomes, each with a two-car tandem garage. The project would include a 120-foot internal access road, associated private driveways, landscaping, and utility improvements.

### II. DETERMINATION

In accordance with the City of Daly City procedures for compliance with the California Environmental Quality Act (CEQA), the City has completed an Initial Study to determine whether the proposed project may have a significant adverse effect on the environment. On the basis of that study, the City makes the following determination:

- Although the project, as proposed, could have had a significant effect on the environment, there will not be a significant effect in this case because mitigation measures are included in the project which will reduce all

Planning Division

333 90<sup>th</sup> Street, Daly City, CA 94015  
Tel: 650-991-8033

identified potential impacts to less than significant levels, and, therefore, this **MITIGATED NEGATIVE DECLARATION** (MND) has been prepared.

### **III. CONDITIONS (Mitigation Measures):**

#### **A. Air Quality:**

**MM AIR-3.1:** During any construction period ground disturbance, the applicant shall ensure that the project contractor implements measures to control dust and exhaust. Implementation of the measures recommended by BAAQMD and listed below would reduce the air quality impacts associated with grading and new construction to a less-than-significant level. Additional measures are identified to reduce construction equipment exhaust emissions. The contractor shall implement the following best management practices that are required of all projects:

- All exposed surfaces (e.g., parking areas, staging areas, soil piles, graded areas, and unpaved access roads) shall be watered two times per day.
- All haul trucks transporting soil, sand, or other loose material off-site shall be covered.
- All visible mud or dirt track-out onto adjacent public roads shall be removed using wet power vacuum street sweepers at least once per day. The use of dry power sweeping is prohibited.
- All vehicle speeds on unpaved roads shall be limited to 15 miles per hour (mph).
- All roadways, driveways, and sidewalks to be paved shall be completed as soon as possible. Building pads shall be laid as soon as possible after grading unless seeding or soil binders are used.
- Idling times shall be minimized either by shutting equipment off when not in use or reducing the maximum idling time to five minutes (as required by the California airborne toxics control measure Title 13, Section 2485 of California Code of Regulations [CCR]). Clear signage shall be provided for construction workers at all access points.
- All construction equipment shall be maintained and properly tuned in accordance with manufacturer's specifications. All equipment shall be checked by a certified mechanic and determined to be running in proper condition prior to operation.
- Post a publicly visible sign with the telephone number and person to contact at the Lead Agency regarding dust complaints. This person shall respond and take corrective action within 48 hours. The Air District's phone number shall also be visible to ensure compliance with applicable regulations.

**MM AIR-3.2:** All construction equipment larger than 25 horsepower used at the site for more than two continuous days or 20 hours total shall meet U.S. EPA Tier 4 emission standards for particulate matter (PM<sub>10</sub> and PM<sub>2.5</sub>). If use of Tier 4 equipment is not

available, alternatively use equipment that meets U.S. EPA emission standards for Tier 3 engines and include particulate matter emissions control equivalent to CARB Level 3 verifiable diesel emission control devices that altogether achieve a 67 percent reduction in particulate matter exhaust in comparison to uncontrolled equipment; alternatively (or in combination). As another alternative, the use of electrical or non-diesel fueled equipment may be used in substitution of diesel equipment.

**B. Biological Resources:**

**MM BIO-1.1:** Pre-construction nesting bird surveys shall be completed prior to tree removal if removal or construction is proposed to commence during the breeding season (February 1 to August 31) in order to avoid impacts to nesting birds. Surveys shall be completed by a qualified biologist no more than 14 days before construction begins. During this survey, the biologist or ornithologist shall inspect all trees and other possible nesting habitats in and within 250 feet of the project boundary.

If an active nest is found in an area that would be disturbed by construction, the ornithologist shall designate an adequate buffer zone (~250 feet) to be established around the nest, in consultation with the California Department of Fish and Wildlife (CDFW). The buffer would ensure that nests shall not be disturbed until the young have fledged (left the nest), the nest is vacated, and there is no evidence of second nesting attempts.

The applicant shall submit a report indicating the results of the survey and any designated buffer zones to the satisfaction of the Director of Community Development, prior to the removal of trees and issuance of a grading permit or demolition permit.

**C. Cultural Resources:**

**MM CUL-2.1:** If evidence of an archaeological site or other suspected cultural resource as defined by CEQA Guideline Section 15064.5, including darkened soil representing past human activity ("midden"), that could conceal material remains (e.g., worked stone, worked bone, fired clay vessels, faunal bone, hearths, storage pits, or burials) is discovered during construction related earth-moving activities, all ground-disturbing activity within 100 feet of the resources shall be halted and the City's Planning Manager shall be notified. The project sponsor shall hire a qualified archaeologist to conduct a field investigation. The City's Planning Manager shall consult with the archaeologist to assess the significance of the find. Impacts to any significant resources shall be mitigated to a less-than-significant level through data recovery or other methods determined adequate by a qualified archaeologist and that are consistent with the Secretary of the Interior's Standards for Archaeological documentation. Any identified

---

Planning Division

333 90<sup>th</sup> Street, Daly City, CA 94015  
Tel: 650-991-8033

cultural resources shall be recorded on the appropriate DPR 523 (A-J) form and filed with the NWIC.

**MM CUL-2.2:** If archaeological resources are identified, a final report summarizing the discovery of cultural materials shall be submitted to the City's Planning Manager prior to issuance of certificate of occupancy. This report shall contain a description of the mitigation program that was implemented and its results, including a description of the monitoring and testing program, a list of the resources found and conclusion, and a description of the disposition/curation of the resources.

**MM CUL-3.1:** If human remains are discovered during project construction, all ground-disturbing activity within 100 feet of the resources shall be halted and the City's Planning Manager and the San Mateo County coroner shall be notified immediately, according to Section 5097.98 of the State Public Resources Code and Section 7050.5 of California's Health and Safety Code. If the remains are determined by the County coroner to be Native American, the Native American Heritage Commission (NAHC) shall be notified within 24 hours, and the guidelines of the NAHC shall be adhered to in the treatment and disposition of the remains. The project sponsor shall also retain a professional archaeologist with Native American burial experience to conduct a field investigation of the specific site and consult with the Most Likely Descendant, if any, identified by the NAHC. As necessary, the archaeologist may provide professional assistance to the Most Likely Descendant, including the excavation and removal of the human remains. The City of Daly City shall be responsible for approval of recommended mitigation as it deems appropriate, taking account of the provisions of State law, as set forth in CEQA Guidelines section 15064.5(e) and Public Resources Code section 5097.98. The project sponsor shall implement approved mitigation, to be verified by the City of Daly City, before the resumption of ground-disturbing activities within 100 feet of where the remains were discovered.

*D. Geology and Soils:*

**MM GEO-6.1:** Should a unique paleontological resource or site or unique geological feature be identified at the project site during any phase of construction, all ground disturbing activities within 25 feet shall cease and the City's Planning Manager notified immediately. A qualified paleontologist shall evaluate the find and prescribe mitigation measures to reduce impacts to a less than significant level. Work may proceed on other parts of the project site while mitigation for paleontological resources or geologic features is implemented. Upon completion of the paleontological assessment, a report shall be submitted to the City and, if paleontological materials are recovered, a paleontological repository, such as the University of California Museum of Paleontology.

*E. Hazards and Hazardous Materials:*

**MM HAZ-2.1:** Prepare a site management plan for review and approval by the San Mateo County Environmental Health Services Division (SMCEHSD). Proof of approval or actions for site work required by the SMCEHSD must be provided to the Director of Community Development prior to the issuance of any demolition or building permits.

*F. Noise:*

**MM NOI-1.1:** The applicant shall incorporate the following practices into the construction documents to be implemented by the project contractor:

- Construction activities shall be limited to the hours between 8:00 am and 5:00 pm, Monday through Friday, and prohibited on weekends and holidays in accordance with the City's General Plan, unless permission is granted with a development permit or other planning approval.
- Equip all internal combustion engine-driven equipment with intake and exhaust mufflers that are in good condition and appropriate for the equipment.
- Unnecessary idling of internal combustion engines should be strictly prohibited.
- Locate stationary noise-generating equipment, such as air compressors or portable power generators, as far as possible from nearby receptors. If they must be located near receptors, adequate muffling (with enclosures where feasible and appropriate) shall be used reduce noise levels at nearby receptors. Any enclosure openings or venting shall face away from receptors.
- Utilize "quiet" air compressors and other stationary noise sources where technology exists.
- A temporary noise control blanket barrier could be erected, if necessary, along building facades facing construction sites. This measure would only be necessary if conflicts occurred which were irresolvable by proper scheduling. Noise control blanket barriers can be rented and quickly erected.
- Control noise from construction workers' radios to a point where they are not audible at existing structures bordering the project site.
- The contractor shall prepare a detailed construction plan identifying the schedule for major noise-generating construction activities. The construction plan shall identify a procedure for coordination with adjacent land uses so that construction activities can be scheduled to minimize noise disturbance.
- Neighbors located adjacent to the construction site shall be notified of the construction schedule in writing.
- Designate a "disturbance coordinator" who would be responsible for responding to any complaints about construction noise. The disturbance coordinator will determine the cause of the noise complaint (e.g., bad muffler, etc.) and will

require that reasonable measures be implemented to correct the problem. Conspicuously post a telephone number for the disturbance coordinator at the construction site and include in it the notice sent to neighbors regarding the construction schedule.

#### **IV. FINDING**

The City of Daly City hereby finds that the proposed project could have a significant effect on the environment; however, there would not be a significant effect in this case because mitigation measures summarized above and described in the Initial Study are included in the project which will reduce all identified potential impacts to less than significant levels.

## **SECTION 1.0 INTRODUCTION AND PURPOSE**

---

### **1.1 PURPOSE OF THE INITIAL STUDY**

The City of Daly City, as the Lead Agency, has prepared this Initial Study for the 141 3<sup>rd</sup> Avenue Residential Project in compliance with the California Environmental Quality Act (CEQA), the CEQA Guidelines (California Code of Regulations §15000 et. seq.) and the regulations and policies of the City of Daly City, California.

The project proposes a General Plan amendment and rezoning to allow the construction of 14 new townhomes at 141 3<sup>rd</sup> Avenue, Daly City. This Initial Study evaluates the environmental impacts that might reasonably be anticipated to result from implementation of the proposed project.

### **1.2 PUBLIC REVIEW PERIOD**

Publication of this Initial Study marks the beginning of a 20-day public review and comment period. During this period, the Initial Study will be available to local, state, and federal agencies and to interested organizations and individuals for review. Written comments concerning the environmental review contained in this Initial Study during the 20-day public review period should be sent to:

Michael Van Lonkhuysen  
Planning Manager  
Planning Division  
333 90<sup>th</sup> Street  
Daly City, CA 94015

### **1.3 CONSIDERATION OF THE INITIAL STUDY AND PROJECT**

Following the conclusion of the public review period, the City of Daly City will consider the adoption of the Initial Study/Mitigated Negative Declaration (MND) for the project at a regularly scheduled meeting. The City shall consider the Initial Study/MND together with any comments received during the public review process. Upon adoption of the MND, the City may proceed with project approval actions.

### **1.4 NOTICE OF DETERMINATION**

If the project is approved, the City will file a Notice of Determination (NOD), which will be available for public inspection and posted within 24 hours of receipt at the County Clerk's Office for 30 days. The filing of the NOD starts a 30-day statute of limitations on court challenges to the approval under CEQA (CEQA Guidelines Section 15075(g)).

## **SECTION 2.0      PROJECT INFORMATION**

---

### **2.1                  PROJECT TITLE**

141 3<sup>rd</sup> Avenue Residential (File Nos. GPA-8-20-14643, ZC-8-20-14633, SUB-8-20-15634, UPR-8-20-14642, DR-8-20-14636)

### **2.2                  LEAD AGENCY CONTACT**

Michael Van Lonkhuysen  
Planning Manager  
Planning Division  
333 90<sup>th</sup> Street  
Daly City, CA 94015

### **2.3                  PROJECT APPLICANT**

Clarum Homes  
412 Olive Avenue  
Palo Alto, CA 94306

### **2.4                  PROJECT LOCATION**

The approximately 0.71-acre site is located at 141 3<sup>rd</sup> Avenue (Assessor Parcel Numbers 006-254-030 and 006-254-020). A regional map and vicinity map of the project site are shown in Figure 2.6-1 and Figure 2.6-2. An aerial photograph with surrounding land uses is shown on Figure 2.6-3.

### **2.5                  ASSESSOR'S PARCEL NUMBERS**

006-254-030 and 006-254-020

### **2.6                  GENERAL PLAN DESIGNATION AND ZONING DISTRICT**

The project site has a General Plan land use designation of Residential – Low Density (R-LD) and is zoned I-D Interim District.

REGIONAL MAP

FIGURE 2.6-1

VICINITY MAP

FIGURE 2.6-2

AERIAL PHOTOGRAPH AND SURROUNDING LAND USES

FIGURE 2.6-3

## **SECTION 3.0 PROJECT DESCRIPTION**

---

### **3.1 PROJECT OVERVIEW AND LOCATION**

The approximately 0.71-acre site is located at 141 3<sup>rd</sup> Avenue (Assessor Parcel Numbers 006-254-030 and 006-254-020) in the City of Daly City. The project site has a General Plan land use designation of Residential – Low Density (R-LD) and is zoned I-D Interim District. The project site is bounded by 3<sup>rd</sup> Avenue to the west, single family homes to the north and east, and townhouses to the south.

The project proposes a General Plan amendment to Residential – Medium Density (R-MD) to allow for a rezoning of the project site to R-3, Multiple-Family Residential. The project would construct 14 new three-story townhomes, each with a two-car tandem garage. The project would include a 120-foot internal access road, associated private driveways, landscaping, and utility improvements. The project components, including the townhomes, landscaping, site access and parking, and construction details are described below. A conceptual site plan and conceptual elevations are shown in Figure 3.2-1, Figure 3.2-2, and Figure 3.2-3, respectively.

### **3.2 PROJECT COMPONENTS**

#### **3.2.1 General Plan Amendment and Rezoning**

The project site has a General Plan land use designation of Residential (R-LD) and is zoned I-D Interim District. In order to develop the proposed project on the 0.71-acre site, the project proposes to amend the General Plan land use designation to Residential – Medium Density (R-MD) and rezone the site to R-3, Multiple-Family Residential. Rezoning would allow the project to develop multi-family housing without a use permit.

#### **3.2.2 Townhomes**

The project would construct 14 new three-story townhomes. Each townhome would be approximately 2,055 square feet and would include a two-car tandem garage. Each unit would also include a minimum of 150 square feet of open space. Units directly adjacent to 3<sup>rd</sup> Avenue would include private front and rear yards, while units set back from 3<sup>rd</sup> Avenue would only have private rear yards. Each unit would also include a second-story covered patio. All units would contain three bedrooms. The townhomes would have a minimum setback of 15-feet from the western property line on 3<sup>rd</sup> Avenue and a minimum setback of ten-feet from the eastern property line. The townhomes along the 3<sup>rd</sup> Avenue frontage would have a 4.5-foot setback from the north property line and an approximately eight-foot setback from the south property line. The rear townhomes would have a three-foot setback from both the north and south property lines. The townhomes would reach a maximum height of 35 feet above ground level.

## FIGURE 3.2-1

NORTH AND EAST ELEVATIONS

FIGURE 3.2-2

SOUTH AND WEST ELEVATIONS

FIGURE 3.2-3

### **3.2.3      Landscaping**

The project would include landscaping throughout the project site. Landscaping would include streetscape planting with bioretention areas and street trees along 3<sup>rd</sup> Avenue, low hedges and accent shrubs/trees between the townhomes, vines along either side of the driveway, a screen planting along the northern end of the internal access road, and a bioretention planting along the southern end of the internal access road. Streetscape fencing and internal neighbor fences would also be included.

### **3.2.4      Site Access and Parking**

The project would include one, 26-foot-wide driveway along 3<sup>rd</sup> Avenue. The project driveway would lead to a 120-foot internal access road perpendicular to the driveway. Each townhome would include a private driveway extending from the internal access road. Townhome driveways would range from approximately five to 13 feet long. Parking would be provided for each unit via two-car tandem garages in each townhome. Each unit would include at least one electric vehicle (EV) ready space. Additionally, there are seven existing street parking spaces in front of the project site along 3<sup>rd</sup> Avenue.

Pedestrian access would be provided to the front townhomes via private, gated walkways extending from the 3<sup>rd</sup> Avenue sidewalk. A five-foot wide, gated sidewalk would run adjacent to the project driveway and provide pedestrian access to the remainder of the townhomes.

### **3.2.5      Utility Improvements**

The project would connect to existing sewer, electrical, and storm drain utilities on 3<sup>rd</sup> Avenue. All above-ground utilities would be placed below ground. On-site stormwater treatment would occur through the use of flow-through planters and bio-retention areas. The project would include modifications to the existing water system. The project would upsize an approximately 480 feet of the existing four-inch diameter water pipe in 3<sup>rd</sup> Avenue to an eight-inch water pipe from Castle Street to Habitat Way. The existing four-inch pipe is partially under the sidewalk and would be abandoned. The new eight-inch diameter water pipe would be constructed in the street right-of-way. All water connections currently served by the existing four-inch pipe would be transferred to the new eight-inch pipe.

There is an existing well buried on-site that was likely used for prior greenhouse irrigation purposes. The project will abandon and/or destroy the existing well.

### **3.2.6      Green Building Measures**

The project would include green building measures to reduce energy use and project-generated greenhouse gas emissions. The green building measures proposed by the project include:

- Rooftop solar panels
- All-electric buildings
- Water-efficient landscaping

### **3.2.7            Construction**

Construction, which includes demolition, site preparation, and construction of the project, is estimated to take approximately nine months to complete.

### **3.3                USES OF THE INITIAL STUDY/MITIGATED NEGATIVE DECLARATION**

This Initial Study/MND provides decision makers in the City of Daly City (the Lead Agency), responsible agencies, and the general public with relevant environmental information to use in considering the proposed project. It is intended that this Initial Study be used for discretionary approvals necessary to implement the project, as proposed. These discretionary actions may include, but are not limited to, the following:

- General Plan Amendment
- Rezoning
- Major Subdivision
- Design Review Permit
- Use Permit
- Grading Permit
- Demolition Permit
- Building Permit
- Well Destruction Permit - San Mateo County Environmental Health Services

## SECTION 4.0 ENVIRONMENTAL SETTING, CHECKLIST, AND IMPACT DISCUSSION

---

This section presents the discussion of impacts related to the following environmental subjects in their respective subsections:

|      |                                    |      |                                    |
|------|------------------------------------|------|------------------------------------|
| 4.1  | Aesthetics                         | 4.12 | Mineral Resources                  |
| 4.2  | Agriculture and Forestry Resources | 4.13 | Noise                              |
| 4.3  | Air Quality                        | 4.14 | Population and Housing             |
| 4.4  | Biological Resources               | 4.15 | Public Services                    |
| 4.5  | Cultural Resources                 | 4.16 | Recreation                         |
| 4.6  | Energy                             | 4.17 | Transportation                     |

The discussion for each environmental subject includes the following subsections:

- **Environmental Setting** – This subsection 1) provides a brief overview of relevant plans, policies, and regulations that compose the regulatory framework for the project and 2) describes the existing, physical environmental conditions at the project site and in the surrounding area, as relevant.
- **Impact Discussion** – This subsection 1) includes the recommended checklist questions from Appendix G of the CEQA Guidelines to assess impacts and 2) discusses the project’s impact on the environmental subject as related to the checklist questions. For significant impacts, feasible mitigation measures are identified. “Mitigation measures” are measures that will minimize, avoid, or eliminate a significant impact (CEQA Guidelines Section 15370). Each impact is numbered to correspond to the checklist question being answered. For example, Impact BIO-1 answers the first checklist question in the Biological Resources section. Mitigation measures are also numbered to correspond to the impact they address. For example, MM BIO-1.1 refers to the first mitigation measure for the first impact in the Biological Resources section.

## **4.1 AESTHETICS**

### **4.1.1 Environmental Setting**

#### **4.1.1.1 *Regulatory Framework***

##### **State**

##### **Senate Bill 743**

Senate Bill (SB) 743 was adopted in 2013 and requires lead agencies to use alternatives to level of service (LOS) for evaluating transportation impacts, specifically vehicle miles traveled (VMT). SB 743 also included changes to CEQA that apply to transit-oriented developments, as related to aesthetics and parking impacts. Under SB 743, a project's aesthetic impacts will no longer be considered significant impacts on the environment if:

- The project is a residential, mixed-use residential, or employment center project, and
- The project is located on an infill site within a transit priority area.<sup>1</sup>

SB 743 also clarifies that local governments retain their ability to regulate a project's aesthetics impacts outside of the CEQA process. The project site is located within a transit priority area.

##### **Streets and Highway Code Sections 260 through 263**

The California Scenic Highway Program (Streets and Highway Code, Sections 260 through 263) is managed by the California Department of Transportation (Caltrans). The program is intended to protect and enhance the natural scenic beauty of California highways and adjacent corridors through special conservation treatment. State laws governing the Scenic Highway Program are found in the Streets and Highway Code, Sections 260 through 263. There are three eligible State scenic highways within the City of Daly City, although none are officially designated; they include Skyline Boulevard (State Route (SR) 35), Cabrillo Highway (SR 1), and Junipero Serra (I-280).

##### **Local**

##### **Daly City 2030 General Plan**

The Daly City 2030 General Plan (General Plan) includes policies for the purpose of avoiding or mitigating impacts resulting from development projects within the City. The following policies are specific to aesthetics and are applicable to the proposed project.

---

<sup>1</sup> An "infill site" is defined as "a lot located within an urban area that has been previously developed, or on a vacant site where at least 75 percent of the perimeter of the site adjoins, or is separated only by an improved public right-of-way from, parcels that are developed with qualified urban uses." A "transit priority area" is defined as "an area within 0.5 mile of a major transit stop that is existing or planned, if the planned stop is scheduled to be completed within the planning horizon included in a Transportation Improvement Program adopted pursuant to Section 450.216 or 450.322 of Title 23 of the Code of Federal Regulations." A "major transit stop" means "a site containing an existing rail transit station, a ferry terminal served by either a bus or rail transit service, or the intersection of two or more major bus routes with a frequency of service interval of 15 minutes or less during the morning and afternoon peak commute periods." Source: Office of Planning and Research. "Changes to CEQA for Transit Oriented Development – FAQ." October 14, 2014. Accessed November 11, 2020. <http://www.opr.ca.gov/ceqa/updates/sb-743/transit-oriented.html>.

| <b>Policy/Task</b> | <b>Description</b>                                                                                                                                                                                                                                                                                                                                                                                                      |
|--------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Task CE-20.7       | As a part of all new development, require, where appropriate, the provision of pedestrian-oriented signs, pedestrian-scaled lighting, benches, and other street furniture so as to make non-motorized forms of travel comfortable and attractive alternatives to the automobile. Where necessary in new development, the City may require additional sidewalk and/or right-of-way width to accommodate these amenities. |
| Policy LU-16       | Regulate the size, quantity, and location of signs to maintain and enhance the visual appearance of Daly City.                                                                                                                                                                                                                                                                                                          |
| Policy RME-20      | Recognize the physical differences between different parts of the City and regulate land uses within these areas accordingly.                                                                                                                                                                                                                                                                                           |
| Task RME-20.4      | Incorporate design features in new development that reflect the character of the neighborhood, to ensure that new construction is compatible with existing development.                                                                                                                                                                                                                                                 |
| Policy LU-17       | Ensure that private development is responsible for providing any on-or off-site improvements related to and/or mitigating the impacts it causes.                                                                                                                                                                                                                                                                        |

### Design Review Ordinance

Chapter 17.45 of the Daly City Zoning Ordinance requires that certain projects undergo design review prior to issuance of any construction permits. A design review committee, as appointed by the mayor, shall evaluate the project's design, layout, and other features to ensure they are compatible with the existing setting. Projects required to undergo design review include residential projects consisting of four or more dwelling units.

#### **4.1.1.2 Existing Conditions**

The project site consists primarily of a vacant lot covered in grass and weeds. There is also a two-story single-family residence on the northwestern corner of the project site. There is various debris adjacent to the single-family residence on the project site. The surrounding residences to the east, south, and west across 3<sup>rd</sup> Avenue primarily consist of two-story, zero lot line single-family residences. The surrounding residences vary in color and architectural style. Although the surrounding residences are all similar in height, the roof lines have a stair-like appearance due to the slope of the vicinity. Views from the project site include the surrounding residences, San Bruno Mountain to the east, and hills to the south. Views of the project site are shown in Photos 1-4, below.

The nearest officially designated State Scenic Highway is Interstate 280 (I-280). The segment that is designated as scenic ends in San Bruno, adjacent to Valleywood Drive<sup>2</sup>, approximately four miles south of the project site.

#### 4.1.2 Impact Discussion

|                                                                                                                                                                                                                                                                                                       | Potentially<br>Significant<br>Impact | Less than<br>Significant<br>with Mitigation<br>Incorporated | Less than<br>Significant<br>Impact  | No Impact                           |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------|-------------------------------------------------------------|-------------------------------------|-------------------------------------|
| Except as provided in Public Resources Code Section 21099, would the project:                                                                                                                                                                                                                         |                                      |                                                             |                                     |                                     |
| 1) Have a substantial adverse effect on a scenic vista?                                                                                                                                                                                                                                               | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 2) Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?                                                                                                                                              | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 3) In non-urbanized areas, substantially degrade the existing visual character or quality of public views of the site and its surroundings? <sup>3</sup><br>If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality? | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| 4) Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?                                                                                                                                                                                 | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |

---

**Impact AES-1:** The project would not have a substantial adverse effect on a scenic vista. **(No Impact)**

---

The General Plan identifies three scenic vistas within Daly City: the coastline, San Bruno Mountain, and scenic corridors. The project site is not visible from the coastline due to distance and surrounding development. Scenic corridors identified in the General Plan include Route 35, I-280, Route 1, Guadalupe Canyon Parkway, Mission Street, John Daly Boulevard, and Lake Merced Boulevard. The nearest of these scenic corridors is Mission Street. The project site is not visible from Mission Street due to surrounding development. The project site would not be visible from the other scenic corridors due to surrounding development and distance.

The project site may be visible from San Bruno Mountain. However, the project would consist of infill development in a residential neighborhood. The proposed townhomes would not be substantially taller than the surrounding buildings and would not be noticeable from San Bruno Mountain because they would be part of larger views of urban development in Daly City. Based on its location and the existing urban development in the surrounding area, the project would not have a substantial adverse effect on a scenic vista. **(No Impact)**

---

**Impact AES-2:** The project would not substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway. **(No Impact)**

---

---

<sup>3</sup> Public views are those that are experienced from publicly accessible vantage points.

There are no designated State Scenic Highways within Daly City. As discussed in Section 4.1.1.2 Existing Conditions, the nearest segment of an officially designated State Scenic Highway is four miles south of the project site on I-280. The project site would not be visible from this segment of I-280 and, therefore, the project would not substantially damage scenic resources within a state scenic highway. **(No Impact)**

---

|                      |                                                                                                                                                                                                                                                                                    |
|----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Impact AES-3:</b> | The project would not substantially degrade the existing visual character or quality of public views of the site and its surroundings. The project would not conflict with applicable zoning and other regulations governing scenic quality. <b>(Less than Significant Impact)</b> |
|----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

---

The project site is currently undeveloped, with the exception of an unoccupied single-family residence in the northwestern corner. The proposed townhomes would be consistent with the surrounding residential neighborhood, which is primarily made up of existing zero lot line single family residences. The conceptual renderings of the proposed project show use of largely neutral colors on the exterior stucco and siding along with incorporation of a modern architectural design. The upper floors of the buildings would step back from the lower floors and recessed windows and entrances would provide variation in the building facades. The project would also include streetscape plantings and street trees along 3<sup>rd</sup> Avenue to improve the visual quality of the site. The project would partially block the existing view of San Bruno Mountain from the public street, however, 3<sup>rd</sup> Avenue is not a designated scenic corridor and intermittent views of San Bruno Mountain would continue to be provided in the area. The project would not substantially degrade the existing visual character or quality of public views of the site and its surroundings.

The project would be consistent with the guidelines for R-3 Medium Density in the Zoning Code as well as the Daly City Design Guidelines. The project would be required to obtain a Design Review Permit pursuant to Chapter 17.45 of the Daly City Zoning Ordinance. The project would not conflict with applicable zoning and other regulations governing scenic quality. **(Less than Significant Impact)**

---

|                      |                                                                                                                                                                                |
|----------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Impact AES-4:</b> | The project would not create a new source of substantial light or glare which would adversely affect day or nighttime views in the area. <b>(Less than Significant Impact)</b> |
|----------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

---

The proposed townhomes would primarily consist of stucco exteriors. Glass windows and metal railings would have the potential to increase daytime glare. The project would also include exterior nighttime lighting. The glare and lighting generated by the project would be similar to that generated by surrounding development. Compliance with the Design Review process and the General Plan policies would ensure that light and glare impacts are less than significant. The project, therefore, would not create a new substantial light or glare which would adversely affect day or nighttime views in the area. **(Less than Significant Impact)**

## 4.2 AGRICULTURE AND FORESTRY RESOURCES

### 4.2.1 Environmental Setting

#### 4.2.1.1 *Regulatory Framework*

##### State

##### Farmland Mapping and Monitoring Program

The California Department of Conservation's Farmland Mapping and Monitoring Program (FMMP) assesses the location, quality, and quantity of agricultural land and conversion of these lands over time. Agricultural land is rated according to soil quality and irrigation status. The best quality land is identified as Prime Farmland. In CEQA analyses, the FMMP classifications and published county maps are used, in part, to identify whether agricultural resources that could be affected are present on-site or in the project area.<sup>4</sup>

##### California Land Conservation Act

The California Land Conservation Act (Williamson Act) enables local governments to enter into contracts with private landowners to restrict parcels of land to agricultural or related open space uses. In return, landowners receive lower property tax assessments. In CEQA analyses, identification of properties that are under a Williamson Act contract is used to also identify sites that may contain agricultural resources or are zoned for agricultural uses.<sup>5</sup>

##### Fire and Resource Assessment Program

The California Department of Forestry and Fire Protection (CAL FIRE) identifies forest land, timberland, and lands zoned for timberland production that can (or do) support forestry resources.<sup>6</sup> Programs such as CAL FIRE's Fire and Resource Assessment Program are used to identify whether forest land, timberland, or timberland production areas that could be affected are located on or adjacent to a project site.<sup>7</sup>

#### 4.2.1.2 *Existing Conditions*

The project site is currently a primarily vacant lot surrounded by a residential neighborhood. The project site is zoned I-D, Interim District. The project site is not zoned for agriculture, not covered by a Williamson Act contract, and is not used or zoned for timber or agricultural production.

<sup>5</sup> California Department of Conservation. "Williamson Act." Accessed November 12, 2020. <http://www.conservation.ca.gov/dlrp/lca>.

<sup>6</sup> Forest Land is land that can support 10 percent native tree cover and allows for management of forest resources (California Public Resources Code Section 12220(g)); Timberland is land not owned by the federal government or designated as experimental forest land that is available for, and capable of, growing trees to produce lumber and other products, including Christmas trees (California Public Resources Code Section 4526); and Timberland Production is land used for growing and harvesting timber and compatible uses (Government Code Section 51104(g)).

## 4.2.2 Impact Discussion

|                                                                                                                                                                                                                                                                                            | Potentially<br>Significant<br>Impact | Less than<br>Significant<br>with Mitigation<br>Incorporated | Less than<br>Significant<br>Impact | No Impact                           |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------|-------------------------------------------------------------|------------------------------------|-------------------------------------|
| Would the project:                                                                                                                                                                                                                                                                         |                                      |                                                             |                                    |                                     |
| 1) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?                                             | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input type="checkbox"/>           | <input checked="" type="checkbox"/> |
| 2) Conflict with existing zoning for agricultural use, or a Williamson Act contract?                                                                                                                                                                                                       | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input type="checkbox"/>           | <input checked="" type="checkbox"/> |
| 3) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code Section 12220(g)), timberland (as defined by Public Resources Code Section 4526), or timberland zoned Timberland Production (as defined by Government Code Section 51104(g))? | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input type="checkbox"/>           | <input checked="" type="checkbox"/> |
| 4) Result in a loss of forest land or conversion of forest land to non-forest use?                                                                                                                                                                                                         | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input type="checkbox"/>           | <input checked="" type="checkbox"/> |
| 5) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland to non-agricultural use or conversion of forest land to non-forest use?                                                                                | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input type="checkbox"/>           | <input checked="" type="checkbox"/> |

---

**Impact AG-1:** The project would not convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance, as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use. **(No Impact)**

---

According to the Department of Conservation, the project site is designated as Urban and Built-Up Land.<sup>8</sup> The project site is not designated for farmland. Therefore, the project would not convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance to non-agricultural use. **(No Impact)**

---

**Impact AG-2:** The project would not conflict with existing zoning for agricultural use, or a Williamson Act contract. **(No Impact)**

---

The project site is currently zoned I-D, Interim District. The project site is not under a Williamson Act contract. **(No Impact)**

|                     |                                                                                                                                                                       |
|---------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Impact AG-3:</b> | The project would not conflict with existing zoning for, or cause rezoning of, forest land, timberland, or timberland zoned Timberland Production. <b>(No Impact)</b> |
|---------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|

---

The project site is not designated or zoned as timberland or forest land. For this reason, the project would have not conflict with existing zoning for, or cause rezoning of, forest land, timberland, or timberland zoned Timberland Production. **(No Impact)**

---

|                     |                                                                                                                          |
|---------------------|--------------------------------------------------------------------------------------------------------------------------|
| <b>Impact AG-4:</b> | The project would not result in a loss of forest land or conversion of forest land to non-forest use. <b>(No Impact)</b> |
|---------------------|--------------------------------------------------------------------------------------------------------------------------|

---

The project site does not contain any forest land. The project would not result in a loss of forest land or conversion of forest land to non-forest use. **(No Impact)**

---

|                     |                                                                                                                                                                                                                                                    |
|---------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Impact AG-5:</b> | The project would not involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use. <b>(No Impact)</b> |
|---------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

---

The project would not involve any changes in the existing environment which could result in conversion of Farmland to non-agricultural use or conversion or forest land to non-forest use. **(No Impact)**

## 4.3 AIR QUALITY

The following discussion is based, in part, on a Construction Community Risk Assessment prepared for the project by Illingworth & Rodkin, Inc. in January 2021. A copy of the report is included as Appendix A in this Initial Study.

### 4.3.1 Environmental Setting

#### 4.3.1.1 *Background information*

##### **Criteria Pollutants**

Air quality in the Bay Area is assessed related to six common air pollutants (referred to as criteria pollutants), including ground-level ozone (O<sub>3</sub>), nitrogen oxides (NO<sub>x</sub>), particulate matter (PM), carbon monoxide (CO), sulfur oxides (SO<sub>x</sub>), and lead.<sup>9</sup> Criteria pollutants are regulated because they result in health effects. An overview of the sources of criteria pollutants and their associated health are summarized in Table 4.3-1. The most commonly regulated criteria pollutants in the Bay Area are discussed further below.

| <b>Table 4.3-1: Health Effects of Air Pollutants</b>                                           |                                                                                                                                                           |                                                                                                                                                                                                                                                 |
|------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Pollutants</b>                                                                              | <b>Sources</b>                                                                                                                                            | <b>Primary Effects</b>                                                                                                                                                                                                                          |
| Ozone (O <sub>3</sub> )                                                                        | Atmospheric reaction of organic gases with nitrogen oxides in sunlight                                                                                    | <ul style="list-style-type: none"><li>• Aggravation of respiratory and cardiovascular diseases</li><li>• Irritation of eyes</li><li>• Cardiopulmonary function impairment</li></ul>                                                             |
| Nitrogen Dioxide (NO <sub>2</sub> )                                                            | Motor vehicle exhaust, high temperature stationary combustion, atmospheric reactions                                                                      | <ul style="list-style-type: none"><li>• Aggravation of respiratory illness</li><li>• Reduced visibility</li></ul>                                                                                                                               |
| Fine Particulate Matter (PM <sub>2.5</sub> ) and Coarse Particulate Matter (PM <sub>10</sub> ) | Stationary combustion of solid fuels, construction activities, industrial processes, atmospheric chemical reactions                                       | <ul style="list-style-type: none"><li>• Reduced lung function, especially in children</li><li>• Aggravation of respiratory and cardiorespiratory diseases</li><li>• Increased cough and chest discomfort</li><li>• Reduced visibility</li></ul> |
| Toxic Air Contaminants (TACs)                                                                  | Cars and trucks, especially diesel-fueled; industrial sources, such as chrome platers; dry cleaners and service stations; building materials and products | <ul style="list-style-type: none"><li>• Cancer</li><li>• Chronic eye, lung, or skin irritation</li><li>• Neurological and reproductive disorders</li></ul>                                                                                      |

High O<sub>3</sub> levels are caused by the cumulative emissions of reactive organic gases (ROG) and NO<sub>x</sub>. These precursor pollutants react under certain meteorological conditions to form high O<sub>3</sub> levels. Controlling the emissions of these precursor pollutants is the focus of the Bay Area's attempts to

<sup>9</sup> The area has attained both state and federal ambient air quality standards for CO. The project does not include substantial new emissions of sulfur dioxide or lead. These criteria pollutants are not discussed further.

reduce O<sub>3</sub> levels. The highest O<sub>3</sub> levels in the Bay Area occur in the eastern and southern inland valleys that are downwind of air pollutant sources.

PM is a problematic air pollutant in the Bay Area. PM is assessed and measured in terms of respirable particulate matter or particles that have a diameter of 10 micrometers or less (PM<sub>10</sub>) and fine particulate matter where particles have a diameter of 2.5 micrometers or less (PM<sub>2.5</sub>). Elevated concentrations of PM<sub>10</sub> and PM<sub>2.5</sub> are the result of both region-wide emissions and localized emissions.

### **Toxic Air Contaminants**

TACs are a broad class of compounds known to have health effects. They include but are not limited to criteria pollutants. TACs are found in ambient air, especially in urban areas, and are caused by industry, agriculture, diesel fuel combustion, and commercial operations (e.g., dry cleaners). TACs are typically found in low concentrations, even near their source (e.g., diesel particulate matter [DPM] near a freeway).

Diesel exhaust is the predominant TAC in urban air and is estimated to represent about three-quarters of the cancer risk from TACs. Diesel exhaust is a complex mixture of gases, vapors, and fine particles. Medium- and heavy-duty diesel trucks represent the bulk of DPM emissions from California highways. The majority of DPM is small enough to be inhaled into the lungs. Most inhaled particles are subsequently exhaled, but some deposit on the lung surface or are deposited in the deepest regions of the lungs (most susceptible to injury).<sup>10</sup> Chemicals in diesel exhaust, such as benzene and formaldehyde, have been previously identified as TACs by the California Air Resources Board (CARB).

### **Sensitive Receptors**

Some groups of people are more affected by air pollution than others. CARB has identified the following persons who are most likely to be affected by air pollution: children under 16, the elderly over 65, athletes, and people with cardiovascular and chronic respiratory diseases. These groups are classified as sensitive receptors. Locations that may contain a high concentration of these sensitive population groups include residential areas, hospitals, daycare facilities, elder care facilities, and elementary schools.

#### **4.3.1.2 Regulatory Framework**

##### **Federal and State**

###### Clean Air Act

At the federal level, the United States Environmental Protection Agency (EPA) is responsible for overseeing implementation of the Clean Air Act and its subsequent amendments. The federal Clean Air Act requires the EPA to set national ambient air quality standards for the six common criteria pollutants (discussed previously), including PM, O<sub>3</sub>, CO, SO<sub>x</sub>, NO<sub>x</sub>, and lead.

---

<sup>10</sup> California Air Resources Board. "Overview: Diesel Exhaust and Health." Accessed November 17, 2020. <https://www.arb.ca.gov/research/diesel/diesel-health.htm>.

CARB is the state agency that regulates mobile sources throughout the state and oversees implementation of the state air quality laws and regulations, including the California Clean Air Act. The EPA and the CARB have adopted ambient air quality standards establishing permissible levels of these pollutants to protect public health and the climate. Violations of ambient air quality standards are based on air pollutant monitoring data and are determined for each air pollutant. Attainment status for a pollutant means that a given air district meets the standard set by the EPA and/or CARB.

### Risk Reduction Plan

To address the issue of diesel emissions in the state, CARB developed the Risk Reduction Plan to Reduce Particulate Matter Emissions from Diesel-Fueled Engines and Vehicles. In addition to requiring more stringent emission standards for new on-road and off-road mobile sources and stationary diesel-fueled engines to reduce particulate matter emissions by 90 percent, the plan involves application of emission control strategies to existing diesel vehicles and equipment to reduce diesel particulate matter (DPM) (in addition to other pollutants). Implementation of this plan, in conjunction with stringent federal and CARB-adopted emission limits for diesel fueled vehicles and equipment (including off-road equipment), will significantly reduce emissions of DPM and NO<sub>x</sub>.

## **Regional**

### 2017 Clean Air Plan

The Bay Area Air Quality Management District (BAAQMD) is the agency primarily responsible for assuring that the federal and state ambient air quality standards are maintained in the San Francisco Bay Area. Regional air quality management districts, such as BAAQMD, must prepare air quality plans specifying how state and federal air quality standards will be met. BAAQMD's most recently adopted plan is the Bay Area 2017 Clean Air Plan (2017 CAP). The 2017 CAP focuses on two related BAAQMD goals: protecting public health and protecting the climate. To protect public health, the 2017 CAP describes how BAAQMD will continue its progress toward attaining state and federal air quality standards and eliminating health risk disparities from exposure to air pollution among Bay Area communities. To protect the climate, the 2017 CAP includes control measures designed to reduce emissions of methane and other super-greenhouse gases (GHGs) that are potent climate pollutants in the near-term, and to decrease emissions of carbon dioxide by reducing fossil fuel combustion.<sup>11</sup>

### CEQA Air Quality Guidelines

The BAAQMD CEQA Air Quality Guidelines are intended to serve as a guide for those who prepare or evaluate air quality impact analyses for projects and plans in the San Francisco Bay Area. Jurisdictions in the San Francisco Bay Area Air Basin utilize the thresholds and methodology for assessing air quality impacts developed by BAAQMD within their CEQA Air Quality Guidelines. The guidelines include information on legal requirements, BAAQMD rules, methods of analyzing impacts, and recommended mitigation measures.

<sup>11</sup> BAAQMD. *Final 2017 Clean Air Plan*. April 19, 2017. <http://www.baaqmd.gov/plans-and-climate/air-quality-plans/current-plans>.

### Daly City 2030 General Plan

The Daly City 2030 General Plan (General Plan) includes policies for the purpose of avoiding or mitigating impacts resulting from development projects within the City. The following policies are specific to air quality and are applicable to the proposed project.

| <b>Policy/Task</b> | <b>Description</b>                                                                                                                                                                                                                                                                                          |
|--------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Policy RME-5       | Assess projected air emissions from new development and associated construction and demolition activities in conformance with the BAAQMD CEQA Guidelines, and relative to state and federal standards.                                                                                                      |
| Task RME-5.1       | Amend the Planning Division's development review procedures to include a formal step that would help identify how a development project can incorporate design or functional changes that will minimize air quality impacts.                                                                                |
| Task RME-5.3       | Consider cumulative air quality impacts consistent with the region's Clean Air Plan and State law.                                                                                                                                                                                                          |
| Task RME-5.4       | Require the preparation of a Transportation Systems Management plan for new development that has been determined to contribute to a reduction in location air quality.                                                                                                                                      |
| Task RME-5.5       | Consult with BAAQMD to identify stationary and mobile TAC sources and determine the need for and requirements of a health risk assessment for proposed developments.                                                                                                                                        |
| Policy RME-6       | Minimize exposure of residents to objectionable smoke and odors by proactively regulating potential sources.                                                                                                                                                                                                |
| Task RME-6.2       | Require new residential development projects and projects categorized as sensitive receptors to be located an adequate distance from facilities that are existing and potential sources of odor. An adequate separate distance will be determined based upon the type, size and operations of the facility. |

#### **4.3.1.3      *Existing Conditions***

The Bay Area is considered a non-attainment area for ground-level O<sub>3</sub> and PM<sub>2.5</sub> under both the federal Clean Air Act and state Clean Air Act. The area is also considered nonattainment for PM<sub>10</sub> under the state act, but not the federal act. The area has attained both state and federal ambient air quality standards for CO. As part of an effort to attain and maintain ambient air quality standards for O<sub>3</sub> and PM<sub>10</sub>, BAAQMD has established thresholds of significance for these air pollutants and their precursors. These thresholds are for O<sub>3</sub> precursor pollutants (ROG and NO<sub>x</sub>), PM<sub>10</sub>, and PM<sub>2.5</sub>, and apply to both construction period and operational period impacts.

The project site is currently vacant and, therefore, not a substantial source of air pollutant emissions. The closest sensitive receptors to the project site are in the single- and multi-family residences adjacent to and surrounding the project site. There are also students at the nearby Thornton High School (14 years and older) approximately 330 feet to the west of the site and Milestone Academy Preschool (2 years and older) approximately 450 feet to the southeast of the site.

## 4.3.2 Impact Discussion

|                                                                                                                                                                                                   | Potentially<br>Significant<br>Impact | Less than<br>Significant<br>with Mitigation<br>Incorporated | Less than<br>Significant<br>Impact  | No Impact                |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------|-------------------------------------------------------------|-------------------------------------|--------------------------|
| Would the project:                                                                                                                                                                                |                                      |                                                             |                                     |                          |
| 1) Conflict with or obstruct implementation of the applicable air quality plan?                                                                                                                   | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 2) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard? | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 3) Expose sensitive receptors to substantial pollutant concentrations?                                                                                                                            | <input type="checkbox"/>             | <input checked="" type="checkbox"/>                         | <input type="checkbox"/>            | <input type="checkbox"/> |
| 4) Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people?                                                                                 | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

### 4.3.2.1 *Thresholds of Significance*

#### **Impacts from the Project**

As discussed in CEQA Guidelines Section 15064(b), the determination of whether a project may have a significant effect on the environment calls for judgment on the part of the lead agency and must be based to the extent possible on scientific and factual data. The City of Daly City has considered the air quality thresholds updated by BAAQMD in May 2017 and regards these thresholds to be based on the best information available for the San Francisco Bay Area Air Basin and conservative in terms of the assessment of health effects associated with TACs and PM<sub>2.5</sub>. The BAAQMD CEQA Air Quality thresholds used in this analysis are identified in Table 4.3-2 below.

| Table 4.3-2: BAAQMD Air Quality Significance Thresholds                          |                                                 |                                             |                                      |
|----------------------------------------------------------------------------------|-------------------------------------------------|---------------------------------------------|--------------------------------------|
| Pollutant                                                                        | Construction Thresholds                         | Operation Thresholds                        |                                      |
|                                                                                  | Average Daily Emissions (pounds/day)            | Average Daily Emissions (pounds/day)        | Annual Average Emissions (tons/year) |
| Criteria Air Pollutants                                                          |                                                 |                                             |                                      |
| ROG, NO <sub>x</sub>                                                             | 54                                              | 54                                          | 10                                   |
| PM <sub>10</sub>                                                                 | 82 (exhaust)                                    | 82                                          | 15                                   |
| PM <sub>2.5</sub>                                                                | 54 (exhaust)                                    | 54                                          | 10                                   |
| CO                                                                               | Not Applicable                                  | 9.0 ppm (eight-hour) or 20.0 ppm (one-hour) |                                      |
| Fugitive Dust                                                                    | Dust Control Measures/Best Management Practices | Not Applicable                              |                                      |
| Health Risks and Hazards for New Sources (within a 1,000-foot Zone of Influence) |                                                 |                                             |                                      |
| Health Hazard                                                                    | Single Source                                   | Combined Cumulative Sources                 |                                      |
| Excess Cancer Risk                                                               | 10 per one million                              | 100 per one million                         |                                      |
| Hazard Index                                                                     | 1.0                                             | 10.0                                        |                                      |
| Incremental Annual PM <sub>2.5</sub>                                             | 0.3 µg/m <sup>3</sup>                           | 0.8 µg/m <sup>3</sup> (average)             |                                      |

---

**Impact AIR-1: The project would not conflict with or obstruct implementation of the applicable air quality plan. (Less than Significant Impact)**

---

The proposed project would not conflict with the 2017 CAP because it would be smaller than the BAAQMD CEQA Air Quality Guidelines Operational Criteria Pollutant Screening Size. The 2011 BAAQMD CEQA Air Quality Guidelines contain a screening table that lists the minimum unit count for residential projects, below which the project would not result in the generation of operational criteria air pollutants that exceed the threshold of significance. The screening threshold for townhouses is 451 dwelling units for operational criteria pollutants and 240 dwelling units for construction criteria air pollutants. The project, proposing 14 new townhomes, is well below this screening threshold.

Given that the project would not exceed the BAAQMD screening criteria, it would not result in the generation of operational-related criteria air pollutants and/or precursors that exceed the thresholds shown in Table 4.3-2. Thus, the project is not required to incorporate project-specific control measures listed in the 2017 CAP. Further, implementation of the project would not inhibit BAAQMD or partner agencies from continuing progress toward attaining state and federal air quality standards and eliminating health-risk disparities from exposure to air pollution among Bay Area communities, as described within the 2017 CAP. **(Less than Significant Impact)**

---

**Impact AIR-2:** The project would not result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard. **(Less than Significant Impact)**

---

As discussed in Impact AIR-1 above, the project falls below the BAAQMD screening thresholds and thus, would not generate a significant amount of criteria air pollutants during operation or construction. **(Less than Significant Impact)**

---

**Impact AIR-3:** The project would not expose sensitive receptors to substantial pollutant concentrations. **(Less than Significant Impact with Mitigation Incorporated)**

---

Sensitive receptors in the project vicinity include surrounding residences, Milestone Academy Preschool, and Thornton High School. The maximally exposed individual (MEI) was identified at a residence adjacent to the project's eastern boundary. Figure 4.3-1 shows the location of all sensitive receptors that the project would have potential to affect. These receptors would be exposed to TAC emissions associated with project construction (i.e., on-site construction and truck hauling emissions). Dispersion modeling was used to identify on-site and off-site concentrations of particulate matter and evaluate the health risks associated with the construction TAC emissions.

Community risk impacts are addressed by predicting increased lifetime cancer risk, the increase in annual PM<sub>2.5</sub> concentrations, and computing the Hazard Index (HI) for non-cancer health risks. Construction equipment and associated heavy-duty truck traffic generates diesel exhaust, which is a known TAC. The results of the health risk assessment for the MEI and the most affected school (Milestone Academy Preschool) are summarized below in Table 4.3-3. To provide the most conservative analysis, the MEI was assumed to be an infant.

| <b>Table 4.3-3: Construction Risk Impacts</b>                    |                                  |                                                   |                     |
|------------------------------------------------------------------|----------------------------------|---------------------------------------------------|---------------------|
| <b>Source</b>                                                    | <b>Cancer Risk (per million)</b> | <b>Annual PM<sub>2.5</sub> (µg/m<sup>3</sup>)</b> | <b>Hazard Index</b> |
| <b>BAAQMD Single-Source Threshold</b>                            | <b>&gt;10.0</b>                  | <b>&gt;0.3</b>                                    | <b>&gt;1.0</b>      |
| MEI (Adjacent residence)                                         |                                  |                                                   |                     |

| Project construction - mitigated*                                | 1.7 (infant)                     | 0.04                                              | <0.01               |
| <b>Exceed Threshold? (unmitigated)</b>                           | <b>Yes</b>                       | No                                                | No                  |
| <b>Exceed Threshold? (mitigated)</b>                             | No                               | No                                                | No                  |
| Milestone Academy Preschool                                      |                                  |                                                   |                     |
| Project construction - unmitigated                               | 0.9 (child)                      | 0.02                                              | <0.01               |
| <b>Exceed Threshold? (unmitigated)</b>                           | No                               | No                                                | No                  |
| *Project to include mitigation as described in MM AIR-3.2 below. |                                  |                                                   |                     |

As shown in Table 4.3-3, unmitigated project construction would exceed the BAAQMD single-source threshold for cancer risk at the location of the MEI. Additionally, project construction would generate diesel particulates and fugitive dust in the form of PM<sub>10</sub> and PM<sub>2.5</sub>, which would contribute to health risks but would not exceed BAAQMD thresholds.

**Mitigation Measures:** To reduce construction-period TAC emissions, the project shall implement the following mitigation measures:

- MM AIR-3.1:** BAAQMD Best Management Practices. During any construction period ground disturbance, the applicant shall ensure that the project contractor implements measures to control dust and exhaust. Implementation of the measures recommended by BAAQMD and listed below would reduce the air quality impacts associated with grading and new construction to a less-than-significant level. Additional measures are identified to reduce construction equipment exhaust emissions. The contractor shall implement the following best management practices that are required of all projects:
- All exposed surfaces (e.g., parking areas, staging areas, soil piles, graded areas, and unpaved access roads) shall be watered two times per day.
  - All haul trucks transporting soil, sand, or other loose material off-site shall be covered.
  - All visible mud or dirt track-out onto adjacent public roads shall be removed using wet power vacuum street sweepers at least once per day. The use of dry power sweeping is prohibited.
  - All vehicle speeds on unpaved roads shall be limited to 15 miles per hour (mph).
  - All roadways, driveways, and sidewalks to be paved shall be completed as soon as possible. Building pads shall be laid as soon as possible after grading unless seeding or soil binders are used.
  - Idling times shall be minimized either by shutting equipment off when not in use or reducing the maximum idling time to five minutes (as required by the California airborne toxics control measure Title 13, Section 2485 of California Code of Regulations [CCR]). Clear signage shall be provided for construction workers at all access points.
  - All construction equipment shall be maintained and properly tuned in accordance with manufacturer's specifications. All equipment shall be checked by a certified mechanic and determined to be running in proper condition prior to operation.
  - Post a publicly visible sign with the telephone number and person to contact at the Lead Agency regarding dust complaints. This person shall respond and take corrective action within 48 hours. The Air District's phone number shall also be visible to ensure compliance with applicable regulations.

LOCATIONS OF SENSITIVE RECEPTORS AND MEI

FIGURE 4.3-1

**MM AIR-3.2:** Tier 4 Emission Equipment. All construction equipment larger than 25 horsepower used at the site for more than two continuous days or 20 hours total shall meet U.S. EPA Tier 4 emission standards for particulate matter (PM<sub>10</sub> and PM<sub>2.5</sub>). If use of Tier 4 equipment is not available, alternatively use equipment that meets U.S. EPA emission standards for Tier 3 engines and include particulate matter emissions control equivalent to CARB Level 3 verifiable diesel emission control devices that altogether achieve a 67 percent reduction in particulate matter exhaust in comparison to uncontrolled equipment; alternatively (or in combination). As another alternative, the use of electrical or non-diesel fueled equipment may be used in substitution of diesel equipment.

With implementation of the best management practices (BMPs) listed in MM AIR-3.1, fugitive dust impacts from construction would be reduced to a less than significant level. Implementation of MM AIR-3.2 would reduce the project's cancer risk impacts to below the BAAQMD single-source threshold. **(Less than Significant Impact with Mitigation Incorporated)**

### Cumulative Community Health Risks

The community health impacts of the project when combined with existing sources of TACs with 1,000 feet of the project site were also analyzed. Existing TAC sources in the project vicinity include Mission Street (SR 82), the Shell gas station located at 950 Hillside Boulevard, and three auto body shops located along Mission Street. The results of the cumulative community health risks assessment are summarized below in Table 4.3-4.

| <b>Table 4.3-4: Cumulative Community Health Risks Impacts</b> |                                  |                                                   |                     |
|---------------------------------------------------------------|----------------------------------|---------------------------------------------------|---------------------|
| <b>Source</b>                                                 | <b>Cancer Risk (per million)</b> | <b>Annual PM<sub>2.5</sub> (µg/m<sup>3</sup>)</b> | <b>Hazard Index</b> |

| Unmitigated                                                   | 39.6 (infant)                    | 0.40                                              | <0.08               |
| Mitigated                                                     | 10.8 (infant)                    | 0.21                                              | <0.06               |

| Table 4.3-4: Cumulative Community Health Risks Impacts |                           |                                               |                 |
|--------------------------------------------------------|---------------------------|-----------------------------------------------|-----------------|
| Source                                                 | Cancer Risk (per million) | Annual PM <sub>2.5</sub> (µg/m <sup>3</sup> ) | Hazard Index    |
| <b>BAAQMD Cumulative Source Threshold</b>              | <b>&gt;100</b>            | <b>&gt;0.8</b>                                | <b>&gt;10.0</b> |
| Exceed Threshold? (unmitigated)                        | No                        | No                                            | No              |
| Exceed Threshold? (mitigated)                          | No                        | No                                            | No              |

As seen in Table 4.3-4, the project would not exceed BAAQMD thresholds for cumulative community health risk impact when combined with existing TAC sources in the project vicinity. Therefore, the project would not expose sensitive receptors to substantial pollutant concentrations. **(Less than Significant Impact)**

---

**Impact AIR-4:** The project would not result in other emissions (such as those leading to odors) adversely affecting a substantial number of people. **(Less than Significant Impact)**

---

The project would generate localized emissions of diesel exhaust during construction equipment operation and truck activity. These emissions may be noticeable from time to time by adjacent receptors. However, they would be localized and not likely to adversely affect people off-site or result in odor complaints. Residential development is not identified by BAAQMD as a substantial source of odors. The proposed project, therefore, would not generate odors that would affect a substantial number of people. **(Less Than Significant Impact)**

#### 4.3.3 Non-CEQA Effects

Per *California Building Industry Association v. Bay Area Air Quality Management District*, 62 Cal. 4th 369 (*BIA v. BAAQMD*), effects of the environment on the project are not considered CEQA impacts. The following discussion is included for informational purposes only because the City of Daly City has policies that address existing air quality conditions affecting a proposed project.

The project would introduce new residences near existing sources of TAC emissions. As mentioned under Impact AIR-3, existing TAC sources include Mission Street (SR 82), the Shell station located at 950 Hillside Boulevard, and several auto body shops located along Mission Street. The health risk impacts from each TAC source on the proposed new residents both individually and cumulatively have been analyzed. The results of this analysis are summarized in Table 4.3-5, below.

| Table 4.3-5: Community Risk Impacts Upon the On-site Sensitive Receptors |                           |                                               |              |
|--------------------------------------------------------------------------|---------------------------|-----------------------------------------------|--------------|
| Source                                                                   | Cancer Risk (per million) | Annual PM <sub>2.5</sub> (µg/m <sup>3</sup> ) | Hazard Index |
| Mission Street (SR-82)                                                   | 5.4                       | 0.18                                          | --           |
| Colma Auto Body Shop, Inc.                                               | --                        | --                                            | <0.01        |

| <b>Table 4.3-5: Community Risk Impacts Upon the On-site Sensitive Receptors</b> |                                  |                                                   |                     |
|---------------------------------------------------------------------------------|----------------------------------|---------------------------------------------------|---------------------|
| <b>Source</b>                                                                   | <b>Cancer Risk (per million)</b> | <b>Annual PM<sub>2.5</sub> (µg/m<sup>3</sup>)</b> | <b>Hazard Index</b> |
| D&J Auto Body Specialists, Inc.                                                 | --                               | --                                                | <0.01               |
| 19 <sup>th</sup> Auto Body Center                                               | --                               | --                                                | <0.01               |
| Hillside Shell station                                                          | 0.6                              | --                                                | <0.01               |
| <b>BAAQMD Single-Source Threshold</b>                                           | <b>&gt;10.0</b>                  | <b>&gt;0.3</b>                                    | <b>&gt;1.0</b>      |
| Exceed Threshold?                                                               | No                               | No                                                | No                  |
| Cumulative Total                                                                | 6.0                              | 0.18                                              | <0.04               |
| <b>BAAQMD Cumulative Source Threshold</b>                                       | <b>&gt;100</b>                   | <b>&gt;0.8</b>                                    | <b>&gt;10.0</b>     |
| Exceed Threshold?                                                               | No                               | No                                                | No                  |

The existing TAC sources would not expose sensitive receptors on-site to substantial levels of pollutant concentrations. The community health risk impacts on residences generated by the project would be less than significant. **(Less than Significant Impact)**

## 4.4 BIOLOGICAL RESOURCES

### 4.4.1 Environmental Setting

#### 4.4.1.1 *Regulatory Framework*

##### **Federal and State**

##### Endangered Species Act

Individual plant and animal species listed as rare, threatened, or endangered under state and federal Endangered Species Acts are considered special-status species. Federal and state endangered species legislation has provided the United States Fish and Wildlife Service (USFWS) and the California Department of Fish and Wildlife (CDFW) with a mechanism for conserving and protecting plant and animal species of limited distribution and/or low or declining populations. Permits may be required from both the USFWS and CDFW if activities associated with a proposed project would result in the take of a species listed as threatened or endangered. To “take” a listed species, as defined by the State of California, is “to hunt, pursue, catch, capture, or kill, or attempt to hunt, pursue, catch, capture, or kill” these species. Take is more broadly defined by the federal Endangered Species Act to include harm of a listed species.

In addition to species listed under state and federal Endangered Species Acts, Sections 15380(b) and (c) of the CEQA Guidelines provide that all potential rare or sensitive species, or habitats capable of supporting rare species, must be considered as part of the environmental review process. These may include plant species listed by the California Native Plant Society and CDFW-listed Species of Special Concern.

##### Migratory Bird Treaty Act

The federal Migratory Bird Treaty Act (MBTA) prohibits killing, capture, possession, or trade of migratory birds except in accordance with regulations prescribed by the Secretary of the Interior. Hunting and poaching are also prohibited. The taking and killing of birds resulting from an activity is not prohibited by the MBTA when the underlying purpose of that activity is not to take birds.<sup>12</sup> Nesting birds are considered special-status species and are protected by the USFWS. The CDFW also protects migratory and nesting birds under California Fish and Game Code Sections 3503, 3503.5, and 3800. The CDFW defines taking as causing abandonment and/or loss of reproductive efforts through disturbance.

##### Sensitive Habitat Regulations

Wetland and riparian habitats are considered sensitive habitats under CEQA. They are also afforded protection under applicable federal, state, and local regulations, and are generally subject to regulation by the United States Army Corps of Engineers (USACE), Regional Water Quality Control Board (RWQCB), CDFW, and/or the USFWS under provisions of the federal Clean Water Act (e.g., Sections 303, 304, 404) and State of California Porter-Cologne Water Quality Control Act.

---

<sup>12</sup> United States Department of the Interior. “Memorandum M-37050. The Migratory Bird Treaty Act Does Not Prohibit Incidental Take.” Accessed November 17, 2020. <https://www.doi.gov/sites/doi.gov/files/uploads/m-37050.pdf>.

## Regional and Local

### San Bruno Mountain Habitat Conservation Plan

The San Bruno Area Habitat Conservation Plan (HCP) was executed as an Agreement in November 1982 with the US Fish and Wildlife Service, California Department of Fish and Game, County of San Mateo, the cities of Brisbane, Daly City and South San Francisco, and several private property owners. The HCP was created to provide for the indefinite perpetuation of the Mission blue butterfly and to protect habitat of the other Species of Concern. It includes the establishment of public ownership of sufficient habitat area to support the species as well as funding for the ongoing maintenance of the habitat. Funding is provided by limited development that was excluded from such habitat area and devoted to urban uses, including, among others, residential, community service, commercial and recreational uses.

Given that the San Bruno Mountain encompasses approximately 3,600 acres, with various ownerships and within various cities, the HCP presents a single unifying and coordinating document to provide protection, enhancement and funding for the entire San Bruno Mountain ecological community. The HCP provides for the perpetuation of conserved habitat areas through eradication of exotic species; re-vegetation with grassland species; effective yearly monitoring of the species of concern to control reintroduction of exotics; and patrol of the area to discourage destructive human activities.

Portions of three of the four HCP planning areas are located within the jurisdiction of Daly City (Saddle, Radio Ridge, and Guadalupe Hills). Within those areas, all designated development has been completed including Point Pacific, Village in the Park, South Hills Estates, Linda Vista, and Bay Ridge. All of this development resulted in a net gain of available habitat either through dedication, easements, or on-site restoration. Furthermore, all of these projects continue to contribute to a trust fund that is used to maintain and monitor the habitat in perpetuity.

### Municipal Code Chapter 12.40 – Urban Forestry

The Municipal Code provides regulations to optimize the use of trees and other landscaping within the city. Chapter 12.40 requires plans submitted to the City for the construction, repair, or alteration of any building, housing, or structure to include provisions for sufficient guards or protectors to prevent injury to any existing publicly owned trees, shrubs, flowers, or vines. It also imposes conditions regarding the displacement of public trees, where a comparable size tree shall be planted, or a fee is paid to the City to cover the cost of replacing a removed tree.

### Daly City 2030 General Plan

The General Plan includes policies for the purpose of avoiding or mitigating impacts resulting from development projects within the City. The following policies are specific to biological resources and are applicable to the proposed project.

| Policy/Task  | Description                                                                                                                                       |
|--------------|---------------------------------------------------------------------------------------------------------------------------------------------------|
| Policy LU-17 | Ensure that private development is responsible for providing any on- or off-site improvements related to and/or mitigating the impacts it causes. |

- Policy LU-18 Development activities shall not be allowed to significantly disrupt the natural or urban environment and all reasonable measures shall be taken to identify and prevent or mitigate potentially significant effects.
- Policy RME-16 The City shall continue to recognize the importance of the San Bruno Mountain HCP, uphold the integrity of the concepts behind the plan, and respect the agreements that serve to implement it.

#### 4.4.1.2 *Existing Conditions*

There are a total of three trees on the project site, one in the front yard and two in the rear yard of the existing single-family residence. The tree species and sizes have not been identified. There is also a large cactus in the rear yard. The rest of the project site is covered with grass, weeds, and bare dirt. There are no special status species known to occur on-site and there is no suitable habitat for special status species.

#### 4.4.2 Impact Discussion

|                                                                                                                                                                                                                                                                                                                                              | Potentially<br>Significant<br>Impact | Less than<br>Significant<br>with Mitigation<br>Incorporated | Less than<br>Significant<br>Impact  | No Impact                           |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------|-------------------------------------------------------------|-------------------------------------|-------------------------------------|
| Would the project:                                                                                                                                                                                                                                                                                                                           |                                      |                                                             |                                     |                                     |
| 1) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Wildlife (CDFW) or United States Fish and Wildlife Service (USFWS)? | <input type="checkbox"/>             | <input checked="" type="checkbox"/>                         | <input type="checkbox"/>            | <input type="checkbox"/>            |
| 2) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations, or by the CDFW or USFWS?                                                                                                                                                     | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 3) Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?                                                                                                                 | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 4) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?                                                                                                           | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| 5) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?                                                                                                                                                                                                          | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |

|                                                                                                                                                                                      | Potentially<br>Significant<br>Impact | Less than<br>Significant<br>with Mitigation<br>Incorporated | Less than<br>Significant<br>Impact | No Impact                           |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------|-------------------------------------------------------------|------------------------------------|-------------------------------------|
| Would the project:                                                                                                                                                                   |                                      |                                                             |                                    |                                     |
| 6) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan? | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input type="checkbox"/>           | <input checked="" type="checkbox"/> |

**Impact BIO-1:** The project would not have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the CDFW or USFWS. **(Less than Significant Impact with Mitigation Incorporated)**

There are no candidate, sensitive, or special status species present on the project site. The proposed project would not have any effect, directly or indirectly, on species identified by any plans, policies, regulations, or by the CDFW or USFWS.

The mature trees on and adjacent to the project site could provide nesting habitat for birds, including migratory birds and raptors. Nesting birds are among the species protected under provisions of the Migratory Bird Treaty Act and California Fish and Game Code Sections 3503, 3503.5, and 2800.

Construction of the project during the breeding season could result in the incidental loss of fertile eggs or nestlings, or otherwise lead to nest abandonment. Disturbance that causes abandonment and/or loss of reproductive effort is considered a taking by the CDFW. Any loss of fertile eggs, nesting raptors, or any activities resulting in nest abandonment would constitute an impact.

Construction activities such as tree removal and site grading that disturb a nesting bird or raptor on-site or immediately adjacent to the construction zone would also constitute an impact.

**Mitigation Measure:** The project will be required to implement the following mitigation measures to reduce impacts to raptors and nesting birds to a less than significant level:

**MM BIO-1.1:** Pre-construction nesting bird surveys shall be completed prior to tree removal if removal or construction is proposed to commence during the breeding season (February 1 to August 31) in order to avoid impacts to nesting birds. Surveys shall be completed by a qualified biologist no more than 14 days before construction begins. During this survey, the biologist or ornithologist shall inspect all trees and other possible nesting habitats in and within 250 feet of the project boundary.

If an active nest is found in an area that would be disturbed by construction, the ornithologist shall designate an adequate buffer zone (~250 feet) to be established around the nest, in consultation with the California Department of Fish and Wildlife (CDFW). The buffer would ensure that nests shall not be disturbed until

the young have fledged (left the nest), the nest is vacated, and there is no evidence of second nesting attempts.

The applicant shall submit a report indicating the results of the survey and any designated buffer zones to the satisfaction of the Director of Community Development, prior to the removal of trees and issuance of a grading permit or demolition permit.

Conformance to State and federal law protecting nesting birds through implementation of mitigation measure MM BIO-1.1 would reduce potential impacts to a less than significant level. **(Less Than Significant Impact with Mitigation Incorporated)**

---

|                      |                                                                                                                                                                                                                               |
|----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Impact BIO-2:</b> | The project would not have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the CDFW or USFWS. <b>(No Impact)</b> |
|----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

---

The project site is located in a developed, urban area of Daly City. There is no riparian habitat or other sensitive habitat areas on or adjacent to the project site. Therefore, the project would not have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the CDFW or USFWS. **(No Impact)**

---

|                      |                                                                                                                                                                                                 |

| <b>Impact BIO-3:</b> | The project would not have a substantial adverse effect on state or federally protected wetlands through direct removal, filling, hydrological interruption, or other means. <b>(No Impact)</b> |
|----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

---

There are no federally protected wetlands on or adjacent to the project site. **(No Impact)**

---

|                      |                                                                                                                                                                                                                                                                                             |
|----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Impact BIO-4:</b> | The project would not interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites. <b>(Less than Significant Impact)</b> |
|----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

---

The project site is surrounded by developed, urban land uses. The project site is not part of an established native or migratory wildlife corridor or nursery site. The project would not interfere substantially with the movement of any native resident or migratory wildlife species. **(Less than Significant Impact)**

---

|                      |                                                                                                                                                                                              |
|----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Impact BIO-5:</b> | The project would not conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance. <b>(Less than Significant Impact)</b> |
|----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

---

The project would remove the three existing trees on-site and plant approximately 20 new trees on-site. The project would not remove any trees in the public right-of-way. The new tree plantings would be subject to the following standard conditions pursuant to Section 12.40.150 of the Daly City Municipal Code:

- New tree plantings on private property that result from use permits, zone changes, subdivisions and related activities shall require a one-year establishment period to ensure the health and vigor of the tree. Establishment period will commence upon city's acceptance of the planting. Tree replacement shall be required if the tree dies during the establishment period. A new establishment period will be determined at the time of replanting.
- All trees planted by property owners or contractors shall be inspected by a city representative prior to planting and planted in accordance with current city planting specifications.

The project would be in compliance with the City's policies regarding tree planting and therefore, would have a less than significant impact. **(Less than Significant Impact)**

---

**Impact BIO-6:** The project would not conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan. **(No Impact)**

---

The project site is not within the boundaries of the San Bruno Mountain HCP or any other conservation plan. Therefore, the project would not conflict with the provisions of an adopted Habitat Conservation Plan or other approved conservation plan. **(No Impact)**

## 4.5 CULTURAL RESOURCES

The following discussion is based, in part, on a Historic Resources Evaluation prepared for the project by TreanorHL (Treanor) in January 2021. A copy of the report is included as Appendix B of this Initial Study.

### 4.5.1 Environmental Setting

#### 4.5.1.1 *Regulatory Framework*

##### **Federal and State**

##### National Historic Preservation Act

Federal protection is legislated by the National Historic Preservation Act of 1966 (NHPA) and the Archaeological Resource Protection Act of 1979. These laws maintain processes for determination of the effects on historical properties eligible for listing in the National Register of Historic Places (NRHP). Section 106 of the NHPA and related regulations (36 Code of Federal Regulations [CFR] Part 800) constitute the primary federal regulatory framework guiding cultural resources investigations and require consideration of effects on properties that are listed or eligible for listing in the NRHP. Impacts to properties listed in the NRHP must be evaluated under CEQA.

##### California Register of Historical Resources

The California Register of Historical Resources (CRHR) is administered by the State Office of Historic Preservation and encourages protection of resources of architectural, historical, archeological, and cultural significance. The CRHR identifies historic resources for state and local planning purposes and affords protections under CEQA. Under Public Resources Code Section 5024.1(c), a resource may be eligible for listing in the CRHR if it meets any of the NRHP criteria.<sup>13</sup>

Historical resources eligible for listing in the CRHR must meet the significance criteria described previously and retain enough of their historic character or appearance to be recognizable as historical resources and to convey the reasons for their significance. A resource that has lost its historic character or appearance may still have sufficient integrity for the CRHR if it maintains the potential to yield significant scientific or historical information or specific data.

The concept of integrity is essential to identifying the important physical characteristics of historical resources and, therefore, in evaluating adverse changes to them. Integrity is defined as “the authenticity of a historical resource’s physical identity evidenced by the survival of characteristics that existed during the resource’s period of significance.” The processes of determining integrity are similar for both the CRHR and NRHP and use the same seven variables or aspects to define integrity that are used to evaluate a resource’s eligibility for listing. These seven characteristics include 1) location, 2) design, 3) setting, 4) materials, 5) workmanship, 6) feeling, and 7) association.

## Senate Bill 18

The intent of SB 18 is to aid in the protection of traditional tribal cultural places through local land use planning by requiring city governments to consult with California Native American tribes on projects which include adoption or amendment of general plans (defined in Government Code Section 65300 et seq.) and specific plans (defined in Government Code Section 65450 et seq.). SB 18 requires local governments to consult with tribes prior to making certain planning decisions and to provide notice to tribes at certain key points in the planning process.

## California Native American Historical, Cultural, and Sacred Sites Act

The California Native American Historical, Cultural, and Sacred Sites Act applies to both state and private lands. The act requires that upon discovery of human remains, construction or excavation activity must cease, and the county coroner be notified.

## Public Resources Code Sections 5097 and 5097.98

Section 15064.5 of the CEQA Guidelines specifies procedures to be used in the event of an unexpected discovery of Native American human remains on non-federal land. These procedures are outlined in Public Resources Code Sections 5097 and 5097.98. These codes protect such remains from disturbance, vandalism, and inadvertent destruction, establish procedures to be implemented if Native American skeletal remains are discovered during construction of a project, and establish the Native American Heritage Commission (NAHC) as the authority to resolve disputes regarding disposition of such remains.

Pursuant to Public Resources Code Section 5097.98, in the event of human remains discovery, no further disturbance is allowed until the county coroner has made the necessary findings regarding the origin and disposition of the remains. If the remains are of a Native American, the county coroner must notify the NAHC. The NAHC then notifies those persons most likely to be related to the Native American remains. The code section also stipulates the procedures that the descendants may follow for treating or disposing of the remains and associated grave goods.

## Daly City 2030 General Plan

The General Plan includes policies for the purpose of avoiding or mitigating impacts resulting from development projects within the City. The following policies are specific to cultural resources and are applicable to the proposed project.

| <b>Policy/Task</b> | <b>Description</b>                                                                                                                                                                                                                               |
|--------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Policy LU-19.1     | Archeological resources should be preserved where possible.                                                                                                                                                                                      |
| Task LU-19.1       | Archeological resources are a valuable educational resource for the residents of the city. Every effort should be made to preserve them in their natural state when found or be excavated by professional archeologists for display in a museum. |
| Policy RME-19      | Undertake measures to protect and preserve historic and archaeological resources.                                                                                                                                                                |
| Task RME-19.1      | Comply with State statutes related to historical and archaeological resources.                                                                                                                                                                   |

- Task RME-19.1      Serve as a leader in historic preservation by preserving, restoring, and reusing City-owned historic resources where feasible.

#### 4.5.1.2      *Existing Conditions*

The project site has not been identified on any national, state, county, or city historic resources inventory. Treanor prepared a Historic Resources Evaluation to determine whether the existing single-family house on the project site is eligible for listing as a historic resource. Treanor conducted an online records search as well as a site visit on December 9, 2020 to assess the history of the project site. Their findings are summarized below.

The single-family house on the project site was constructed circa 1908. A series of greenhouses, a small one-story accessory structure, and a two-story water tank were developed by 1926 to the east and south of the single-family house. A boiler house for heating the greenhouses was constructed in 1946. The greenhouses were removed by 1980 and this portion of the project site has remained vacant since that time.

The project site was associated with Italian-immigrant Valentino Tosetti from at least 1920 to 1945. Although Tosetti sold the property in 1940, it is possible that he continued to rent or operate the greenhouses through the 1940s. Flower growing was a highly profitable industry in the Daly City area in the early 20<sup>th</sup> century and could be considered a historically significant event on a local level. Italian American growers were a leading group in the industry, founding the San Francisco Growers Association in 1923. The project sites association with the Italian flower growers in Daly City could make the project site eligible for listing on the CRHR. However, the project site does not retain any integrity of this historic association given that the greenhouses and associated accessory structures were removed after 1975.

Although the single-family house was constructed circa 1908, the house is of common construction and materials with no notable or significant attributes. The house does not embody the distinctive characteristics of an architectural style and is not associated with any significant design professionals. Therefore, the project site is not eligible for listing on the CRHR and there are no historic resources on-site.

#### 4.5.2      Impact Discussion

|                                                                                                                                      | Potentially<br>Significant<br>Impact | Less than<br>Significant<br>with Mitigation<br>Incorporated | Less than<br>Significant<br>Impact | No Impact                           |

| Would the project:                                                                      |                                      |                                                             |                                    |                          |
| 3) Disturb any human remains, including those interred outside of dedicated cemeteries? | <input type="checkbox"/>             | <input checked="" type="checkbox"/>                         | <input type="checkbox"/>           | <input type="checkbox"/> |

---

**Impact CUL-1:** The project would not cause a substantial adverse change in the significance of a historical resource pursuant to CEQA Guidelines Section 15064.5. **(No Impact)**

---

The project site and adjacent properties have not been identified on any national, state, county, or city historic resources inventory. Despite the project site's historic association with Italian flower growing in Daly City from approximately 1920 to 1945, the project site is not eligible for listing on the CRHR due to a lack of historic integrity. The single-family house is not eligible for listing on the CRHR due to a lack of architectural significance. Therefore, there are no historical resources on the project site. There are no historical resources adjacent to the site that would be affected by the project. **(No Impact)**

---

**Impact CUL-2:** The project would not cause a substantial adverse change in the significance of an archaeological resource pursuant to CEQA Guidelines Section 15064.5. **(Less than Significant Impact with Mitigation Incorporated)**

---

According to the General Plan EIR, there are no known archaeological resources within the project site. However, project-related grading during construction could result in the discovery of unknown archaeological resources. The following mitigation measure would ensure that the proper precautions are taken during an inadvertent archaeological discovery.

**Mitigation Measures:** The project will be required to implement the following mitigation measures to reduce potential impacts to archaeological resources to a less than significant level:

**MM CUL-2.1:** Undiscovered Archaeological Resources. If evidence of an archaeological site or other suspected cultural resource as defined by CEQA Guideline Section 15064.5, including darkened soil representing past human activity ("midden"), that could conceal material remains (e.g., worked stone, worked bone, fired clay vessels, faunal bone, hearths, storage pits, or burials) is discovered during construction related earth-moving activities, all ground-disturbing activity within 100 feet of the resources shall be halted and the City's Planning Manager shall be notified. The project sponsor shall hire a qualified archaeologist to conduct a field investigation. The City's Planning Manager shall consult with the archaeologist to assess the significance of the find. Impacts to any significant resources shall be mitigated to a less-than-significant level through data recovery or other methods determined adequate by a qualified archaeologist and that are consistent with the Secretary of the Interior's Standards for Archaeological documentation. Any identified cultural resources shall be recorded on the appropriate DPR 523 (A-J) form and filed with the NWIC.

**MM CUL-2.2:** Report of Archaeological Resources. If archaeological resources are identified, a final report summarizing the discovery of cultural materials shall be submitted to the City's Planning Manager prior to issuance of certificate of occupancy. This report shall contain a description of the mitigation program that was implemented and its results, including a description of the monitoring and testing program, a list of the resources found and conclusion, and a description of the disposition/curation of the resources.

With implementation of MM CUL-2.1 and MM CUL-2.2, impacts to any incidental discoveries of archaeological resources would be reduced to a less than significant level. **(Less than Significant Impact with Mitigation Incorporated)**

---

**Impact CUL-3:** The project would not disturb any human remains, including those interred outside of dedicated cemeteries. **(Less than Significant Impact with Mitigation Incorporated)**

---

As described above, the site has no known archaeological resources, including human remains. In the unlikely event human remains are unearthed during project construction, damage to or destruction of significant archaeological remains would be a potentially significant impact.

**Mitigation Measures:** The project will be required to implement the following mitigation measure to reduce potential impacts to buried human remains to a less than significant level:

**MM CUL-3.1:** Human Remains. If human remains are discovered during project construction, all ground-disturbing activity within 100 feet of the resources shall be halted and the City's Planning Manager and the San Mateo County coroner shall be notified immediately, according to Section 5097.98 of the State Public Resources Code and Section 7050.5 of California's Health and Safety Code. If the remains are determined by the County coroner to be Native American, the Native American Heritage Commission (NAHC) shall be notified within 24 hours, and the guidelines of the NAHC shall be adhered to in the treatment and disposition of the remains. The project sponsor shall also retain a professional archaeologist with Native American burial experience to conduct a field investigation of the specific site and consult with the Most Likely Descendant, if any, identified by the NAHC. As necessary, the archaeologist may provide professional assistance to the Most Likely Descendant, including the excavation and removal of the human remains. The City of Daly City shall be responsible for approval of recommended mitigation as it deems appropriate, taking account of the provisions of State law, as set forth in CEQA Guidelines section 15064.5(e) and Public Resources Code section 5097.98. The project sponsor shall implement approved mitigation, to be verified by the City of Daly City, before the resumption of ground-disturbing activities within 100 feet of where the remains were discovered.

With implementation of MM CUL-3.1, any potential impacts from incidental discoveries of human remains would be reduced to a less than significant level. **(Less than Significant Impact with Mitigation Incorporated)**

## 4.6 ENERGY

### 4.6.1 Environmental Setting

#### 4.6.1.1 *Regulatory Framework*

##### **Federal and State**

##### Energy Star and Fuel Efficiency

At the federal level, energy standards set by the EPA apply to numerous consumer products and appliances (e.g., the EnergyStar™ program). The EPA also sets fuel efficiency standards for automobiles and other modes of transportation.

##### Renewables Portfolio Standard Program

In 2002, California established its Renewables Portfolio Standard Program, with the goal of increasing the percentage of renewable energy in the state's electricity mix to 20 percent of retail sales by 2010. Governor Schwarzenegger issued Executive Order (EO) S-3-05, requiring statewide emissions reductions to 80 percent below 1990 levels by 2050. In 2008, EO S-14-08 was signed into law, requiring retail sellers of electricity serve 33 percent of their load with renewable energy by 2020. In October 2015, Governor Brown signed SB 350 to codify California's climate and clean energy goals. A key provision of SB 350 requires retail sellers and publicly owned utilities to procure 50 percent of their electricity from renewable sources by 2030. SB 100, passed in 2018, requires 100 percent of electricity in California to be provided by 100 percent renewable and carbon-free sources by 2045.

##### Executive Order B-55-18 To Achieve Carbon Neutrality

In September 2018, Governor Brown issued an executive order, EO-B-55-18 To Achieve Carbon Neutrality, setting a statewide goal "to achieve carbon neutrality as soon as possible, and no later than 2045, and achieve and maintain net negative emissions thereafter." The executive order requires CARB to "ensure future Scoping Plans identify and recommend measures to achieve the carbon neutrality goal." EO-B-55-18 supplements EO S-3-05 by requiring not only emissions reductions, but also that, by no later than 2045, the remaining emissions be offset by equivalent net removals of CO<sub>2</sub> from the atmosphere through sequestration.

##### California Building Standards Code

The Energy Efficiency Standards for Residential and Nonresidential Buildings, as specified in Title 24, Part 6 of the California Code of Regulations (Title 24), was established in 1978 in response to a legislative mandate to reduce California's energy consumption. Title 24 is updated approximately every three years.<sup>14</sup> Compliance with Title 24 is mandatory at the time new building permits are issued by city and county governments.<sup>15</sup>

<sup>15</sup> California Energy Commission (CEC). "2019 Building Energy Efficiency Standards." Accessed November 17, 2020. <https://www.energy.ca.gov/programs-and-topics/programs/building-energy-efficiency-standards/2019-building-energy-efficiency>.

## California Green Building Standards Code (CALGreen)

CALGreen establishes mandatory green building standards for buildings in California. CALGreen was developed to reduce GHG emissions from buildings, promote environmentally responsible and healthier places to live and work, reduce energy and water consumption, and respond to state environmental directives. CALGreen covers five categories: planning and design, energy efficiency, water efficiency and conservation, material and resource efficiency, and indoor environmental quality. CALGreen requires that construction projects recycle or salvage 65 percent of non-hazardous construction and demolition waste.

## Advanced Clean Cars Program

CARB adopted the Advanced Clean Cars program in 2012 in coordination with the EPA and National Highway Traffic Safety Administration. The program combines the control of smog-causing pollutants and GHG emissions into a single coordinated set of requirements for vehicle model years 2015 through 2025. The program promotes development of environmentally superior passenger cars and other vehicles, as well as saving the consumer money through fuel savings.<sup>16</sup>

## **Local**

### Daly City 2030 General Plan

The General Plan includes policies for the purpose of avoiding or mitigating impacts resulting from development projects within the City. The following policies are specific to energy and are applicable to the proposed project.

| <b>Policy/Task</b> | <b>Description</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|--------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Policy HE-25       | Mandate the inclusion of green building techniques into most new construction.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Task HE-28.2       | Adopt progressive energy efficiency strategies similar to those adopted by the California Public Utilities Commission: <ol style="list-style-type: none"><li>1. All new residential construction in California will be zero net energy by 2020;</li><li>2. All new commercial construction in California will be zero net energy by 2030;</li><li>3. Heating, ventilation, and air conditioning (HVAC) will be transformed to ensure that its energy performance is optimal for California's climate; and</li><li>4. All eligible low-income customers will be given the opportunity to participate in the low-income energy efficiency program by 2020.</li></ol> |

### Daly City's Green Vision

*Daly City's Green Vision, A Climate Action Plan (CAP) for 2011-2020 and Beyond*, was adopted in December 2010. Daly City's Green Vision guides the City towards a sustainable future that reduces GHG emissions from current levels, while promoting economic prosperity for present and future generations. The Green Vision identifies ten goals and seeks to achieve these goals through cost-

<sup>16</sup> California Air Resources Board. "The Advanced Clean Cars Program." Accessed November 17, 2020. <https://www.arb.ca.gov/msprog/acc/acc.htm>.

effective strategies by the year 2020. The GHG reduction goals include adopting a general plan with measurable policies for sustainable development, reducing energy use in buildings, reducing transportation emissions, reducing solid waste disposal, and GHG emissions reductions from municipal operations. Daly City completed an update to the General Plan which incorporated these goals in March 2013.

#### **4.6.1.2 Existing Conditions**

Total energy usage in California was approximately 6,957 trillion British thermal units (Btu) in the year 2020, the most recent year for which this data was available.<sup>17</sup> Out of the 50 states, California is ranked second in total energy consumption and 49<sup>th</sup> in energy consumption per capita. The breakdown by sector was approximately 22 percent (1,508 trillion Btu) for residential uses, 19 percent (1,358 trillion Btu) for commercial uses, 25 percent (1,701 trillion Btu) for industrial uses, and 34 percent (2,356 trillion Btu) for transportation.<sup>18</sup> This energy is primarily supplied in the form of natural gas, petroleum, biomass, nuclear electric power, and hydroelectric power.

### **Electricity**

Electricity in San Mateo County in 2021 was consumed primarily by the non-residential sector (60 percent), with the residential sector consuming 40 percent. In 2020, a total of approximately 4,157 GWh of electricity was consumed in San Mateo County.<sup>19</sup>

Peninsula Clean Energy (PCE) is a public and locally controlled electricity provider for the County of San Mateo. Electricity provided by PCE is delivered through PG&E transmission lines. Commercial and residential customers in San Mateo County are included in the PCE service area and can choose to have 50 to 100 percent of their electricity supplied from renewable and carbon-free sources. Customers are automatically enrolled in the ECO plus plan, which generates its electricity from 100 percent carbon-free sources, with at least 50 percent from renewable sources. Customers have the option to enroll in the ECO100 plan, which generates its electricity from 100 percent carbon-free, renewable sources.<sup>20</sup>

### **Fuel for Motor Vehicles**

In 2019, 15.4 billion gallons of gasoline were sold in California.<sup>21</sup> The average fuel economy for light-duty vehicles (autos, pickups, vans, and sport utility vehicles) in the United States has steadily increased from about 13.1 miles per gallon (mpg) in the mid-1970s to 25.4 mpg in 2020.<sup>22</sup> Federal

fuel economy standards have changed substantially since the Energy Independence and Security Act was passed in 2007. That standard, which originally mandated a national fuel economy standard of 35 miles per gallon by the year 2020, was updated in April 2022 to require all cars and light duty trucks achieve an overall industry average fuel economy of 49 mpg by model year 2026.<sup>23,24</sup>

#### 4.6.2 Impact Discussion

|                                                                                                                                                                                     | Potentially Significant Impact                                                                                                                                                                                                               | Less than Significant with Mitigation Incorporated | Less than Significant Impact        | No Impact                |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------|-------------------------------------|--------------------------|
| Would the project:                                                                                                                                                                  |                                                                                                                                                                                                                                              |                                                    |                                     |                          |
| 1) Result in a potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation? | <input type="checkbox"/>                                                                                                                                                                                                                     | <input type="checkbox"/>                           | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 2) Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?                                                                                       | <input type="checkbox"/>                                                                                                                                                                                                                     | <input type="checkbox"/>                           | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| <hr/>                                                                                                                                                                               |                                                                                                                                                                                                                                              |                                                    |                                     |                          |
| <b>Impact EN-1:</b>                                                                                                                                                                 | The project would not result in a potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation. <b>(Less than Significant Impact)</b> |                                                    |                                     |                          |

Energy would be consumed during both the construction and operational phases of the proposed project. Energy requirements throughout the construction phase include energy for the manufacturing and transportation of building materials, preparation of the site, and operation of construction equipment. The operation of the project would consume electricity for building heating and cooling, lighting, cooking, appliances, and water heating. In compliance with the City's Reach Code, the project would be 100 percent electric and would not utilize any natural gas. Fuel would also be consumed during vehicle trips to and from the project site.

The project proposes to be constructed in compliance with the 2019 California Green Building Standards Code (Title 24, Part 11 or CALGreen), which requires features that reduce water and energy consumption. The project proposes rooftop solar panels on all dwelling units. In compliance with CALGreen, the project would also recycle or salvage 65 percent of non-hazardous construction and demolition waste.

Given the infill location of the project site, the existing pedestrian, bicycle, and transit services in the project area, and the project's compliance with the 2019 CALGreen Code, the proposed project would not result in a wasteful, inefficient, and unnecessary consumption of energy. **(Less Than Significant Impact)**

<sup>24</sup> United States Department of Transportation. USDOT Announces New Vehicle Fuel Economy Standards for Model Year 2024-2026." Accessed October 26, 2022. <https://www.nhtsa.gov/press-releases/usdot-announces-new-vehicle-fuel-economy-standards-model-year-2024-2026>

---

**Impact EN-2:** The project would not conflict with or obstruct a state or local plan for renewable energy or energy efficiency. **(Less than Significant Impact)**

---

According to the 2019 Integrated Energy Policy Report, the state is working towards decarbonizing the energy system and moving towards a 100 percent carbon-free system by 2045.<sup>25</sup> The project would obtain energy from the PCE which provides 50 to 100 percent carbon free electricity to the project site. The project also proposes rooftop solar panels on all dwelling units. The project would result in an increase in demand on existing energy resources; however, the project is required to comply with applicable regulations and City policies that would conserve energy and water, and reduce fuel consumption and waste generation. For these reasons, the proposed project would not conflict with or obstruct a state or local plan for renewable energy or energy efficiency. **(Less Than Significant Impact)**

## **4.7 GEOLOGY AND SOILS**

### **4.7.1 Environmental Setting**

#### **4.7.1.1 *Regulatory Framework***

##### **State**

##### **Alquist-Priolo Earthquake Fault Zoning Act**

The Alquist-Priolo Earthquake Fault Zoning Act was passed following the 1971 San Fernando earthquake. The act regulates development in California near known active faults due to hazards associated with surface fault ruptures. Alquist-Priolo maps are distributed to affected cities, counties, and state agencies for their use in planning and controlling new construction. Areas within an Alquist-Priolo Earthquake Fault Zone require special studies to evaluate the potential for surface rupture to ensure that no structures intended for human occupancy are constructed across an active fault.

##### **Seismic Hazards Mapping Act**

The Seismic Hazards Mapping Act (SHMA) was passed in 1990 following the 1989 Loma Prieta earthquake. The SHMA directs the California Geological Survey (CGS) to identify and map areas prone to liquefaction, earthquake-induced landslides, and amplified ground shaking. CGS has completed seismic hazard mapping for the portions of California most susceptible to liquefaction, landslides, and ground shaking, including the central San Francisco Bay Area. The SHMA requires that agencies only approve projects in seismic hazard zones following site-specific geotechnical investigations to determine if the seismic hazard is present and identify measures to reduce earthquake-related hazards.

##### **California Building Standards Code**

The California Building Code (CBC) prescribes standards for constructing safe buildings. The CBC contains provisions for earthquake safety based on factors including occupancy type, soil and rock profile, ground strength, and distance to seismic sources. The CBC requires that a site-specific geotechnical investigation report be prepared for most development projects to evaluate seismic and geologic conditions such as surface fault ruptures, ground shaking, liquefaction, differential settlement, lateral spreading, expansive soils, and slope stability. The CBC is updated every three years.

##### **California Division of Occupational Safety and Health Regulations**

Excavation, shoring, and trenching activities during construction are subject to occupational safety standards for stabilization by the California Department of Industrial Relations, Division of Occupational Safety and Health (Cal/OSHA) under Title 8 of the California Code of Regulations and Excavation Rules. These regulations minimize the potential for instability and collapse that could injure construction workers on the site.

## Public Resources Code Section 5097.5

Paleontological resources are the fossilized remains of organisms from prehistoric environments found in geologic strata. They range from mammoth and dinosaur bones to impressions of ancient animals and plants, trace remains, and microfossils. These materials are valued for the information they yield about the history of the earth and its past ecological settings. California Public Resources Code Section 5097.5 specifies that unauthorized removal of a paleontological resource is a misdemeanor. Under the CEQA Guidelines, a project would have a significant impact on paleontological resources if it would disturb or destroy a unique paleontological resource or site or unique geologic feature.

### **Local**

#### Daly City 2030 General Plan

The General Plan includes policies for the purpose of avoiding or mitigating impacts resulting from development projects within the City. The following policies are specific to geology and soils and are applicable to the proposed project.

| <b>Policy/Task</b> | <b>Description</b>                                                                                                                                                                                                                                                                                                                              |
|--------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Policy SE-1.1      | Continue to investigate the potential for seismic and geologic hazards as part of the development review process and maintain this information for the public record. Update Safety Element maps as appropriate.                                                                                                                                |
| Policy SE-1.2      | Require site specific geotechnical, soils, and foundation reports for development proposed on sites identified in the Safety Element and its Geologic and Hazard Maps as having moderate or high potential for ground failure.                                                                                                                  |
| Policy SE-1.3      | Permit development in areas of potential geologic hazards only where it can be demonstrated that the project will not be endangered by, nor contribute to, the hazardous condition on the site or on adjacent properties. All proposed development is subject to the City's Zoning Ordinance and Building Codes.                                |
| Policy SE-1.4      | Prohibit development—including any land alteration, grading for roads and structural development—in areas of slope instability or other geologic concerns unless mitigation measures are taken to limit potential damage to levels of acceptable risk.                                                                                          |
| Policy SE-6.1      | Regulate building construction practices to prevent hazardous structures and assure structural safety. Measures may include requiring conformance to an accepted set of construction standards, authorizing inspection of suspected dangerous structures, discontinuing improper construction activities, and eliminating hazardous conditions. |

#### **4.7.1.2      *Existing Conditions***

##### **Regional Geological Conditions**

The project site and the surrounding parts of Daly City lie on the San Francisco Peninsula which is set within the Coast Ranges Geomorphic Province. The San Francisco Peninsula lies north of the Santa Cruz Mountains where it is flanked by the Pacific Ocean and San Francisco Bay to the west and east, respectively. The Coast Ranges Geomorphic Province is typified by northwest-southeast

trending mountain ranges that stretch from the Oregon border in the north to Point Conception in the south.

## **On-Site Geological Conditions**

### Seismicity

There are several major fault zones present in the Bay Area. The closest of which is the San Andreas Fault Line, approximately 2.12 miles southwest of the project site. According to the City’s General Plan EIR, Daly City would be subject to violent levels of shaking in the event of an earthquake.

### Liquefaction

Liquefaction is a result of seismic activity characterized by the transformation of loose water-saturated soils from a solid state to a liquid state during ground shaking. The project site has a low potential for liquefaction.<sup>26</sup>

### Landslide and Lateral Spreading

The potential for landslides or downslope movement is dependent on slope geometry, subsurface soil and groundwater conditions, prior slope behavior, and severity of ground shaking. According to the General Plan EIR, there is a low potential for landslide risk in the project area. The project site is labeled “Flatland – Not Landslide Prone”.

Lateral spreading is a type of ground failure related to liquefaction. It consists of the horizontal displacement of flat-lying soil material toward an open face, such as the steep bank of a stream channel. The project site does not contain any features susceptible to lateral spreading.

## **4.7.2      Impact Discussion**

|                                                                                                                                                                                                                                                                                        | Potentially<br>Significant<br>Impact | Less than<br>Significant<br>with Mitigation<br>Incorporated | Less than<br>Significant<br>Impact  | No Impact                |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------|-------------------------------------------------------------|-------------------------------------|--------------------------|
| Would the project:                                                                                                                                                                                                                                                                     |                                      |                                                             |                                     |                          |
| 1) Directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving:                                                                                                                                                         |                                      |                                                             |                                     |                          |
| – Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault (refer to Division of Mines and Geology Special Publication 42)? | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| – Strong seismic ground shaking?                                                                                                                                                                                                                                                       | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| – Seismic-related ground failure, including liquefaction?                                                                                                                                                                                                                              | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

<sup>26</sup> U.S. Geological Survey. “Map of Quaternary Deposits and Liquefaction Susceptibility in the Central San Francisco Bay Region, California: Liquefaction Susceptibility”. Map. 2006.

|                                                                                                                                                                                                                                     | Potentially<br>Significant<br>Impact | Less than<br>Significant<br>with Mitigation<br>Incorporated | Less than<br>Significant<br>Impact  | No Impact                           |

| Would the project:                                                                                                                                                                                                                  |                                      |                                                             |                                     |                                     |
| – Landslides?                                                                                                                                                                                                                       | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| 2) Result in substantial soil erosion or the loss of topsoil?                                                                                                                                                                       | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| 3) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction, or collapse? | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| 4) Be located on expansive soil, as defined in the current California Building Code, creating substantial direct or indirect risks to life or property?                                                                             | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| 5) Have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of wastewater?                                                  | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 6) Directly or indirectly destroy a unique paleontological resource or site or unique geological feature?                                                                                                                           | <input type="checkbox"/>             | <input checked="" type="checkbox"/>                         | <input type="checkbox"/>            | <input type="checkbox"/>            |

**Impact GEO-1:** The project would not directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault; strong seismic ground shaking; seismic-related ground failure, including liquefaction; or landslides.  
**(Less than Significant Impact)**

An earthquake of moderate to high magnitude generated within the San Francisco Bay Region could cause considerable ground shaking at the site. Therefore, the project would conform to the standard engineering and building practices and techniques specified in the CBC. The proposed buildings, streets, and utilities would be designed and constructed in accordance with the recommendations of a geotechnical report prepared for the site, which identifies the specific design features related to geologic and seismic conditions.

As described in Section 4.7.1.2 Existing Conditions, the project site is in an area of low risk for liquefaction, landslides, and lateral spreading. The project, in conformance with applicable regulations and with the implementation of the recommendations in the geotechnical report, would not result in significant impacts from seismicity and seismic-related hazards. **(Less Than Significant Impact)**

---

**Impact GEO-2:** The project would not result in substantial soil erosion or the loss of topsoil. **(Less than Significant Impact)**

---

Daly City requires project applicants to submit a stormwater management plan that illustrates full compliance with the Municipal Regional Stormwater NPDES Permit (MRP). This will require the project to include stormwater controls, including site design measures, source controls, treatment measures, low impact development, hydromodification management, and construction best management practices to limit erosion. These measures would help to control erosion and are discussed further in Section 4.9 Hydrology and Water Quality. **(Less Than Significant Impact)**

---

**Impact GEO-3:** The project would not be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction, or collapse. **(Less than Significant Impact)**

---

As discussed above in Impact GEO-1, the project site has a low potential for liquefaction and related hazards. A geotechnical report would be prepared for the project to assess current soil conditions and recommend site specific designs. The proposed construction would not result in instability of soil or another geologic unit on-site or off-site. **(Less than Significant Impact)**

---

**Impact GEO-4:** The project would not be located on expansive soil, as defined in the current California Building Code, creating substantial direct or indirect risks to life or property. **(Less than Significant Impact)**

---

The project site is not located within an area identified as having a high soil expansion potential.<sup>27</sup> The geotechnical report would address expansive soil potential. The proposed project would not create a substantial risk to life or property due to expansive soils. **(Less than Significant Impacts)**

---

**Impact GEO-5:** The project would not have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of wastewater. **(No Impact)**

---

The proposed project would be served by existing municipal sanitary sewers. There would be no need for alternative wastewater disposal systems, such as septic tanks, on-site. Therefore, there would be no impact due to soils incapable of supporting alternative wastewater disposal systems. **(No Impact)**

---

**Impact GEO-6:** The project would not directly or indirectly destroy a unique paleontological resource or site or unique geological feature. **(Less than Significant Impact with Mitigation Incorporated)**

---

The project site is not known to contain any subsurface paleontological resources or geological features. Although unlikely, grading of the project site could result in the disturbance of previously undiscovered paleontological resources. The following mitigation measure would ensure that the proper precautions are taken during an inadvertent paleontological discovery.

---

<sup>27</sup> City of Daly City. General Plan Update EIR. Figure 3.5-6 Soil Erosion and Shrink Swell Potential. October 2012.

**Mitigation Measure:** The project will be required to implement the following mitigation measure to reduce potential impacts to paleontological resources to a less than significant level:

**MM GEO-6.1:** Unique Paleontological and/or Geologic Features and Reporting. Should a unique paleontological resource or site or unique geological feature be identified at the project site during any phase of construction, all ground disturbing activities within 25 feet shall cease and the City's Planning Manager notified immediately. A qualified paleontologist shall evaluate the find and prescribe mitigation measures to reduce impacts to a less than significant level. Work may proceed on other parts of the project site while mitigation for paleontological resources or geologic features is implemented. Upon completion of the paleontological assessment, a report shall be submitted to the City and, if paleontological materials are recovered, a paleontological repository, such as the University of California Museum of Paleontology.

With implementation of MM GEO-6.1, impacts to undiscovered paleontological resources would be reduced to a less than significant level. **(Less than Significant with Mitigation Incorporated)**

## **4.8 GREENHOUSE GAS EMISSIONS**

### **4.8.1 Environmental Setting**

#### **4.8.1.1 *Background Information***

Gases that trap heat in the atmosphere, GHGs, regulate the earth's temperature. This phenomenon, known as the greenhouse effect, is responsible for maintaining a habitable climate. In GHG emission inventories, the weight of each gas is multiplied by its global warming potential (GWP) and is measured in units of CO<sub>2</sub> equivalents (CO<sub>2</sub>e). The most common GHGs are carbon dioxide (CO<sub>2</sub>) and water vapor but there are also several others, most importantly methane (CH<sub>4</sub>), nitrous oxide (N<sub>2</sub>O), hydrofluorocarbons (HFCs), perfluorocarbons (PFCs), and sulfur hexafluoride (SF<sub>6</sub>). These are released into the earth's atmosphere through a variety of natural processes and human activities. Sources of GHGs are generally as follows:

- CO<sub>2</sub> and N<sub>2</sub>O are byproducts of fossil fuel combustion.
- N<sub>2</sub>O is associated with agricultural operations such as fertilization of crops.
- CH<sub>4</sub> is commonly created by off-gassing from agricultural practices (e.g., keeping livestock) and landfill operations.
- Chlorofluorocarbons (CFCs) were widely used as refrigerants, propellants, and cleaning solvents, but their production has been stopped by international treaty.
- HFCs are now used as a substitute for CFCs in refrigeration and cooling.
- PFCs and SF<sub>6</sub> emissions are commonly created by industries such as aluminum production and semiconductor manufacturing.

An expanding body of scientific research supports the theory that global climate change is currently causing changes in weather patterns, average sea level, ocean acidification, chemical reaction rates, and precipitation rates, and that it will increasingly do so in the future. The climate and several naturally occurring resources within California are adversely affected by the global warming trend. Increased precipitation and sea level rise will increase coastal flooding, saltwater intrusion, and degradation of wetlands. Mass migration and/or loss of plant and animal species could also occur. Potential effects of global climate change that could adversely affect human health include more extreme heat waves and heat-related stress; an increase in climate-sensitive diseases; more frequent and intense natural disasters such as flooding, hurricanes and drought; and increased levels of air pollution.

#### **4.8.1.2 *Regulatory Framework***

##### **State**

##### **Assembly Bill 32**

Under the California Global Warming Solutions Act, also known as AB 32, CARB established a statewide GHG emissions cap for 2020, adopted mandatory reporting rules for significant sources of GHGs, and adopted a comprehensive plan, known as the Climate Change Scoping Plan, identifying how emission reductions would be achieved from significant GHG sources.

In 2016, SB 32 was signed into law, amending the California Global Warming Solution Act. SB 32, and accompanying Executive Order B-30-15, require CARB to ensure that statewide GHG emissions are reduced to 40 percent below the 1990 level by 2030. CARB updated its Climate Change Scoping Plan in December of 2017 to express the 2030 statewide target in terms of million metric tons of CO<sub>2</sub>e (MMTCO<sub>2</sub>e). Based on the emissions reductions directed by SB 32, the annual 2030 statewide target emissions level for California is 260 MMTCO<sub>2</sub>e.

### Senate Bill 375

SB 375, known as the Sustainable Communities Strategy and Climate Protection Act, was signed into law in September 2008. SB 375 builds upon AB 32 by requiring CARB to develop regional GHG reduction targets for automobile and light truck sectors for 2020 and 2035. The per capita GHG emissions reduction targets for passenger vehicles in the San Francisco Bay Area include a seven percent reduction by 2020 and a 15 percent reduction by 2035.

Consistent with the requirements of SB 375, the Metropolitan Transportation Commission (MTC) partnered with the Association of Bay Area Governments (ABAG), BAAQMD, and the Bay Conservation and Development Commission to prepare the region's Sustainable Communities Strategy (SCS) as part of the Regional Transportation Plan process. The SCS is referred to as Plan Bay Area 2040. Plan Bay Area 2040 establishes a course for reducing per capita GHG emissions through the promotion of compact, high-density, mixed-use neighborhoods near transit, particularly within identified Priority Development Areas (PDAs).

## **Regional and Local**

### 2017 Clean Air Plan

To protect the climate, the 2017 CAP (prepared by BAAQMD) includes control measures designed to reduce emissions of methane and other super-GHGs that are potent climate pollutants in the near-term, and to decrease emissions of carbon dioxide by reducing fossil fuel combustion.

### CEQA Air Quality Guidelines

The BAAQMD CEQA Air Quality Guidelines are intended to serve as a guide for those who prepare or evaluate air quality impact analyses for projects and plans in the San Francisco Bay Area. The jurisdictions in the San Francisco Bay Area Air Basin utilize the thresholds and methodology for assessing GHG impacts developed by BAAQMD within the CEQA Air Quality Guidelines. The guidelines include information on legal requirements, BAAQMD rules, methods of analyzing impacts, and recommended mitigation measures.

### Daly City 2030 General Plan

The General Plan includes policies for the purpose of avoiding or mitigating impacts resulting from development projects within the City. The following policies are specific to greenhouse gases and are applicable to the proposed project.

| <b>Policies</b> | <b>Description</b>                                                                                                                                                                                                                                          |
|-----------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Policy HE-24    | Gradually increase energy and water efficiency standards for all new and existing housing while minimizing the costs of such standards.                                                                                                                     |
| Task HE-24.1    | Develop enhanced residential energy efficiency standards (Title 24, California Administrative Code) in all new residential construction which exceeds State-mandated requirements by five percent in 2015, ten percent in 2020, and twenty percent in 2030. |
| Policy HE-25    | Mandate the inclusion of green building techniques into most new construction.                                                                                                                                                                              |
| Policy HE-29    | Promote alternative sources of energy in all homes.                                                                                                                                                                                                         |
| Task HE-29.1    | Encourage, incentivize, or require all new major construction projects to pre-plumb for solar hot water and pre-wire for solar electric systems                                                                                                             |

### Daly City's Green Vision

*Daly City's Green Vision, A Climate Action Plan (CAP) for 2011-2020 and Beyond*, was adopted in December 2010. Daly City's Green Vision guides the City towards a sustainable future that reduces GHG emissions from current levels, while promoting economic prosperity for present and future generations. The Green Vision identifies ten goals and seeks to achieve these goals through cost-effective strategies by the year 2020. The GHG reduction goals include adopting a general plan with measurable policies for sustainable development, reducing energy use in buildings, reducing transportation emissions, reducing solid waste disposal, and GHG emissions reductions from municipal operations. Daly City completed an update to the General Plan which incorporated these goals in March 2013.

### Daly City Municipal Code

Consistent with the goals of Daly City's Green Vision, the City Council adopted the Green Building Standards Code in order to protect the environment and health of the community. Chapter 15.22 of the Municipal Code 15.22 incorporates the California Green Building Standards Code, 2019 edition, for the protection of the public health and safety of its inhabitants.

### Daly City Reach Code

In April 2021, the City Council of Daly City adopted a reach code ordinance to electrify buildings and vehicles in new construction. The new requirements are intended to result in safer and more comfortable buildings, increase electric vehicle charging infrastructure, and reduce carbon emissions. The ordinance requires all new buildings to be all-electric with some exceptions such as non-residential buildings containing a commercial kitchen may contain non-electric cooking appliances. The ordinance also requires electric vehicle charging infrastructure beyond that required in the 2019 California Green Building Standards Code.

#### **4.8.1.3 Existing Conditions**

Unlike emissions of criteria and toxic air pollutants, which have regional and local impacts, emissions of GHGs have a broader, global impact. Global warming is a process whereby GHGs accumulating in the upper atmosphere contribute to an increase in the temperature of the earth and

changes in weather patterns. The existing single-family residence on the project site would result in limited GHG emissions.

#### 4.8.2 **Impact Discussion**

|                                                                                                                                   | Potentially<br>Significant<br>Impact | Less than<br>Significant<br>with Mitigation<br>Incorporated | Less than<br>Significant<br>Impact  | No Impact                |
|-----------------------------------------------------------------------------------------------------------------------------------|--------------------------------------|-------------------------------------------------------------|-------------------------------------|--------------------------|
| Would the project:                                                                                                                |                                      |                                                             |                                     |                          |
| 1) Generate greenhouse gas (GHG) emissions, either directly or indirectly, that may have a significant impact on the environment? | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 2) Conflict with an applicable plan, policy, or regulation adopted for the purpose of reducing the emissions of GHGs?             | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

##### 4.8.2.1 ***Thresholds of Significance***

In April of 2022, BAAQMD updated its thresholds of significance for evaluating a project's GHG impacts under CEQA. Under these updated thresholds, projects must meet either criteria A or B of the following:

A. Projects must include, at a minimum, the following project design elements:

##### 1. Buildings

- a. The project will not include natural gas appliances or natural gas plumbing (in both residential and nonresidential development).
- b. The project will not result in any wasteful, inefficient, or unnecessary energy usage as determined by the analysis required under CEQA Section 21100(b)(3) and Section 15126.2(b) of the State CEQA Guidelines.

##### 2. Transportation

- a. Achieve a reduction in project-generated vehicle miles traveled (VMT) below the regional average consistent with the current version of the California Climate Change Scoping Plan (currently 15 percent) or meet a locally adopted Senate Bill 743 VMT target, reflecting the recommendations provided in the Governor's Office of Planning and Research's Technical Advisory on Evaluating Transportation Impacts in CEQA:
  - i. Residential projects: 15 percent below the existing VMT per capita
  - ii. Office projects: 15 percent below the existing VMT per employee
  - iii. Retail projects: no net increase in existing VMT
- b. Achieve compliance with off-street electric vehicle requirements in the most recently adopted version of CALGreen Tier 2.

B. Be consistent with a local GHG reduction strategy that meets the criteria under State CEQA Guidelines Section 15183.5(b).

---

**Impact GHG-1:** The project would not generate GHG emissions, either directly or indirectly, that may have a significant impact on the environment. **(Less than Significant Impact)**

---

### Construction Emissions

GHG emissions associated with project construction activities (including operation of construction equipment, hauling truck trips, vendor truck trips, and worker trips) were estimated to be 107 MT of carbon dioxide equivalents (CO<sub>2</sub>e) during nine months of construction (refer to Appendix A). Neither the City nor BAAQMD have an adopted threshold of significance for construction-related GHG emissions, though BAAQMD recommends quantifying emissions and disclosing that GHG emissions would occur during construction.

BAAQMD also encourages the incorporation of best management practices, including recycling and reusing construction waste or demolition materials, and using local building materials of at least ten percent. The project, in compliance with CALGreen would recycle at least 65 percent of construction waste or demolition materials. Additionally, the project would limit equipment idling times either by shutting equipment off when not in use or reducing the maximum idling time to five minutes, as described in MM AIR-3.1. Thus, the project would not generate significant GHG emissions during construction. **(Less than Significant Impact)**

### Operational Emissions

In April of 2022, BAAQMD updated its thresholds of significance for evaluating a project's GHG impacts under CEQA. Under these recently updated thresholds, projects must demonstrate either A) specific building design and transportation elements or B) consistency with a local GHG reduction strategy. The City of Daly City does not currently have a certified GHG reduction strategy. Consistent with the BAAQMD thresholds and the City's Reach Code, the project would be 100 percent electric and would not utilize any natural gas. As described in Section 4.6 Energy, the project would not result in any wasteful, inefficient, or unnecessary energy usage. As discussed further in Section 4.17 Transportation, the project would result in a low number of VMT and thus, would not generate a significant amount of GHG emissions from automobiles. Each of the proposed townhomes would include one EV Ready Space<sup>28</sup>, in compliance with CALGreen. Additionally, the proposed townhome buildings would be built in accordance with the California Green Building Standards Code and would include rooftop solar panels on all dwelling units to further reduce its GHG impact. Therefore, the project would result in a less than significant level of GHG emissions. **(Less than Significant Impact)**

---

**Impact GHG-2:** The project would not conflict with an applicable plan, policy, or regulation adopted for the purpose of reducing the emissions of GHGs. **(Less than Significant Impact)**

---

The project would be consistent with the City's General Plan policies [specifically Policy HE-23 of increasing energy efficiency standards in new and existing housing developments], Green Vision, and the current CALGreen Code, which requires efficient windows, insulation, lighting, ventilation

---

<sup>28</sup> EV Ready Space: A vehicle space which is provided with a branch circuit; any necessary raceways, both underground and/or surface mounted; to accommodate EV charging, terminating in a receptacle or a charger

systems, and other features that reduce water and energy consumption. Compliance with the CALGreen Code would ensure the project incorporates various measures to reduce GHG emissions. Consistent with the City's Reach Code, the project would be 100 percent electric and would not utilize any natural gas. For this reason, the project would be consistent with applicable plans, policies, and regulations adopted for the purpose of reducing emissions of GHGs. **(Less Than Significant Impact)**

## **4.9 HAZARDS AND HAZARDOUS MATERIALS**

The following discussion is based, in part, on a Phase I Environmental Site Assessment (Phase I) prepared by AEI Consultants in October 2020 and a Phase II Subsurface Investigation (Phase II) prepared by Creative Environmental Solutions (ICES) in November 2020. Copies of these reports are included as Appendix C and Appendix D, respectively, of this Initial Study.

### **4.9.1 Environmental Setting**

#### **4.9.1.1 *Regulatory Framework***

##### **Overview**

The storage, use, generation, transport, and disposal of hazardous materials and waste are highly regulated under federal and state laws. In California, the EPA has granted most enforcement authority over federal hazardous materials regulations to the California Environmental Protection Agency (CalEPA). In turn, local agencies have been granted responsibility for implementation and enforcement of many hazardous materials regulations under the Certified Unified Program Agency (CUPA) program.

Worker health and safety and public safety are key issues when dealing with hazardous materials. Proper handling and disposal of hazardous material is vital if it is disturbed during project construction. Cal/OSHA enforces state worker health and safety regulations related to construction activities. Regulations include exposure limits, requirements for protective clothing, and training requirements to prevent exposure to hazardous materials. Cal/OSHA also enforces occupational health and safety regulations specific to lead and asbestos investigations and abatement.

##### **Federal and State**

#### **Federal Aviation Regulations Part 77**

Federal Aviation Regulations, Part 77 Objects Affecting Navigable Airspace (FAR Part 77) sets forth standards and review requirements for protecting the airspace for safe aircraft operation, particularly by restricting the height of potential structures and minimizing other potential hazards (such as reflective surfaces, flashing lights, and electronic interference) to aircraft in flight. These regulations require that the Federal Aviation Administration (FAA) be notified of certain proposed construction projects located within an extended zone defined by an imaginary slope radiating outward for several miles from an airport's runways, or which would otherwise stand at least 200 feet in height above the ground.

#### **Comprehensive Environmental Response, Compensation, and Liability Act**

The Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), commonly known as Superfund, was enacted by Congress on December 11, 1980. This law created a tax on the chemical and petroleum industries and provided broad federal authority to respond directly to releases or threatened releases of hazardous substances that may endanger public health or the environment. Over five years, \$1.6 billion was collected and the tax went to a trust fund for cleaning

up abandoned or uncontrolled hazardous waste sites. CERCLA accomplished the following objectives:

- Established prohibitions and requirements concerning closed and abandoned hazardous waste sites;
- Provided for liability of persons responsible for releases of hazardous waste at these sites; and
- Established a trust fund to provide for cleanup when no responsible party could be identified.

The law authorizes two kinds of response actions:

- Short-term removals, where actions may be taken to address releases or threatened releases requiring prompt response; and
- Long-term remedial response actions that permanently and significantly reduce the dangers associated with releases or threats of releases of hazardous substances that are serious, but not immediately life-threatening. These actions can be completed only at sites listed on the EPA's National Priorities List.

CERCLA also enabled the revision of the National Contingency Plan (NCP). The NCP provided the guidelines and procedures needed to respond to releases and threatened releases of hazardous substances, pollutants, or contaminants. The NCP also established the National Priorities List. CERCLA was amended by the Superfund Amendments and Reauthorization Act on October 17, 1986.<sup>29</sup>

### Resource Conservation and Recovery Act

The Resource Conservation and Recovery Act (RCRA), enacted in 1976, is the principal federal law in the United States governing the disposal of solid waste and hazardous waste. RCRA gives the EPA the authority to control hazardous waste from the “cradle to the grave.” This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also sets forth a framework for the management of non-hazardous solid wastes.

The Federal Hazardous and Solid Waste Amendments (HSWA) are the 1984 amendments to RCRA that focused on waste minimization, phasing out land disposal of hazardous waste, and corrective action for releases. Some of the other mandates of this law include increased enforcement authority for the EPA, more stringent hazardous waste management standards, and a comprehensive underground storage tank program.<sup>30</sup>

<sup>30</sup> United States Environmental Protection Agency. “Summary of the Resource Conservation and Recovery Act.” Accessed May 11, 2020. <https://www.epa.gov/laws-regulations/summary-resource-conservation-and-recovery-act>.

## Government Code Section 65962.5

Section 65962.5 of the Government Code requires CalEPA to develop and update a list of hazardous waste and substances sites, known as the Cortese List. The Cortese List is used by state and local agencies and developers to comply with CEQA requirements. The Cortese List includes hazardous substance release sites identified by the Department of Toxic Substances Control (DTSC) and State Water Resources Control Board (SWRCB).<sup>31</sup>

## Toxic Substances Control Act

The Toxic Substances Control Act (TSCA) of 1976 provides the EPA with authority to require reporting, record-keeping and testing requirements, and restrictions relating to chemical substances and/or mixtures. Certain substances are generally excluded from TSCA, including, among others, food, drugs, cosmetics, and pesticides. The TSCA addresses the production, importation, use, and disposal of specific chemicals including polychlorinated biphenyls (PCBs), asbestos, radon, and lead-based paint.

## California Accidental Release Prevention Program

The California Accidental Release Prevention (CalARP) Program aims to prevent accidental releases of regulated hazardous materials that represent a potential hazard beyond the boundaries of a property. Facilities that are required to participate in the CalARP Program use or store specified quantities of toxic and flammable substances (hazardous materials) that can have off-site consequences if accidentally released. The San Mateo County Environmental Health Services Division reviews CalARP risk management plans as the CUPA.

## Asbestos-Containing Materials

Friable asbestos is any asbestos-containing material (ACM) that, when dry, can easily be crumbled or pulverized to a powder by hand, allowing the asbestos particles to become airborne. Common examples of products that have been found to contain friable asbestos include acoustical ceilings, plaster, wallboard, and thermal insulation for water heaters and pipes. Common examples of non-friable ACMs are asphalt roofing shingles, vinyl floor tiles, and transite siding made with cement. The EPA phased out use of friable asbestos products between 1973 and 1978. National Emission Standards for Hazardous Air Pollutants (NESHAP) guidelines require that potentially friable ACMs be removed prior to building demolition or remodeling that may disturb the ACMs.

## CCR Title 8, Section 1532.1

The United States Consumer Product Safety Commission banned the use of lead-based paint in 1978. Removal of older structures with lead-based paint is subject to requirements outlined by the Cal/OSHA Lead in Construction Standard, CCR Title 8, Section 1532.1 during demolition activities. Requirements include employee training, employee air monitoring, and dust control. If lead-based paint is peeling, flaking, or blistered, it is required to be removed prior to demolition.

## Regional and Local

### San Francisco International Airport Land Use Compatibility Plan

The project site is located within the jurisdiction of the San Francisco International (SFO) Airport Land Use Compatibility Plan (ALUCP). The ALUCP identifies potential conflicting land uses within the Airport Influence Area (AIA) of SFO.

### Daly City 2030 General Plan

The General Plan includes policies for the purpose of avoiding or mitigating impacts resulting from development projects within the City. The following policies are specific to hazards and hazardous materials and are applicable to the proposed project.

| Policy/Task   | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|---------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Policy LU-18  | Development activities shall not be allowed to significantly disrupt the natural or urban environment and all reasonable measures shall be taken to identify and prevent or mitigate potentially significant effects.                                                                                                                                                                                                                                                                                                                     |
| Task LU-18.1  | Ensure that potentially significant environmental impacts associated with development proposals are properly mitigated through conditions of approval, mitigation measures, project design, or project denial. In cases where the impacts may not be completely preventable but will not significantly disrupt the community, the City may recognize that the benefits of a project may outweigh the environmental consequences. In no case shall the City approve a project that endangers the health, safety, or welfare of the public. |
| Policy SE-4.1 | Support efforts to locate, regulate, and maintain information regarding hazardous materials located or transported within the City.                                                                                                                                                                                                                                                                                                                                                                                                       |
| Policy SE-4.2 | Cooperate with the County of San Mateo in the regulation of hazardous materials and transportation in the Fire Prevention Services Bureau within the City.                                                                                                                                                                                                                                                                                                                                                                                |
| Policy SE-4.6 | Require the preparation of a risk assessment to determine site suitability for applications for hazardous materials waste management facilities. Establish the distance requirements for these facilities from public assembly, residential or immobile population and recreation areas and structures. Access impacts from seismic, geologic, and flood hazards, impacts on wetlands, endangered species, air quality and emergency response capabilities; and proximity to major transport routes.                                      |

#### 4.9.1.2 *Existing Conditions*

### On-Site Conditions

#### Historic Uses

Based on a review of historic aerial photographs, the first known development on-site was the single-family residence located on the northwestern corner of the project site. The residence was constructed around 1908. By 1926, numerous greenhouses were developed on the property, and by 1946, a boiler room was developed on the southwestern corner of the project site. By 1980, the greenhouses and boiler room were no longer present on-site.

## Soil Conditions

Five soil samples were collected from four test pit locations on-site. The soil samples were analyzed for organochlorine pesticides, arsenic, lead, mercury, and soluble lead. The soil analysis indicated that the soil samples contained organochlorine pesticide concentrations that were below the RWQCB's Direct Exposure Human Health Screening Levels (DEHHSL) for residential land use. Arsenic concentrations ranged from 2.9 mg/kg to 4.6 mg/kg, exceeding the DEHHSL of 0.067 mg/kg, but were below the background upper level of 11 mg/kg. The RWQCB considers background levels to be acceptable for contaminants where the DEHHSL are less than typical background levels. The lead concentrations contained in the samples were generally within typical background levels and below their respective residential DEHHSL, with the exception of one sample. The lead concentration was found to be 92 mg/kg, exceeding the residential DEHHSL of 80 mg/kg.

Concentrations of mercury detected in the samples were below their respective residential DEHHSL and within typical background levels. Soluble lead was found at a concentration of 4.3 mg/L, which is below the Soluble Threshold Limit Concentration (STLC) of 5.0 mg/L. Soil containing a soluble lead concentration below the STLC is characterized as non-hazardous waste.

## Asbestos and Lead-Based Paint (LBP)

Due to the age of the existing residence, there is potential that ACMs and LBP are present in building materials.

## **Surrounding Conditions**

Based on a records search, the south adjoining property at 165 3<sup>rd</sup> Avenue was also historically developed with greenhouses from at least 1943 to 2002. Prior to redevelopment of this property with the current townhouses, elevated concentrations of pesticides in soils were identified in the area of the former greenhouses, including dichlorodiphenyltrichloroethane (DDT), dieldrin, dichlorodiphenyl-dichloroethylene (DDE), and dichlorodiphenyldichloroethane (DDD). Some of the highest concentrations were identified along the border shared with the project site. Thus, there is potential that the project site has some soils impacted by pesticide contamination, particularly in the southern portion of the site.

## **Other Hazards**

### Airports

The San Francisco International Airport is located approximately 6.6 miles southeast of the project site. Federal Aviation Regulations, Part 77, "Objects Affecting Navigable Airspace" (FAR Part 77), requires that the Federal Aviation Administration (FAA) be notified of certain proposed construction projects located within an extended zone defined by an imaginary slope radiating outward for several miles from an airport's runways, or which would otherwise stand at least 200 feet in height above ground. For the project site, any structure exceeding 200 feet in height above ground would require submittal to the FAA for airspace safety review.

Any proposed land use policy actions, including the proposed General Plan amendment/rezoning, that affect properties within the ALUCP Area B boundary in Daly City (such as the project site) must

be referred to the C/CAG Board for an ALUCP consistency review and determination. The Plan would first go to the C/CAG Airport Land Use Committee for review and a recommendation to the C/CAG Board. The Board will consider the ALUC recommendation and evaluate the consistency of the General Plan amendment with the relevant airport/land use compatibility policies and criteria contained in the adopted ALUCP. The C/CAG Board consistency determination must occur before the City Council can approve the proposed project. If the C/CAG Board determines the project inconsistent, the City Council can override the Board's determination with a supermajority vote upon making necessary findings.

### Wildland Fire Hazards

The project site is not located within a Very-High Fire Hazard Severity Zone for wildland fires.<sup>32</sup>

#### **4.9.2      Impact Discussion**

|                                                                                                                                                                                                                                                                   | Potentially<br>Significant<br>Impact | Less than<br>Significant with<br>Mitigation<br>Incorporated | Less than<br>Significant<br>Impact  | No Impact                           |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------|-------------------------------------------------------------|-------------------------------------|-------------------------------------|
| Would the project:                                                                                                                                                                                                                                                |                                      |                                                             |                                     |                                     |
| 1) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?                                                                                                                           | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| 2) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?                                                                   | <input type="checkbox"/>             | <input checked="" type="checkbox"/>                         | <input type="checkbox"/>            | <input type="checkbox"/>            |
| 3) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?                                                                                                   | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| 4) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?                                    | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 5) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, result in a safety hazard or excessive noise for people residing or working in the project area? | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| 6) Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?                                                                                                                                         | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |

|                                                                                                                                          | Potentially<br>Significant<br>Impact | Less than<br>Significant with<br>Mitigation<br>Incorporated | Less than<br>Significant<br>Impact  | No Impact                |
|------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------|-------------------------------------------------------------|-------------------------------------|--------------------------|
| Would the project:                                                                                                                       |                                      |                                                             |                                     |                          |
| 7) Expose people or structures, either directly or indirectly, to a significant risk of loss, injury, or death involving wildland fires? | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

---

**Impact HAZ-1:** The project would not create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials. **(Less than Significant Impact)**

---

Operation of the proposed townhomes would likely include the use and storage of cleaning supplies and maintenance chemicals in small quantities on-site. The small quantities of cleaning supplies and maintenance chemicals used on-site would be comparable to the operations of adjacent residential uses and would not pose a risk to adjacent land uses. **(Less Than Significant Impact)**

---

**Impact HAZ-2:** The project would not create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment. **(Less than Significant Impact with Mitigation Incorporated)**

---

### On-Site Soils

As discussed in Section 4.9.1.2 Existing Conditions, lead was detected in the on-site soils in excess of the RWQCB's DEHSL. Additionally, the adjacent site at 165 3<sup>rd</sup> Avenue was known to have elevated levels of pesticide contamination prior to development of the current townhomes. Soil sampling on the project site did not identify elevated concentrations of organochlorine pesticides in on-site soils. The project could result in the release soil contaminants into the environment if appropriate control measures are not implemented.

**Impact HAZ-2:** Disturbance of hazardous materials could expose works and nearby sensitive receptors to hazardous materials during construction.

**Mitigation Measures:** The following mitigation measures would reduce impacts to workers and nearby sensitive receptors to a less than significant level:

**MM HAZ-2.1:** Prepare a site management plan for review and approval by the San Mateo County Environmental Health Services Division (SMCEHSD). Proof of approval or actions for site work required by the SMCEHSD must be provided to the Director of Community Development prior to the issuance of any demolition or building permits.

With implementation of mitigation measure MM HAZ-2.1, the impacts from on-site contamination would be reduced to a less than significant level. **(Less than Significant Impact with Mitigation Incorporated)**

## Asbestos and Lead Based Paint

Based on the estimated age of the existing on-site building, ACMs and LBP may be present in some building materials. Building demolition could result in the release of these materials to the environment. The project will, however, be required to comply with local, state, and federal laws, which require an ACM and LBP building survey be completed by a qualified professional to determine the presence of ACMs and/or LBP on the residence proposed for demolition.

Demolition activities will be undertaken in accordance with Cal/OSHA standards, contained in Title 8 of the California Code of Regulations Sections 1528 and 1529, to protect workers from exposure to asbestos. Materials containing more than one percent asbestos are also subject to BAAQMD regulations. To comply with these regulatory requirements, a registered asbestos abatement contractor will be retained to remove and dispose of all potentially friable ACMs, in accordance with the National Emissions Standards for Hazardous Air Pollutants guidelines, prior to building demolition that may disturb the materials. Materials containing LBP will be removed in accordance with Cal/OSHA Lead in Construction Standard, Title 8, CCR 1532.1, including employee training, employee air monitoring and dust control. Any debris or soil containing lead-based paint or coatings will be disposed of at landfills that meet acceptance criteria for the waste being disposed. **(Less Than Significant Impact)**

---

|                      |                                                                                                                                                                                                                          |
|----------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Impact HAZ-3:</b> | The project would not emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school. <b>(Less than Significant Impact)</b> |
|----------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

---

The nearest school is Thornton High School, located at 115 1<sup>st</sup> Avenue, approximately 0.07 miles west of the project site. As discussed in Impact HAZ-1, project operation would involve the storage and use of limited quantities of common residential cleaning and maintenance chemicals. Construction emissions are addressed in Section 4.3 Air Quality. The project would not emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste. **(Less than Significant Impact)**

---

|                      |                                                                                                                                                                                                                                                             |
|----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Impact HAZ-4:</b> | The project would not be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, create a significant hazard to the public or the environment. <b>(No Impact)</b> |
|----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

---

The project site is not included on a list of hazardous materials sites pursuant to Government Code Section 65962.5.<sup>33</sup> **(No Impact)**

---

|                      |                                                                                                                                                                                                                                                                                                                                   |
|----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Impact HAZ-5:</b> | The project would be located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport. The project would not result in a safety hazard or excessive noise for people residing or working in the project area. <b>(Less than Significant Impact)</b> |
|----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

<sup>33</sup> CalEPA. Cortese List Data Resources. Accessed December 1, 2020. <https://calepa.ca.gov/sitecleanup/corteselist/>

The project site is located approximately 6.6 miles northwest of SFO. The proposed project would be located within the SFO AIA. As a result, it would be required to comply with applicable policies of the SFO ALUCP. The project has been reviewed by the C/CAG Board and was determined to be consistent with the ALUCP.<sup>34</sup> The project site is not located inside the CNEL noise contours identified in the SFO ALUCP, indicating airport related noise levels are below 65 dB at the project site, a level compatible with residential uses.

The proposed project will be 35 feet in height; therefore, the total height of the townhomes would not exceed 200 feet above ground level and, therefore, would not require submittal to the FAA for airspace safety review. Although the project site is located within the jurisdiction of the SFO ALUCP, there are no safety hazards or excessive noise levels which would result in a significant impact. **(Less than Significant Impact)**

|                      |                                                                                                                                                                                    |
|----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Impact HAZ-6:</b> | The project would not impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan. <b>(Less than Significant Impact)</b> |
|----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

---

The proposed project would not impair or physically interfere with any adopted emergency response or evacuation plan. The proposed project would be constructed to comply with all applicable building and fire codes. During construction and operation of any future project, roadways would not be blocked such that emergency vehicles would be unable to access the site or surrounding properties. During operation, emergency ingress and egress to the project site would be provided by the surrounding roadways. The alignments of the drive aisles on-site and the radii of the corners and curbs would be adequate to accommodate the circulation of emergency vehicles. **(Less than Significant Impact)**

---

|                      |                                                                                                                                                                                                   |
|----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Impact HAZ-7:</b> | The project would not expose people or structures, either directly or indirectly, to a significant risk of loss, injury, or death involving wildland fires. <b>(Less than Significant Impact)</b> |
|----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

---

The project vicinity is entirely urbanized and is not located within a wildlands hazard area.<sup>35</sup> Therefore, the project would not expose people or structures to a significant risk of loss, injury, or death involving wildland fires. **(Less than Significant Impact)**

## **4.10 HYDROLOGY AND WATER QUALITY**

### **4.10.1 Environmental Setting**

#### **4.10.1.1 *Regulatory Framework***

##### **Federal and State**

The federal Clean Water Act and California's Porter-Cologne Water Quality Control Act are the primary laws related to water quality in California. Regulations set forth by the EPA and the SWRCB have been developed to fulfill the requirements of this legislation. EPA regulations include the National Pollutant Discharge Elimination System (NPDES) permit program, which controls sources that discharge pollutants into the waters of the United States (e.g., streams, lakes, bays, etc.). These regulations are implemented at the regional level by the Regional Water Quality Control Boards (RWQCBs). The project site is within the jurisdiction of the San Francisco Bay RWQCB.

##### National Flood Insurance Program

The Federal Emergency Management Agency (FEMA) established the National Flood Insurance Program (NFIP) to reduce impacts of flooding on private and public properties. The program provides subsidized flood insurance to communities that comply with FEMA regulations protecting development in floodplains. As part of the program, FEMA publishes Flood Insurance Rate Maps (FIRMs) that identify Special Flood Hazard Areas (SFHAs). An SFHA is an area that would be inundated by the one-percent annual chance flood, which is also referred to as the base flood or 100-year flood.

##### Statewide Construction General Permit

The SWRCB has implemented an NPDES General Construction Permit for the State of California (Construction General Permit). For projects disturbing one acre or more of soil, a Notice of Intent (NOI) must be filed with the RWQCB by the project sponsor, and a Storm Water Pollution Prevention Plan (SWPPP) must be prepared by a qualified professional prior to commencement of construction and filed with the RWQCB by the project sponsor. The Construction General Permit includes requirements for training, inspections, record keeping, and, for projects of certain risk levels, monitoring. The general purpose of the requirements is to minimize the discharge of pollutants and to protect beneficial uses and receiving waters from the adverse effects of construction-related storm water discharges.

##### **Regional and Local**

##### San Francisco Bay Basin Plan

The San Francisco Bay RWQCB regulates water quality in accordance with the Water Quality Control Plan for the San Francisco Bay Basin (Basin Plan). The Basin Plan lists the beneficial uses that the San Francisco Bay RWQCB has identified for local aquifers, streams, marshes, rivers, and the San Francisco Bay, as well as the water quality objectives and criteria that must be met to protect these uses. The San Francisco Bay RWQCB implements the Basin Plan by issuing and enforcing waste discharge requirements, including permits for nonpoint sources such as the urban runoff

discharged by a City's stormwater drainage system. The Basin Plan also describes watershed management programs and water quality attainment strategies.

### Municipal Regional Permit Provision C.3

The San Francisco Bay RWQCB re-issued the MRP in 2015 to regulate stormwater discharges from municipalities and local agencies (co-permittees) in Alameda, Contra Costa, San Mateo, and Santa Clara Counties, and the cities of Fairfield, Suisun City, and Vallejo.<sup>36</sup> Under Provision C.3 of the MRP, new and redevelopment projects that create or replace 10,000 square feet or more of impervious surface area are required to implement site design, source control, and Low Impact Development (LID)-based stormwater treatment controls to treat post-construction stormwater runoff. LID-based treatment controls are intended to maintain or restore the site's natural hydrologic functions, maximizing opportunities for infiltration and evapotranspiration, and using stormwater as a resource (e.g., rainwater harvesting for non-potable uses). The MRP also requires that stormwater treatment measures are properly installed, operated, and maintained.

In addition to water quality controls, the MRP requires new development and redevelopment projects that create or replace one acre or more of impervious surface to manage development-related increases in peak runoff flow, volume, and duration, where such hydromodification is likely to cause increased erosion, silt pollutant generation, or other impacts to local rivers, streams, and creeks. Projects may be deemed exempt from these requirements if they do not meet the minimized size threshold, drain into tidally influenced areas or directly into the Bay, or drain into hardened channels, or if they are infill projects in subwatersheds or catchment areas that are greater than or equal to 65 percent impervious.

### Construction Dewatering Waste Discharge Requirements

Each of the RWQCBs regulate construction dewatering discharges to storm drains or surface waters within its Region under the NPDES program and Waste Discharge Requirements.

### Daly City Municipal Code

Chapter 14.04 of the Daly City Municipal Code, also known as the Daly City Stormwater Management and Discharge Control Ordinance prohibits non-stormwater discharges to the City storm drain system. The purpose of the Ordinance is to eliminate non-stormwater discharges to the municipal separate storm drain system, control the discharge of spills, dumping or disposal of materials other than stormwater, and reduce pollutants in stormwater discharges into the storm drain system to the maximum extent practicable. Chapter 14.12 gives the City the authority to inspect projects to enforce any of the provisions of Title 14.

Chapter 15.62 of the Daly City Municipal Code, also known as the City of Daly City Grading, Erosion and Sediment Control Ordinance sets forth rules and regulations to control site clearing, vegetation disturbances, land-fills, land excavations, soil storage, and other such activities which may cause sediments and other pollutants to enter the public drainage facilities. The chapter establishes the regulations, permit requirements, procedures for administration and enforcement of permits to properly control the aforementioned activities to preserve and enhance public health, safety and

---

<sup>36</sup> MRP Number CAS612008

environment. Section 15.62.230 requires the permittee to maintain a copy of the permit, approved plans and reports and make these available for city inspection. Section 15.62.270 gives the City engineer authority to suspend or revoke a permit for violation or non-compliance with Chapter 15.62.

#### Daly City 2030 General Plan

The General Plan includes policies for the purpose of avoiding or mitigating impacts resulting from development projects within the City. The following policies are specific to hydrology and water quality and are applicable to the proposed project.

| <b>Policy/Task</b> | <b>Description</b>                                                                                                                                                                                                                                                                                                                                                                                    |
|--------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Policy RME-8       | Through the development of a Stormwater Management Program, ensure that all new development complies with the applicable Municipal Regional Stormwater Permit by incorporating controls that reduce water quality impacts over the life of the project in ways that are both technically and economically feasible, and reduce pollutants in stormwater discharges to the maximum extent practicable. |
| Task RME-8.5       | Ensure the regular inspection of stormwater treatment facilities as required by the Municipal Regional Stormwater NPDES Permit.                                                                                                                                                                                                                                                                       |
| Policy RME-9       | Balance stormwater mitigation measures with the other inherent benefits of higher density development that is in close proximity to public transit, i.e., reduction of Vehicle Miles Traveled (VMT) on local and regional roadways to the extent permitted under the Municipal Regional Stormwater Permit.                                                                                            |
| Task RME-9.1       | Continue to explore low-impact development credits for high density transit-oriented development within the City's established Priority Development Areas with the Regional Water Quality Control Board.                                                                                                                                                                                              |
| Policy SE-2.1      | Protect the City of Daly City from unreasonable risk to life and property caused by flood hazards by designing and constructing drainage facilities to improve the flow capacity of the City's water system in order to accommodate the storm water runoff generated by a 100-year storm.                                                                                                             |

#### **4.10.1.2      *Existing Conditions***

##### **Stormwater**

The project site is located within the Colma Creek Watershed which extends from San Bruno Mountain to its outlet at the San Francisco Bay just north of the San Francisco Airport and south of Point San Bruno. The project site is primarily unpaved, with the exception of the existing single-family residence and associated driveway. Approximately 1,700 square feet (5.5 percent) of the 31,140 square-foot site is made up of impervious surface area while the remainder of the project site (94.5 percent) contains pervious surfaces. Stormwater not absorbed within the project site is directed to the curb inlets and conveyed into the existing 12-inch stormwater line in 3<sup>rd</sup> Avenue.

## **Groundwater**

The aquifer that underlies most of Daly City is within the Westside Groundwater Basin (Westside Basin). The Westside Basin underlies parts of San Francisco and northern San Mateo counties. The basin extends from Golden Gate Park in the north and past the San Francisco International Airport in the south. The basin extends to the west beneath the Pacific Ocean at least as far as the San Andreas Fault and to the east an unknown distance beneath San Francisco Bay. The Westside Basin is a buried valley, where the walls and floor of the valley are formed by rock with a mixture of coarse- and fine-grained sediments as much as 3,700 feet thick in parts of the basin fill. The coarse-grained sediments consist of sand and gravel and the fine-grained sediments consist of silt and clay. Sand and gravel can transmit substantial quantities of water to wells, whereas silt and clay impede the movement of groundwater. Where silt and clay deposits form semi-continuous beds, they can effectively isolate the water table from underlying aquifer. Groundwater in the shallow water table aquifer is referred to as “unconfined” and the underlying aquifer separated from the water table by continuous and semi-continuous fine-grained silt and clay strata are referred to as “confined.” Both unconfined and confined conditions occur in the Westside Basin. The project site is not located within a designated recharge area.<sup>37</sup> Groundwater on-site is estimated to be 16 to 17 feet below ground surface (bgs) and flow westward.<sup>38</sup>

There is an existing, buried well on-site that was likely associated with prior greenhouse irrigation. The depth of the well on-site is not currently known, but other wells in the project area are known to reach depths up to hundreds of feet deep.

## **Flooding Hazards**

FEMA has developed a Flood Hazard Boundary Map (FHBM) and has designated Daly City as a Non-Special Flood Hazard Area (NSFHA). The project site is not located in a 100-year floodplain.

## **Dam Inundation, Seiches, Tsunamis, and Mudflow Hazards**

No areas in the city are subject to dam inundation. There are no water bodies in Daly City so there is no threat of seiches. A tsunami inundation map prepared by the California Department of Conservation shows a portion of the coast in Daly City as a tsunami inundation area. However, the project site is outside of the tsunami inundation area.<sup>39</sup>

#### 4.10.2 Impact Discussion

|                                                                                                                                                                                                                        | Potentially<br>Significant<br>Impact                                                                                                                                                                | Less than<br>Significant<br>with Mitigation<br>Incorporated | Less than<br>Significant<br>Impact  | No Impact                           |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------|-------------------------------------|-------------------------------------|
| Would the project:                                                                                                                                                                                                     |                                                                                                                                                                                                     |                                                             |                                     |                                     |
| 1) Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality?                                                                             | <input type="checkbox"/>                                                                                                                                                                            | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| 2) Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?                                  | <input type="checkbox"/>                                                                                                                                                                            | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| 3) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would: | <input type="checkbox"/>                                                                                                                                                                            | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| – result in substantial erosion or siltation on- or off-site;                                                                                                                                                          | <input type="checkbox"/>                                                                                                                                                                            | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| – substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site;                                                                                              | <input type="checkbox"/>                                                                                                                                                                            | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| – create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or                                | <input type="checkbox"/>                                                                                                                                                                            | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| – impede or redirect flood flows?                                                                                                                                                                                      | <input type="checkbox"/>                                                                                                                                                                            | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| 4) In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation?                                                                                                                    | <input type="checkbox"/>                                                                                                                                                                            | <input type="checkbox"/>                                    | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 5) Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?                                                                                                | <input type="checkbox"/>                                                                                                                                                                            | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| <hr/>                                                                                                                                                                                                                  |                                                                                                                                                                                                     |                                                             |                                     |                                     |
| <b>Impact HYD-1:</b>                                                                                                                                                                                                   | The project would not violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality. <b>(Less than Significant Impact)</b> |                                                             |                                     |                                     |

#### Construction Water Quality Impacts

Potential impacts related to water quality are constrained by existing regulatory systems from the federal to the local level. The Clean Water Act sets minimum water quality standards for all surface waters in the U.S. and requires that industrial, municipal, and construction-related sources of pollution are regulated through the NPDES. The City requires project applicants to submit a

stormwater management plan that illustrates full compliance with the MRP. The project would be required to include stormwater controls and construction best management practices. Compliance with the MRP would ensure that project construction would not substantially degrade surface water or ground water quality. **(Less than Significant Impact)**

### **Post-Construction Water Quality Impacts**

The proposed project would result in approximately 15,850 square feet (51 percent) of impervious surface area and 15,290 square feet (49 percent) of pervious surface area on the site. Overall, the project would result in a net increase of 14,150 square feet of impervious surface area. Pervious surface area provided by the project would include pervious concrete for the driveway, landscaping areas, and bioretention areas. The drainage system on-site would connect to the existing 12-inch stormwater line in 3<sup>rd</sup> Avenue. With the implementation of stormwater treatment measures, the project would result in a less than significant impact to water quality. **(Less than Significant Impact)**

---

|                      |                                                                                                                                                                                                                                                |
|----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Impact HYD-2:</b> | The project would not substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin. <b>(Less than Significant Impact)</b> |
|----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

---

Daly City receives a large portion of its water supply from the San Francisco Public Utilities Commission (SFPUC) and supplements the SFPUC supply with groundwater pumped from six local wells. During dry periods, groundwater makes up a larger proportion (up to 45 percent) of the City's supply. The proposed project, consisting of 14 townhomes, would not result in the need for excessive groundwater pumping from the local wells, and would therefore not substantially decrease groundwater supplies (refer to water supply discussion in Section 4.19 Utilities and Service Systems). There is a buried existing well on-site that was likely associated with irrigation of the greenhouses previously existing on-site. The project proposes to abandon and/or destroy the well in conformance with the County of San Mateo and RWQCB requirements. The existing well is currently inoperable and does not supply groundwater to any existing land uses. Thus, abandonment/destruction of the well would not decrease groundwater supplies or interfere with groundwater management.

There are no designated groundwater recharge areas within the Westside Groundwater Basin. The principal sources of recharge are direct infiltration of rainfall, infiltration of irrigation water, and leakage from water and sewer pipes.<sup>40</sup> As described in Impact HYD-1, the proposed project would reduce the pervious area on-site, resulting in a corresponding decrease in infiltration capacity. However, the project's Stormwater Management Plan shows numerous self-retaining, self-treating, bioretention areas within the landscaping that would provide opportunities for stormwater infiltration. The project would therefore not be expected to substantially interfere with groundwater recharge or impede groundwater management of the basin. **(Less Than Significant Impact)**

---

<sup>40</sup> *San Francisco Bay Hydrologic Region Westside Groundwater Basin*, California's Groundwater Bulletin 118, January 20, 2006.

---

**Impact HYD-3:** The project would not substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would result in substantial erosion or siltation on- or off-site; substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site; create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or impede or redirect flood flows. **(Less than Significant Impact)**

---

The project site does not contain, nor is it adjacent to, any waterway. Therefore, the proposed project would not alter the course of a stream or river. Construction on the site will comply with the City's stormwater regulations (Chapters 14.04 and 15.62 of the City's Municipal Code) to ensure construction activities on the site do not result in increased soil erosion and siltation, exceed capacity of the drainage system, or add substantial sources of polluted runoff. Consistent with the City's requirements, the project would not increase site runoff from a 10-year storm for a duration of two hours of rainfall and will retain any increased flow due to reduction in pervious surfaces. **(Less Than Significant Impact)**

---

**Impact HYD-4:** The project would not risk release of pollutants due to project inundation in flood hazard, tsunami, or seiche zones. **(No Impact)**

---

As described in Section 4.10.1.2 Existing Conditions, the project site is not located within a 100-year floodplain nor is it subject to tsunamis or seiches. **(No Impact)**

---

**Impact HYD-5:** The project would not conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan. **(Less than Significant Impact)**

---

As previously described, the project site is located within the Westside Groundwater Basin. There are existing groundwater management plans for the northwestern portion (North Westside Groundwater Basin Management Plan) and the southern portion (South Westside Basin Groundwater Management Plan) of the Basin. The City of Daly City, which would be the water service provider for the project, is a participant in the South Westside Basin Groundwater Management Plan. The City would implement the groundwater protection and management goals and objectives of the Plan. The project, which proposes to construct 14 new townhomes, would not conflict with or obstruct the implementation of the Plan. **(Less Than Significant Impact)**

## **4.11 LAND USE AND PLANNING**

### **4.11.1 Environmental Setting**

#### **4.11.1.1 *Regulatory Framework***

##### **Local**

##### **Comprehensive Airport Land Use Compatibility Plan for the Environs of San Francisco International Airport**

In 1967, the State legislature adopted legislation requiring the establishment of airport land use commissions in counties with one or more airports serving the general public. Amendments adopted by the legislature in 1970 required each commission to develop comprehensive ALUCPs. The purpose of the ALUCPs is to provide for the orderly growth of airports and the surrounding areas to minimize the public's exposure to excessive noise and safety hazards.

The project site is located within the AIA of SFO. Properties within the AIA may be subject to some of the annoyances or inconveniences associated with proximity to airport operations (e.g., noise, vibration, and odors). The airport/land use compatibility of a proposed development or land use policy action shall be determined by comparing the proposed development or land use policy action with the safety compatibility criteria, noise compatibility criteria, and airspace protection/height limitation criteria in the ALUCP.

Furthermore, properties located within the 70 dB CNEL aircraft noise contour for SFO warrant land use controls to promote noise compatibility. The project site is not located within SFO's 70 dB CNEL aircraft noise contour.

The ALUCP also includes airspace protection/height limitation criteria based on Federal Aviation Regulations. Federal Aviation Regulations, Part 77, "Objects Affecting Navigable Airspace" (referred to as FAR Part 77) sets forth standards and review requirements for protecting the airspace for safe aircraft operation, particularly by restricting the height of potential structures and minimizing other potential hazards (such as reflective surfaces, flashing lights, and electronic interference) to aircraft in flight. These regulations require that the FAA be notified of certain proposed construction projects located within an extended zone defined by an imaginary slope radiating outward for several miles from an airport's runways, or which would otherwise stand at least 200 feet in height above ground. For the project site, any proposed structure of a height greater than approximately 200 feet above mean ground level is required under FAR Part 77 to be submitted to the FAA for review.

Any proposed land use policy actions, including the proposed General Plan Amendment and rezoning, that affect properties within the ALUCP Airport Influence Area B boundary in Daly City (such as the project site), must be referred to the C/CAG Board for an ALUCP consistency review and determination.

## Daly City 2030 General Plan

The General Plan includes policies for the purpose of avoiding or mitigating impacts resulting from development projects within the City. The following policies are specific to land use and planning and are applicable to the proposed project.

| <b>Policy/Task</b> | <b>Description</b>                                                                                                                                                                                                                                                                                                                                                                                                     |
|--------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Task CE-20.7       | As a part of all new development, require, where appropriate, the provision of pedestrian-oriented signs, pedestrian-scale lighting, benches, and other street furniture so as to make non-motorized forms of travel comfortable and attractive alternatives to the automobile. Where necessary in new development, the City may require additional sidewalk and/or right-of-way width to accommodate these amenities. |
| Policy RME-20      | Recognize the physical differences between different parts of the City and regulate land uses within these areas accordingly.                                                                                                                                                                                                                                                                                          |
| Task RME-20.2      | Amend the Zoning Ordinance to provide development regulations that more closely reflect the predominant neighborhood character established when the neighborhood was constructed.                                                                                                                                                                                                                                      |
| Task RME-20.4      | Incorporate design features in new development that reflects the character of the neighborhood, to ensure that new construction is compatible with existing development.                                                                                                                                                                                                                                               |
| Policy LU-8        | Ensure that landscape and hardscape improvements made to all residential properties are environmentally sound and do not negatively impact existing neighborhood aesthetics.                                                                                                                                                                                                                                           |

## City of Daly City Zoning Ordinance

The Zoning Ordinance is provided in Title 17 of the Daly City Municipal Code. The Zoning Ordinance helps promote public health, safety, morals, convenience, comfort, prosperity and general welfare of residents in the City.

The project site is zoned I-D, Interim District. All territory annexed to the City are automatically zoned to an interim district until such time as the territory is zoned to another district.<sup>41</sup>

### **4.11.1.2 Existing Conditions**

The project site has a General Plan land use designation of Residential – Low Density (R-LD). This land applies generally to those areas which were subdivided after January 1949, which have single family residences located on parcels of 3,000 square feet or more. The project site is immediately surrounded by residential land uses. A commercial development that fronts on E. Market Street is located approximately 117 feet south of the site.

#### 4.11.2 Impact Discussion

|                                                                                                                                                                                        | Potentially<br>Significant<br>Impact | Less than<br>Significant with<br>Mitigation<br>Incorporated | Less than<br>Significant<br>Impact  | No Impact                |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------|-------------------------------------------------------------|-------------------------------------|--------------------------|
| Would the project:                                                                                                                                                                     |                                      |                                                             |                                     |                          |
| 1) Physically divide an established community?                                                                                                                                         | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 2) Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect? | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

---

**Impact LU-1:** The project would not physically divide an established community. **(Less than Significant Impact)**

---

Examples of projects that have the potential to physically divide an established community include new freeways and highways, major arterial streets, and railroad lines. The project would construct 14 new townhomes in a residential neighborhood, on a lot that is surrounded by existing one- to two-story residences. Development of the project site would be consistent with the surrounding area. In addition, the project would not result in the construction of dividing infrastructure such as highways, expressways, or major arterial streets. For these reasons, the proposed project would not physically divide an established community **(Less than Significant Impact)**

---

**Impact LU-2:** The project would not cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect. **(Less than Significant Impact)**

---

#### **General Plan and Zoning**

In order to develop the project site with the proposed residences, the project would require an amended land use designation and change in zoning to Residential – Medium Density (R-MD) and R-3 Multiple-Family Residential, respectively. The R-LD designation allows between two and 14.5 DU/acre and the R-MD designation allows between 20.1 and 35 DU/acre. Thus, amending the designation of the 0.71-acre project site would increase the maximum allowable dwelling units on-site from ten to 24 units. The 14 proposed townhomes would be consistent with the R-MD designation.

As previously noted, the project site is currently zoned I-D, Interim District. This zoning is given as a placeholder for territories annexed by the City. The project would rezone the site to R-3. The proposed townhomes would not require a use permit under the R-3 zoning and would be consistent with the requirements of the zoning district, as shown below in Table 4.11-1.

| Table 4.11-1: R-3 Zoning Requirements |                          |                         |                                 |                                |
|---------------------------------------|--------------------------|-------------------------|---------------------------------|--------------------------------|
|                                       | Maximum Height<br>(feet) | Maximum Lot<br>Coverage | Minimum Front<br>Setback (feet) | Minimum Rear<br>Setback (feet) |
| Allowable                             | 36                       | 75%                     | 15                              | 10                             |
| Proposed                              | 35                       | 37.2%                   | 15                              | 10                             |

### SFO Airport Land Use Compatibility Plan

The project site is located within the SFO AIA and thus, the project would be required to comply with the SFO ALUCP. For the project site, any structure exceeding 200 feet in height above ground would require submittal to the FAA for airspace safety review. The proposed residences would reach a maximum of 35 feet above ground level, therefore, notification to the FAA would not be required. Given that the project proposes a General Plan amendment and rezoning and is located within the ALUCP Area B boundary, the project has been referred to the C/CAG Board for an ALUCP consistency review and determination. The project was determined by the C/CAG Board to be consistent with the ALUCP.<sup>42</sup> The project site is outside of the 70 dB CNEL aircraft noise contour and therefore does not require controls to promote noise compatibility.

The project would be consistent with the proposed General Plan Land Use designation and zoning district, as well as the SFO ALUCP. Therefore, the project would not cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect. **(Less than Significant Impact)**

<sup>42</sup> C/CAG Board of Directors. *Resolution 22-107*. December 8, 2022.

## 4.12 MINERAL RESOURCES

### 4.12.1 Environmental Setting

#### 4.12.1.1 *Regulatory Framework*

#### State

##### Surface Mining and Reclamation Act

The Surface Mining and Reclamation Act (SMARA) was enacted by the California legislature in 1975 to address the need for a continuing supply of mineral resources, and to prevent or minimize the negative impacts of surface mining to public health, property, and the environment. As mandated under SMARA, the State Geologist has designated mineral land classifications in order to help identify and protect mineral resources in areas within the state subject to urban expansion or other irreversible land uses which would preclude mineral extraction. SMARA also allowed the State Mining and Geology Board (SMGB), after receiving classification information from the State Geologist, to designate lands containing mineral deposits of regional or statewide significance.

#### 4.12.1.2 *Existing Conditions*

The San Mateo County General Plan identifies 13 mineral resources found in San Mateo County. Seven of these minerals: chromite, clay, expansible shale, mercury, sand and gravel, sands (specialty), and stone (dimension), are not likely to be used primarily because of limited quantities, urbanization or economic infeasibility. Daly City does not contain any mineral resources within its limits.

### 4.12.2 Impact Discussion

|                                                                                                                                                                        | Potentially<br>Significant<br>Impact                                                                                                                                     | Less than<br>Significant<br>with Mitigation<br>Incorporated | Less than<br>Significant<br>Impact | No Impact                           |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------|------------------------------------|-------------------------------------|
| Would the project:                                                                                                                                                     |                                                                                                                                                                          |                                                             |                                    |                                     |
| 1) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?                                 | <input type="checkbox"/>                                                                                                                                                 | <input type="checkbox"/>                                    | <input type="checkbox"/>           | <input checked="" type="checkbox"/> |
| 2) Result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan, or other land use plan? | <input type="checkbox"/>                                                                                                                                                 | <input type="checkbox"/>                                    | <input type="checkbox"/>           | <input checked="" type="checkbox"/> |
| <b>Impact MIN-1:</b>                                                                                                                                                   | The project would not result in the loss of availability of a known mineral resource that would be of value to the region and residents of the state. <b>(No Impact)</b> |                                                             |                                    |                                     |

Due to the fact that the project site is located on urban land in the City of Daly City, there are no significant mineral resources on or in the vicinity of the project site. **(No Impact)**

---

**Impact MIN-2:** The project would not result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan, or other land use plan. **(No Impact)**

---

Please see the discussion for MIN-1, above. **(No Impact)**

## **4.13 NOISE**

### **4.13.1 Environmental Setting**

#### **4.13.1.1 *Background Information***

##### **Noise**

Factors that influence sound as it is perceived by the human ear, include the actual level of sound, period of exposure, frequencies involved, and fluctuation in the noise level during exposure. Noise is measured on a decibel scale, which serves as an index of loudness. The zero on the decibel scale is based on the lowest sound level that the healthy, unimpaired human ear can detect. Each 10 decibel increase in sound level is perceived as approximately a doubling of loudness. Because the human ear cannot hear all pitches or frequencies, sound levels are frequently adjusted or weighted to correspond to human hearing. This adjusted unit is known as the A-weighted decibel, or dBA.

Since excessive noise levels can adversely affect human activities and human health, federal, state, and local governmental agencies have set forth criteria or planning goals to minimize or avoid these effects. Noise guidelines are generally expressed using one of several noise averaging methods, including  $L_{eq}$ , DNL, or CNEL.<sup>43</sup> These descriptors are used to measure a location's overall noise exposure, given that there are times when noise levels are higher (e.g., when a jet is taking off from an airport or when a leaf blower is operating) and times when noise levels are lower (e.g., during lulls in traffic flows on freeways or in the middle of the night).  $L_{max}$  is the maximum A-weighted noise level during a measurement period.

##### **Vibration**

Ground vibration consists of rapidly fluctuating motions or waves with an average motion of zero. Vibration amplitude can be quantified using Peak Particle Velocity (PPV), which is defined as the maximum instantaneous positive or negative peak of the vibration wave. PPV has been routinely used to measure and assess groundborne construction vibration. Studies have shown that the threshold of perception for average persons is in the range of 0.008 to 0.012 inches/second (in/sec) PPV.

#### **4.13.1.2 *Regulatory Framework***

##### **Federal**

##### **Federal Transit Administration Vibration Limits**

The Federal Transit Administration (FTA) has developed vibration impact assessment criteria for evaluating vibration impacts associated with transit projects. The FTA has proposed vibration impact criteria based on maximum overall levels for a single event. The impact criteria for groundborne

---

<sup>43</sup>  $L_{eq}$  is a measurement of average energy level intensity of noise over a given period of time. Day-Night Level (DNL) is a 24-hour average of noise levels, with a 10 dB penalty applied to noise occurring between 10:00 PM and 7:00 AM. Community Noise Equivalent Level (CNEL) includes an additional five dB applied to noise occurring between 7:00 PM and 10:00 PM. Where traffic noise predominates, the CNEL and DNL are typically within two dBA of the peak-hour  $L_{eq}$ .

vibration are shown in Table 4.13-1 below. These criteria can be applied to development projects in jurisdictions that lack vibration impact standards.

| <b>Table 4.13-1: Groundborne Vibration Impact Criteria</b>                                                     |                                                               |                              |                              |

| Source: Federal Transit Administration. <i>Transit Noise and Vibration Assessment Manual</i> . September 2018. |                                                               |                              |                              |

## State

### California Building Standards Code

The CBC establishes uniform minimum noise insulation performance standards to protect persons within new buildings housing people, including hotels, motels, dormitories, multi-family residential units, apartments, and dwellings other than single-family residences. Title 24 mandates that interior noise levels attributable to exterior sources not exceed 45  $L_{dn}/CNEL$  in any habitable room. Exterior windows must have a minimum Sound Transmission Class (STC) of 40 or Outdoor-Indoor Transmission Class (OITC) of 30 when the property falls within the 65 dBA DNL noise contour for a freeway or expressway, railroad, or industrial source.

## Local

### Comprehensive Airport Land Use Compatibility Plan for the Environs of the San Francisco International Airport

As discussed in more detail in Section 4.10 Land Use, the project site is located within the AIA of SFO. Properties within the AIA may be subject to some of the annoyances or inconveniences associated with proximity to airport operations (e.g., noise, vibration, and odors). The airport/land use compatibility of a proposed development or land use policy action shall be determined by comparing the proposed development or land use policy action with the safety compatibility criteria, noise compatibility criteria, and airspace protection/height limitation criteria in the ALUCP. The site is located outside of the SFO 70 dB CNEL noise contour.

## Daly City 2030 General Plan

The General Plan includes policies for the purpose of avoiding or mitigating impacts resulting from development projects within the City. The following policies are specific to noise and are applicable to the proposed project.

| <b>Policy/Task</b> | <b>Description</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|--------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Policy NE-1        | Use the future noise contour map to identify existing and potential noise impact areas.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Policy NE-3        | Maintain a CNEL level of not more than 70 dBA $L_{eq}$ in residential areas.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| Task NE-2.1        | Use the Noise Control Guidelines to assess the suitability of a site for new development in combination with the noise contours to accurately identify areas that may need additional noise study and mitigation. Noise mitigations include additional insulation, double glazing of windows and increasing building setbacks from the noise source. Mitigations should also be creative and attractive whenever possible and appropriate. Creative noise mitigation measures can include incorporation of fountains using water to mask freeway noise and noise walls of an appropriate scale painted with decorative murals. |
| Task NE-3.1        | Continue to enforce the environmental noise requirements of the State Building Code (Title 24).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| Task NE-5.1        | Additional noise studies should be conducted in “Conditionally Acceptable” noise environments to ensure adequate mitigation features are employed. Usually conventional construction with closed windows and fresh air supply systems will maintain a healthy noise environment.                                                                                                                                                                                                                                                                                                                                               |
| Task HE-4.2        | For all development proposals with the 65dB CNEL noise contour, the City shall require a noise study that identifies the proposed project’s compliance with requirement of Task 4.1. If the project qualifies for review under CEQA, the City shall incorporate the noise study and any mitigation measures into the CEQA document and shall adopt findings that the project, as conditioned, complies with the interior noise level requirement.                                                                                                                                                                              |
| Task NE-9.1        | Depending upon the hours of operation, intensity of use, and the location of sensitive receptors in the area, the expansion or change of use could cause noise impacts. Acoustical studies should be performed, at the applicant's expense, during the discretionary and environmental review processes and conditions should be placed on the project accordingly                                                                                                                                                                                                                                                             |
| Task NE-11.3       | Require all future development within the Airport Influence Area B boundary for San Francisco International Airport to conform to the relevant height/airspace protection, aircraft noise, and safety policies and land use compatibility criteria contained within the most recent adopted version of the ALUCP for the environs of San Francisco International Airport.                                                                                                                                                                                                                                                      |

### **4.13.1.3      *Existing Conditions***

The project site is bounded by 3<sup>rd</sup> Avenue to the west and residential uses to the north, east, and south. The noise environment on the project site primarily results from vehicular traffic along 3<sup>rd</sup> Avenue and the surrounding roadway network and aircraft departures from SFO. According to the

General Plan EIR, the existing roadway noise ranges between 65 to 70 dBA on 3<sup>rd</sup> Avenue and 65 to 70 dBA on Hillside Boulevard and E. Market Street. Based on the General Plan noise contours, noise levels on the project site are between 60 to 65 dBA. The project site is not within the 65 CNEL noise contour for SFO.

#### 4.13.2 Impact Discussion

|                                                                                                                                                                                                                                                                                                           | Potentially<br>Significant<br>Impact                                                                                                                                                                                                                                                                                                              | Less than<br>Significant<br>with Mitigation<br>Incorporated | Less than<br>Significant<br>Impact  | No Impact                |

| Would the project result in:                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                   |                                                             |                                     |                          |
| 1) Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?                                                         | <input type="checkbox"/>                                                                                                                                                                                                                                                                                                                          | <input checked="" type="checkbox"/>                         | <input type="checkbox"/>            | <input type="checkbox"/> |
| 2) Generation of excessive groundborne vibration or groundborne noise levels?                                                                                                                                                                                                                             | <input type="checkbox"/>                                                                                                                                                                                                                                                                                                                          | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 3) For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels? | <input type="checkbox"/>                                                                                                                                                                                                                                                                                                                          | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| <hr/>                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                   |                                                             |                                     |                          |
| <b>Impact NOI-1:</b>                                                                                                                                                                                                                                                                                      | The project would not result in generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies. <b>(Less than Significant Impact with Mitigation Incorporated)</b> |                                                             |                                     |                          |

#### Permanent Noise Impacts

The project would add approximately 92 total average daily vehicle trips to surrounding roadways. For a project to result in a noticeable change in roadway noise, i.e., 3 dBA increase, roadway volumes would have to double with the addition of project trips. Primary access to the site is provided by 3<sup>rd</sup> Avenue which serves an existing residential neighborhood with more than double the number of units proposed by the project. The project would not double the number of vehicle trips on 3<sup>rd</sup> Avenue, a primarily residential street, therefore, the project would not result in a noticeable change in roadway noise. The proposed townhomes would generate noise levels compatible with the surrounding residential uses. The project would not result in a significant permanent ambient noise level increase. **(Less than Significant Impact)**

## Temporary Noise Impacts

The construction schedule assumes that the project would be built out over a period of approximately nine months. The project would be constructed in various phases involving demolition, site preparation, grading, foundation, building construction, paving, and building interior/ architectural coating. Construction noise levels would fluctuate across the site based on the type of construction activity occurring with the site demolition, grading, and foundation phases being the noisiest periods of construction. Project construction would include several days of overlap when multiple phases are being carried out simultaneously. The project does not include construction activities that would generate substantial loud noise such as pile driving or demolition of a large building.

**Impact NOI-1:** Project implementation would result in intermittent short-term noise impacts resulting from construction-related activities.

**Mitigation Measures:** In accordance with the City's General Plan and Municipal Code, construction activities would be completed with incorporation of the following BMPs to further reduce potential temporary construction noise impacts:

**MM NOI-1.1:** The applicant shall incorporate the following practices into the construction documents to be implemented by the project contractor:

- 1) Construction activities shall be limited to the hours between 8:00 am and 5:00 pm, Monday through Friday, and prohibited on weekends and holidays in accordance with the City's General Plan, unless permission is granted with a development permit or other planning approval.
- 2) Equip all internal combustion engine-driven equipment with intake and exhaust mufflers that are in good condition and appropriate for the equipment.
- 3) Unnecessary idling of internal combustion engines should be strictly prohibited.
- 4) Locate stationary noise-generating equipment, such as air compressors or portable power generators, as far as possible from nearby receptors. If they must be located near receptors, adequate muffling (with enclosures where feasible and appropriate) shall be used reduce noise levels at nearby receptors. Any enclosure openings or venting shall face away from receptors.
- 5) Utilize "quiet" air compressors and other stationary noise sources where technology exists.
- 6) A temporary noise control blanket barrier could be erected, if necessary, along building facades facing construction sites. This measure would only be necessary if conflicts occurred which were irresolvable by proper scheduling. Noise control blanket barriers can be rented and quickly erected.
- 7) Control noise from construction workers' radios to a point where they are not audible at existing structures bordering the project site.
- 8) The contractor shall prepare a detailed construction plan identifying the schedule for major noise-generating construction activities. The construction plan shall identify a procedure for coordination with adjacent land uses so that construction activities can be scheduled to minimize noise disturbance.

- 9) Neighbors located adjacent to the construction site shall be notified of the construction schedule in writing.
- 10) Designate a “disturbance coordinator” who would be responsible for responding to any complaints about construction noise. The disturbance coordinator will determine the cause of the noise complaint (e.g., bad muffler, etc.) and will require that reasonable measures be implemented to correct the problem. Conspicuously post a telephone number for the disturbance coordinator at the construction site and include in it the notice sent to neighbors regarding the construction schedule.

With the implementation of the identified BMPs above, the proposed project would reduce construction noise impacts to a less than significant level. **(Less Than Significant Impact with Mitigation Incorporated)**

---

|                      |                                                                                                                                                  |
|----------------------|--------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Impact NOI-2:</b> | The project would not result in generation of excessive groundborne vibration or groundborne noise levels. <b>(Less than Significant Impact)</b> |
|----------------------|--------------------------------------------------------------------------------------------------------------------------------------------------|

---

Construction of the proposed residential development would not require pile driving or other significant vibration caused by construction activity. Therefore, the construction of the proposed development would not generate vibration levels that exceed limits defined by the City of Daly City. **(Less Than Significant Impact)**

---

|                      |                                                                                                                                                                                                                                                                                                                                                             |
|----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Impact NOI-3:</b> | The project would not be located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport. The project would not expose people residing or working in the project area to excessive noise levels. <b>(Less than Significant Impact)</b> |
|----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

---

SFO is a public-use airport located approximately 6.9 miles southeast of the project site. According to the Comprehensive Airport Land Use Compatibility Plan for the Environs of San Francisco International Airport, the project site lies outside the 65 dBA CNEL 2020 noise contour of the airport. Therefore, future exterior noise levels due to aircraft from SFO would be compatible with the City’s exterior noise standards for aircraft noise. **(Less than Significant Impact)**

#### **4.14.1.1 *Regulatory Framework***

##### **State**

##### **Housing Element Law**

State requirements mandating that housing be included as an element of each jurisdiction's general plan is known as housing-element law. The Regional Housing Need Allocation (RHNA) is the state-mandated process to identify the total number of housing units (by affordability level) that each jurisdiction must accommodate in its housing element. California housing-element law requires cities to: 1) zone adequate lands to accommodate its RHNA; 2) produce an inventory of sites that can accommodate its share of the RHNA; 3) identify governmental and non-governmental constraints to residential development; 4) develop strategies and a work plan to mitigate or eliminate those constraints; and 5) adopt a housing element and update it on a regular basis.<sup>44</sup> The City of Daly City Housing Element and related land use policies were last updated in 2015.

##### **Regional and Local**

##### **Plan Bay Area 2040**

Plan Bay Area 2040 is a long-range transportation, land-use, and housing plan intended support a growing economy, provide more housing and transportation choices, and reduce transportation-related pollution and GHG emissions in the Bay Area. Plan Bay Area 2040 promotes compact, mixed-use residential and commercial neighborhoods near transit, particularly within identified PDAs.<sup>45</sup> The project site is located within a PDA.

ABAG allocates regional housing needs to each city and county within the nine-county San Francisco Bay Area, based on statewide goals. ABAG also develops forecasts for population, households, and economic activity in the Bay Area. ABAG, MTC, and local jurisdiction planning staff created the Regional Forecast of Jobs, Population, and Housing, which is an integrated land use and transportation plan through the year 2040 (upon which Plan Bay Area 2040 is based).

##### **Daly City 2030 General Plan**

The General Plan includes policies for the purpose of avoiding or mitigating impacts resulting from development projects within the City. The following policies are specific to population and housing and are applicable to the proposed project.

| Policy/Task | Description                                                                                                                                                                                         |
|-------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Policy HE-1 | Maintain and, where possible, create larger housing development sites throughout the City.                                                                                                          |
| Policy HE-2 | Support infill housing in existing neighborhoods by offering streamlined planning and environmental reviews.                                                                                        |
| Policy HE-3 | Provide regulatory incentives for developers to construct higher-density mixed-use development along Mission Street, Geneva Avenue, and any other locations with close proximity to public transit. |

#### 4.14.1.2 *Existing Conditions*

According to a May 2022 estimate by the California Department of Finance, Daly City has a total population of 102,875 persons.<sup>46</sup> There are estimated to be 33,934 housing units in the City, with the largest categories of housing consisting of 15,907 single-detached units and 8,354 structures containing five or greater units.<sup>47</sup> According to ABAG projections, Daly City's population will grow to a total of 121,330 by 2040.<sup>48</sup>

#### 4.14.2 Impact Discussion

|                                                                                                                                                                                                                     | Potentially Significant Impact | Less than Significant with Mitigation Incorporated | Less than Significant Impact        | No Impact                |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------|----------------------------------------------------|-------------------------------------|--------------------------|
| Would the project:                                                                                                                                                                                                  |                                |                                                    |                                     |                          |
| 1) Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)? | <input type="checkbox"/>       | <input type="checkbox"/>                           | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 2) Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?                                                                                     | <input type="checkbox"/>       | <input type="checkbox"/>                           | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

**Impact POP-1:** The project would not induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure).  
(Less than Significant Impact)

According to the City's General Plan, an increase of approximately 950 residents per year is projected between 2010 and 2030. The project proposes to construct 13 net new housing units. With

<sup>46</sup> California Department of Finance. *E-5 Population and Housing Estimates for Cities, Counties, and the State 2011-2022 with 2020 Census Benchmark*. Accessed on October 26, 2022. Available at: <http://dof.ca.gov/Forecasting/Demographics/Estimates/E-5/>.

<sup>47</sup> Ibid.

<sup>48</sup> Association of Bay Area Governments. "Projections 2040." Accessed December 8, 2020. Available at: <http://projections.planbayarea.org/>.

an average occupancy of 3.16 residents per household,<sup>49</sup> the proposed development would result in an increase of 41 new residents. Although the General Plan includes low-density housing on the project site, population growth induced by the proposed medium-density residential project would result in limited additional residential units in the City and remain consistent with planned growth under the General Plan and ABAG projections. Therefore, the proposed project would result in growth consistent with City plans. Additionally, the project is consistent with the General Plan policies to create larger housing development and support infill development (Policies HE-1.1 and HE-2). For this reason, there would be a less than significant impact due to direct or indirect unplanned population growth. **(Less than Significant Impact)**

---

|                      |                                                                                                                                                                                             |
|----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Impact POP-2:</b> | The project would not displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere.<br><b>(Less than Significant Impact)</b> |
|----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

---

The project would demolish one single-family residence in order to construct the proposed 14 townhomes. The project would not displace a substantial number of existing people and would be constructing a net increase of 13 housing units. The project would not necessitate the construction of replacement housing elsewhere. **(Less than Significant Impact)**

## **4.15 PUBLIC SERVICES**

### **4.15.1 Environmental Setting**

#### **4.15.1.1 *Regulatory Framework***

##### **State**

##### Government Code Section 66477

The Quimby Act (included within Government Code Section 66477) requires local governments to set aside parkland and open space for recreational purposes. It provides provisions for the dedication of parkland and/or payment of fees in lieu of parkland dedication to help mitigate the impacts from new residential developments. The Quimby Act authorizes local governments to establish ordinances requiring developers of new residential subdivisions to dedicate parks, pay a fee in lieu of parkland dedication, or perform a combination of the two.

##### Government Code Section 65995 through 65998

California Government Code Section 65996 specifies that an acceptable method of offsetting a project's effect on the adequacy of school facilities is the payment of a school impact fee prior to the issuance of a building permit. Government Code Sections 65995 through 65998 set forth provisions for the payment of school impact fees by new development by "mitigating impacts on school facilities that occur (as a result of the planning, use, or development of real property" (Section 65996[a]). The legislation states that the payment of school impact fees "are hereby deemed to provide full and complete school facilities mitigation" under CEQA (Section 65996[b]).

Developers are required to pay a school impact fee to the school district to offset the increased demands on school facilities caused by the proposed residential development project. The school district is responsible for implementing the specific methods for mitigating school impacts under the Government Code.

##### **Local**

##### City of Daly City Capital Plan

In 2008, the City expanded its Capital Plan to cover a 20-year period. It was estimated that 2.8 million square feet of commercial space and 2,641 residential units would be added to the City, which is slightly more than projected in the 2013 General Plan. The study also projected the extent of capital improvements for public facilities which would be needed in the City over the same time period. The City identified the capital improvements which would be needed to provide City services to all areas over the next 20 years. The relationship between the additional projected commercial and residential development and the need for improvements in public facilities was analyzed. The City formulated impact fees that are based on the extent to which any need for new public facilities is attributed to new development.

## Daly City 2030 General Plan

The General Plan includes policies for the purpose of avoiding or mitigating impacts resulting from development projects within the City. The following policies are specific to public services and are applicable to the proposed project.

| <b>Policy/Task</b> | <b>Description</b>                                                                                                                     |
|--------------------|----------------------------------------------------------------------------------------------------------------------------------------|
| Policy SE-3.1      | Support and maintain the City's Insurance Service Office rating of a Class 2, which establishes the fire insurance rates for the City. |
| Policy SE-3.2      | Provide for a seven-minute total reflex time for arrival of a first due company to 90 percent of all emergency incidents.              |
| Policy SE-3.3      | Provide for an eleven-minute total reflex time for arrival of multiple fire companies to 90 percent of all structure fires.            |
| Policy SE-3.4      | Maintain fire company reliability, whereby 90 percent of all incidents are handled by the district fire company.                       |

### **4.15.1.2 Existing Conditions**

#### **Fire Protection**

The City of Daly City is served by the North County Fire Authority (NCFA), a Joint Powers Authority which currently serves the communities of Brisbane, Daly City, and Pacifica.<sup>50</sup> The NCFA responds to all fires, hazardous materials spills, and medical emergencies in the City. The closest station to the project site is Station No. 92, located at 18 Bepler Street, approximately one mile north of the project site.

#### **Police Protection**

Police protection services for the project site are provided by the Daly City Police Department, which is headquartered at 333 90<sup>th</sup> Street, approximately 1.2 miles west of the project site. The Daly City Police Department employs 111 sworn personnel.<sup>51</sup>

#### **Schools**

The project site is located within the Jefferson Elementary School District and the Jefferson Union High School District. The nearest elementary school is Susan B. Anthony Elementary, approximately 0.5 miles east of the project site, located at 575 Abbot Avenue. The nearest middle school is Thomas R. Pollicita Middle School, approximately 0.3 miles east of the project site, located at 550 E. Market Street. The nearest high school is Jefferson High School, approximately 0.5 miles north of the project site, located at 6996 Mission Street.

## Parks

According to the General Plan, 13 municipal parks and 12 tot lots are located in Daly City, resulting in a total of 82.95 acres of developed public recreational open space. The nearest park is Hillside Park, approximately 0.4 miles northeast of the project site, located at 222 Lausanne Avenue. Hillside Park is approximately 6.40 acres and contains tennis courts, basketball courts, a playground for small children, picnic tables, open fields, walking trails, and a cultural center.

## Libraries, Community Centers, and Other Facilities

The Daly City Library provides library services to the residents of Daly City. The nearest library branch, the John Daly Library, approximately 0.8 miles north of the project site, is located at 134 Hillside Boulevard.

There are two community centers, one art center, and one public clubhouse in Daly City. The nearest of these centers is the Albert Teglia Community Center, approximately 0.4 miles northeast of the project site, located at 285 Abbot Avenue.

| Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times, or other performance objectives for any of the public services: |                                      |                                                             |                                     |                          |
| 1) Fire Protection?                                                                                                                                                                                                                                                                                                                                                                                                       | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 2) Police Protection?                                                                                                                                                                                                                                                                                                                                                                                                     | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 3) Schools?                                                                                                                                                                                                                                                                                                                                                                                                               | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 4) Parks?                                                                                                                                                                                                                                                                                                                                                                                                                 | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 5) Other Public Facilities?                                                                                                                                                                                                                                                                                                                                                                                               | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

---

|                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|---------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Impact PS-1:</b> | The project would not result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times, or other performance objectives for fire protection services. <b>(Less than Significant Impact)</b> |
|---------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

---

As part of the permitting process, the North County Fire Department would review project plans before permits are issued to ensure compliance with all applicable fire and building code standards and to ensure that adequate fire and life safety measures are incorporated into the project in compliance with all applicable state and city fire safety regulations. The proposed project would

result in an incremental increase in the demand for fire protection services. The service area of the NCFA includes the cities of Daly City, Brisbane, and Pacifica. As a result, the proposed project's increase in service population would be insignificant compared to the total projected population increase within the NCFA service area. For this reason, the proposed project would not individually require new or altered fire protection facilities, and as a result, would have a less than significant impact on the environment. **(Less than Significant Impact)**

---

|                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|---------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Impact PS-2:</b> | The project would not result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times, or other performance objectives for police protection services. <b>(Less than Significant Impact)</b> |
|---------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

---

The proposed project would result in an incremental increase in the demand for police protection services within the DCPD service area. However, the increase of 41 residents (see Section 4.14 Population and Housing) would be insignificant with the total projected increase in population within the City. According to the City's General Plan, an increase of approximately 950 residents per year is projected between 2010 and 2030. Thus, the increase in police service demand generated by the project would not exhaust existing police facilities. As a result, the proposed project would have a less than significant impact on the provision of police protection services and would not require the construction or alteration of existing facilities. **(Less than Significant Impact)**

---

|                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|---------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Impact PS-3:</b> | The project would not result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times, or other performance objectives for schools. <b>(Less than Significant Impact)</b> |
|---------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

---

As previously mentioned in Section 4.15.1.2 Existing Conditions, the project site is within the Jefferson Elementary School District and the Jefferson Union High School District. According to the Developer Fee Justification Study for Jefferson Elementary School District published in 2014, the statewide student generation factor is 0.5 for grades K-8.<sup>52</sup> According to the Level I Developer Fee Study for Jefferson Union High School District published in 2020, the student generation rate for multi-family housing units is 0.111.<sup>53</sup> Thus, the proposed 14 new townhomes would generate approximately seven new students in K-8 and two new students in grades 9-12. Table 3.11-3 of the General Plan EIR presented future enrollment within the various school districts that serve Daly City, and concluded that after accommodating modest growth in student population from General Plan buildout, the Jefferson Elementary School District would have available capacity of 693 students, and Jefferson High School District would have available capacity of 573 students. Therefore, the number of new students generated by the project would not significantly impact school facilities and would not require new or altered school facilities. **(Less than Significant Impact)**

|                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|---------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Impact PS-4:</b> | The project would not result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times, or other performance objectives for parks. <b>(Less than Significant Impact)</b> |
|---------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

---

As previously described in Section 4.15.1.2 Existing Conditions, Daly City contains approximately 82.95 acres of developed public recreational open space. This does not include the numerous nearby regional park facilities. The approximately 6.40-acre Hillside Park is approximately 0.4 miles northeast of the project site.

Based on the City's current parkland dedication ratio of three acres per 1,000 residents in the Municipal Code, the City will need to provide 15.8 acres of parkland to meet future need resulting from anticipated population growth (without ameliorating existing deficiencies). To meet this demand, the General Plan proposes a task to develop part of the 140-acre undeveloped Mussel Rock area into a park for community use. The program for the park will be further developed through Program RME-3 which calls for the preparation of a Parks and Recreation Analysis and Master Plan. The Parks and Recreation Analysis and Master Plan will address existing and future opportunities for parks and recreational services for the city and guide the planning, selection, dedication and funding of future park land in the city. The Master Plan would allow priorities to be adopted and identify park site locations and development plans be determined at the time the acquisition and development process begins. The General Plan includes policies and programs to help parkland development to meet additional recreational need, which would reduce impact to a less than significant level. Given the expansive existing and planned park space within Daly City and the relatively small number of residents the project would generate, the project would not result in the need for new or altered park facilities. **(Less than Significant Impact)**

---

|                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|---------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Impact PS-5:</b> | The project would not result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times, or other performance objectives for other public facilities. <b>(Less than Significant Impact)</b> |
|---------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

---

As described above, the residential population growth accommodated by the proposed project would result in an incremental increase in demand for City public services and facilities, including libraries. However, the population increase resulting from the proposed project would be within the planned growth in service population of the City, and, as a result, would not cause a substantial adverse impact associated within the provision of new or altered libraries or other public facilities. **(Less than Significant Impact)**

## **4.16 RECREATION**

### **4.16.1 Environmental Setting**

#### **4.16.1.1 *Regulatory Framework***

##### **State**

##### Government Code Section 66477

The Quimby Act (included within Government Code Section 66477) requires local governments to set aside parkland and open space for recreational purposes. It provides provisions for the dedication of parkland and/or payment of fees in lieu of parkland dedication to help mitigate the impacts from new residential developments. The Quimby Act authorizes local governments to establish ordinances requiring developers of new residential subdivisions to dedicate parks, pay a fee in lieu of parkland dedication, or perform a combination of the two.

##### **Local**

##### Parkland Dedication

The City of Daly City Municipal Code currently has parkland dedication standards within Title 16 – Subdivisions. Section 16.30 of the Municipal Code has a standard for parks of three acres per 1,000 people. This requirement may be satisfied through either on-site park construction, land dedication, or an in-lieu fee equal to the land value plus ten percent towards costs of off-site improvements.<sup>54</sup>

##### Daly City 2030 General Plan

The General Plan includes policies for the purpose of avoiding or mitigating impacts resulting from development projects within the City. The following policies are specific to recreation and are applicable to the proposed project.

| <b>Policy/Task</b> | <b>Description</b>                                                                                                                                                                              |
|--------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Policy RME-11      | Areas designated as open space recreation-public shall continue to be maintained and upgraded by the Public Works Department.                                                                   |
| Policy RME-12      | Encourage a diverse, equitable, and integrated system of park facilities throughout Daly City that are accessible to all age, social, and economic groups and all geographic areas of the City. |
| Policy RME-13      | Require the dedication of parkland or the payment of an in-lieu fee in accordance with Subdivision Map Act.                                                                                     |
| Policy RME-14      | Prioritize the dispersal of park in-lieu fees collected from the development of new subdivisions to ensure that the fees are spent in the appropriate areas.                                    |

---

<sup>54</sup> City of Daly City. *Municipal Code 16.30.050*. Accessed December 8, 2020.

#### 4.16.1.2 Existing Conditions

Public recreational open space within Daly City consists of City parks and facilities, and State and County Parks. There are 13 municipal parks and 12 tot lots within Daly City, totaling 82.95 acres of developed recreational area.<sup>55</sup> In addition to City parks, San Bruno Mountain State and County Park provides 2,063 acres of public park space comprising state and San Mateo County managed land.

The nearest recreational facility to the project site is Hillside Park, approximately 0.4 miles northeast of the project site, located at 222 Lausanne Avenue. Hillside Park is approximately 6.40 acres and contains tennis courts, basketball courts, a playground for small children, picnic tables, open fields, walking trails, and a cultural center.

#### 4.16.2 Impact Discussion

|                                                                                                                                                                                                                | Potentially<br>Significant<br>Impact                                                                                                                                                                                                                  | Less than<br>Significant<br>with Mitigation<br>Incorporated | Less than<br>Significant<br>Impact  | No Impact                |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------|-------------------------------------|--------------------------|
| 1) Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated? | <input type="checkbox"/>                                                                                                                                                                                                                              | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 2) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?                        | <input type="checkbox"/>                                                                                                                                                                                                                              | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| <hr/>                                                                                                                                                                                                          |                                                                                                                                                                                                                                                       |                                                             |                                     |                          |
| <b>Impact REC-1:</b>                                                                                                                                                                                           | The project would not increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated. <b>(Less than Significant Impact)</b> |                                                             |                                     |                          |

The project would generate approximately 41 new residents. Residents generated by the project would result in an incremental increase in the use of existing neighborhood and regional parks and recreational facilities. Physical deterioration of these facilities would not be substantially accelerated by the increased use generated by the project. Additionally, the City is in the process of preparing a Parks and Recreation Analysis and Master Plan that will address existing and future opportunities for parks and recreational services within the city and guide the planning, selection, dedication and funding of future park land in the city. The Master Plan would allow priorities to be adopted and identify park site locations and development plans be determined at the time the acquisition and development process begins. Given the expansive existing and planned park space within Daly City and the relatively small number of residents the project would generate, the project would have a less than significant impact on existing recreational facilities. **(Less than Significant Impact)**

<sup>55</sup> City of Daly City. Daly City 2030 General Plan. Resource Management Element. March 25, 2013.

---

**Impact REC-2:** The project does not include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment. **(Less than Significant Impact)**

---

Each proposed townhome unit would include a minimum of 150 sf of private open space. Construction and operation of these facilities is included in the analysis of this Initial Study. The project would not include any other recreational facilities or require the construction or expansion of recreational facilities. **(Less than Significant Impact)**

## 4.17 TRANSPORTATION

The following discussion is based, in part, on a VMT Analysis prepared for the project by Hexagon Transportation Consultants, Inc. (Hexagon), dated December 2022. A copy of the report is included in Appendix E of this Initial Study.

### 4.17.1 Environmental Setting

#### 4.17.1.1 *Regulatory Framework*

##### State

##### Regional Transportation Plan

MTC is the transportation planning, coordinating, and financing agency for the nine-county San Francisco Bay Area, including San Mateo County. MTC is charged with regularly updating the Regional Transportation Plan, a comprehensive blueprint for the development of mass transit, highway, airport, seaport, railroad, bicycle, and pedestrian facilities in the region. MTC and ABAG adopted Plan Bay Area 2040 in July 2017, which includes a Regional Transportation Plan to guide regional transportation investment for revenues from federal, state, regional and local sources through 2040.

##### Senate Bill 743

SB 743 establishes criteria for determining the significance of transportation impacts using a vehicle miles traveled (VMT) metric intended to promote the reduction of GHG emissions, the development of multimodal transportation networks, and a diversity of land uses. Specifically, SB 743 requires analysis of VMT in determining the significance of transportation impacts. Local jurisdictions were required by Governor's Office of Planning and Research (OPR) to implement a VMT policy by July 1, 2020.

SB 743 did not authorize OPR to set specific VMT impact thresholds, but it did direct OPR to develop guidelines for jurisdictions to utilize. CEQA Guidelines Section 15064.3(b)(1) describes factors that might indicate whether a development project's VMT may be significant. Notably, projects located within 0.50 mile of transit should be considered to have a less than significant transportation impact based on OPR guidance.

##### Regional and Local

##### San Mateo County Congestion Management Program

The City/County Association of Governments (C/CAG), as the Congestion Management Agency for San Mateo County, is required to prepare and adopt a Congestion Management Program (CMP) on a biennial basis. The purpose of the CMP is to identify strategies to respond to future transportation needs, develop procedures to alleviate and control congestion, and promote countywide solutions. Also included in the CMP is the Traffic Impact Analysis (TIA) Policy, which provides uniform procedures to analyze traffic impacts. According to the CMP, an acceptable level of service at signalized intersections is LOS E.

## Daly City 2030 General Plan

The General Plan includes policies for the purpose of avoiding or mitigating impacts resulting from development projects within the City. The following policies are specific to transportation and are applicable to the proposed project.

| <b>Policy/Task</b> | <b>Description</b>                                                                                                                                                                                                                                              |
|--------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Policy CE-6        | Support regional efforts to improve traffic while accommodating future development.                                                                                                                                                                             |
| Policy CE-7        | Ensure an effective transit system by supporting the work of other agencies in their efforts to expand public transit in and around Daly City.                                                                                                                  |
| Task CE-13.3       | Consider impacts to the existing and future bicycle and pedestrian network when completing environmental review for private development projects, and require mitigation measures where necessary and reasonable to ensure that these systems are not impacted. |

### **4.17.1.2      *Existing Conditions***

#### **Roadway Network**

Regional access to the project site is provided by I-280, State Route 82 (SR 82, also referred to as Mission Street), and State Route 1 (SR 1). Local access to the project site is provided via E. Market Street, Castle Street, San Pedro Road, John Daly Boulevard, Sullivan Avenue, and Junipero Serra Boulevard. These roadways are described below:

*I-280* is an eight- to 12-lane freeway with a posted speed limit of 65 miles per hour (mph). The north-south freeway connects Daly City with nearby cities, such as San Francisco and San Bruno, and regional destinations, such as San José. Additionally, it provides access to the greater freeway network with direct connections to Interstates 680 and 880, U.S. Highway 101, and State Routes 1, 35, 92, and 85. The Sullivan Avenue off-ramp provide access to the project site via San Pedro Road, from I-280 South. The Junipero Serra Boulevard interchange provides access to the project site via John Daly Boulevard from I-280 North.

*SR 82* is a four- to six-lane state highway that functions as an arterial in the vicinity of the project site with a posted speed limit of 35 mph. It provides regional access to the project site from San Francisco to the north via its interchange with I-280. Interchanges at E. Market Street and Castle Street provide access to the project site via direct connections to 3<sup>rd</sup> Avenue from both the north and south of SR 82.

*SR 1* is a six- to ten-lane freeway in the vicinity of the project with a posted speed limit of 65 mph. SR1 extends northward through San Francisco and southward through Pacifica. The off-ramp at Junipero Serra Boulevard provides access to the project site via San Pedro Road, from SR 1 North. The hook-ramp at John Daly Boulevard provides access to the project site via Hillside Boulevard, from SR 1 South.

## **Bicycle and Pedestrian Facilities**

Pedestrian access is provided via sidewalks along the 3<sup>rd</sup> Avenue frontage of the project site, and along other vicinity streets including Castle Street, E. Market Street, and Hillside Boulevard. The project vicinity largely lacks bicycle facilities. There are no designated bicycle lanes along Hillside Boulevard, E. Market Street, or Mission Street. John Daly Boulevard contains Class I bike lanes<sup>56</sup> west of SR1. Class III bike lanes<sup>57</sup> are proposed in the City's Bicycle Master Plan for the remainder of John Daly Boulevard as well as Hillside Boulevard, E. Market Street, Mission Street, and other roadways in the project vicinity.

## **Transit Services**

### **SamTrans**

SamTrans provides the principal bus service in San Mateo County. It operates local and school buses, as well as express routes to San Francisco. It is also a service provider for paratransit. All scheduled buses are equipped with front-loading racks that can hold up to two bicycles. In the project vicinity, bus stops exist along E. Market Street and Hillside Boulevard. The closest bus stop is located on the corner of E. Market Street and Hillside Boulevard, approximately 0.2 miles southeast of the project site.

### **BART**

The nearest BART station is the Colma BART station, located approximately 0.8 miles southwest of the project site. From the Colma BART station, riders can access Fremont, Pleasanton/Dublin, Richmond and Pittsburg as well as numerous points in between. Trains run on approximately 15-minute headways during commute hours. There are also a number of bus routes and shuttles operated by SamTrans that stop at the Colma BART station.

### **4.17.1.3      *Methodology***

## **VMT Analysis**

At the time of this report, the City of Daly City is undertaking a process of updating its significance thresholds to be consistent with SB 743, and the CEQA 2019 Update Guidelines Section 15064.3, subdivision (b). The City has not released draft significance thresholds to determine project VMT impacts. In the absence of a City policy or draft numeric thresholds, this study utilized the OPR guidelines in analyzing VMT.

---

<sup>56</sup> Class I bike lanes, or shared-use paths, are facilities with exclusive right of way for bicyclists and pedestrians, away from the roadway.

<sup>57</sup> Class III bike lanes, or bike routes, designate a preferred route for bicyclists on streets shared with motor traffic not served by dedicated bikeways to provide continuity to the bikeway network.

#### 4.17.2 Impact Discussion

|                                                                                                                                                                  | Potentially<br>Significant<br>Impact                                                                                                                                                                                      | Less than<br>Significant<br>with Mitigation<br>Incorporated | Less than<br>Significant<br>Impact  | No Impact                |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------|-------------------------------------|--------------------------|
| Would the project:                                                                                                                                               |                                                                                                                                                                                                                           |                                                             |                                     |                          |
| 1) Conflict with a program, plan, ordinance, or policy addressing the circulation system, including transit, roadways, bicycle lanes, and pedestrian facilities? | <input type="checkbox"/>                                                                                                                                                                                                  | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 2) Conflict or be inconsistent with CEQA Guidelines Section 15064.3, subdivision (b)?                                                                            | <input type="checkbox"/>                                                                                                                                                                                                  | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 3) Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)? | <input type="checkbox"/>                                                                                                                                                                                                  | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 4) Result in inadequate emergency access?                                                                                                                        | <input type="checkbox"/>                                                                                                                                                                                                  | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| <hr/>                                                                                                                                                            |                                                                                                                                                                                                                           |                                                             |                                     |                          |
| <b>Impact TRN-1:</b>                                                                                                                                             | The project would not conflict with a program, plan, ordinance, or policy addressing the circulation system, including transit, roadways, bicycle lanes, and pedestrian facilities. <b>(Less than Significant Impact)</b> |                                                             |                                     |                          |

#### **Roadways**

The City of Daly City does not currently have an adopted VMT policy. Per SB 743, the City's LOS standards cannot be used in CEQA analysis for transportation impacts. The CMP requires traffic impact analyses when a project generates greater than a 100 peak hour trips. The project would not generate more than 100 peak hour trips and, therefore, a County CMP analysis is not required. The project's VMT impact is discussed in Impact TRN-2, below.

#### **Bicycle and Pedestrian Facilities**

The project would not generate a large volume of pedestrian or bicycle trips and would not exceed the capacity of existing facilities. The project would also not conflict with the City's Bicycle and Pedestrian Master Plan.

#### **Transit**

The project could generate new transit users but is not anticipated to exceed the capacity of bus service near the project site. The project would not conflict with any SamTrans policies related to the transit system. **(Less than Significant Impact)**

|                      |                                                                                                                                                |
|----------------------|------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Impact TRN-2:</b> | The project would not conflict or be inconsistent with CEQA Guidelines Section 15064.3, subdivision (b). <b>(Less than Significant Impact)</b> |
|----------------------|------------------------------------------------------------------------------------------------------------------------------------------------|

The VMT thresholds used for this project are based on the Governor's Office of Planning and Research (OPR)'s recommendations. Per OPR guidelines, projects that generate or attract fewer than

110 trips per day may be assumed to cause a less than significant transportation impact. The number of trips the project would generate were estimated using the Institute of Transportation Engineers' (ITE) Trip Generation Manual, 10<sup>th</sup> Edition (2017) daily trip rates for "Multifamily Housing Low-Rise" (Land Use Code 220) located in a general Urban/Suburban area. The project would generate approximately 92 net new trips.

Furthermore, according to OPR, residential and office projects that locate in areas with low VMT, and that incorporate similar features (i.e., density, mix of uses, transit accessibility), will tend to exhibit similarly low VMT. According to the MTC's ArcGIS VMT tool, the 2040 Plan Bay Area Model forecasted daily VMT for the project transportation analysis zone (TAZ 201) are 9.47, 9.3, and 8.36 miles per resident in years 2020, 2030, and 2040, respectively. The San Francisco Bay Area average daily VMT is 15.0, 14.4, and 13.8 miles per resident in years 2020, 2030, and 2040, respectively.

Given that the project would generate less than 110 trips and the average VMT for residents within the project's transportation analysis zone is lower than the regional average, the project would have a less than significant VMT impact. **(Less than Significant Impact)**

---

|                      |                                                                                                                                                                                                                           |
|----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Impact TRN-3:</b> | The project would not substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment). <b>(Less than Significant Impact)</b> |
|----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

---

Vehicle access to the residences and parking lot would be provided via a 26-foot-wide driveway along 3<sup>rd</sup> Avenue with a ten-foot-wide vehicular access gate. Separated pedestrian access would be provided to the front townhomes via private, gated walkways extending from the 3<sup>rd</sup> Avenue sidewalk. A four-foot wide, gated walkway would be located adjacent to the project driveway and provide pedestrian access to the remainder of the townhomes. The project driveway would be clear of any obstructions, thereby ensuring the exiting vehicles can see pedestrians on the sidewalk, and bicyclists and other vehicles traveling along 3<sup>rd</sup> Avenue. Landscaping would be planted in a manner that would ensure no conflicts with a driver's ability to locate a gap in traffic and see oncoming pedestrians, bicyclists, and vehicles. Trees planted along the project frontage on 3<sup>rd</sup> Avenue would be at the back of sidewalk and a proper height to provide sight lines for vehicles. No other objects exist or are proposed along the project frontages that would reduce vehicle sight distance. For these reasons, the proposed project would not create an operational safety hazard. **(Less than Significant Impact)**

---

|                      |                                                                                                    |
|----------------------|----------------------------------------------------------------------------------------------------|
| <b>Impact TRN-4:</b> | The project would not result in inadequate emergency access. <b>(Less than Significant Impact)</b> |
|----------------------|----------------------------------------------------------------------------------------------------|

---

The driveway would lead to a 120-foot hammerhead dead-end, turn-around apparatus, perpendicular to the driveway. The proposed internal access road would provide a hammerhead turnaround for circulation of emergency vehicles and would be reviewed by City staff to ensure adequacy. Therefore, the project would not result in inadequate emergency access. **(Less than Significant Impact)**

## 4.18 TRIBAL CULTURAL RESOURCES

### 4.18.1 Environmental Setting

#### 4.18.1.1 *Regulatory Framework*

##### State

##### Assembly Bill 52

AB 52, effective July 2015, established a new category of resources for consideration by public agencies called Tribal Cultural Resources (TCRs). AB 52 requires lead agencies to provide notice of projects to tribes that are traditionally and culturally affiliated with the geographic area if they have requested to be notified. Where a project may have a significant impact on a tribal cultural resource, consultation is required until the parties agree to measures to mitigate or avoid a significant effect on a tribal cultural resource or until it is concluded that mutual agreement cannot be reached.

Under AB 52, TCRs are defined as follows:

- Sites, features, places, cultural landscapes, sacred places, and objects with cultural value to a California Native American tribe that are also either:
  - Included or determined to be eligible for inclusion in the California Register of Historic Resources, or
  - Included in a local register of historical resources as defined in Public Resources Code Section 5020.1(k).
- A resource determined by the lead agency to be a TCR.

#### 4.18.1.2 *Existing Conditions*

Archaeological resources in Daly City consist primarily of the remains of the Ohlone Indian tribe, which inhabited a large area along the California Coast from the San Francisco Bay to the Monterrey Bay. The Mussel Rock archaeological site is the only source of Ohlone artifacts within the City.

The project site is currently vacant but was previously used for agricultural purposes and disturbed for construction of the associated greenhouses and single-family residence.

### 4.18.2 Impact Discussion

|                                                                                                                                                                                                                                                                                                                                                                                             | Potentially<br>Significant<br>Impact | Less than<br>Significant<br>with Mitigation<br>Incorporated | Less than<br>Significant<br>Impact | No Impact |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------|-------------------------------------------------------------|------------------------------------|-----------|
| Would the project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code Section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is: |                                      |                                                             |                                    |           |

|                                                                                                                                                                                                                                                                                                                                                                                                                          | Potentially<br>Significant<br>Impact | Less than<br>Significant<br>with Mitigation<br>Incorporated | Less than<br>Significant<br>Impact | No Impact                |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------|-------------------------------------------------------------|------------------------------------|--------------------------|
| 1) Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code Section 5020.1(k)?                                                                                                                                                                                                                              | <input type="checkbox"/>             | <input checked="" type="checkbox"/>                         | <input type="checkbox"/>           | <input type="checkbox"/> |
| 2) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1? In applying the criteria set forth in subdivision (c) of Public Resources Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe. | <input type="checkbox"/>             | <input checked="" type="checkbox"/>                         | <input type="checkbox"/>           | <input type="checkbox"/> |

---

**Impact TCR-1:** The project would not cause a substantial adverse change in the significance of a tribal cultural resource that is listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code Section 5020.1(k). **(Less than Significant Impact with Mitigation Incorporated)**

---

No tribes have contacted the City to request notification under AB 52. The project site is mostly undeveloped, with the exception of the single-family residence on the northern portion of the site. In the event that an inadvertent discovery of a tribal cultural resource is made, mitigation measures MM CUL-2.1, MM CUL-2.2, and MM CUL-3.1 would be implemented, as stated in Section 4.5 Cultural Resources of this Initial Study. **(Less Than Significant Impact with Mitigation Incorporated)**

---

**Impact TCR-2:** The project would not cause a substantial adverse change in the significance of a tribal cultural resource that is determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1. **(Less than Significant Impact with Mitigation Incorporated)**

---

Please see response to Impact TCR-1. **(Less than Significant Impact with Mitigation Incorporated)**

## **4.19 UTILITIES AND SERVICE SYSTEMS**

The following discussion is based, in part, on a hydraulic analysis prepared for the project by Brown and Caldwell, dated May 2021, and a sanitary sewer capacity evaluation prepared for the project by Woodard & Curran, dated April 2021. Copies of these reports are included in Appendix F and Appendix G of this Initial Study, respectively.

### **4.19.1 Environmental Setting**

#### **4.19.1.1 *Regulatory Framework***

##### **State**

##### State Water Code

Pursuant to the State Water Code, water suppliers providing water for municipal purposes to more than 3,000 customers or supplying more than 3,000 acre-feet (approximately 980 million gallons) of water annually must prepare and adopt an urban water management plan (UWMP) and update it every five years. As part of a UWMP, water agencies are required to evaluate and describe their water resource supplies and projected needs over a 20-year planning horizon, water conservation, water service reliability, water recycling, opportunities for water transfers, and contingency plans for drought events. The City of Daly City adopted its most recent UWMP in June 2021.

##### Assembly Bill 939

The California Integrated Waste Management Act of 1989, or AB 939, established the Integrated Waste Management Board, required the implementation of integrated waste management plans, and mandated that local jurisdictions divert at least 50 percent of solid waste generated (from 1990 levels), beginning January 1, 2000, and divert at least 75 percent by 2010. Projects that would have an adverse effect on waste diversion goals are required to include waste diversion mitigation measures.

##### Assembly Bill 341

AB 341 sets forth the requirements of the statewide mandatory commercial recycling program. Businesses that generate four or more cubic yards of garbage per week and multi-family dwellings with five or more units in California are required to recycle. AB 341 sets a statewide goal for 75 percent disposal reduction by the year 2020.

##### Senate Bill 1383

SB 1383 establishes targets to achieve a 50 percent reduction in the level of the statewide disposal of organic waste from the 2014 level by 2020 and a 75 percent reduction by 2025. The bill grants CalRecycle the regulatory authority required to achieve the organic waste disposal reduction targets and establishes an additional target that at least 20 percent of currently disposed edible food is recovered for human consumption by 2025.

## California Green Building Standards Code

CALGreen establishes mandatory green building standards for buildings in California. CALGreen was developed to reduce GHG emissions from buildings, promote environmentally responsible and healthier places to live and work, reduce energy and water consumption, and respond to state environmental directives. CALGreen covers five categories: planning and design, energy efficiency, water efficiency and conservation, material and resource efficiency, and indoor environmental quality.

### **Local**

#### Daly City 2030 General Plan

The General Plan includes policies for the purpose of avoiding or mitigating impacts resulting from development projects within the City. The following policies are specific to utilities and service systems and are applicable to the proposed project.

| <b>Policy/Task</b> | <b>Description</b>                                                                                                                                                                                                                                                                                                                                                                                                          |
|--------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Policy RME-1       | Reduce average per capita demand by implementing cost effective water conservation programs that address all applicable methods of water conservation.                                                                                                                                                                                                                                                                      |
| Task RME-1.1       | Enforce the provisions of the Indoor Water Use Efficiency Ordinance through an extensive public outreach campaign to residents and contractors, to be completed by 2014.                                                                                                                                                                                                                                                    |
| Policy RME-2       | Require drought resistant landscaping and water conserving irrigation methods in new development, and encourage the replacement of existing water-intensive landscaping.                                                                                                                                                                                                                                                    |
| Task RME-2.1       | Enforce the provisions of the Water Conservation in Landscaping Ordinance and conduct a public education effort to ensure that residents, businesses, and contractors are aware of the Ordinance provisions.                                                                                                                                                                                                                |
| Policy RME-3       | Continue to use recycled wastewater for irrigating and explore opportunities to expand capacity to accommodate its use in development projects, landscaped medians, golf courses, cemeteries, parks, and school playgrounds.                                                                                                                                                                                                |
| Policy RME-4       | For development projects which will create water demand exceeding a pre-defined amount, require that developers provide a water supply analysis for the project to demonstrate water availability to adequately serve the proposed project.                                                                                                                                                                                 |
| Policy RME-8       | Through the development of a Stormwater Management Program, ensure that all new development complies with applicable municipal stormwater Municipal Regional Stormwater NPDES Permit by incorporating controls that reduce water quality impacts over the life of the project in way that is both technically and economically feasible, and reduces pollutants in stormwater discharges to the maximum extent practicable. |
| Task RME-8.2       | Evaluate acceptable development standards for stormwater treatment mechanisms and publish such standards for distribution to developers. Such standards shall be based on a thorough evaluation of modern stormwater control mechanisms and shall, to the extent feasible, consider soil conditions in various parts of Daly City.                                                                                          |

- |              |                                                                                                                                                                                                                                                                                                                                                                                                                     |
|--------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Task RME-8.4 | Assess projected stormwater impacts from new development in conformance with the San Mateo County Water Pollution Prevention Program, CEQA Guidelines and relative to state and federal standards.                                                                                                                                                                                                                  |
| Policy RME-9 | Balance stormwater mitigation measures with the other inherent benefits of higher density development that is in close proximity to public transit, i.e., reduction of VMT on local and regional roadways, to the extent permitted under the Municipal Regional Stormwater Permit.                                                                                                                                  |
| Policy HE-27 | Through the development of a Stormwater Management Program, ensure that all new development complies with applicable Municipal Regional Stormwater NPDES Permit requirements by incorporating controls that reduce water quality impacts over the life of the project in way that is both technically and economically feasible, and reduces pollutants in stormwater discharges to the maximum extent practicable. |
- 

### Daly City Urban Water Management Plan (2020)

The UWMP is a long-range plan that assesses the City's water supply over a 25-year planning horizon (2045) to ensure adequate water supplies to meet existing and future demands for water. The UWMP presents forecasted supplies and demands, describes conservation programs, and includes a water shortage contingency analysis.

### Daly City Municipal Code

Chapter 17.41, Water Conservation in Landscaping, establishes regulations to implement water conservation practices on existing and new landscapes. For projects containing more than 1,000 square feet of irrigated landscape, a landscape permit is required which requires irrigation design review. Further, this Chapter mandates that any owner of landscape of over one acre in size shall comply with local agency programs that may be instituted relating to irrigation audits, surveys and water use analysis, and shall maintain landscape irrigation facilities to prevent water waste and runoff.

#### **4.19.1.2      *Existing Conditions***

##### **Water Supply**

Water service to the project site is provided by the Daly City Department of Water and Wastewater Resources (DWW). The City relies on local groundwater pumping from six municipal wells and water supply purchases from the SFPUC.<sup>58</sup> The City also uses tertiary recycled water from the North San Mateo County Sanitation District wastewater treatment plant, to offset potable/aquifer water demands. The project site is served by a four-inch water main in 3<sup>rd</sup> Avenue.

##### **Storm Drainage**

As discussed in Section 4.10 Hydrology and Water Quality, the project site is located within the Colma Creek Watershed which extends from San Bruno Mountain to its outlet at the San Francisco Bay just north of the San Francisco Airport and south of Point San Bruno. The project site is primarily unpaved, with the exception of the single-family residence and associated driveway.

---

<sup>58</sup> City of Daly City. *General Plan Environmental Impact Report. Utilities and Service Systems*. 2012.

Approximately 1,700 square feet (5.5 percent) of the 31,140 square-foot site is made up of impervious surface area while the rest of the project site (94.5 percent) is pervious surface area. Stormwater not absorbed within the project site is directed to the curb inlets and conveyed into the existing 12-inch stormwater line under 3<sup>rd</sup> Avenue.

### **Wastewater/Sanitary Sewer System**

Wastewater collection and treatment for Daly City is managed by the North San Mateo County Sanitation District (NSMCSD), which is a subsidiary of the City of Daly City. Wastewater produced within the District is treated at the NSMCSD Treatment Plant (WWTP), which is located at the corner of John Daly Boulevard and Lake Merced Boulevard.

Sanitary sewer lines in the project area are maintained by the City of Daly City Department of Water and Wastewater Resources. There is an existing six-inch sanitary sewer line in 3<sup>rd</sup> Avenue.

The City's WWTP has an average dry weather flow design capacity of 10.3 million gpd. However, the NSMCSD discharges and operates the WWTP at or below the permitted average dry weather flow rate of eight million gpd (averaged over three consecutive dry months) and does not anticipate a need to increase the permitted flow rate in the next five years.

### **Solid Waste**

Solid waste is collected from Daly City homes and businesses and is processed by Republic Services of Daly City at its Mussel Rock Transfer Station. Materials that cannot be recycled or composted are transferred to the Ox Mountain Sanitary Landfill near Half Moon Bay. In 2001, Browning-Ferris Industries, owner of the Ox Mountain Landfill, obtained a revised solid waste facility permit for Ox Mountain to increase the permitted disposal acreage from 173 acres to 191 acres and to change the closure date of the facility from 2018 to 2023, with a longer period of operation allowed pending renewal of the landfill's permit. The current landfill permit estimates closure of the landfill in 2034.<sup>59</sup> The Ox Mountain Landfill has a remaining capacity of approximately 22,180,000 cubic yards of solid waste. Capacity may change based on such factors such as amount of waste landfilled, compaction rates, waste settlement, and cover soil use, and therefore the closure date may also change.

| Would the project:                                                                                                                                                                                                                                                                  |                                      |                                                             |                                     |                          |
| 1) Require or result in the relocation or construction of new or expanded water, wastewater treatment or stormwater drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects? | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 2) Have insufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years?                                                                                                                         | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 3) Result in a determination by the wastewater treatment provider which serves or may serve the project that it does not have adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?                                         | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 4) Generate solid waste in excess of state or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?                                                                                             | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 5) Be noncompliant with federal, state, or local management and reduction statutes and regulations related to solid waste?                                                                                                                                                          | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

---

**Impact UTL-1:** The project would not require or result in the relocation or construction of new or expanded water, wastewater treatment or stormwater drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects. **(Less than Significant Impact)**

---

#### Water

In order to accommodate the proposed townhomes, the project would include modifications to the existing water system. The project would upsize approximately 480 feet of the existing four-inch diameter water main in 3<sup>rd</sup> Avenue to an eight-inch water main from Castle Street to Habitat Way. The existing four-inch water main is partially under the sidewalk and would be abandoned. The new eight-inch diameter water main would be constructed in the street right-of-way. All water connections currently served by the existing four-inch water main would be transferred to the new eight-inch water main. The proposed modifications to the existing water system would be subject to the construction-related mitigation measures and standard conditions described in previous sections of this Initial Study and thus, would not have a significant impact on the environment.

## Wastewater/Sanitary Sewer

Several capacity improvements have been planned for the trunk sewer downstream of the project site. These improvements are not associated with the proposed townhomes and will be implemented separately by the City. Based on the sanitary sewer modeling completed for the project, the proposed development would result in a small increase in sewage flows that could be adequately supported by the existing sanitary sewer system without any additional modifications. Therefore, the project would not require new or expanded wastewater facilities.

## Stormwater Drainage

The project would result in a net increase of impervious surface area. On-site stormwater treatment would occur through the use of flow-through planters and bio-retention areas. Consistent with the City's requirements, the project would not increase site runoff from a 10-year storm for a duration of two hours of rainfall and will retain any increased flow due to reduction in pervious surfaces. Adherence to the City's stormwater retention requirements would ensure the project would not require new or expanded stormwater facilities.

## Electricity and Telecommunications

The project shall underground all electrical and telecommunication services, including adjacent property services as may be necessary to ensure that existing overhead drop services do not traverse the proposed townhomes. Undergrounding of electrical and telecommunication services shall be subject to the construction-related mitigation measures and standard conditions described in previous sections of this Initial Study and thus, would not have a significant impact on the environment. The project would result in an increase in utilities demand; however, the project would not necessitate substantial construction or relocation of utility facilities. **(Less than Significant Impact)**

---

|                      |                                                                                                                                                                                                                      |
|----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Impact UTL-2:</b> | The project would not have insufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years. <b>(Less than Significant Impact)</b> |
|----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

---

Based on the UWMP's 2020 goal of 124 gallons per capita per day (gpcd), the project would result in a net increase of 5,084 gallons per day (gpd) in water demand.<sup>60</sup> The UWMP estimated that the City would have excess water supply in normal, dry, and multiple-dry years through 2040. Excess water supply across all scenarios ranged from 91 to 333 million gallons per year (MGY). Increased water demand from the project would be equivalent to approximately two percent<sup>61</sup> of the excess water available in the second- and third-year dry scenarios for 2020, the scenarios with the least amount of excess water. Therefore, the City has capacity to supply the project during normal, dry, and multiple dry years. **(Less than Significant Impact)**

---

<sup>60</sup> 41 net new residents x 124 gpcd = 5,084 gpd

<sup>61</sup> 5,084 gpd x 10<sup>-6</sup> million gallons per gallon x 365 days of the year = 1.86 MGY.

1.86 MGY/ 91 MGY x 100 = 2.0 percent.

---

**Impact UTL-3:** The project would not result in a determination by the wastewater treatment provider which serves or may serve the project that it does not have adequate capacity to serve the project's projected demand in addition to the provider's existing commitments. **(Less than Significant Impact)**

---

The WWTP has an average dry weather flow design capacity of 10.3 million gallons per day (mgd). The General Plan FEIR determined that full buildout of the General would generate approximately 6.66 mgd. This is below the permitted flow rate of eight mgd, leaving 1.34 mgd of unused capacity at buildout. The project would add approximately 4,321 gpd<sup>62</sup> of wastewater to be treated at the WWTP, or approximately 0.32 percent of the unused capacity. This would be a less than significant increase in wastewater flow. In addition, the WWTP monitors its wastewater to ensure that it meets all requirements and the RWQCB routinely inspects treatment facilities to ensure permit requirements are met. For these reasons, there would be adequate capacity at the WWTP. **(Less than Significant Impact)**

---

**Impact UTL-4:** The project would not generate solid waste in excess of state or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals. **(Less than Significant Impact)**

---

Waste generation and disposal data for Daly City is maintained by CalRecycle. According to the CalRecycle, the total amount of solid waste landfilled in 2019 was 52,899 tons.<sup>63</sup> The project would generate approximately six tons of solid waste per year.<sup>64</sup> The project would increase solid waste generation in the City by substantially less than one percent and therefore would not generate solid waste in excess of local standards or capacity and would not impair the attainment of solid waste reduction goals. **(Less than Significant Impact)**

---

**Impact UTL-5:** The project would not be noncompliant with federal, state, or local management and reduction statutes and regulations related to solid waste. **(Less than Significant Impact)**

---

The project would comply with solid waste management and reductions statutes and regulations including CALGreen requirements for recycling and salvaging of construction and demolition waste. **(Less than Significant Impact)**

---

<sup>62</sup> Wastewater is conservatively estimated at 85 percent of potable water demand.

<sup>63</sup> CalRecycle. "Disposal Rate Calculator". Accessed December 8, 2020.  
<https://www2.calrecycle.ca.gov/LGCentral/AnnualReporting/DisposalRateCalculator>.

## 4.20 WILDFIRE

### 4.20.1 Environmental Setting

#### 4.20.1.1 *Regulatory Framework*

#### 4.20.1.2 *Existing Conditions*

The California Department of Forestry and Fire Protection (Cal Fire) is required by law to map areas of significant fire hazards based on fuels, terrain, weather, and other relevant factors. Referred to as Fire Hazard Severity Zones (FHSZ), these maps influence how people construct buildings and protect property to reduce risk associated with wildland fires. The project site is not located in a FHSZ.<sup>65</sup>

### 4.20.2 Impact Discussion

|                                                                                                                                                                                                                                                                     | Potentially<br>Significant<br>Impact | Less than<br>Significant<br>with Mitigation<br>Incorporated | Less than<br>Significant<br>Impact | No Impact                           |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------|-------------------------------------------------------------|------------------------------------|-------------------------------------|
| If located in or near state responsibility areas or lands classified as very high fire hazard severity zones, would the project:                                                                                                                                    |                                      |                                                             |                                    |                                     |
| 1) Substantially impair an adopted emergency response plan or emergency evacuation plan?                                                                                                                                                                            | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input type="checkbox"/>           | <input checked="" type="checkbox"/> |
| 2) Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?                                                         | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input type="checkbox"/>           | <input checked="" type="checkbox"/> |
| 3) Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines, or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment? | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input type="checkbox"/>           | <input checked="" type="checkbox"/> |
| 4) Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?                                                                             | <input type="checkbox"/>             | <input type="checkbox"/>                                    | <input type="checkbox"/>           | <input checked="" type="checkbox"/> |

The project site is not located in or near state responsibility areas or lands classified as very high fire hazard severity zones; therefore, the project would not result in wildfire impacts. **(No Impact)**

<sup>65</sup> California Board of Forestry and Fire Protection. *Fire Hazard Severity Zones Maps*. Accessed November 11, 2020. <https://osfm.fire.ca.gov/divisions/wildfire-prevention-planning-engineering/wildland-hazards-building-codes/fire-hazard-severity-zones-maps/>

## 4.21

## MANDATORY FINDINGS OF SIGNIFICANCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | Potentially<br>Significant<br>Impact | Less than<br>Significant<br>with Mitigation<br>Incorporated | Less than<br>Significant<br>Impact | No Impact                |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------|-------------------------------------------------------------|------------------------------------|--------------------------|
| 1) Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal, or eliminate important examples of the major periods of California history or prehistory? | <input type="checkbox"/>             | <input checked="" type="checkbox"/>                         | <input type="checkbox"/>           | <input type="checkbox"/> |
| 2) Does the project have impacts that are individually limited, but cumulatively considerable? (“Cumulatively considerable” means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects.)                                                                                                                                        | <input type="checkbox"/>             | <input checked="" type="checkbox"/>                         | <input type="checkbox"/>           | <input type="checkbox"/> |
| 3) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?                                                                                                                                                                                                                                                                                                                                           | <input type="checkbox"/>             | <input checked="" type="checkbox"/>                         | <input type="checkbox"/>           | <input type="checkbox"/> |

|                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Impact MFS-1:</b> | The project does not have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal, or eliminate important examples of the major periods of California history or prehistory. <b>(Less than Significant Impact with Mitigation Incorporated)</b> |
|----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

As discussed in the individual sections, the proposed project would not degrade the quality of the environment with the implementation of identified mitigation measures. As discussed in Section 4.4 Biological Resources, the project would not impact sensitive habitat or species but requires the implementation of appropriate mitigation measures for nesting preconstruction bird surveys. There are no historic buildings on-site or in the immediate project vicinity as discussed in Section 4.5 Cultural Resources. However, the project requires implementation of appropriate mitigation measures if project construction encounters buried archaeological resources. **(Less Than Significant Impact with Mitigation Incorporated)**

---

**Impact MFS-2:** The project does not have impacts that are individually limited, but cumulatively considerable. **(Less than Significant Cumulative Impact)**

---

Under Section 15065(a)(3) of the CEQA Guidelines, a lead agency shall find that a project may have a significant effect on the environment where there is substantial evidence that the project has potential environmental effects “that are individually limited, but cumulatively considerable.” As defined in Section 15065(a)(3) of the CEQA Guidelines, cumulatively considerable means “that the incremental effects of an individual project are significant when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects.”

### **Resource Topics with No Cumulative Impact**

The project would not result in wildlife hazards and would have no impact on agricultural resources or mineral resources. Impacts discussed in Geology and Soils and Land Use, would all be less than significant and would be limited to the project site. Therefore, the project has no potential to combine with other projects to result in cumulative impacts to those resources. **(No Cumulative Impact)**

### **Air Quality and GHGs**

Because criteria air pollutant and GHG emissions would contribute to regional and global emissions of such pollutants, the identified thresholds developed by BAAQMD and used by the City of Daly City were developed such that a project-level impact would also be a cumulatively considerable impact. The project would not result in a significant emissions of criteria air pollutants or GHG emissions and, therefore, would not make a substantial contribution to cumulative air quality or GHG emissions impacts. The discussion in Section 4.3 Air Quality provides analysis of the cumulative health risk effects of the project’s TACs emissions during construction, and concluded those effects would be less than significant. **(Less than Significant Cumulative Impact)**

### **Biological Resources**

The project would have no impact on special status species, wetlands, riparian habitat, or conflict with applicable habitat plans. The project would result in a net increase of six trees and with implementation of MM BIO-1.1 would have a less than significant impact on nesting birds. Therefore, the project would have no potential to combine with other projects to result in a cumulatively significant impact. **(Less than Significant Cumulative Impact with Mitigation Incorporated)**

### **Hydrology and Water Quality**

Cumulative developments near the project would be subject to similar hydrological and urban runoff conditions. All projects occurring within Daly City would be required to implement the same Standard Conditions of Approval and measures related to construction water quality as the proposed project (including preparation of a SWPPP if disturbance if greater than one acre). In addition, all current and probable future projects that would disturb more than one acre of soil or replace/add more at least 10,000 square feet of impervious surfaces would be required to meet applicable site design and runoff reduction measures. For these reasons, the cumulative projects, including the

proposed project, would not result in significant cumulative hydrology or water quality impacts. **(Less than Significant Cumulative Impact)**

### **Hazards and Hazardous Materials**

The use, storage, transportation, and disposal of maintenance chemicals of the project would be managed in accordance with existing laws and regulations that ensure herbicide and pesticide storage, and transportation to and from the cumulative sites. The project would implement MM HAZ-2.1 to address impacted soils on the site and ensure the project would not result in a significant cumulative impact related to hazardous materials. **(Less than Significant Cumulative Impact with Mitigation Incorporated)**

### **Noise**

Construction noise would be temporary and would be kept to a less than significant level by the implementation of MM NOI-1.1. There are several projects along Mission Street that may be under construction at the same time as the proposed project.<sup>66</sup> The nearest of which is located at 7310 Mission Street, approximately 1,000 feet from the project site. It is not likely that this project would have potential to combine noise impacts with the project to result in cumulatively significant construction noise due to the distance between the projects. Additionally, the project at 7310 Mission Street, and any other nearby projects, would be required to implement similar construction noise BMPs and therefore, would not generate construction noise that would result in a cumulatively significant impact. The project's operational noise would be compatible with the surrounding residences and would not have potential to contribute to a significant cumulative operational noise impact. **(Less than Significant Cumulative Impact with Mitigation Incorporated)**

### **Population and Housing, Public Services and Recreation**

The project would result in a net increase of 13 DU. Population growth generated by the project and cumulative projects would be consistent with the growth projected by the General Plan. Residents of the proposed project would be served by existing public services and recreational facilities. The project would not result in the need for new or altered facilities. The project would not result in a cumulatively significant impact on population and housing, public services or recreational facilities. **(Less than Significant Cumulative Impact)**

### **Transportation**

The project would generate approximately 92 net new vehicle trips per day. The project would result in a less than significant number of VMT. The project would be consistent with applicable policies regarding transportation and circulation and, therefore, would not result in a cumulative conflict with those policies. The project would comply with current building and fire codes and be reviewed by the NCFA to ensure adequate emergency access, as would all other projects in the vicinity. Therefore, the project would not result in a cumulatively significant impact to emergency access or other transportation issues. **(Less than Significant Cumulative Impact)**

---

**Impact MFS-3:** The project does not have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly. **(Less than Significant Impact with Mitigation Incorporated)**

---

Consistent with Section 15065(a)(4) of the CEQA Guidelines, a lead agency shall find that a project may have a significant effect on the environment where there is substantial evidence that the project has the potential to cause substantial adverse effects on human beings, either directly or indirectly. Under this standard, a change to the physical environment that might otherwise be minor must be treated as significant if people would be significantly affected. This factor relates to adverse changes to the environment of human beings generally, and not to effects on particular individuals. While changes to the environment that could indirectly affect human beings would be represented by all of the designated CEQA issue areas, those that could directly affect human beings include construction TACs, lead-contaminated soils, and noise. However, implementation of mitigation measures and General Plan policies would reduce these impacts to a less than significant level. No other direct or indirect adverse effects on human beings have been identified. **(Less Than Significant Impact with Mitigation Incorporated)**

I&R Project#: 20-185

## **Introduction**

The purpose of this report is to address the potential community risk impacts associated with the construction of the proposed townhome project located at 141 3<sup>rd</sup> Avenue in Daly City, California. The air quality impacts from this project would be associated with construction of the new buildings. Air pollutant emissions associated with construction of the project were predicted using appropriate computer models. In addition, the potential project construction health risk impacts and the impact of existing toxic air contaminant (TAC) sources affecting the nearby sensitive receptors were evaluated. The analysis was conducted following guidance provided by the Bay Area Air Quality Management District (BAAQMD).<sup>1</sup> BAAQMD recommends using a 1,000-foot screening radius around the project site for purposes of identifying community health risk from existing sources of TACs.

## **Project Description**

The project site is currently occupied by an approximate 1,200 square foot single-family home. The remainder of the 0.68-acre site is vacant. The project proposes to demolish the existing use and construct 15 townhomes with enclosed garages. Construction is to begin in September of 2021 and is expected to complete in June of 2022.

## **Setting**

The project is located in San Mateo County, which is in the San Francisco Bay Area Air Basin. Ambient air quality standards have been established at both the State and federal level. The Bay Area meets all ambient air quality standards with the exception of ground-level ozone, respirable particulate matter (PM<sub>10</sub>), and fine particulate matter (PM<sub>2.5</sub>).

### Air Pollutants of Concern

High ozone levels are caused by the cumulative emissions of reactive organic gases (ROG) and nitrogen oxides (NO<sub>x</sub>). These precursor pollutants react under certain meteorological conditions to form high ozone levels. Controlling the emissions of these precursor pollutants is the focus of the Bay Area's attempts to reduce ozone levels. The highest ozone levels in the Bay Area occur in the eastern and southern inland valleys that are downwind of air pollutant sources. High ozone levels aggravate respiratory and cardiovascular diseases, reduced lung function, and increase coughing and chest discomfort.

Particulate matter is another problematic air pollutant of the Bay Area. Particulate matter is assessed and measured in terms of respirable particulate matter or particles that have a diameter of 10 micrometers or less (PM<sub>10</sub>) and fine particulate matter where particles have a diameter of 2.5 micrometers or less (PM<sub>2.5</sub>). Elevated concentrations of PM<sub>10</sub> and PM<sub>2.5</sub> are the result of both region-wide (or cumulative) emissions and localized emissions. High particulate matter levels aggravate respiratory and cardiovascular diseases, reduce lung function, increase mortality (e.g., lung cancer), and result in reduced lung function growth in children.

## Toxic Air Contaminants

Toxic air contaminants (TAC) are a broad class of compounds known to cause morbidity or mortality (usually because they cause cancer) and include, but are not limited to, the criteria air pollutants. TACs are found in ambient air, especially in urban areas, and are caused by industry, agriculture, fuel combustion, and commercial operations (e.g., dry cleaners). TACs are typically found in low concentrations, even near their source (e.g., diesel particulate matter [DPM] near a freeway). Because chronic exposure can result in adverse health effects, TACs are regulated at the regional, State, and federal level.

Diesel exhaust is the predominant TAC in urban air and is estimated to represent about three-quarters of the cancer risk from TACs (based on the Bay Area average). According to the California Air Resources Board (CARB), diesel exhaust is a complex mixture of gases, vapors, and fine particles. This complexity makes the evaluation of health effects of diesel exhaust a complex scientific issue. Some of the chemicals in diesel exhaust, such as benzene and formaldehyde, have been previously identified as TACs by the CARB, and are listed as carcinogens either under the State's Proposition 65 or under the Federal Hazardous Air Pollutants programs.

## Regulatory Setting

### *Federal Regulations*

The United States Environmental Protection Agency (EPA) sets nationwide emission standards for mobile sources, which include on-road (highway) motor vehicles such trucks, buses, and automobiles, and non-road (off-road) vehicles and equipment used in construction, agricultural, industrial, and mining activities (such as bulldozers and loaders). The EPA also sets nationwide fuel standards. California also has the ability to set motor vehicle emission standards and standards for fuel used in California, as long as they are the same or more stringent than the federal standards.

In the past decade the EPA has established a number of emission standards for on- and non-road heavy-duty diesel engines used in trucks and other equipment. This was done in part because diesel engines are a significant source of NO<sub>x</sub> and particulate matter (PM<sub>10</sub> and PM<sub>2.5</sub>) and because the EPA has identified DPM as a probable carcinogen. Implementation of the heavy-duty diesel on-road vehicle standards and the non-road diesel engine standards are estimated to reduce particulate matter and NO<sub>x</sub> emissions from diesel engines up to 95 percent in 2030 when the heavy-duty vehicle fleet is completely replaced with newer heavy-duty vehicles that comply with these emission standards.<sup>2</sup>

In concert with the diesel engine emission standards, the EPA has also substantially reduced the amount of sulfur allowed in diesel fuels. The sulfur contained in diesel fuel is a significant contributor to the formation of particulate matter in diesel-fueled engine exhaust. The new standards reduced the amount of sulfur allowed by 97 percent for highway diesel fuel (from 500 parts per million by weight [ppmw] to 15 ppmw), and by 99 percent for off-highway diesel fuel

---

<sup>2</sup> USEPA, 2000. *Regulatory Announcement, Heavy-Duty Engine and Vehicle Standards and Highway Diesel Fuel Sulfur Control Requirements*. EPA420-F-00-057. December.

(from about 3,000 ppmw to 15 ppmw). The low sulfur highway fuel (15 ppmw sulfur), also called ultra-low sulfur diesel (ULSD), is currently required for use by all vehicles in the U.S.

All of the above federal diesel engine and diesel fuel requirements have been adopted by California, in some cases with modifications making the requirements more stringent or the implementation dates sooner.

### *State Regulations*

To address the issue of diesel emissions in the state, CARB developed the Risk Reduction Plan to Reduce Particulate Matter Emissions from Diesel-Fueled Engines and Vehicles.<sup>3</sup> In addition to requiring more stringent emission standards for new on-road and off-road mobile sources and stationary diesel-fueled engines to reduce particulate matter emissions by 90 percent, a significant component of the plan involves application of emission control strategies to existing diesel vehicles and equipment. Many of the measures of the Diesel Risk Reduction Plan have been approved and adopted, including the federal on-road and non-road diesel engine emission standards for new engines, as well as adoption of regulations for low sulfur fuel in California.

CARB has adopted and implemented a number of regulations for stationary and mobile sources to reduce emissions of DPM. Several of these regulatory programs affect medium and heavy-duty diesel trucks that represent the bulk of DPM emissions from California highways. CARB regulations require on-road diesel trucks to be retrofitted with particulate matter controls or replaced to meet 2010 or later engine standards that have much lower DPM and PM<sub>2.5</sub> emissions. This regulation will substantially reduce these emissions between 2013 and 2023. While new trucks and buses will meet strict federal standards, this measure is intended to accelerate the rate at which the fleet either turns over so there are more cleaner vehicles on the road or is retrofitted to meet similar standards. With this regulation, older, more polluting trucks would be removed from the roads sooner.

CARB has also adopted and implemented regulations to reduce DPM and NO<sub>x</sub> emissions from in-use (existing) and new off-road heavy-duty diesel vehicles (e.g., loaders, tractors, bulldozers, backhoes, off-highway trucks, etc.). The regulations apply to diesel-powered off-road vehicles with engines 25 horsepower (hp) or greater. The regulations are intended to reduce particulate matter and NO<sub>x</sub> exhaust emissions by requiring owners to turn over their fleet (replace older equipment with newer equipment) or retrofit existing equipment in order to achieve specified fleet-averaged emission rates. Implementation of this regulation, in conjunction with stringent federal off-road equipment engine emission limits for new vehicles, will significantly reduce emissions of DPM and NO<sub>x</sub>.

### *Bay Area Air Quality Management District (BAAQMD)*

BAAQMD has jurisdiction over an approximately 5,600-square mile area, commonly referred to as the San Francisco Bay Area (Bay Area). The District's boundary encompasses the nine San Francisco Bay Area counties, including Alameda County, Contra Costa County, Marin County,

---

<sup>3</sup> California Air Resources Board, 2000. Risk Reduction Plan to Reduce Particulate Matter Emissions from Diesel-Fueled Engines and Vehicles. October.

San Francisco County, San Mateo County, Santa Clara County, Napa County, southwestern Solano County, and southern Sonoma County.

BAAQMD is the lead agency in developing plans to address attainment and maintenance of the National Ambient Air Quality Standards and California Ambient Air Quality Standards. The District also has permit authority over most types of stationary equipment utilized for the proposed project. The BAAQMD is responsible for permitting and inspection of stationary sources; enforcement of regulations, including setting fees, levying fines, and enforcement actions; and ensuring that public nuisances are minimized.

The BAAQMD California Environmental Quality Act (CEQA) *Air Quality Guidelines*<sup>4</sup> were prepared to assist in the evaluation of air quality impacts of projects and plans proposed within the Bay Area. The guidelines provide recommended procedures for evaluating potential air impacts during the environmental review process consistent with CEQA requirements including thresholds of significance, mitigation measures, and background air quality information. They also include assessment methodologies for air toxics, odors, and greenhouse gas emissions. *Attachment 1* includes detailed community risk modeling methodology.

#### *Daly City 2030 General Plan*

The following air resources policies and implementing tasks contained in the Resource Management Element of the Daly City 2030 General Plan<sup>5</sup> are applicable to the proposed project:

*Policy RME-5:* Assess projected air emissions from new development and associated construction and demolition activities in conformance with the Bay Area Air Quality Management District (BAAQMD) CEQA Guidelines, and relative to state and federal standards.

- Task RME-5.1: Amend the Planning Division's development review procedures to include a formal step that would help identify how a development project can incorporate design or functional changes that will minimize air quality impacts.
- Task RME-5.2: Incorporate air quality significance thresholds into the Local Thresholds of Significance document identified in Program RME-1.
- Task RME-5.3: Consider cumulative air quality impacts consistent with the region's Clean Air Plan and State law.
- Task RME-5.4: Require the preparation of a Transportation Systems Management plan for new development that has been determined to contribute to a reduction in location air quality. Daly City 2030 General Plan | Resource Management Element 193

---

<sup>4</sup> Bay Area Air Quality Management District, 2017. *CEQA Air Quality Guidelines*. May.

<sup>5</sup> Daly City, 2013. *Daly City 2030 General Plan*. Adopted March 25, 2013.

- Task RME-5.5: Consult with BAAQMD to identify stationary and mobile TAC sources and determine the need for and requirements of a health risk assessment for proposed developments. type, size and operations of the facility.

*Policy RME-6:* Assess projected air emissions from new development and associated construction and demolition activities in conformance with the Bay Area Air Quality Management District (BAAQMD) CEQA Guidelines, and relative to state and federal standards.

- Task RME-6.1: For new, expanded, or modified development proposals (including tenant improvements) that are potential sources of objectionable smoke and odor, require an analysis of possible smoke and odor impacts and the provision of smoke and odor minimization and control measures as mitigation. The requirements for such shall be codified within the Daly City Municipal Code.

Task RME-6.2: Require new residential development projects and projects categorized as sensitive receptors to be located an adequate distance from facilities that are existing and potential sources of odor. An adequate separate distance will be determined based upon the type, size and operations of the facility.

### Sensitive Receptors

There are groups of people more affected by air pollution than others. CARB has identified the following persons who are most likely to be affected by air pollution: children under 16, the elderly over 65, athletes, and people with cardiovascular and chronic respiratory diseases. These groups are classified as sensitive receptors. Locations that may contain a high concentration of these sensitive population groups include residential areas, hospitals, daycare facilities, elder care facilities, and elementary schools. For cancer risk assessments, children are the most sensitive receptors, since they are more susceptible to cancer causing TACs. Residential locations are assumed to include infants and small children. The closest sensitive receptors to the project site are in the single- and multi-family residences adjacent to and surrounding the project site. There are also students at the nearby Thornton High School (14 years and older) to the west of the site and Milestone Academy Preschool (2 years and older) to the southeast of the site. This project would introduce new sensitive receptors (i.e., residents) to the area.

### Significance Thresholds

In June 2010, BAAQMD adopted thresholds of significance to assist in the review of projects under CEQA and these significance thresholds were contained in the District's 2011 CEQA Air Quality Guidelines. These thresholds were designed to establish the level at which BAAQMD believed air pollution emissions would cause significant environmental impacts under CEQA. The thresholds were challenged through a series of court challenges and were mostly upheld. BAAQMD updated the CEQA Air Quality Guidelines in 2017 to include the latest significance thresholds, which were used in this analysis and are summarized in Table 1.

**Table 1. Community Risk Significance Thresholds**

| <b>Health Risks and Hazards</b>                                                                                                                                                                                                                                    | <b>Single Sources Within ¼-Mile Zone of Influence</b> | <b>Combined Sources (Cumulative from all sources within ¼-Mile zone of influence)</b> |

## Construction Community Risk Impacts and Mitigation Measures

Project impacts related to increased community risk can occur either by generating emissions of TACs and air pollutants and by introducing a new sensitive receptor in proximity to an existing source of TACs. Temporary project construction activity would generate emissions of DPM from equipment and trucks and also generate dust on a temporary basis that could affect nearby sensitive receptors. A construction community health risk assessment was prepared to address project construction impacts on the surrounding off-site sensitive receptors.

Additionally, the project could introduce new residents that are sensitive receptors, who would be exposed to existing sources of TACs and localized air pollutants in the vicinity of the project. Therefore, the impact of the existing sources of TAC upon the existing sensitive receptors and new incoming sensitive receptors was assessed.

Community risk impacts are addressed by predicting increased lifetime cancer risk, the increase in annual PM<sub>2.5</sub> concentrations, and computing the Hazard Index (HI) for non-cancer health risks. Construction equipment and associated heavy-duty truck traffic generates diesel exhaust, which is a known TAC. These exhaust emissions pose health risks for sensitive receptors such as surrounding residents. The primary community risk impact issues associated with construction emissions are cancer risk and exposure to PM<sub>2.5</sub>. A health risk assessment of the project construction activities was conducted that evaluated potential health effects to nearby sensitive receptors from construction emissions of DPM and PM<sub>2.5</sub>.<sup>6</sup> This assessment included dispersion modeling to predict the offsite and onsite concentrations resulting from project construction, so that lifetime cancer risks and non-cancer health effects could be evaluated. The methodology for computing community risks impacts is contained in *Attachment 1*.

### Construction Period Emissions

The California Emissions Estimator Model (CalEEMod) Version 2016.3.2 was used to estimate emissions from on-site construction activity, construction vehicle trips, and evaporative emissions. The project land use types and size, and anticipated construction schedule were input to CalEEMod. The CARB Emission FAcTors 2017 (EMFAC2017) model was used to predict emissions from construction traffic, which includes worker travel, vendor trucks, and haul trucks.<sup>7</sup>

<sup>6</sup> DPM is identified by California as a toxic air contaminant due to the potential to cause cancer.

<sup>7</sup> See CARB's EMFAC2017 Web Database at <https://www.arb.ca.gov/emfac/2017/>

The CalEEMod model output along with construction inputs are included in *Attachment 2* and EMFAC2017 vehicle emissions modeling outputs are included in *Attachment 3*.

## CalEEMod Modeling

### *Land Use Inputs*

The proposed townhome land uses were entered into CalEEMod as described in Table 2.

**Table 1. Summary of Project Land Use Inputs**

| <b>Project Land Uses</b>   | <b>Size</b> | <b>Units</b>   | <b>Square Feet (sf)</b> | <b>Acreage</b> |
|----------------------------|-------------|----------------|-------------------------|----------------|
| Condo/Townhouse            | 15          | Dwelling Unit  | 33,675                  | 0.68           |
| Enclosed Parking Structure | 30          | Parking Spaces | 2,245                   |                |

### *Construction Inputs*

CalEEMod computes annual emissions for construction that are based on the project type, size and acreage. The model provides emission estimates for both on-site and off-site construction activities. On-site activities are primarily made up of construction equipment emissions, while off-site activity includes worker, hauling, and vendor traffic. The construction build-out scenario for both phases, including equipment list and schedule, were based on information provided by the project applicant.

The construction equipment worksheets provided by the applicant included the schedule for each phase. Within each phase, the quantity of equipment to be used along with the average hours per day and total number of workdays was set to the default values in CalEEMod. Where CalEEMod doesn't provide default values, conservatively high values were assumed for equipment required and hours operated. Since different equipment would have different estimates of the working days per phase, the hours per day for each phase was computed by dividing the total number of hours that the equipment would be used by the total number of days in that phase. The construction schedule assumed that the earliest possible start date would be September 2021 and would be built out over a period of approximately ten months, or 206 construction workdays. The earliest year of full operation was assumed to be 2023.

### *Construction Truck Traffic Emissions*

The latest version of the CalEEMod model is based on the older version of the CARB EMFAC2014 motor vehicle emission factor model. This model has been superseded by the EMFAC2017 model; however, CalEEMod has not been updated to include EMFAC2017. Construction would produce traffic in the form of worker trips and truck traffic. The traffic-related emissions are based on worker and vendor trip estimates produced by CalEEMod and haul trips that were computed based on the estimate of demolition material to be exported, soil material imported and/or exported to the site, and the estimate of cement and asphalt truck trips. CalEEMod provides daily estimates of worker and vendor trips for each applicable phase. The total trips for those were computed by multiplying the daily trip rate by the number of days in that phase. Haul trips for demolition and grading were estimated from the provided pavement demolition and

grading volumes. The number of concrete and asphalt total round haul trips were provided for the project and converted to total one-way trips, assuming two trips per delivery.

The construction traffic information was combined with EMFAC2017 motor vehicle emissions factors. EMFAC2017 provides aggregate emission rates in grams per mile for each vehicle type. The vehicle mix for this study was based on CalEEMod default assumptions, where worker trips are assumed to be comprised of light-duty autos (EMFAC category LDA) and light duty trucks (EMFAC category LDT1 and LDT2). Vendor trips are comprised of delivery and large trucks (EMFAC category MHDT and HHDT) and haul trips, including cement trucks, are comprised of large trucks (EMFAC category HHDT). Travel distances are based on CalEEMod default lengths, which are 10.8 miles for worker travel, 7.3 miles for vendor trips and 20 miles for hauling (demolition material export and soil import/export). Since CalEEMod does not address cement trucks, these were treated as vendor travel distances. Each trip was assumed to include an idle time of 5 minutes. Emissions associated with vehicle starts were also included. On road emissions in Santa Clara County for 2021 and 2022 were used in these calculations. Table 3 provides the traffic inputs that were combined with the EMFAC2017 emission database to compute vehicle emissions.

**Table 3. Construction Traffic Data Used for EMFAC2017 Model Runs**

| CalEEMod Run/Land Uses and Construction Phase                                                        | Trips by Trip Type                   |                           |                                          | Notes                                                                  |

### Summary of Computed Construction Period Emissions

The CalEEMod model and EMFAC2017 emissions provided total annual PM<sub>10</sub> exhaust emissions (assumed to be DPM) for the off-road construction equipment and for exhaust emissions from on-

road vehicles, with total emissions from all construction stages as 0.0386 tons (77 pounds). The on-road emissions are a result of haul truck travel during demolition and grading activities, worker travel, and vendor deliveries during construction. A trip length of one mile was used to represent vehicle travel while at or near the construction site. It was assumed that these emissions from on-road vehicles traveling at or near the site would occur at the construction site. Fugitive PM<sub>2.5</sub> dust emissions were calculated by CalEEMod as 0.0046 tons (9 pounds) for the overall construction period.

## **Community Health Risk from Project Construction**

### Dispersion Modeling

The U.S. EPA AERMOD dispersion model was used to predict concentrations of DPM and PM<sub>2.5</sub> concentrations at sensitive receptors in the vicinity of the project construction area. The AERMOD dispersion model is a BAAQMD-recommended model for use in modeling analysis of these types of emission activities for CEQA projects.<sup>8</sup>

### *Construction Sources*

To represent the construction equipment exhaust emissions, an area source emission release height of 20 feet (6 meters) was used for the area sources.<sup>9</sup> The release height incorporates both the physical release height from the construction equipment (i.e., the height of the exhaust pipe) and plume rise after it leaves the exhaust pipe. Plume rise is due to both the high temperature of the exhaust and the high velocity of the exhaust gas. It should be noted that when modeling an area source, plume rise is not calculated by the AERMOD dispersion model as it would do for a point source (exhaust stack). Therefore, the release height from an area source used to represent emissions from sources with plume rise, such as construction equipment, should be based on the height the exhaust plume is expected to achieve, not just the height of the top of the exhaust pipe.

For modeling fugitive PM<sub>2.5</sub> emissions, a near-ground level release height of 7 feet (2 meters) was used for the area source. Fugitive dust emissions at construction sites come from a variety of sources, including truck and equipment travel, grading activities, truck loading (with loaders) and unloading (rear or bottom dumping), loaders and excavators moving and transferring soil and other materials, etc. All of these activities result in fugitive dust emissions at various heights at the point(s) of generation. Once generated, the dust plume will tend to rise as it moves downwind across the site and exit the site at a higher elevation than when it was generated. For all these reasons, a 7-foot release height was used as the average release height across the construction site. Emissions from the construction equipment and on-road vehicle travel were distributed throughout the modeled area sources.

## *AERMOD Inputs and Meteorological Data*

The modeling used a three-year data set (2010, 2012, 2013) of hourly meteorological data from the Fort Funston prepared for use with the AERMOD model by BAAQMD. Construction emissions were modeled as occurring daily between 7:00 a.m. to 6:00 p.m., when the majority of construction activity would occur according to the applicant. Annual DPM and PM<sub>2.5</sub> concentrations from construction activities during the 2021-2022 period were calculated using the model. DPM and PM<sub>2.5</sub> concentrations were calculated at nearby sensitive receptors. Receptor heights of 5 feet (1.5 meters) were used to represent the breathing height on the first floor of nearby single- and multi-family residences.<sup>10</sup> Receptor heights of 3 feet (1 meter) were used to represent the breathing height of the children at the high school and preschool.

## Summary of Construction Community Risk Impacts

The maximum increased cancer risks were calculated using the modeled TAC concentrations combined with the Office of Environmental Health Hazard Assessment (OEHHA) guidance for age sensitivity factors and exposure parameters as recommended by BAAQMD (see *Attachment 1*). Non-cancer health hazards and maximum PM<sub>2.5</sub> concentrations were also calculated and identified. Age-sensitivity factors reflect the greater sensitivity of infants and small children to cancer causing TACs. Infant, child, and adult exposures were assumed to occur at all residences during the entire construction period. For the students, children at Milestone Academy Preschool and Thornton High School were assumed to be two years and older. The child (ages 2 through 16 years old) cancer risk parameters were used to calculate the increased cancer risk for the students.

The maximum modeled annual PM<sub>2.5</sub> concentration was calculated based on combined exhaust and fugitive concentrations. The maximum computed HI value was based on the ratio of the maximum DPM concentration modeled and the chronic inhalation reference exposure level of 5 µg/m<sup>3</sup>.

The maximum-modeled annual DPM and PM<sub>2.5</sub> concentrations, which includes both the DPM and fugitive PM<sub>2.5</sub> concentrations, were identified at nearby sensitive receptors (as shown in Figure 1) to find the maximally exposed individuals (MEI). Results of this assessment indicated that the construction residential MEI was located at single-family home east of the construction project site. Table 4 summarizes the maximum cancer risks, PM<sub>2.5</sub> concentrations, and health hazard indexes for project related construction activities affecting the construction MEI. *Attachment 4* to this report includes the emission calculations used for the construction area source modeling and the cancer risk calculations.

Additionally, modeling was conducted to predict the cancer risks, non-cancer health hazards, and maximum PM<sub>2.5</sub> concentrations associated with construction activities at the nearby high school and preschool. The maximum increased cancer risks were adjusted using child exposure parameters. The uncontrolled cancer risk, PM<sub>2.5</sub> concentration, and HI at the nearby high school and preschool do not exceed their respective BAAQMD single-source significance thresholds, as shown in Table 4.

**Figure 1. Project Construction Site, Locations of Off-Site Sensitive Receptors, and Maximum TAC Impact Location**

## Cumulative Community Risks of all TAC Sources at the Offsite Project MEI

Community health risk assessments typically look at all substantial sources of TACs that can affect sensitive receptors that are located within 1,000 feet of a project site (i.e., influence area). These sources include rail lines, highways, busy surface streets, and stationary sources identified by BAAQMD. A review of the project influence area based on provided information indicates that traffic on Mission Street (State Route 82) would exceed an average daily traffic (ADT) of 10,000 vehicles. A review of BAAQMD's stationary source geographic information systems (GIS) map tool identified four stationary sources with the potential to affect the project site and MEI. Figure 2 shows the location of sources affecting the project site and MEI. Community risk impacts from these sources upon the MEI reported in Table 5. Details of the modeling and community risk calculations are included in *Attachment 5*.

**Figure 2. Project Site and Nearby TAC and PM<sub>2.5</sub> Sources**

### Highways – Mission Street (State Route 82)

BAAQMD provided raster files with cancer risk and PM<sub>2.5</sub> values for all highways/freeways, roadways (ADT > 30,000), and rail lines within the Bay Area. The risk values shown in the raster files were modeled in AERMOD in 20x20-meter grid cells. The files incorporate AADT for the

highway using EMFAC 2014 data for fleet mix and include the OEHHA 2015 factor. These raster files were used to screen the Mission Street (S.R.82) risks and hazards upon the MEI. The MEI is approximately 1,025 feet east of the state route. At the edge of the MEI, the increased cancer risk would be 5.1 per million and the PM<sub>2.5</sub> value would be 0.17 µg/m<sup>3</sup>. Note that the cancer risk value is not adjusted for age sensitivity or exposure duration. It is conservatively higher than adjusted cancer risk values. Refined modeling of the state route would have resulted in even lower risk values. Note that BAAQMD has found that non-cancer hazards were found to be minimal, so an HI value is not included. The rail line screening levels are listed in Table 5.

### BAAQMD Permitted Stationary Sources

Permitted stationary sources of air pollution near the project site were identified using BAAQMD's *Permitted Stationary Sources 2018* GIS website.<sup>11</sup> This mapping tool identifies the location of nearby stationary sources and their estimated risk and hazard impacts. Four sources were identified using this tool with three sources being auto body coating equipment and one a gas dispensing facility. A Stationary Source Information Form (SSIF) containing the identified sources was prepared and submitted to BAAQMD. BAAQMD provided input and clarification about the stationary sources.<sup>12</sup>

The screening level risks and hazards for the three generic sources reported by BAAQMD were adjusted for distance using BAAQMD's *Distance Adjustment Multiplier Tool for Generic Equipment*. The gas station source #112293 had high screening risk levels that were close to the project site. Therefore, emissions data provided by BAAQMD were input into BAAQMD's *Risk and Hazards Emissions Screening Calculator*, which is a more refined screening tool that computes the cancer risk, annual PM<sub>2.5</sub> concentrations, and HI using adjustments to account for new OEHHA guidance and distance between the receptor and source. Community risk impacts from the stationary sources upon the MEI is reported in Table 5.

### Summary of Cumulative Health Risk Impact at Construction MEI

Table 5 reports both the project and cumulative community risk impacts at the sensitive receptors most affected by construction (i.e. the MEI). The project would have an exceedance with respect to community risk caused by project construction activities, since the maximum unmitigated cancer risk exceeds the BAAQMD single-source thresholds. With the implementation of *Mitigation Measure AQ-1 and AQ-2*, the project's cancer risks would be lowered to a level below the single-source thresholds. The cancer risk, PM<sub>2.5</sub> concentration, and HI, unmitigated and mitigated, does not exceed its cumulative threshold.

Construction activities, particularly during site preparation and grading, would temporarily generate fugitive dust in the form of PM<sub>10</sub> and PM<sub>2.5</sub>. Sources of fugitive dust would include disturbed soils at the construction site and trucks carrying uncovered loads of soils. Unless properly controlled, vehicles leaving the site would deposit mud on local streets, which could be an additional source of airborne dust after it dries. The BAAQMD CEQA Air Quality Guidelines consider these impacts to be less-than-significant if best management practices are implemented to reduce these emissions. *Recommended Measure AQ-1 would implement BAAQMD-recommended best management practices.*

***Recommended Measure AQ-1: Include measures to control dust and exhaust during construction.***

During any construction period ground disturbance, the applicant shall ensure that the project contractor implement measures to control dust and exhaust. Implementation of the measures recommended by BAAQMD and listed below would reduce the air quality impacts associated with grading and new construction to a less-than-significant level. Additional measures are identified to reduce construction equipment exhaust emissions. The contractor shall implement the following best management practices that are required of all projects:

1. All exposed surfaces (e.g., parking areas, staging areas, soil piles, graded areas, and unpaved access roads) shall be watered two times per day.
2. All haul trucks transporting soil, sand, or other loose material off-site shall be covered.

3. All visible mud or dirt track-out onto adjacent public roads shall be removed using wet power vacuum street sweepers at least once per day. The use of dry power sweeping is prohibited.
4. All vehicle speeds on unpaved roads shall be limited to 15 miles per hour (mph).
5. All roadways, driveways, and sidewalks to be paved shall be completed as soon as possible. Building pads shall be laid as soon as possible after grading unless seeding or soil binders are used.
6. Idling times shall be minimized either by shutting equipment off when not in use or reducing the maximum idling time to 5 minutes (as required by the California airborne toxics control measure Title 13, Section 2485 of California Code of Regulations [CCR]). Clear signage shall be provided for construction workers at all access points.
7. All construction equipment shall be maintained and properly tuned in accordance with manufacturer's specifications. All equipment shall be checked by a certified mechanic and determined to be running in proper condition prior to operation.
8. Post a publicly visible sign with the telephone number and person to contact at the Lead Agency regarding dust complaints. This person shall respond and take corrective action within 48 hours. The Air District's phone number shall also be visible to ensure compliance with applicable regulations.

#### *Effectiveness of Recommended Measure AQ-1*

The measures above are consistent with BAAQMD-recommended basic control measures for reducing fugitive particulate matter that are contained in the BAAQMD CEQA Air Quality Guidelines.

#### **Mitigation Measure AQ-2: Use construction equipment that has low diesel particulate matter exhaust to minimize emissions**

A feasible plan to reduce emissions such that increased cancer risk and annual PM<sub>2.5</sub> concentrations from construction would be reduced below significance levels is as follows:

1. All construction equipment larger than 25 horsepower used at the site for more than two continuous days or 20 hours total shall meet U.S. EPA Tier 4 emission standards for particulate matter (PM<sub>10</sub> and PM<sub>2.5</sub>), if feasible, otherwise,
  - a. If use of Tier 4 equipment is not available, alternatively use equipment that meets U.S. EPA emission standards for Tier 3 engines and include particulate matter emissions control equivalent to CARB Level 3 verifiable diesel emission control devices that altogether achieve a 67 percent reduction in particulate matter exhaust in comparison to uncontrolled equipment; alternatively (or in combination).

- b. Use of electrical or non-diesel fueled equipment.

#### *Effectiveness of Mitigation Measure AQ-2*

CalEEMod was used to compute emissions associated with this mitigation measure assuming that all equipment met U.S. EPA Tier 4 interim engines standards and BAAQMD best management practices for construction were included. With these implemented, the project's construction cancer risk impact, assuming infant exposure, would be reduced to 1.68 per million. As a result, the project's construction cancer risk would be reduced below the BAAQMD single-source threshold.

#### **On-Site Community Health Risk Impacts – New Project Residents**

In addition to evaluating health impact from project construction, a health risk assessment was completed to assess the impact existing TAC sources would have on the new proposed sensitive receptors (residents) that that project would introduce. The same TAC sources identified above were used in this health risk assessment.<sup>13</sup>

#### Highways – Mission Street (S.R. 82)

The state route screening analysis for the new project sensitive receptors was conducted in the same manner as described above for the construction MEI. The project site is approximately 850 east of the state route. The community risk impacts from the state route at the project site are shown in Table 6.

#### Stationary Sources

The stationary source screening analysis for the new project sensitive receptors was conducted in the same manner as described above for the construction MEI. The community risk impacts from the stationary sources at the project site are shown in Table 6.

#### *Combined Community Health Risk at Project Site*

Community risk impacts from the existing TAC sources upon the project site are reported in Table 6. The risks from the singular TAC sources are compared against the BAAQMD single-source threshold. The risks from all the sources are then combined and compared against the BAAQMD cumulative-source threshold. As shown, none of the sources exceed the single-source or cumulative-source thresholds.

---

<sup>13</sup> We note that to the extent this analysis considers *existing* air quality issues in relation to the impact on *future residents* of the Project, it does so for informational purposes only pursuant to the judicial decisions in *CBIA v. BAAQMD* (2015) 62 Cal.4th 369, 386 and *Ballona Wetlands Land Trust v. City of Los Angeles* (2011) 201 Cal.App.4th 455, 473, which confirm that the impacts of the environment on a project are excluded from CEQA unless the project itself “exacerbates” such impacts.

## Supporting Documentation

*Attachment 1* is the methodology used to compute community risk impacts, including the methods to compute lifetime cancer risk from exposure to project emissions.

*Attachment 2* includes the CalEEMod output for project construction emissions. Also included are any modeling assumptions.

*Attachment 3* includes the EMFAC2017 emissions modeling. The input files for these calculations are voluminous and are available upon request in digital format.

*Attachment 4* is the construction health risk assessment. This includes the summary of the dispersion modeling and the cancer risk calculations for construction. AERMOD dispersion modeling files for this assessment, which are quite voluminous, are available upon request and would be provided in digital format

*Attachment 5* includes the cumulative community risk calculations, modeling results, and health risk calculations from sources affecting the construction MEI and project site receptors.

## Attachment 1: Health Risk Calculation Methodology

A health risk assessment (HRA) for exposure to Toxic Air Contaminates (TACs) requires the application of a risk characterization model to the results from the air dispersion model to estimate potential health risk at each sensitive receptor location. The State of California Office of Environmental Health Hazard Assessment (OEHHA) and California Air Resources Board (CARB) develop recommended methods for conducting health risk assessments. The most recent OEHHA risk assessment guidelines were published in February of 2015.<sup>14</sup> These guidelines incorporate substantial changes designed to provide for enhanced protection of children, as required by State law, compared to previous published risk assessment guidelines. CARB has provided additional guidance on implementing OEHHA's recommended methods.<sup>15</sup> This HRA used the 2015 OEHHA risk assessment guidelines and CARB guidance. The BAAQMD has adopted recommended procedures for applying the newest OEHHA guidelines as part of Regulation 2, Rule 5: New Source Review of Toxic Air Contaminants.<sup>16</sup> Exposure parameters from the OEHHA guidelines and the recent BAAQMD HRA Guidelines were used in this evaluation.

### Cancer Risk

Potential increased cancer risk from inhalation of TACs is calculated based on the TAC concentration over the period of exposure, inhalation dose, the TAC cancer potency factor, and an age sensitivity factor to reflect the greater sensitivity of infants and children to cancer causing TACs. The inhalation dose depends on a person's breathing rate, exposure time and frequency and duration of exposure. These parameters vary depending on the age, or age range, of the persons being exposed and whether the exposure is considered to occur at a residential location or other sensitive receptor location.

The current OEHHA guidance recommends that cancer risk be calculated by age groups to account for different breathing rates and sensitivity to TACs. Specifically, they recommend evaluating risks for the third trimester of pregnancy to age zero, ages zero to less than two (infant exposure), ages two to less than 16 (child exposure), and ages 16 to 70 (adult exposure). Age sensitivity factors (ASFs) associated with the different types of exposure are an ASF of 10 for the third trimester and infant exposures, an ASF of 3 for a child exposure, and an ASF of 1 for an adult exposure. Also associated with each exposure type are different breathing rates, expressed as liters per kilogram of body weight per day (L/kg-day) or liters per kilogram of body weight per 8-hour period for the case of worker or school child exposures. As recommended by the BAAQMD for residential exposures, 95<sup>th</sup> percentile breathing rates are used for the third trimester and infant exposures, and 80<sup>th</sup> percentile breathing rates for child and adult exposures. For children at schools and daycare facilities, BAAQMD recommends using the 95<sup>th</sup> percentile 8-hour breathing rates. Additionally, CARB and the BAAQMD recommend the use of a residential exposure duration of

<sup>15</sup> CARB, 2015. *Risk Management Guidance for Stationary Sources of Air Toxics*. July 23.

<sup>16</sup> BAAQMD, 2016. *BAAQMD Air Toxics NSR Program Health Risk Assessment (HRA) Guidelines*. December 2016.

30 years for sources with long-term emissions (e.g., roadways). For workers, assumed to be adults, a 25-year exposure period is recommended by the BAAQMD. For school children a 9-year exposure period is recommended by the BAAQMD.

Under previous OEHHA and BAAQMD HRA guidance, residential receptors are assumed to be at their home 24 hours a day, or 100 percent of the time. In the 2015 Risk Assessment Guidance, OEHHA includes adjustments to exposure duration to account for the fraction of time at home (FAH), which can be less than 100 percent of the time, based on updated population and activity statistics. The FAH factors are age-specific and are: 0.85 for third trimester of pregnancy to less than 2 years old, 0.72 for ages 2 to less than 16 years, and 0.73 for ages 16 to 70 years. Use of the FAH factors is allowed by the BAAQMD if there are no schools in the project vicinity have a cancer risk of one in a million or greater assuming 100 percent exposure (FAH = 1.0).

Functionally, cancer risk is calculated using the following parameters and formulas:

$$\text{Cancer Risk (per million)} = \text{CPF} \times \text{Inhalation Dose} \times \text{ASF} \times \text{ED/AT} \times \text{FAH} \times 10^6$$

Where:

CPF = Cancer potency factor (mg/kg-day)<sup>-1</sup>

ASF = Age sensitivity factor for specified age group

ED = Exposure duration (years)

AT = Averaging time for lifetime cancer risk (years)

FAH = Fraction of time spent at home (unitless)

$$\text{Inhalation Dose} = C_{\text{air}} \times \text{DBR}^* \times A \times (\text{EF}/365) \times 10^{-6}$$

Where:

C<sub>air</sub> = concentration in air (µg/m<sup>3</sup>)

DBR = daily breathing rate (L/kg body weight-day)

8HrBR = 8-hour breathing rate (L/kg body weight-8 hours)

A = Inhalation absorption factor

EF = Exposure frequency (days/year)

10<sup>-6</sup> = Conversion factor

The health risk parameters used in this evaluation are summarized as follows:

| Parameter                                                             | Exposure Type → | Infant                    |          | Child    | Adult    |
|-----------------------------------------------------------------------|-----------------|---------------------------|----------|----------|----------|
|                                                                       | Age Range →     | 3 <sup>rd</sup> Trimester | 0<2      | 2 < 16   | 16 - 30  |

| Age Sensitivity Factor                                                |                 | 10                        | 10       | 3        | 1        |
| Fraction of Time at Home (FAH)                                        |                 | 0.85-1.0                  | 0.85-1.0 | 0.72-1.0 | 0.73*    |

\* An 8-hour breathing rate (8HrBR) is used for worker and school child exposures.

## Non-Cancer Hazards

Non-cancer health risk is usually determined by comparing the predicted level of exposure to a chemical to the level of exposure that is not expected to cause any adverse effects (reference exposure level), even to the most susceptible people. Potential non-cancer health hazards from TAC exposure are expressed in terms of a hazard index (HI), which is the ratio of the TAC concentration to a reference exposure level (REL). OEHHA has defined acceptable concentration levels for contaminants that pose non-cancer health hazards. TAC concentrations below the REL are not expected to cause adverse health impacts, even for sensitive individuals. The total HI is calculated as the sum of the HIs for each TAC evaluated and the total HI is compared to the BAAQMD significance thresholds to determine whether a significant non-cancer health impact from a project would occur.

Typically, for residential projects located near roadways with substantial TAC emissions, the primary TAC of concern with non-cancer health effects is diesel particulate matter (DPM). For DPM, the chronic inhalation REL is 5 micrograms per cubic meter ( $\mu\text{g}/\text{m}^3$ ).

## Annual PM<sub>2.5</sub> Concentrations

While not a TAC, fine particulate matter (PM<sub>2.5</sub>) has been identified by the BAAQMD as a pollutant with potential non-cancer health effects that should be included when evaluating potential community health impacts under the California Environmental Quality Act (CEQA). The thresholds of significance for PM<sub>2.5</sub> (project level and cumulative) are in terms of an increase in the annual average concentration. When considering PM<sub>2.5</sub> impacts, the contribution from all sources of PM<sub>2.5</sub> emissions should be included. For projects with potential impacts from nearby local roadways, the PM<sub>2.5</sub> impacts should include those from vehicle exhaust emissions, PM<sub>2.5</sub> generated from vehicle tire and brake wear, and fugitive emissions from re-suspended dust on the roads.

## 141 3rd Ave Townhome Construction - San Mateo County, Annual

# 141 3rd Ave Townhome Construction

## San Mateo County, Annual

### 1.0 Project Characteristics

#### 1.1 Land Usage

| Land Uses                  | Size  | Metric        | Lot Acreage | Floor Surface Area | Population |
|----------------------------|-------|---------------|-------------|--------------------|------------|
| Condo/Townhouse            | 15.00 | Dwelling Unit | 0.68        | 33,675.00          | 43         |
| Enclosed Parking Structure | 30.00 | Space         | 0.00        | 2,245.00           | 0          |

#### 1.2 Other Project Characteristics

|                                |                                |                                |       |                                  |       |
|--------------------------------|--------------------------------|--------------------------------|-------|----------------------------------|-------|
| <b>Urbanization</b>            | Urban                          | <b>Wind Speed (m/s)</b>        | 2.2   | <b>Precipitation Freq (Days)</b> | 70    |
| <b>Climate Zone</b>            | 5                              |                                |       | <b>Operational Year</b>          | 2023  |
| <b>Utility Company</b>         | Pacific Gas & Electric Company |                                |       |                                  |       |
| <b>CO2 Intensity (lb/MWhr)</b> | 210                            | <b>CH4 Intensity (lb/MWhr)</b> | 0.029 | <b>N2O Intensity (lb/MWhr)</b>   | 0.006 |

#### 1.3 User Entered Comments & Non-Default Data

Project Characteristics - PG&E Intensity Rate = 210 (Year 2017)

Land Use - Square footage provided by client

Construction Phase - Construction schedule provided by client. Default equipment and hours.

Off-road Equipment -

Off-road Equipment -

Off-road Equipment -

Off-road Equipment -

Off-road Equipment -

Off-road Equipment -

Off-road Equipment -

Off-road Equipment - Construction equipment and hours default. Assumed 1 excavator and 1 tractor, 8 hrs/day for trenching.

Grading - Construction worksheet and correspondence data. Grading = 400 cubic yards imported, 200 cubic yards exported.

Demolition - Existing building demo. Google Earth est. 1200 sqft

Trips and VMT - Trips copied to EMFAC

Architectural Coating - Square footage provided in site plan

Construction Off-road Equipment Mitigation - All equipment greater than 50hp T4i. Water and vehicle speed at default.

### 3.1 Mitigation Measures Construction

Use Cleaner Engines for Construction Equipment

Water Exposed Area

Reduce Vehicle Speed on Unpaved Roads

Clean Paved Roads

### 3.2 Demolition - 2021

#### Unmitigated Construction On-Site

\*PM Exhaust off model factor is only applied to the PM Exhaust emissions not start/idle  
The off-model adjustment factors need to be applied only to emissions from gasoline light duty vehicles (LDA, LDT1, LDT2 and MDV). Please note that the adjustment factors are by calendar year and includes all model years.

Enter NA in the date field if adjustments do not apply

**141 3rd Avenue, Daly City, CA - Construction Impacts - Without Mitigation**  
**Maximum DPM Cancer Risk and PM2.5 Calculations From Construction**  
**Impacts at Off-Site MEI Location - 1.5 meter receptor height**

Cancer Risk (per million) = CPF x Inhalation Dose x ASF x ED/AT x FAH x 1.0E6

Where: CPF = Cancer potency factor (mg/kg-day)<sup>-1</sup>  
 ASF = Age sensitivity factor for specified age group  
 ED = Exposure duration (years)  
 AT = Averaging time for lifetime cancer risk (years)  
 FAH = Fraction of time spent at home (unitless)

Inhalation Dose = C<sub>air</sub> x DBR x A x (EF/365) x 10<sup>-6</sup>

Where: C<sub>air</sub> = concentration in air (µg/m<sup>3</sup>)  
 DBR = daily breathing rate (L/kg body weight-day)  
 A = Inhalation absorption factor  
 EF = Exposure frequency (days/year)  
 10<sup>-6</sup> = Conversion factor

**141 3rd Avenue, Daly City, CA - Construction Impacts - With Mitigation**  
**Maximum DPM Cancer Risk and PM2.5 Calculations From Construction**  
**Impacts at Off-Site MEI Location - 1.5 meter receptor height**

$$\text{Cancer Risk (per million)} = \text{CPF} \times \text{Inhalation Dose} \times \text{ASF} \times \text{ED} / \text{AT} \times \text{FAH} \times 1.0\text{E}6$$

Where: CPF = Cancer potency factor (mg/kg-day)<sup>-1</sup>  
 ASF = Age sensitivity factor for specified age group  
 ED = Exposure duration (years)  
 AT = Averaging time for lifetime cancer risk (years)  
 FAH = Fraction of time spent at home (unitless)

$$\text{Inhalation Dose} = C_{\text{air}} \times \text{DBR} \times A \times (\text{EF}/365) \times 10^{-6}$$

Where: C<sub>air</sub> = concentration in air (µg/m<sup>3</sup>)  
 DBR = daily breathing rate (L/kg body weight-day)  
 A = Inhalation absorption factor  
 EF = Exposure frequency (days/year)  
 10<sup>-6</sup> = Conversion factor

\* Third trimester of pregnancy

**141 3rd Avenue, Daly City, CA - Construction Impacts - Without Mitigation**  
**Maximum DPM Cancer Risk and PM2.5 Calculations From Construction**  
**Impacts at Milestone Academy Preschool (2 years and older) - 1.0 meters - Child Exposure**

Student Cancer Risk (per million) = CPF x Inhalation Dose x ASF x ED/AT x 1.0E6

Where: CPF = Cancer potency factor (mg/kg-day)<sup>-1</sup>

ASF = Age sensitivity factor for specified age group

ED = Exposure duration (years)

AT = Averaging time for lifetime cancer risk (years)

Inhalation Dose = C<sub>air</sub> x SAF x 8-Hr BR x A x (EF/365) x 10<sup>-6</sup>

Where: C<sub>air</sub> = concentration in air (µg/m<sup>3</sup>)

SAF = Student Adjustment Factor (unitless)

= (24 hrs/9 hrs) x (9 hrs/8 hrs) = 3

8-Hr BR = Eight-hour breathing rate (L/kg body weight-per 8 hrs)

A = Inhalation absorption factor

EF = Exposure frequency (days/year)

10<sup>-6</sup> = Conversion factor

**Values**

## Risk & Hazard Stationary Source Inquiry Form

This form is required when users request stationary source data from BAAQMD

This form is to be used with the BAAQMD's Google Earth stationary source screening tables.

[Click here for guidance on conducting risk & hazard screening, including roadways & freeways, refer to the District's Risk & Hazard Analysis flow chart.](#)

[Click here for District's Recommended Methods for Screening and Modeling Local Risks and Hazards document.](#)

**Table A: Requester Contact Information**

|                                                             |                                                                                  |

For Air District assistance, the following steps must be completed:

1. Complete all the contact and project information requested in **Table A**. Incomplete forms will not be processed. Please include a project site map.
2. Download and install the free program Google Earth, <http://www.google.com/earth/download/ge/>, and then download the county specific Google Earth stationary source application files from the District's website, <http://www.baaqmd.gov/Divisions/Planning-and-Research/CEQA-GUIDELINES/Tools-and-Methodology.aspx>. The small points on the map represent stationary sources permitted by the District (Map A on right). These permitted sources include diesel back-up generators, gas stations, dry cleaners, boilers, printers, auto spray booths, etc. Click on a point to view the source's Information Table, including the name, location, and preliminary estimated cancer risk, hazard index, and PM2.5 concentration.
3. Find the project site in Google Earth by inputting the site's address in the Google Earth search box.
4. Identify stationary sources within at least a 1000ft radius of project site. Verify that the location of the source on the map matches with the source's address in the Information Table, by using the Google Earth address search box to confirm the source's address location. Please report any mapping errors to the District.
5. List the stationary source information in **Table B** (see section only).
6. Note that a small percentage of the stationary sources have Health Risk Screening Assessment (HRSR) data INSTEAD of screening level data. These sources will be noted by an asterisk next to the Plant Name (Map B on right). If HRSR values are presented, these values have already been modeled and cannot be adjusted further.
7. Email this completed form to District staff. District staff will provide the most recent risk, hazard, and PM2.5 data that are available for the source(s). If this information or data are not available, source emissions data will be provided. Staff will respond to inquiries within three weeks.

**Note that a public records request received for the same stationary source information will cancel the processing of your SSIF request.**

Footnotes:

1. Maximally exposed individual

2. These Cancer Risk, Hazard Index, and PM2.5 columns represent the values in the Google Earth Plant Information Table.
3. Each plant may have multiple permits and sources.
4. Permitted sources include diesel back-up generators, gas stations, dry cleaners, boilers, printers, auto spray booths, etc.
5. Fuel codes: 98 = diesel, 189 = Natural Gas.

6. If a Health Risk Screening Assessment (HRSA) was completed for the source, the application number will be listed here.

7. The date that the HRSA was completed.

8. Engineer who completed the HRSA. For District purposes only.

9. All HRSA completed before 1/5/2010 need to be multiplied by an age sensitivity factor of 1.7.

10. The HRSA "Chronic Health" number represents the Hazard Index.

11. Further information about common sources:

- a. Sources that only include diesel internal combustion engines can be adjusted using the BAAQMD's Diesel Multiplier worksheet.
- b. The risk from natural gas boilers used for space heating when <25 MM BTU/hr would have an estimated cancer risk of one in a million or less, and a chronic hazard index of 0.003
- c. BAAQMD Reg 11 Rule 16 required that all co-residential (sharing a wall, floor, ceiling or is in the same building as a residential unit) dry cleaners cease use of perc on July 1, 2010. Therefore, there is no cancer risk, hazard or PM2.5 concentrations from co-residential dry cleaning businesses in the BAAQMD.
- d. Non co-residential dry cleaners must phase out use of perc by Jan. 1, 2023. Therefore, the risk from these dry cleaners does not need to be factored in over a 70-year period, but instead should
- e. Gas stations can be adjusted using BAAQMD's Gas Station Distance Multitplier worksheet.
- f. Unless otherwise noted, exempt sources are considered insignificant. See BAAQMD Reg 2 Rule 1 for a list of exempt sources.
- g. This spray booth is considered to be insignificant.

Source: BAAQMD SSIF Request for I&R Project 20-185 141 3rd Avenue (SSIF received 01/21/2021 A Flores)

Step 1:  
Enter Facility Data

Plant Name  
**Hillside Shell**

Plant No.  
**112293**

Step 4:  
Specify Source Type

Does facility have only diesel backup generators?  
**no**

Is this analysis for a gas station?  
**yes**

Note: Default generic distance multiplier used if source is not a generator or gas station.

Step 5:  
Read

Total  
Cancer Risk  
**0.583** per 1,000,000

Total  
Chronic Hazard  
**0.003**

Total PM2.5  
Concentration  
**0.000** µg/m<sup>3</sup>

Step 2:  
Estimate Distance

What is the distance (m) from the facility boundary to the MEI?  
**65**

Step 3:  
Enter Emissions Data

| Chemical Name                                        | CAS No.          | Rate     | Risk            | Hazard  | Concentration |
|------------------------------------------------------|------------------|----------|-----------------|---------|---------------|

## 1. INTRODUCTION

David J. Powers & Associates has requested that TreanorHL assess the property located at 141 3<sup>rd</sup> Avenue in Daly City (APN 006254030) for its eligibility as a historic resource as defined by the California Environmental Quality Act (CEQA). A proposed project would demolish the existing single-family house on the parcel and construct new townhomes. The parcel has not been identified on any national, state, county, or city historic resources inventory. Daly City does not maintain any local criteria for evaluation and relies on the California Register of Historical Resources (CRHR) criteria for determining eligibility of historic resources. The following report provides an evaluation of the subject property's potential eligibility to be individually listed in the CRHR.

## 2. SUMMARY OF FINDINGS

Upon completion of the survey and archival work, the property at 141 3<sup>rd</sup> Avenue in Daly City appears individually eligible for listing on the CRHR under Criterion 1 for its association with the Italian flower industry in Daly City and the Bay Area. The period of significance is from ca. 1920 to ca. 1945 when it was owned and/or operated by Italian nurseryman Valentino Tosetti. However, the property does not retain sufficient integrity to communicate its significance since the integrity of feeling, association, and setting has been significantly diminished after demolition of the greenhouses in the 1970s. Therefore, the property is not eligible as a historic resource as defined by CEQA.

## 3. METHODOLOGY

TreanorHL conducted a site visit on December 9, 2020 to evaluate the existing conditions, historic features, and architectural significance of the property. Due to the Covid-19 shelter-in-place order, TreanorHL was not able to conduct in-person research at local libraries or archives. In order to evaluate the historic significance of the properties, available online research was completed including consultation of local city directories, Sanborn fire insurance maps, historical aerials and photographs, newspaper articles, County of San Mateo Assessor-County Clerk-Recorder, Daly City Building Division, and various other online repositories.

## 4. PROPOSED PROJECT DESCRIPTION

The project proposes a General Plan amendment for a rezoning of the 0.71-acre project site at 141 3<sup>rd</sup> Avenue. The existing house on the parcel will be demolished and 15 new three-story townhomes, each with a two-car tandem garage, will be constructed. The project would include a 120-foot hammerhead dead-end fire apparatus turn-around access road, associated private driveways, landscaping, and civil and utility improvements.<sup>1</sup>

## 5. PROPERTY DESCRIPTION

The 141 3<sup>rd</sup> Avenue property is located in Daly City, three blocks east of Mission Street—the north-south arterial running through the city. Located on the western side of the block bounded by Castle Street to the north, 3<sup>rd</sup> Avenue to the west, E. Market Street to the south, and Hillside Boulevard to the east, the subject property is an irregularly shaped lot. A single-family house stands at the north end and the rest of the parcel remains vacant.

---

<sup>1</sup> Project information received from David J. Powers & Associates, Inc. via email on December 16, 2020.

The house is set back approximately 25 feet from the sidewalk and has a fenced backyard. The subject block and the surrounding area consist of a mix of low-rise row houses and commercial buildings.

The one-story over garage house at 141 3<sup>rd</sup> Avenue is rectangular in plan. While the hipped roof has a simple form at the rear, it features a gable-on-hip shape at the front elevation. The house is clad in horizontal wood siding. Although the windows are currently plywood-covered, they appear, based upon earlier street views on Google Maps, to be wood double-hung units, with lambs-tongue details at the upper sash.

The primary (west) façade features a central staircase leading to the centered entry door on the upper floor. This door is flanked by projecting angled bays, between which is a small entry porch. Although the trims are also covered by the plywood panels, Google maps shows them to be simple flat board elements. A small, two-part, horizontally oriented rectangular window is centered in the gable end. Its operation is unclear. On the lower floor, a garage door is located to the south of the staircase and a window to the north, both boarded-up.

The rear (east) elevation is in poor condition. A dilapidated shed-roofed porch is centered at the upper floor, accessed by a wooden staircase, and protected by a poorly constructed shed roof. All openings have been boarded over, some with old doors. Paint is peeling, exposing bare wood on approximately 10% of the cladding.

The south façade, which faces a vacant lot, is mostly blank, with one window – again boarded over – at the upper story. A TV satellite dish attaches at the approximate center of the house, and a vent pipe mounts towards the rear corner. The north façade, facing the adjacent home, has a boarded-up window at the east end.

Figure 1. The subject property at 141 3<sup>rd</sup> Avenue in Daly City, outlined in red (Google Earth, imagery date March 2018).

Figure 2. The front (west) and south façades of 141 3<sup>rd</sup> Avenue.

Figure 3. The rear (east) and south façades.

Figure 4. Looking northeast at the single-family house, the vacant portion of the parcel visible in the foreground.

## 6. ARCHITECTURAL STYLES

Constructed ca. 1908, the subject building at 141 3<sup>rd</sup> Avenue is a simple vernacular agricultural cottage without a definitive architectural style.

## 7. SITE HISTORY

According to the San Mateo Assessor's Office records, the single-family house on the property was constructed ca. 1908.<sup>2</sup> Sanborn maps show that a series of glass and wood frame greenhouses, a small one-story accessory structure, and a two-story water tank were developed by 1926 to the east and south of the one-story over basement house. A boiler house to heat up the greenhouses was constructed at the southwest corner of the parcel in 1946. The appraisal report from the County records the house, a shed, a boiler house, and heated greenhouses in 1959. The property remained this way until at least 1975: according to the appraisal report on file, greenhouses were still in use and being rented in December 1975, but the boiler was inoperable, so space heaters were installed.<sup>3</sup> The 1926 and 1945 Sanborn maps note that the greenhouses on the property were owned or operated by V. Toseti (Valentino Tosetti according to public records).

The subject block was largely developed with greenhouses and a few dwellings in the early and mid-20<sup>th</sup> century. Most of the greenhouses were replaced by residences along Castle Street and Hillside Boulevard, and a shopping center was constructed at the south end of the block on Market Street in the 1970s. The greenhouses

## 8. HISTORIC CONTEXT<sup>6</sup>

Much of Daly City occupies what were original Spanish land grants, largely uninhabited in the 18<sup>th</sup> century. After the Presidio was established as a military post and a mission was founded in what became San Francisco, European settlers started to inhabit this north peninsula. The area around San Bruno Mountain was used for cattle grazing. Mission road forked at the "top-of-the-hill" in Daly City, one route headed to the mission, the other to the Presidio. While other locations down the San Francisco Peninsula were being settled, very little was happening at the San Francisco-Daly City border. In the early 1850s, a few settlers claimed lands on the old Spanish grants. More settlers started to take residence in the area who sought a living from the soil or opened small businesses along Mission road.

<sup>6</sup> Unless noted, largely summarized from *History of Daly City*, [www.dalycity.org](http://www.dalycity.org) (accessed December 9, 2020).

In 1868, John Daly purchased 250 acres at the “top-of-the-hill” and established San Mateo Dairy; becoming a prominent businessman and leader among the burgeoning population of the area. In the early 1860s, a railroad ran south to San Jose, passing around the westerly edge of Daly's ranch. Stores, hotels, butcher shops, and other businesses were established at the bottom of the hill, later supported by a new schoolhouse, railway station, and a Catholic church. The population was increasing and many of the newcomers were Italians growing crops. By the early 1890s streetcars were running from San Francisco to communities as far south as San Mateo, coming right over Daly's hill. It was not until the 1906 earthquake and fire in San Francisco that the population surged around the area. John Daly subdivided his property in 1907, and streets were quickly laid out. Daly City was incorporated in 1911. Streets were paved, sewers and a water system were introduced, a city hall was erected (1914, replaced in 1939)<sup>7</sup>, police and fire departments were founded, and more schools were built.

The population gradually increased, but very little land had been added to Daly City by World War II. There was virtually no war industry within the city—the slight growth in Daly City came from temporary military boarding in people's homes. After World War II moderate-cost housing began in Daly City and the city grew rapidly. A San Francisco builder, Henry Doelger, purchased the land between the original Daly City's westerly edge to the ocean, and developed a community called Westlake (annexed to Daly City in 1948). Doelger and other builders continued building thousands of homes and satellite shopping centers. A Bay Area-wide rail system, a new freeway complex, and the use of almost all the open space on the westerly side of San Bruno Mountain for housing have raised the population of Daly City.

According to Sanborn maps, the subject block and its immediate surroundings were only 50% or less developed with single-family dwellings and greenhouses by 1926. Some names associated with these greenhouses include V. Tosetti, E. Celle, A. Costa, G. Costa, G. Nano, and J. Franzoia.<sup>8</sup> A public school at the intersection of First Avenue and Castle Street was constructed by 1926. A few more dwellings were added by 1945 but it was not until the 1970s and later that the block was developed with more houses and a strip mall.<sup>9</sup> The adjacent property to the south, 165 3<sup>rd</sup> Avenue, was developed with greenhouses from at least 1943 to 2002.<sup>10</sup> It was redeveloped with townhouses ca. 2005.

### Flower Growing<sup>11</sup>

Historically, three groups, Japanese, Italian, and Chinese growers, have been the backbone of the flower industry in the Bay Area. Each group mastered different areas of floriculture and were based in a different geographical area: the Chinese handled asters, sweet peas, and pompoms on the San Francisco Peninsula; the Japanese covered chrysanthemums and greenhouse-grown cut flowers in the East Bay; and the Italians specialized in field grown varieties, such as violets and ferns in the Daly City and Colma area.<sup>12</sup>

San Francisco Bay Area's Italian flower growers started in the greens trade; Italians foraged through the Santa Cruz and Sonoma mountains for maidenhair ferns. Italian farmers, who were growing produce in the southern neighborhoods of San Francisco, began to sell ferns and their extra flowers to the restaurateurs and florists during summer and fall. The Italian American growers organized the San Francisco Fern Growers Association, which became the San Francisco Growers Association in 1923. The part-time activity of flower growing and foraging for ferns became profitable enough for many Italian growers to completely switch over to floriculture.

<sup>11</sup> Largely summarized from Carey & Co., a TreanorHL Company, *San Francisco Flower Mart Historic Resource Evaluation Part 1 – Significance Evaluation* (October 31, 2017), 16-27.

<sup>12</sup> Gary Kawaguchi, *Living with Flowers: The California Flower Market History*, (San Francisco: California Flower Market, Inc., 1993), 30.

Over time, the Italian growers expanded into other field flowers such as stock, sweet peas, snapdragons, cornflowers, Italian and German irises, and daisies.<sup>13</sup>

The early growers of Daly City and Colma area were gardeners from Italy who planted flowers and marketed their crops in the nearby cities. By 1920, it was estimated that 20% of the land of northern San Mateo County was used for flower raising. The first flower growers planted their crops in the fields and protected them from the fog with cheesecloth. As the 20<sup>th</sup> century progressed, they started to construct greenhouses which allowed them to produce more varieties and to grow on a year-round basis. By 1944 one third of the \$18 million agricultural output of the county was in flowers, many of them grown in the Colma-Daly City area. The production remained high despite the post-World War II housing developments and highways.<sup>14</sup>

## 9. ARCHITECT/BUILDER

Research did not reveal any design professionals or builders associated with the subject property.

## 10. OCCUPANCY HISTORY

According to Sanborn maps and federal censuses, Valentino Tosetti was associated with the property from at least 1920 to 1945. Born in Italy in 1893, he immigrated to the United States in 1910. Tosetti, together with his family, was listed in the 1920 and 1930 censuses as the gardener/nurseryman on 3<sup>rd</sup> Avenue, Daly City.<sup>15</sup> The unit appraisal report from the County notes that Tosetti sold the property in 1940 but it is possible that he continued to rent or operate the greenhouses in the 1940s.<sup>16</sup> His primary address was listed as Hillside Boulevard in Colma in the 1938 and 1940 records.<sup>17</sup> The address 141 3<sup>rd</sup> Avenue first appeared in the 1961 city directory; see table below for later occupancy history of the subject property.<sup>18</sup> The Chow family has owned the property since the 1960s, and the residence on site was occupied until 2019.<sup>19</sup>

| Dates | Occupants                              |

## California Register of Historical Resources Criteria

The California Office of Historic Preservation's Technical Assistance Series #6, *California Register and National Register: A Comparison*, outlines the differences between the federal and state processes. The criteria to be used when establishing the significance of a property for listing on the California Register of Historical Resources (CRHR) are very similar, with emphasis on local and state significance. They are:

1. It is associated with events that have made a significant contribution to the broad patterns of local or regional history, or the cultural heritage of California or the United States; or
2. It is associated with the lives of persons important to local, California, or national history; or
3. It embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values; or
4. It has yielded, or is likely to yield, information important to prehistory or history of the local area, California, or the nation.<sup>20</sup>

The CRHR requires the establishment of historic significance before integrity is considered. California's integrity threshold is slightly lower than the federal level. As a result, some resources that are historically significant but do not meet National Register of Historic Places (NRHP) integrity standards may be eligible for listing on the CRHR.<sup>21</sup>

California's list of special considerations is shorter and more lenient than the NRHP. It includes some allowances for moved buildings, structures, or objects, as well as lower requirements for proving the significance of resources that are less than 50 years old and a more elaborate discussion of the eligibility of reconstructed buildings.<sup>22</sup>

In addition to separate evaluations for eligibility for the CRHR, the state automatically lists on the CRHR resources that are listed or determined eligible for the NRHP through a complete evaluation process.<sup>23</sup>

### *Integrity*

Second, for a property to qualify under the CRHR's Criteria for Evaluation, it must also retain "historic integrity of those features necessary to convey its significance."<sup>24</sup> While a property's significance relates to its role within a specific historic context, its integrity refers to "a property's physical features and how they relate to its significance."<sup>25</sup> To determine if a property retains the physical characteristics corresponding to its historic context, the NRHP has identified seven aspects of integrity (identified above under the NRHP criteria), which the CRHR closely follows.<sup>26</sup>

<sup>20</sup> California Office of Historic Preservation, *California Register and National Register: A Comparison*, Technical Assistance Series 6, (Sacramento, 2001), 1.

<sup>21</sup> *California Register and National Register: A Comparison*.

<sup>22</sup> *California Register and National Register: A Comparison*, 2.

<sup>23</sup> All State Historical Landmarks from number 770 onward are also automatically listed on the California Register. California Office of Historic Preservation, *California Register of Historical Resources: The Listing Process*, Technical Assistance Series 5 (Sacramento, n.d.), 1.

<sup>24</sup> United States Department of the Interior, *How to Apply the National Register Criteria for Evaluation*, National Register Bulletin, No. 15 (Washington, D.C., 1997), 3.

<sup>25</sup> *How to Apply the National Register Criteria for Evaluation*, 44.

<sup>26</sup> *How to Apply the National Register Criteria for Evaluation*, 1.

## Local Eligibility

Apart from some language in the Daly City General Plan, the City does not have any regulations regarding historic resources, or any ordinance that identifies local historic resources.<sup>27</sup> The General Plan defines *cultural resources* as “resources created by humans, that through events and places located within an area, describe the historic events that have contributed to the present culture of the City.”<sup>28</sup> The policy on the historical and archaeological resources does not include any local criteria for evaluation, and specifies to comply with State statutes related to historical and archaeological resources.<sup>29</sup> Therefore, the City relies on the CRHR criteria for determining eligibility of historic resources.

## 12. SIGNIFICANCE EVALUATION

### Current Historic Status

The subject parcel at 141 3<sup>rd</sup> Avenue has not previously been identified on any local, state, or national historic resources inventory.

### CRHR Significance Evaluation

#### *Criterion 1 – Association with significant events*

According to the San Mateo County records, the single-family house at 141 3<sup>rd</sup> Avenue was constructed ca. 1908 during the initial development of Daly City as a residential community. The area was established as an agricultural community in the late 19<sup>th</sup> century, but it was not until after the 1906 earthquake that the population surged and the infrastructure was established. However, the subject building was not found to be individually representative of any important patterns of development within the Daly City area. Research has not revealed a significant association between the building and Daly City’s early-20<sup>th</sup> century residential growth.

The residence at 141 3<sup>rd</sup> Avenue appears significant at the local level for its association with the Italian flower industry in the Bay Area from at least 1920 to 1940. Focusing on growing field flowers, the Italian flower industry was established in the Daly City and Colma area in the early 20<sup>th</sup> century. Over time, the growers started to construct greenhouses which allowed them to produce more varieties and to grow on a year-round basis. A series of greenhouses were located on the southern part of the subject parcel from at least ca. 1926 until their removal after 1974.

Therefore, the property at 141 3<sup>rd</sup> Avenue appears eligible for listing on the CRHR under Criterion 1 for its association with the Italian flower growers in Daly City. The period of significance is from ca. 1920 to ca. 1945 when it was owned and/or operated by Italian nurseryman Valentino Tosetti according to the federal censuses and Sanborn maps.

#### *Criterion 2 – Persons*

No persons of known historical significance appear to have been associated with the subject property. None of the owners or occupants have been identified as important to the history of Daly City or California. The property was associated with the Italian flower growers in the area: the 1920 and 1930 censuses list Valentino Tosetti, a gardener/nurseryman, and his family residing at this address. The 1926 and 1945 Sanborn maps also shows him as the owner or manager of the greenhouses on the parcel. However, the research has not revealed Tosetti as a

---

<sup>27</sup> City of Daly City, Department of Economic and Community Development, *Daly City 2030 General Plan* (Adopted March 25, 2013; Housing Element Revised March 9, 2015), 192.

<sup>28</sup> City of Daly City, *Daly City 2030 General Plan*, 174.

<sup>29</sup> City of Daly City, *Daly City 2030 General Plan*, 192.

significant individual associated with the flower industry in the Daly City area or California. Therefore, the property does not appear eligible for listing on the CRHR under Criterion 2.

#### *Criterion 3 – Architecture and Construction*

The house at 141 3<sup>rd</sup> Avenue is of common construction and materials with no notable or special attributes, and it does not possess high artistic value. Constructed ca. 1908, the vernacular agricultural cottage does not embody the distinctive characteristics of an architectural style. Also, the research did not reveal any design professionals associated with the initial design and/or construction of the building. Therefore, the property does not appear eligible for listing on the CRHR under Criterion 3.

#### *Criterion 4 – Information Potential*

Archival research provided no indication that the subject property has the potential to yield information important to the prehistory or history of the local area, California, or the nation. The subject property does not appear eligible for listing on the CRHR under Criterion 4.

#### **Integrity**

The property retains integrity of location since the residence on the parcel has not been moved. Even though the building was used as a residence until 2019, the subject property does not retain its integrity of association and feeling since it is no longer linked to the local flower industry: the greenhouses and the associated accessory structures were removed after 1975. The house itself has not received any major alterations and retains its residential scale and continues to illustrate the early 20<sup>th</sup> century vernacular agricultural cottage architecture. The building retains sufficient integrity of design, materials, and workmanship. The immediate integrity of setting for the property has been diminished since the greenhouses as well as the associated boiler house and the shed were removed after 1975. The integrity of overall neighborhood setting has also been significantly compromised since the early 20<sup>th</sup> century dwellings and the greenhouses on the block and its immediate surrounding were replaced by contemporary residential and commercial buildings after the 1970s. Overall, the property does not retain sufficient integrity to communicate its significance under Criterion 1 for its defined period of significance.

## **13. CONCLUSION**

Based on the above evaluation of the subject property at 141 3<sup>rd</sup> Avenue in Daly City in reference to the CRHR criteria, the property appears individually eligible for the CRHR under Criterion 1 for its association with the Italian flower industry of Daly City and the Bay Area. The period of significance is from ca. 1920 to ca. 1945 when it was owned and/or operated by Italian nurseryman Valentino Tosetti. However, the property does not retain sufficient integrity to communicate its significance since the integrity of feeling, association, and setting has been significantly diminished after demolition of the greenhouses in the 1970s and the redevelopment of the immediate area with contemporary residential and commercial buildings. Therefore, the property is not eligible as a historic resource as defined by CEQA.

\*P3a. **Description:** (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

The 141 3<sup>rd</sup> Avenue property is located in Daly City, three blocks east of Mission Street—the north-south arterial running through the city. Located on the western side of the block bounded by Castle Street to the north, 3<sup>rd</sup> Avenue to the west, E. Market Street to the south, and Hillside Boulevard to the east, the subject property is an irregularly shaped lot. A single-family house stands at the north end and the rest of the parcel remains vacant. The house is set back approximately 25 feet from the sidewalk and has a fenced backyard. The subject block and the surrounding area consist of a mix of low-rise row houses and commercial buildings.

The one-story over garage house at 141 3<sup>rd</sup> Avenue is rectangular in plan. While the hipped roof has a simple form at the rear, it features a gable-on-hip shape at the front elevation. The house is clad in horizontal wood siding. Although the windows are currently plywood-covered, they appear, based upon earlier street views on Google Maps, to be wood double-hung units, with lambs-tongue details at the upper sash. (See Continuation Sheet.)

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

According to the San Mateo Assessor's Office records, the single-family house on the property was constructed ca. 1908.<sup>2</sup> Sanborn maps show that a series of glass and wood frame greenhouses, a small one-story accessory structure, and a two-story water tank were developed by 1926 to the east and south of the one-story over basement house. A boiler house to heat up the greenhouses was constructed at the southwest corner of the parcel in 1946. The appraisal report from the County records the house, a shed, a boiler house, and heated greenhouses in 1959. The property remained this way until at least 1975: according to the appraisal report on file, greenhouses were still in use and being rented in December 1975, but the boiler was inoperable, so space heaters were installed.<sup>3</sup> The 1926 and 1945 Sanborn maps note that the greenhouses on the property were owned or operated by V. Toseti (Valentino Tosetti according to public records).

The subject block was largely developed with greenhouses and a few dwellings in the early and mid-20<sup>th</sup> century. Most of the greenhouses were replaced by residences along Castle Street and Hillside Boulevard, and a shopping center was constructed at the south end of the block on Market Street in the 1970s. The greenhouses at 141 3<sup>rd</sup> Avenue were removed by 1980 and the rest of the parcel remained vacant.<sup>4</sup> (See Continuation Sheet.)

## CONTINUATION SHEET

Property Name: 141 3<sup>rd</sup> Avenue Daly City, CA  
Page 3 of 9

### \*P3a. Description, Continued:

The primary (west) façade features a central staircase leading to the centered entry door on the upper floor. This door is flanked by projecting angled bays, between which is a small entry porch. Although the trims are also covered by the plywood panels, Google maps shows them to be simple flat board elements. A small, two-part, horizontally oriented rectangular window is centered in the gable end. Its operation is unclear. On the lower floor, a garage door is located to the south of the staircase and a window to the north, both boarded-up.

The rear (east) elevation is in poor condition. A dilapidated shed-roofed porch is centered at the upper floor, accessed by a wooden staircase, and protected by a poorly constructed shed roof. All openings have been boarded over, some with old doors. Paint is peeling, exposing bare wood on approximately 10% of the cladding.

The south façade, which faces a vacant lot, is mostly blank, with one window – again boarded over – at the upper story. A TV satellite dish attaches at the approximate center of the house, and a vent pipe mounts towards the rear corner. The north façade, facing the adjacent home, has a boarded-up window at the east end.

### \*B10. Significance, Continued:

#### Historic Context<sup>5</sup>

Much of Daly City occupies what were original Spanish land grants, largely uninhabited in the 18<sup>th</sup> century. After the Presidio was established as a military post and a mission was founded in what became San Francisco, European settlers started to inhabit this north peninsula. The area around San Bruno Mountain was used for cattle grazing. Mission road forked at the “top-of-the-hill” in Daly City, one route headed to the mission, the other to the Presidio. While other locations down the San Francisco Peninsula were being settled, very little was happening at the San Francisco-Daly City border. In the early 1850s, a

## CONTINUATION SHEET

Property Name: 141 3<sup>rd</sup> Avenue Daly City, CA

Page 5 of 9

few settlers claimed lands on the old Spanish grants. More settlers started to take residence in the area who sought a living from the soil or opened small businesses along Mission road.

In 1868, John Daly purchased 250 acres at the “top-of-the-hill” and established San Mateo Dairy; becoming a prominent businessman and leader among the burgeoning population of the area. In the early 1860s, a railroad ran south to San Jose, passing around the westerly edge of Daly's ranch. Stores, hotels, butcher shops, and other businesses were established at the bottom of the hill, later supported by a new schoolhouse, railway station, and a Catholic church. The population was increasing and many of the newcomers were Italians growing crops. By the early 1890s streetcars were running from San Francisco to communities as far south as San Mateo, coming right over Daly's hill. It was not until the 1906 earthquake and fire in San Francisco that the population surged around the area. John Daly subdivided his property in 1907, and streets were quickly laid out. Daly City was incorporated in 1911. Streets were paved, sewers and a water system were introduced, a city hall was erected (1914, replaced in 1939)<sup>6</sup>, police and fire departments were founded, and more schools were built.

The population gradually increased, but very little land had been added to Daly City by World War II. There was virtually no war industry within the city—the slight growth in Daly City came from temporary military boarding in people's homes. After World War II moderate-cost housing began in Daly City and the city grew rapidly. A San Francisco builder, Henry Doelger, purchased the land between the original Daly City's westerly edge to the ocean, and developed a community called Westlake (annexed to Daly City in 1948). Doelger and other builders continued building thousands of homes and satellite shopping centers. A Bay Area-wide rail system, a new freeway complex, and the use of almost all the open space on the westerly side of San Bruno Mountain for housing have raised the population of Daly City.

According to Sanborn maps, the subject block and its immediate surroundings were only 50% or less developed with single-family dwellings and greenhouses by 1926. Some names associated with these greenhouses include V. Tosetti, E. Celle, A. Costa, G. Costa, G. Nano, and J. Franzioia.<sup>7</sup> A public school at the intersection of First Avenue and Castle Street was constructed by 1926. A few more dwellings were added by 1945 but it was not until the 1970s and later that the block was developed with more houses and a strip mall.<sup>8</sup> The adjacent property to the south, 165 3<sup>rd</sup> Avenue, was developed with greenhouses from at least 1943 to 2002.<sup>9</sup> It was redeveloped with townhouses ca. 2005.

### *Flower Growing<sup>10</sup>*

Historically, three groups, Japanese, Italian, and Chinese growers, have been the backbone of the flower industry in the Bay Area. Each group mastered different areas of floriculture and were based in a different geographical area: the Chinese handled asters, sweet peas, and pompoms on the San Francisco Peninsula; the Japanese covered chrysanthemums and greenhouse-grown cut flowers in the East Bay; and the Italians specialized in field grown varieties, such as violets and ferns in the Daly City and Colma area.<sup>11</sup>

San Francisco Bay Area's Italian flower growers started in the greens trade; Italians foraged through the Santa Cruz and Sonoma mountains for maidenhair ferns. Italian farmers, who were growing produce in the southern neighborhoods of San Francisco, began to sell ferns and their extra flowers to the restaurateurs and florists during summer and fall. The Italian American growers organized the San Francisco Fern Growers Association, which became the San Francisco Growers Association in 1923. The part-time activity of flower growing and foraging for ferns became profitable enough for many Italian growers to completely switch over to floriculture. Over time, the Italian growers expanded into other field

## CONTINUATION SHEET

Property Name: 141 3<sup>rd</sup> Avenue Daly City, CA

Page 6 of 9

flowers such as stock, sweet peas, snapdragons, cornflowers, Italian and German irises, and daisies.<sup>12</sup>

The early growers of Daly City and Colma area were gardeners from Italy who planted flowers and marketed their crops in the nearby cities. By 1920, it was estimated that 20% of the land of northern San Mateo County was used for flower raising. The first flower growers planted their crops in the fields and protected them from the fog with cheesecloth. As the 20<sup>th</sup> century progressed, they started to construct greenhouses which allowed them to produce more varieties and to grow on a year-round basis. By 1944 one third of the \$18 million agricultural output of the county was in flowers, many of them grown in the Colma-Daly City area. The production remained high despite the post-World War II housing developments and highways.<sup>13</sup>

### Architect/Builder

Research did not reveal any design professionals or builders associated with the property.

### Architectural Style

Constructed ca. 1908, the subject building at 141 3<sup>rd</sup> Avenue is a simple vernacular agricultural cottage without a definitive architectural style.

### Occupants

According to Sanborn maps and federal censuses, Valentino Tosetti was associated with the property from at least 1920 to 1945. Born in Italy in 1893, he immigrated to the United States in 1910. Tosetti, together with his family, was listed in the 1920 and 1930 censuses as the gardener/nurseryman on 3<sup>rd</sup> Avenue, Daly City.<sup>14</sup> The unit appraisal report from the County notes that Tosetti sold the property in 1940 but it is possible that he continued to rent or operate the greenhouses in the 1940s.<sup>15</sup> His primary address was listed as Hillside Boulevard in Colma in the 1938 and 1940 records.<sup>16</sup> The address 141 3<sup>rd</sup> Avenue first appeared in the 1961 city directory; see table below for later occupancy history of the subject property.<sup>17</sup> The Chow family has owned the property since the 1960s, and the residence on site was occupied until 2019.<sup>18</sup>

| Dates | Occupants                              |
|-------|----------------------------------------|
| 1961  | R. Aguiniga                            |
| 1970  | Rios Augustine, Paulita, Petra, Philip |
| 1981  | M. Hernandez                           |
| 1991  | B. and Sara Moreno                     |
| 2001  | Ann Chow, Richard Morilla              |

### *Current Historic Status*

The subject parcel at 141 3<sup>rd</sup> Avenue has not previously been identified on any local, state, or national historic resources inventory.

## CONTINUATION SHEET

Property Name: 141 3<sup>rd</sup> Avenue Daly City, CA

Page 7 of 9

### *Significance Evaluation*

#### *California Register of Historical Resources<sup>19</sup>*

##### *Criterion 1 – Association with significant events*

According to the San Mateo County records, the single-family house at 141 3<sup>rd</sup> Avenue was constructed ca. 1908 during the initial development of Daly City as a residential community. The area was established as an agricultural community in the late 19<sup>th</sup> century, but it was not until after the 1906 earthquake that the population surged and the infrastructure was established. However, the subject building was not found to be individually representative of any important patterns of development within the Daly City area. Research has not revealed a significant association between the building and Daly City's early-20<sup>th</sup> century residential growth.

The residence at 141 3<sup>rd</sup> Avenue appears significant at the local level for its association with the Italian flower industry in the Bay Area from at least 1920 to 1940. Focusing on growing field flowers, the Italian flower industry was established in the Daly City and Colma area in the early 20<sup>th</sup> century. Over time, the growers started to construct greenhouses which allowed them to produce more varieties and to grow on a year-round basis. A series of greenhouses were located on the southern part of the subject parcel from at least ca. 1926 until their removal after 1974.

Therefore, the property at 141 3<sup>rd</sup> Avenue appears eligible for listing on the CRHR under Criterion 1 for its association with the Italian flower growers in Daly City. The period of significance is from ca. 1920 to ca. 1945 when it was owned and/or operated by Italian nurseryman Valentino Tosetti according to the federal censuses and Sanborn maps.

##### *Criterion 2 – Persons*

No persons of known historical significance appear to have been associated with the subject property. None of the owners or occupants have been identified as important to the history of Daly City or California. The property was associated with the Italian flower growers in the area: the 1920 and 1930 censuses list Valentino Tosetti, a gardener/nurseryman, and his family residing at this address. The 1926 and 1945 Sanborn maps also shows him as the owner or manager of the greenhouses on the parcel. However, the research has not revealed Tosetti as a significant individual associated with the flower industry in the Daly City area or California. Therefore, the property does not appear eligible for listing on the CRHR under Criterion 2.

##### *Criterion 3 – Architecture and Construction*

The house at 141 3<sup>rd</sup> Avenue is of common construction and materials with no notable or special attributes, and it does not possess high artistic value. Constructed ca. 1908, the vernacular agricultural cottage does not embody the distinctive characteristics of an architectural style. Also, the research did not reveal any design professionals associated with the initial design and/or construction of the building. Therefore, the property does not appear eligible for listing on the CRHR under Criterion 3.

##### *Criterion 4 – Information Potential*

Archival research provided no indication that the subject property has the potential to yield information important to the prehistory or history of the local area, California, or the nation. The subject property does not appear eligible for listing on the CRHR under Criterion 4.

## CONTINUATION SHEET

Property Name: 141 3<sup>rd</sup> Avenue Daly City, CA

Page 8 of 9

### Integrity

The property retains integrity of location since the residence on the parcel has not been moved. Even though the building was used as a residence until 2019, the subject property does not retain its integrity of association and feeling since it is no longer linked to the local flower industry: the greenhouses and the associated accessory structures were removed after 1975. The house itself has not received any major alterations and retains its residential scale and continues to illustrate the early 20<sup>th</sup> century vernacular agricultural cottage architecture. The building retains sufficient integrity of design, materials, and workmanship. The immediate integrity of setting for the property has been diminished since the greenhouses as well as the associated boiler house and the shed were removed after 1975. The integrity of overall neighborhood setting has also been significantly compromised since the early 20<sup>th</sup> century dwellings and the greenhouses on the block and its immediate surrounding were replaced by contemporary residential and commercial buildings after the 1970s. Overall, the property does not retain sufficient integrity to communicate its significance under Criterion 1 for its defined period of significance.

### Conclusion

Based on the above evaluation of the subject property at 141 3<sup>rd</sup> Avenue in Daly City in reference to the CRHR criteria, the property appears individually eligible for the CRHR under Criterion 1 for its association with the Italian flower industry of Daly City and the Bay Area. The period of significance is from ca. 1920 to ca. 1945 when it was owned and/or operated by Italian nurseryman Valentino Tosetti. However, the property does not retain sufficient integrity to communicate its significance since the integrity of feeling, association, and setting has been significantly diminished after demolition of the greenhouses in the 1970s and the redevelopment of the immediate area with contemporary residential and commercial buildings. Therefore, the property is not eligible as a historic resource as defined by CEQA.

Dear Ms. Gitteson:

AEI Consultants is pleased to provide the *Phase I Environmental Site Assessment* of the above referenced property. This assessment was authorized and performed in accordance with the scope of services engaged.

We appreciate the opportunity to provide services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (925) 746-6000 or [ggriffin@aeiconsultants.com](mailto:ggriffin@aeiconsultants.com).

Sincerely,

Greg Griffin  
Business Development Manager  
AEI Consultants

## PROJECT SUMMARY

**141 3rd Avenue, Daly City, San Mateo County, California 94014**  
**AEI Project No. 427321**

| Report Section |                                          | REC | CREC | HREC | OEC | Recommended Action                |
|----------------|------------------------------------------|-----|------|------|-----|-----------------------------------|
| 1.0            | Introduction                             |     |      |      |     | None                              |
| 2.0            | Site and Vicinity Description            |     |      |      |     | None                              |
| 3.0            | Historical Review of Site and Vicinity   | ✓   |      |      |     | Phase II Subsurface Investigation |
| 4.0            | Regulatory Agency Records Review         |     |      |      |     | None                              |
| 5.0            | Regulatory Database Records Review       | ✓   |      |      |     | Phase II Subsurface Investigation |

## EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by PIH, LLC to conduct a Phase I ESA in conformance with AEI's contract and the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 141 3rd Avenue, Daly City, San Mateo County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

Pertinent subject property information is noted below:

| PROPERTY INFORMATION                 |                                                               |
|--------------------------------------|---------------------------------------------------------------|
| Site Address(es)                     | 141 3rd Avenue, Daly City, San Mateo County, California 94014 |
| Property ID (APN or Block/Lot)       | 006-254-020 and 006-254-030                                   |
| Location                             | East side of 3rd Avenue                                       |
| Property Type                        | Residential                                                   |
| SITE AND BUILDING INFORMATION        |                                                               |
| Approximate Site Acreage/Source      | 0.71/Assessor                                                 |
| Number of Buildings                  | One                                                           |
| Building Construction Date(s)/Source | 1908/Assessor                                                 |

| Basement or Subgrade Area(s)         | None identified                                               |
| Number of Units                      | One                                                           |
| Additional Improvements              | Cement-paved driveway and some landscaping work               |
| On-site Occupant(s)                  | Vacant residential building                                   |
| Current On-site Operations/Use       | Former residential use and vacant land                        |
| Current Use of Hazardous Substances  | None identified                                               |
| REGULATORY INFORMATION               |                                                               |
| Regulatory Database Listing(s)       | None identified                                               |

A chronological summary of historical subject property information is as follows:

| Date Range    | Subject Property Description and Occupancy (Historical Addresses)                 | Source(s)                                                                      |
|---------------|-----------------------------------------------------------------------------------|--------------------------------------------------------------------------------|
| Prior to 1908 | Unknown use/Data failure; refer to <a href="#">Section 1.6.1</a>                  | Aerial photographs, Sanborn maps, agency records                               |
| circa 1908    | Current residence developed                                                       | Assessor's Office                                                              |
| 1926-1975     | Developed with a residence and green houses (141 3rd Avenue)                      | Aerial photographs, Sanborn maps, city directories, agency records             |
| 1980-2019     | Residence still present, and rest of the property is vacant land (141 3rd Avenue) | Aerial photographs, Sanborn maps, city directories, agency records, interviews |

| Date Range   | Subject Property Description and Occupancy<br>(Historical Addresses) | Source(s)                                                                                    |
|--------------|----------------------------------------------------------------------|----------------------------------------------------------------------------------------------|
| 2019-Present | Vacant residence and land (141 3rd Avenue)                           | Aerial photographs,<br>Sanborn maps, city<br>directories, interviews,<br>site reconnaissance |

According to review of historical sources, the subject property was identified to be developed with the current single-family residence around 1908. By 1926, numerous green houses were developed on the property, and by 1946, a boiler room was developed on the southwestern corner of the property in order to heat up the green houses. The property appears to have remained this way until at least 1975. During this time, Sanborn maps indicate that the subject property and eastern and southern adjoining properties were owned and/or operated by V. Toseti from at least 1926 to 1945. By 1980, the green houses on the subject were no longer present, and the area remained as vacant land. The residence was reportedly occupied until 2019, and has been vacant since that time. The subject property is slated for redevelopment with 15 town homes.

The immediately surrounding properties consist of the following:

| Direction    | Tenant/Use (Address)                                       | Regulatory Database Listing(s) |
|--------------|------------------------------------------------------------|--------------------------------|
| <b>North</b> | Residence (131 3rd Avenue)                                 | None identified                |
| <b>East</b>  | Residences (930-960 Hillside Boulevard)                    | None identified                |
| <b>South</b> | Residences (301-313 Habitat Way and 165 3rd Avenue)        | CLEANUP SITES, DELISTED COUNTY |
| <b>West</b>  | 3rd Avenue followed by:<br>Residences (132-168 3rd Avenue) | None identified                |

If the surrounding properties are listed in the regulatory database, please refer to [Section 5.1](#) for discussion.

## FINDINGS

Recognized Environmental Condition (REC) is defined by the ASTM Standard Practice E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

- According to review of historical, municipal, and regulatory agency records, the south adjoining property, 165 3rd Avenue, was historically developed with a nursery that included several green houses from at least 1943 to 2002. Prior to the redevelopment of this property with the current townhouses, elevated concentrations of pesticides in soils were identified, including DDT up to 12 ppm, Dieldrin up to 0.47 ppm, 4,4-DDE up to 2.2 ppm, and 4,4-DDD up to 0.18 ppm. Approximately 1,237 tons of impacted soils were excavated and removed from this site.

The former nursery operations at this property appear to have extended onto the southern portion of the subject property, and some of the highest pesticide concentrations were identified along the border of the two properties. As such, it is likely that the subject property had been adversely impacted by the former nursery operations, which represents a REC.

Controlled Recognized Environmental Condition (CREC) is defined by the ASTM Standard Practice E1527-13 as a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

- AEI did not identify evidence of CRECs during the course of this assessment.

Historical Recognized Environmental Condition (HREC) is defined by the ASTM Standard Practice E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

- AEI did not identify evidence of HRECs during the course of this assessment.

Other Environmental Considerations (OEC) warrant discussion, but do not qualify as RECs as defined by the ASTM Standard Practice E1527-13. These include, but are not limited to, de minimis conditions and/or environmental considerations such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property.

- Based on the age of the subject property building, there is a potential that ACMs are present. Due to the poor conditions of the building (locked and boarded up), AEI did not access the interior. The subject property building is scheduled for demolition and the property will be redeveloped with townhouses. Regardless of building construction date, the EPA's NESHAP requires that a thorough asbestos survey be performed prior to demolition or renovation activities that may disturb ACMs. This requirement may be enforced by federal, state and local regulatory agencies, and specifies that all suspect ACMs be sampled to determine the presence or absence of asbestos prior to any renovation or demolition activities which may disturb them to prevent potential exposure to workers, building occupants, and the environment.
- Due to the age of the subject property building, there is a potential that LBP is present. AEI understands that demolition activities of the subject property building are planned. As such, the property owner should consult with a certified Lead Risk Assessor to determine options for control of possible LBP hazards. Stringent local and State regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

## CONCLUSIONS, OPINIONS, AND RECOMMENDATIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) of 141 3rd Avenue, Daly City, San Mateo County, California, the *subject property*. Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

AEI did not identify evidence of RECs or CRECs in connection with the property except for those previously identified in the Findings section. AEI recommends the following:

- Conduct Phase II Subsurface Investigation to determine potential impacts from the former on-site greenhouse operations.

## 1.0 INTRODUCTION

---

This report documents the methods and findings of the Phase I Environmental Site Assessment performed in conformance with AEI's contract and scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 141 3rd Avenue, Daly City, San Mateo County, California ([Appendix A: Figures](#) and [Appendix B: Property Photographs](#)).

### 1.1 SCOPE OF WORK

The purpose of the Phase I ESA is to assist the client in identifying potential RECs, in accordance with ASTM E1527-13, associated with the presence of any hazardous substances or petroleum products, their use, storage, and disposal at and in the vicinity of the subject property. Property assessment activities focused on: 1) a review of federal, state, tribal, and local databases that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance, and interviews with the past and present owners and current occupants and operators to identify potential environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

### 1.2 ADDITIONAL SERVICES

Other Environmental Considerations such as ACMs, LBP, lead in drinking water, radon, mold, and wetlands can result in business environmental risks for property owners which may disrupt current or planned operations or cash flow and are generally beyond the scope of a Phase I assessment as defined by ASTM E1527-13. Based upon the agreed-on scope of services this ESA did not include subsurface or other invasive assessments, business environmental risks, or other services not specifically identified and discussed herein.

### 1.3 SIGNIFICANT ASSUMPTIONS

The following assumptions are made by AEI in this report. AEI relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. AEI has reviewed and evaluated the thoroughness and reliability of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews. It appears that all information obtained from outside sources and reviewed for this assessment is thorough and reliable. However, AEI cannot guarantee the thoroughness or reliability of this information.

Groundwater flow, unless otherwise specified by on-site well data or well data from the subject property or nearby sites, is inferred from contour information depicted on the USGS topographic maps. AEI assumes the property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives.

## 1.4 LIMITATIONS

Property conditions, as well as local, state, tribal, and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this assessment apply strictly to the environmental regulations and property conditions existing at the time the assessment was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the assessment.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: ACMs, radon, LBP, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, mold, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under ASTM Standard Practice E1527-13.

If requested by the client, these non-scope issues are discussed herein. Otherwise, the purpose of this assessment is solely to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner or bona fide prospective purchaser under CERCLA. ASTM Standard Practice E1527-13 and the United States EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

1. 42 U.S.C. § 9601(35)(B), referenced in the ASTM Standard Practice E1527-13.
2. Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).
3. 42 U.S.C. § 9601(40) and 42 U.S.C. § 9607(q).

The Phase I Environmental Site Assessment is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of assessment into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, current subject property use, and observations and conditions that existed on the date and time of the property reconnaissance.

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

AEI's limited radon screening, if included, is intended to provide a preliminary screening to evaluate the potential presence of elevated radon concentrations at the site. The proposed scope is not intended to define the full extent of the presence of radon at the subject property. As such, the results should be used for lending purposes only. The recommendations and conclusions presented as a result of the limited preliminary radon screening apply strictly to the property conditions existing at the time the sampling was performed. The sample analytical results are only valid for the time, place, and condition of the site at the time of collection and AEI does not warrant that the results will be repeatable or are representative of past or future conditions.

### **1.5 LIMITING CONDITIONS/DEVIATIONS**

The performance of this assessment was limited by the following:

- While additional assessments may have been conducted on the subject property, these documents must be provided for AEI's review in order for the information to be summarized/included in this report. Please refer to [Section 6.3](#) for a summary of previous reports and other documentation provided to AEI during this assessment.
- On September 16, 2020, the Daly City Building Department was contacted for information on the subject property. Due to the time frame of this assessment and the current conditions associated with the coronavirus disease 2019 (COVID-19) outbreak, the Daly City Building Department is temporarily closed and the date in which the agency will reopen is unknown. As a result, microfiche records at the Daly City Building Department were not available for review. However, based on the quality of information obtained from other sources including aerial photographs and Sanborn maps, this limitation is not expected to significantly alter the findings of this assessment.
- Due to the poor condition of the subject property residence (locked and boarded up), AEI did not access the building. However, based on the residential nature of the structure and information obtained from historical resources, the lack of access is not expected to significantly alter the findings of the assessment.

### **1.6 DATA FAILURE AND DATA GAPS**

According to ASTM E1527-13, data gaps occur when the Environmental Professional is unable to obtain information required by the Standard, despite good faith efforts to gather such information. Pursuant to ASTM E1527-13, only significant data gaps, defined as those that affect the ability of the Environmental Professional to identify RECs, need to be documented.

Data failure is one type of data gap. According to ASTM E1527-13, data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. Pursuant to ASTM E1527-13, historical sources are required to document property use back to the property's first developed use or back to 1940, whichever is earlier, or periods of five years or greater.

### 1.6.1 DATA FAILURE

The following data failure was identified during the course of this assessment:

|                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|--------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Data Failure</b>                  | The earliest historical resource obtained during this assessment was an appraisal record from the Assessor's Office indicating the the on-site residence was developed around 1908. The lack of historical sources for the subject property dating back to first developed use represents historical data source failure. However, as it is assumed that the subject property would have been previously used for residential purposes, if not undeveloped, this data failure is not expected to significantly alter the findings of this assessment. |
| <b>Information/Sources Consulted</b> | City directories, Sanborn fire insurance maps, aerial photographs, agency records, interviews                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

### 1.6.2 SIGNIFICANT DATA GAPS

AEI did not identify significant data gaps which affected our ability to identify RECs.

### 1.7 RELIANCE

All reports, both verbal and written, are for the benefit of PIH, LLC. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of AEI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with AEI granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against AEI, its officers, employees, vendors, successors or assigns. Reliance is provided in accordance with AEI's contract and Terms and Conditions executed by PIH, LLC on September 16, 2020. The limitation of liability defined in the Terms and Conditions is the aggregate limit of AEI's liability to the client and all relying parties.

## 2.0 SITE AND VICINITY DESCRIPTION

### 2.1 SITE LOCATION AND DESCRIPTION

| PROPERTY INFORMATION                 |                                                               |
|--------------------------------------|---------------------------------------------------------------|

### 2.2 ON-SITE UTILITIES

| Utility                   | Source/System Information |
|---------------------------|---------------------------|
| Heating System            | N/A                       |
| Cooling System            | N/A                       |
| Potable Water             | City of Daly City         |
| Sewage Disposal/Treatment | City of Daly City         |

Utility source/system information listed in the table above was obtained during the site visit and on-line.

## 2.3 SITE AND VICINITY CHARACTERISTICS

The subject property is located in a residential area of Daly City, California. The immediately surrounding properties consist of the following:

| Direction    | Tenant/Use (Address)                                       | Regulatory Database Listing(s) |
|--------------|------------------------------------------------------------|--------------------------------|
| <b>North</b> | Residence (131 3rd Avenue)                                 | None identified                |
| <b>East</b>  | Residences (930-960 Hillside Boulevard)                    | None identified                |
| <b>South</b> | Residences (301-313 Habitat Way and 165 3rd Avenue)        | CLEANUP SITES, DELISTED COUNTY |
| <b>West</b>  | 3rd Avenue followed by:<br>Residences (132-168 3rd Avenue) | None identified                |

If the surrounding properties are listed in the regulatory database, please refer to [Section 5.1](#) for discussion.

## 2.4 PHYSICAL SETTING

|                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|--------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Geologic Unit:<br/>Description/Source</b>                             | Q: Alluvium, lake playa and terrace deposits of the Quaternary period/USGS and United States Department of the Interior                                                                                                                                                                                                                                                                                                                            |
| <b>Soil Series:<br/>Description/Source</b>                               | Urban land-Orthents: 65% Urban land, 25% Orthents and similar soils, and the rest minor components. The Urban land designation indicates that more than 85 percent of the original soils have been disturbed or covered by paved surfaces, buildings or other structures; due to the variability of the soil material, on-site investigation would be required to determine the specific soil composition at the subject property/USDA Soil Survey |
| <b>Groundwater Flow<br/>Direction/Source</b>                             | West/Topographic map interpretation                                                                                                                                                                                                                                                                                                                                                                                                                |
| <b>Estimated Depth to<br/>Groundwater/<br/>Source</b>                    | 16 to 17 feet bgs/Groundwater information obtained from GeoTracker for a nearby site located at 1055 Hillside Boulevard, approximately 600 feet southeast                                                                                                                                                                                                                                                                                          |
| <b>Surface waters on<br/>the subject property<br/>or adjoining sites</b> | None                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| <b>Additional notes</b>                                                  | None                                                                                                                                                                                                                                                                                                                                                                                                                                               |

Note: Groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and over time, in response to urban development such as storm water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

### 3.0 HISTORICAL REVIEW OF SITE AND VICINITY

Reasonably ascertainable standard historical sources as outlined in ASTM Standard E1527-13 were used to determine previous uses and occupancies of the subject property that are likely to have led to RECs in connection with the subject property. A chronological summary of historical data found, including but not limited to aerial photographs, historical city directories, Sanborn fire insurance maps, and agency records, is as follows:

| Date Range    | Subject Property Description and Occupancy<br>(Historical Addresses)              | Source(s)                                                                           |
|---------------|-----------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|
| Prior to 1908 | Unknown use/Data failure; refer to <a href="#">Section 1.6.1</a>                  | Aerial photographs, Sanborn maps, agency records                                    |
| circa 1908    | Current residence developed                                                       | Assessor's Office                                                                   |
| 1926-1975     | Developed with a residence and green houses (141 3rd Avenue)                      | Aerial photographs, Sanborn maps, city directories, agency records                  |
| 1980-2019     | Residence still present, and rest of the property is vacant land (141 3rd Avenue) | Aerial photographs, Sanborn maps, city directories, agency records, interviews      |
| 2019-Present  | Vacant residence and land (141 3rd Avenue)                                        | Aerial photographs, Sanborn maps, city directories, interviews, site reconnaissance |

According to review of historical sources, the subject property was identified to be developed with the current single-family residence around 1908. By 1926, numerous green houses were developed on the property, and by 1946, a boiler room was developed on the southwestern corner of the property in order to heat up the green houses. The property appears to have remained this way until at least 1975. During this time, Sanborn maps indicate that the subject property and eastern and southern adjoining properties were owned and/or operated by V. Toseti from at least 1926 to 1945. By 1980, the green houses on the subject were no longer present, and the area remained as vacant land. The residence was reportedly occupied until 2019, and has been vacant since that time. The subject property is slated for redevelopment with 15 town homes.

According to review of municipal and regulatory agency records, the south adjoining property, 165 3rd Avenue, was also historically developed with green houses from at least 1943 to 2002. Prior to the redevelopment of this property with the current townhouses, elevated concentrations of pesticides in soils, including DDT, Dieldrin, 4,4-DDE, and 4,4-DDD were identified. The former nursery operations at this property appear to have extended onto the southern portion of the subject property. Some of the highest pesticide concentrations were identified along the border of the two properties. As such, it is likely that the subject property had been adversely impacted by the former nursery operations, which represents a REC. Please refer to Sections 4.5 and 5.1 for further discussion.

If available, copies of historical sources are provided in [Appendix D](#).

### 3.1 AERIAL PHOTOGRAPHS

AEI reviewed aerial photographs of the subject property and surrounding area. A search was made of the ERIS collection of aerial photographs. Aerial photographs were reviewed for the following years:

| Year(s)               | Subject Property Description                                                                                                                        | Adjoining Site Descriptions                                                                                                                                                                                                             |

| 2016                  | No significant changes                                                                                                                              | NORTH: No significant changes<br>EAST: No significant changes<br>SOUTH: No significant changes<br>WEST: Road followed by all of the previous residences                                                                                 |

Based on a review of aerial photographs, the subject property and eastern and southern adjoining properties were developed with green houses from at least 1943 to 1974. Please refer to Section 3.0 for additional information.

\*Due to copyright restrictions, copies of the aerial photographs reviewed are not included in the appendices, but can be viewed online at [historicaerials.com](http://historicaerials.com).

### 3.2 SANBORN FIRE INSURANCE MAPS

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of the ERIS collection of Sanborn Fire Insurance maps.

The following maps were reviewed:

| Year(s) | Subject Property Description (Listed Address)                                                                                                                      | Adjoining Site Descriptions                                                                                                                                                                                                                                                                                           |
|---------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1926    | Developed with the current residence, and a small ancillary structure, a water tank, and five green houses Titled V. Toseti.                                       | NORTH: Vacant land<br>EAST: Vacant land<br>SOUTH: Developed with a residence and vacant land<br>WEST: 3rd Avenue followed by a residence and ancillary structure and vacant land                                                                                                                                      |
| 1945    | No significant changes. Appears to be associated with the southern property, also developed with greenhouses at 165 3rd Avenue, Titled V. Toseti. (141 3rd Avenue) | NORTH: No significant changes<br>EAST: Developed with green houses that appear to be associated with the subject property and south adjoining property; titled as V. Toseti<br>SOUTH: Previous residence still present, and property developed with green houses, titled as V. Toseti<br>WEST: No significant changes |
| 1953    | No significant changes. No name present; however, appears to still be affiliated with the south adjoining property                                                 | NORTH: No significant changes<br>EAST: No significant changes<br>SOUTH: No significant changes, titled as Zanolini & Birtini<br>WEST: No significant changes                                                                                                                                                          |

Based on a review of Sanborn maps the subject property and eastern and southern adjoining properties were developed as a large nursery operation with numerous green houses from at least 1926 to 1953. Please refer to Section 3.0 for additional information.

### 3.3 CITY DIRECTORIES

A search of historical city directories was conducted for the subject property utilizing ERIS. The following table summarizes the results of the city directory search:

| Year(s)                | Address - Occupant Listed                                                                   |
|------------------------|---------------------------------------------------------------------------------------------|
| 1942, 1947, 1951, 1955 | 141 3rd Avenue - Address not listed<br>165 3rd Avenue - Addresses not listed                |
| 1961                   | 141 3rd Avenue - Aguiniga R<br>165 3rd Avenue - Addresses not listed                        |
| 1964                   | 141 & 165 3rd Avenue - Addresses not listed                                                 |
| 1970                   | 141 3rd Avenue - Rios Augustin, Paulita, Petra, Philip<br>165 3rd Avenue - Marvin Felker    |
| 1975                   | 141 3rd Avenue - XXXX<br>165 3rd Avenue - Marvin Felker                                     |
| 1981                   | 141 3rd Avenue - Hernandez M<br>165 3rd Avenue - Marvin Felker, <b>Ottoboni A J Nursery</b> |

| Year(s)                | Address - Occupant Listed                                                                                        |
|------------------------|------------------------------------------------------------------------------------------------------------------|
| 1986                   | 141 3rd Avenue - XXXX<br>165 3rd Avenue - Maggi Luigi, <b>Ottoboni A J Nursery</b>                               |
| 1991                   | 141 3rd Avenue - Moreno B, Moreno Sara<br>165 3rd Avenue - <b>Ottoboni A J Nursery</b>                           |
| 1996                   | 141 3rd Avenue - XXXX<br>165 3rd Avenue - <b>Rodriguez Family</b> , Toribio Sanchez                              |
| 2001                   | 141 3rd Avenue - Chow Ann, Morilla Richard<br>165 3rd Avenue - <b>Rodriguez Family Orchids</b> , Toribio Sanchez |
| 2006, 2008, 2013, 2018 | 141 3rd Avenue - Address not listed<br>165 3rd Avenue - XXXX / Address not listed                                |

*If listed above, XXXX indicates that the address is valid but there is no occupancy information available.*

AEI did not identify potential environmental concerns in association with the historical use of the subject property during the city directory review. However, the historic on-site greenhouse operations appear to have been affiliated with historic nursery operations conducted on the southern adjoining property. Please refer to Section 3.0 for further discussion.

### 3.4 HISTORICAL TOPOGRAPHIC MAPS

Based on the quality of information obtained from other sources, historical topographic maps were not reviewed as a part of this assessment.

### 3.5 CHAIN OF TITLE

Based on the quality of information obtained from other sources, a chain of title search was not performed as part of this assessment.

## 4.0 REGULATORY AGENCY RECORDS REVIEW

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous substance use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to AULs, defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.

### 4.1 LOCAL ENVIRONMENTAL HEALTH DEPARTMENT AND/OR STATE ENVIRONMENTAL AGENCY

| Agency                                                 | Date Contacted     | Method of Contact | Name & Title of Contact | Agency Response    |
|--------------------------------------------------------|--------------------|-------------------|-------------------------|--------------------|
| San Mateo County Environmental Health Services (SMEHS) | September 16, 2020 | Email             | Jean DeTar              | No records on file |

### 4.2 FIRE DEPARTMENT

| Agency                             | Date Contacted     | Method of Contact | Name & Title of Contact | Agency Response                                                                     |
|------------------------------------|--------------------|-------------------|-------------------------|-------------------------------------------------------------------------------------|
| North County Fire Authority (NCFA) | September 16, 2020 | Telephone         | Unknown                 | Department does not maintain hazardous materials records. Referred AEI to the SMEHS |

### 4.3 BUILDING DEPARTMENT

| Agency                               | Date Contacted     | Method of Contact   | Name & Title of Contact | Agency Response                                                                             |

| <b>Additional Information</b>  | <p>Some of the information above was obtained from various sources. Mr. Lombardo stated that these two parcels appear to have not been surveyed in a very long time, and the department does not have the parcel sizes on file. The parcel sizes were determined by Mr. Lombardo using AutoCAD.</p> <p>Ms. Christine Taliva'a-Aguerre, an appraiser, supplied AEI with additional information about the subject property. According to a Unit Appraisal Record (UAR) Pictometry map, and a snippet of the County's master screen was supplied, the subject property has a Use Code of 59, "Nurseries and Greenhouses." To her knowledge, the greenhouses were torn down several decades ago, as well as a boiler house and shed. Records, including a 1959 appraisal that indicated the subject property building was constructed in approximately in 1908. The property also had a 73 square foot shed, 320 square foot boiler house, and approximately 24,000 square feet of green houses. The residence is noted to have a 918 square foot "first story" and a 918 square foot "basement." However, the "basement" level is aboveground, and considered as the first floor in this report, or the garage. There is no subterranean basement level of the residence.</p> <p>The boiler house was indicated to have a concrete floor, and was constructed in 1946. The boiler house was connected to the former greenhouses, which it heated up. The greenhouses were made of glass and wood frames, and were in use until at least 1975.</p> |

#### 4.6 OTHER AGENCIES SEARCHED

| Agency                                                                                  | Date Contacted     | Method of Contact | Name & Title of Contact | Agency Response    |

| SWRCB Groundwater Ambient Monitoring and Assessment Program (GAMA)                      | September 16, 2020 | Website           | N/A                     | No records on file |

Due to the historical agricultural/nursery nature of the subject property from at least 1926 to 1974, AEI researched the SWRCB GAMA online database in order to determine if a well was present or is present on the property. The database did not depict a well on the subject property, and the current property owner was not aware of any well on the subject property. No agency records note the presence of a well either. Based on this information, it is unlikely that a well is located on the subject property.

#### 4.7 OIL AND GAS WELLS

| Agency                                                                                       | Date Referenced    | Resource   | Oil or gas wells located within 500 feet of the subject property |

#### 4.9 STATE ENVIRONMENTAL SUPERLIENS

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state environmental superliens.

#### 4.10 STATE PROPERTY TRANSFER LAWS

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state property transfer laws.

## 5.0 REGULATORY DATABASE RECORDS REVIEW

AEI contracted ERIS to conduct a search of publicly available information from federal, state, tribal, and local databases containing known and suspected sites of environmental contamination and sites of potential environmental significance. Data gathered during the current regulatory database search is compiled by ERIS into one regulatory database report. Location information for listed sites is designated using geocoded information provided by federal, state, or local agencies and commonly used mapping databases with the exception of "Orphan" sites. Due to poor or inadequate address information, Orphan sites are identified but not geocoded/mapped by ERIS, rather, information is provided based upon vicinity zip codes, city name, and state. The number of listed sites identified within the approximate minimum search distance from the federal and state environmental records database listings specified in ASTM Standard E1527-13 is summarized in Section 5.1, along with the total number of Orphan sites. A copy of the regulatory database report, which includes detailed descriptions of the databases noted below, is included in [Appendix C](#) of this report.

In determining if a listed site is a potential environmental concern to the subject property, AEI generally applies the following criteria to classify the site as lower potential environmental concern: 1) the site only holds an operating permit (which does not imply a release), 2) the site's distance from, and/or topographic position relative to, the subject property, and/or 3) the site has recently been granted "No Further Action" by the appropriate regulatory agency.

Regulatory database listings associated with the subject property, adjoining site(s) and/or nearby sites of concern that were determined to warrant additional discussion are identified and further discussed in Section 5.1.

### 5.1 RECORDS SUMMARY

| Database                              | Search Distance (Miles) | Listings Within Search Distance | Subject Property | Adjoining Site(s) | Other Nearby Sites of Concern |

| <b>Comments</b>                 | <p>According to the regulatory database and historical resources, this site was historically developed with green houses from at least 1943 to 2002, was occupied by the Ottoboni Nursery from at least 1981 to 1996, and another family nursery until at least 2002. Due to it's historical use, a subsurface investigation was completed on the property in 2002 and 2003. A total of 28 soil samples were collected throughout the property, and concentrations of DDT up to 12 ppm, Dieldrin up to 0.47 ppm, 4,4-DDE up to 2.2 ppm, and 4,4-DDD up to 0.18 ppm were identified. The four closest soil samples to the subject property were collected near the southern boundary (sampling points 24 to 27), which contained some of the highest levels of contaminants. Approximately 1,237 tons of impacted soils were excavated from the site and properly disposed of at an off-site location. Confirmation soil samples were collected from around the property, and only 0.110 ppm of DDT, 0.28 ppm of Dieldrin,, 0.083 ppm of 4-4 DDE, and 0.017 ppm of 4-4 DDD remained. Groundwater was not encountered during the investigations. Due to the low level of remaining contaminants, the site was granted regulatory closure on December 4, 2003, and the property redeveloped with residences by 2005.</p> <p>However, as previously discussed in Section 3.0 of this report, operations at this former nursery appear to have extended on to the southern portion of the subject property. Due to the elevated concentrations identified at this site, it is likely that subject property has been adversely impacted. As such, the former nursery/greenhouse operations are considered a REC.</p> |

## **5.2 VAPOR MIGRATION**

AEI reviewed reasonably ascertainable information for the subject and nearby properties, including a regulatory database, files for nearby release sites, and/or historical documentation, to determine if potential vapor-phase migration concerns may be present which could impact the subject property.

Based on a review of available resources as documented in this report, AEI did not identify significant on-site concerns and/or regulated listings from nearby sites which suggest that a vapor-phase migration concern currently exists at the subject property.

## 6.0 INTERVIEWS AND USER PROVIDED INFORMATION

### 6.1 INTERVIEWS

Pursuant to ASTM E1527-13, the following interviews were performed during this assessment in order to obtain information indicating RECs in connection with the subject property.

#### 6.1.1 OWNER AND KEY SITE MANAGER

According to Mr. Winston Chow, the subject property has been owned by his family for approximately 55 years, and he personally inherited the property in 2011. To his knowledge, the majority of the property has always been vacant, and the structure occupied as a residence. The last tenant was evicted in 2019, and the structure has been vacant since that time. Mr. Chow was not aware of any environmental concerns with the subject property.

### 6.1.2 PAST OWNERS, OPERATORS, AND OCCUPANTS

According to Ms. Nicole Gittleston with the Client, Clarum Homes, the subject property is slated for residential redevelopment, which includes the demolition of the current residence, and the construction of 15 town homes.

### 6.1.3 INTERVIEW WITH OTHERS

Information obtained during interviews with local government officials is incorporated into the appropriate segments of this report.

## 6.2 USER PROVIDED INFORMATION

User provided information is intended to help identify the possibility of RECs in connection with the subject property. According to ASTM E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), certain items should be researched by the prospective landowner or grantee, and the results of such inquiries may be provided to the Environmental Professional. The responsibility for qualifying for LLPs by conducting the inquiries ultimately rests with the User, and providing the information to the Environmental Professional would be prudent if such information is available.

The User Questionnaire was completed by Ms. Nicole Gittleston with the Client, Clarum Homes. The following table represents information contained therein.

| Question                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | Response/<br>Comment |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------|
| <b>1. Environmental liens that are filed or recorded against the property (40 CFR 312.25)</b><br><br>Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?                                                                                                                                                                                          | No                   |
| <b>2. Activity and use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and vi)).</b><br><br>Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law? | No                   |
| <b>3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).</b><br><br>Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?                               | No                   |

| Question                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | Response/<br>Comment     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|
| <p><b>4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).</b></p> <p>Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?</p>                                                                                                                                                                                                                                                            | Yes                      |
| <p><b>5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30).</b></p> <p>Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example:</p> <p>(a) Do you know the past uses of the property?</p> <p>(b) Do you know of specific chemicals that are present or once were present at the property?</p> <p>(c) Do you know of spills or other chemical releases that have taken place at the property?</p> <p>(d) Do you know of any environmental cleanups that have taken place at the property?</p> | No                       |
| <p><b>6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).</b></p> <p>Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?</p>                                                                                                                                                                                                                                                                                                        | Information not provided |

### 6.3 PREVIOUS REPORTS AND OTHER PROVIDED DOCUMENTATION

No prior reports or other relevant documentation in association with the subject property was made available to AEI during the course of this assessment.

### 6.4 ENVIRONMENTAL LIEN SEARCH

In accordance with our approved scope of services, an environmental lien search was not performed as part of this assessment.

## 7.0 SITE RECONNAISSANCE

|                                                        |                                                                                                      |
|--------------------------------------------------------|------------------------------------------------------------------------------------------------------|
| <b>Site Reconnaissance Date</b>                        | September 22, 2020                                                                                   |
| <b>AEI Site Assessor(s)</b>                            | Elizabeth Hoggatt                                                                                    |
| <b>Property Escort(s)/ Relationship(s) to Property</b> | N/A                                                                                                  |
| <b>Units/Areas Observed</b>                            | Exterior areas: Traversed the vacant parcel and walked through the back yard area of the residence   |
| <b>Area(s) not accessed and reason(s)</b>              | Due to the poor conditions of the residence on the subject property, AEI did not access the building |
| <b>Other Physical Constraints</b>                      | None                                                                                                 |

### *Reconnaissance Findings Summary*

| <b>Feature</b>                                                                                  | <b>Observed on Subject Property (see Section 7.1)</b> | <b>Observed on Adjoining Property (see Section 7.2)</b> |
|-------------------------------------------------------------------------------------------------|-------------------------------------------------------|---------------------------------------------------------|
| Regulated Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use |                                                       |                                                         |
| Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)      |                                                       |                                                         |
| Hazardous Substance and Petroleum Product Containers Not in Connection with Property Use        |                                                       |                                                         |

### 7.1 SUBJECT PROPERTY RECONNAISSANCE FINDINGS

During the site reconnaissance, AEI observed the item listed in the above Reconnaissance Findings Summary table, which is further discussed below.

### **7.1.1 OTHER**

AEI identified numerous containers of paint, cleaning products, maintenance products, and miscellaneous household debris outside of the residence and scattered throughout the undeveloped portions of the property. Prior to redevelopment, these materials should be removed and properly disposed of in accordance with applicable regulations.

## **7.2 ADJOINING PROPERTY RECONNAISSANCE FINDINGS**

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

### **7.2.1 ELECTRICAL OR MECHANICAL EQUIPMENT LIKELY TO CONTAIN FLUIDS**

Toxic PCBs were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR, Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing." Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process, or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

#### *Transformers*

The management of potential PCB-containing transformers is the responsibility of the local utility or the transformer owner. Actual material samples need to be collected to determine if transformers are PCB-containing.

Numerous pole-mounted transformers were observed on the adjoining sites during the site reconnaissance. No spills, staining, or leaks were observed on or around the transformers. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

### **7.2.2 DRAINS, SUMPS, AND CLARIFIERS**

Several storm drains were observed in the parking areas of the adjoining properties and adjoining roadways. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff and connection to the municipal system, their presence was not expected to represent a significant environmental concern.

## 8.0 NON-ASTM SERVICES

---

### 8.1 ASBESTOS-CONTAINING BUILDING MATERIALS

Asbestos is the name for a group of naturally occurring silicate minerals that can be separated into fibers. The fibers are strong, durable, and resistant to heat and fire. They are also long, thin and flexible, so they can even be woven into cloth. Because of these qualities, asbestos has been used in thousands of consumer, industrial, maritime, automotive, scientific and building products. During the 20th century, some 30 million tons of asbestos have been used in industrial sites, homes, schools, shipyards and commercial buildings in the United States. Commercial use of ACM began in the early 1900s and peaked in the period between 1940 and into the 1970s. Common ACMs include pipe-covering, insulating cement, insulating block, refractory and boiler insulation materials, transite board, fireproofing spray, joint compound, vinyl floor tile, ceiling tile, mastics, roofing products, and duct insulation for HVAC applications. Inhalation of asbestos fibers can result in deleterious health effects.

The potential for ACM was evaluated based the United States EPA Guidance Document: Managing Asbestos in Place - A Building Owner's Guide to Operations and Maintenance Programs for Asbestos-Containing Materials (the Green Book). In 1973 the NESHAPS banned the use of most spray-applied surfacing ACM, specifically asbestos containing spray-on fireproofing and insulation. Subsequent revisions to this regulation in 1975 and 1978 effectively eliminated the use of friable pre-molded pipe, boiler, turbine, and duct insulation; and the spray application of friable asbestos-containing materials for all uses in buildings. In 1989 the EPA issued regulations to ban some asbestos-containing products and phase out most others over a multi-year period. The "Ban and Phase-Down" rule was challenged in court and the regulation remanded to the agency. As a result, any asbestos-containing products then "in commerce" would not be banned. Those not in commerce would be banned. Those materials "banned" could not be sold. It did not affect such materials already installed, or in use. Most US firms voluntarily ceased production of asbestos containing building materials not covered by the aforementioned Federal bans by the mid-1980s. In 1994, the OSHA determined that employers and building owners are required to treat installed thermal system installation and sprayed on and troweled-on surfacing materials, as well as vinyl or asphalt flooring material, as ACM in buildings constructed no later than 1980 until tested by laboratory analysis to prove otherwise.

The information below is for general informational purposes only and does not constitute an asbestos survey. In addition, the information is not intended to comply with federal, state or local regulations in regards to ACM.

Due to the age of the subject property building, there is a potential that ACMs are present. Due to the poor conditions of the building (locked and boarded up), AEI did not access the interior. However, a limited list of typical suspect ACMs is included in the following table:

| Material Type                                                                          | Location                                                                                                 |
|----------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------|
| Plaster (acoustical and smooth)                                                        | Walls and ceilings                                                                                       |
| Ceiling tile                                                                           | Ceiling systems                                                                                          |
| Thermal systems insulations, packings, and gaskets                                     | Heating systems, cooling systems, domestic and heating and cooling piping, ductwork, and other equipment |
| Floor tile and associate mastics, flooring felts, and papers (under hardwood/other)    | Floors                                                                                                   |
| Vinyl sheet flooring and adhesives                                                     | Floors                                                                                                   |
| Cove base and associated mastics                                                       | Walls                                                                                                    |
| Ceramic tile adhesives and grouts                                                      | Walls, floors, and ceilings                                                                              |
| All adhesives                                                                          | Mirrors, wall coverings, construction, etc.                                                              |
| Grout and caulking                                                                     | Windows and doors                                                                                        |
| Gypsum board, tape, and joint compound                                                 | Wall and ceiling systems                                                                                 |
| Insulation materials                                                                   | Walls, ceilings, and attic spaces                                                                        |
| Roofing materials (felts, rolled, shingle, flashings, adhesives, tar, and insulations) | Roof and parapet wall systems                                                                            |
| Brick and block, mortars                                                               | Walls                                                                                                    |

The subject property building is scheduled for demolition and the property will be redeveloped with townhouses. Regardless of building construction date, the EPA's NESHAP requires that a thorough asbestos survey be performed prior to demolition or renovation activities that may disturb ACMs. This requirement may be enforced by federal, state and local regulatory agencies, and specifies that all suspect ACMs be sampled to determine the presence or absence of asbestos prior to any renovation or demolition activities which may disturb them to prevent potential exposure to workers, building occupants, and the environment.

## 8.2 LEAD-BASED PAINT

Lead-based paint (LBP) is defined as any paint, varnish, stain, or other applied coating that has  $\geq 1 \text{ mg/cm}^2$  (5,000  $\mu\text{g/g}$  or 5,000 ppm) or more of lead by federal guidelines; state and local definitions may differ from the federal definitions in amounts ranging from  $0.5 \text{ mg/cm}^2$  to  $2.0 \text{ mg/cm}^2$ . Section 1017 of the Housing and Urban Development (HUD) Guidelines, Residential Lead-Based Paint Hazard Reduction Act of 1992, otherwise known as "Title X," defines a LBP hazard as "any condition that causes exposure to lead that would result in adverse human health effects" resulting from lead-contaminated dust, bare, lead-contaminated soil, and/or lead-contaminated paint that is deteriorated or present on accessible, friction, or impact surfaces. Therefore, under Title X, intact LBP on most walls and ceilings would not be considered a "hazard," although the paint should be maintained and its condition monitored to ensure that it does not deteriorate and become a hazard. Additionally, Section 1018 of this law directed HUD and EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978. Most private housing, public housing, or federally owned or subsidized housing is affected by this rule.

Under OSHA, lead-containing paint (LCP) is defined as any paint with any detectable amount of lead present in it. Therefore, all LBP is considered LCP. Conversely, LCP may not meet the criteria to be considered LBP in accordance with HUD guidelines or some states' definition of LBP.

It is important to note that LCP may create a lead hazard when being removed. The condition of these materials must be monitored when they are being disturbed. In the event LCP is subject to abrading, sanding, torching, and/or cutting during demolition or renovation activities, there may be regulatory issues that must be addressed.

The information below is for general informational purposes only and does not constitute a lead hazard evaluation. In addition, the information is not intended to comply with federal, state, or local regulations in regards to LBP.

In buildings constructed after 1978, it is unlikely that LBP is present; however, some paints utilized after 1978 will be LCP under OSHA. Structures built prior to 1978 and especially prior to the 1960s should be expected to contain LBP.

Due to the age of the subject property building, there is a potential that LBP is present. AEI understands that demolition activities of the subject property building are planned. As such, the property owner should consult with a certified Lead Risk Assessor to determine options for control of possible LBP hazards. Stringent local and State regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

### **8.3 RADON**

Radon is a naturally-occurring, odorless, and invisible gas. Natural radon levels vary and are closely related to geologic formations. Radon may enter buildings through basement sumps or other openings.

Radon sampling was not requested as part of this assessment. According to the California Department of Health Services Radon Database, 32 tests were conducted for radon levels in the subject property zip code (94014) in 2016. All of these tests indicated that radon levels were below the action level of 4.0 pCi/L set forth by the US EPA. Therefore, radon is not expected to represent a significant environmental concern.

## 9.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

---

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR Part 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

**Reliance on information in Report:** This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as database review of environmental records.

**License for use of information in Report:** No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

**Your Liability for misuse:** Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

**No warranty of Accuracy or Liability for ERIS:** The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

**Trademark and Copyright:** You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

# Executive Summary

## Property Information:

**Project Property:** 427321  
141 3rd Avenue Daly City CA 94014

**Project No:** 234837

### **Coordinates:**

**Latitude:** 37.69121436  
**Longitude:** -122.46195405  
**UTM Northing:** 4,171,691.69  
**UTM Easting:** 547,436.56  
**UTM Zone:** UTM Zone 10S

**Elevation:** 211 FT

## Order Information:

**Order No:** 20291600341  
**Date Requested:** September 16, 2020  
**Requested by:** AEI Consultants  
**Report Type:** Database Report

Operators associated with the site include L. Celle (1926), G. Nano (1945), the Dentone family (1929-1964), Ray's Nursery Sales (1988), Graciano's Nursery (1993), and Daly City Nursery, the current operator since 1995. From 1929 until 1962, the greenhouses were used to grow ferns in hanging baskets and asparagus ferns in the ground. Hanging plants were fertilized with pigeon manure obtained by the nursery operator, but plants grown in-ground were not. Since at least 1988, the greenhouses have been used to grow small potted plants on tables. At that time, the greenhouses were leased to Ray's Nursery Sales. Subsequently, the greenhouses were leased to Graciano's Nursery and Daly City Nursery, the current operator. A house occupies the southwest corner of the site.</p> <div> <b>Status:</b> INACTIVE - NEEDS EVALUATION<br/> <b>A2 Program Type:</b> EVALUATION<br/> <b>CalEnviroScreen Score:</b> 71-75%<br/> <b>Summary Link:</b> <a href="http://www.envirostor.dtsc.ca.gov/public/profile_report?global_id=70000094">http://www.envirostor.dtsc.ca.gov/public/profile_report?global_id=70000094</a> </div> <p><b>Completed Activities</b></p> <div> <b>Title:</b> Site Screening<br/> <b>Title Link:</b> <a href="http://www.envirostor.dtsc.ca.gov/public/final_documents2?global_id=70000094&amp;doc_id=6008420">http://www.envirostor.dtsc.ca.gov/public/final_documents2?global_id=70000094&amp;doc_id=6008420</a><br/> <b>Area Name:</b><br/> <b>Area Link:</b><br/> <b>Sub Area:</b><br/> <b>Sub Area Link:</b><br/> <b>Document Type:</b> Site Screening<br/> <b>Date Completed:</b> 5/4/2006<br/> <b>Comments:</b> The site screening was approved by US EPA. No further action is required under CERCLA. However, since no confirmation sampling was taken, the site needs to be re-evaluated under DTSC lead. </div> |                   |           |                  |                |                                                                                                    |            |

**Violation/Evaluation Summary**

**Note:** NO RECORDS: As of May 2020, there are no Compliance Monitoring and Enforcement (violation) records associated with this facility (EPA ID).

**Handler Summary**

Importer Activity: No  
 Mixed Waste Generator: No  
 Transporter Activity: No  
 Transfer Facility: No  
 Onsite Burner Exemption: No  
 Furnace Exemption: No  
 Underground Injection Activity: No  
 Commercial TSD: No  
 Used Oil Transporter: No  
 Used Oil Transfer Facility: No  
 Used Oil Processor: No  
 Used Oil Refiner: No  
 Used Oil Burner: No  
 Used Oil Market Burner: No  
 Used Oil Spec Marketer: No

**Hazardous Waste Handler Details**

Sequence No: 1  
 Receive Date: 20020718  
 Handler Name: SHELL SERVICE STATION  
 Federal Waste Generator Code: 2  
 Generator Code Description: Small Quantity Generator  
 Source Type: Notification

**Waste Code Details**

Hazardous Waste Code: D001  
 Waste Code Description: IGNITABLE WASTE

**Owner/Operator Details**

PLLD SHUTDOWN ALARM - NOV 3 for 87 tank Not in NOV DO report PLLD SHUTDOWN ALARM - SEPT 19TH, 23RD, 28TH for 87 tank, SEPT 16TH AND 22ND for 91 tank Not in October DO report OVERFILL ALARM - SEPT 5TH for 87 tank Not in September DO report PLLD SHUTDOWN ALARM - AUG 1ST, 2ND, 3RD for 87 tank HIGH PRODUCT ALARM - JULY 30TH for 87 tank OVERFILL ALARM - JULY 30TH for 87 tank Not in August DO report PLLD SHUTDOWN ALARM - JUNE 28TH for 87 tank, JUNE 25TH AND 29TH for 91 tank Not in July DO report Explain causes for the alarms listed, follow up action, and any work orders. Submit documentation to the inspector within the comply by date.

**Violation Description:**

For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements:

| Map Key | Number of Records | Direction | Distance (mi/ft) | Elev/Diff (ft) | Site | DB |
|---------|-------------------|-----------|------------------|----------------|------|----|
|---------|-------------------|-----------|------------------|----------------|------|----|

Be performed by an ICC certified DO.  
Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy.  
Inspect for the presence of liquid/debris in spill containers.  
Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly.  
Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit.  
Check that all testing and maintenance has been completed and documented.  
Verify that all facility employees have been trained in accordance with 23 CCR 2715(c).  
For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.

#### Violations

**Violation Date:** 11/28/2018  
**Violation Program:** UST  
**Citation:** 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)  
**Violation Notes:**

Returned to compliance on 06/21/2019. Overfill inspection has not been conducted. Conduct overfill inspection and submit results to the inspector within the comply by date.

#### **Violation Description:**

Failure to comply with one or more of the following overfill prevention equipment requirements:  
Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or  
Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or  
Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or  
Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.

Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018.

For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter.

For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter.

Inspected within 30 days after a repair to the overfill prevention equipment.

Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer.

Inspected by a certified UST service technician.

Maintain records of overfill prevention equipment inspection for 36 months.

#### Site History:

The Site consists of eight adjacent parcels that are located on both sides of 2nd Avenue and on the west side of 3rd Avenue, south of Valley Street, and north of A Street in Daly City, San Mateo County, California. The property is currently developed for mixed-use consisting of agricultural field areas and older residences. Three phases of investigations have been conducted at the Site. KB Homes intends to acquire the Site for townhouse development.

CHLORDANE, DIELDRIN, ENDRIN, LEAD

#### Site History:

The Site consists of eight adjacent parcels that are located on both sides of 2nd Avenue and on the west side of 3rd Avenue, south of Valley Street, and north of A Street in Daly City, San Mateo County, California. The property is currently developed for mixed-use consisting of agricultural field areas and older residences. Three phases of investigations have been conducted at the Site. KB Homes intends to acquire the Site for townhouse development.

HILLSIDE TIRE & BRAKE  
1055 HILLSIDE BLVD  
DALY CITY CA 94014-0000

RCRA  
NON GEN

EPA Handler ID: CAL000360733  
Gen Status Universe: No Report  
Contact Name: LEONEL S HERNANDEZ  
Contact Address: 1055 HILLSIDE BLVD , , COLMA , CA, 94014 ,  
Contact Phone No and Ext: 650-922-4505  
Contact Email: CONSUELOHERNADEZ780@GMAIL.COM  
Contact Country:  
County Name: SAN MATEO  
EPA Region: 09  
Land Type:  
Receive Date: 20110201

#### Violation/Evaluation Summary

**Note:** NO RECORDS: As of May 2020, there are no Compliance Monitoring and Enforcement (violation) records associated with this facility (EPA ID).

#### Handler Summary

Importer Activity: No  
Mixed Waste Generator: No  
Transporter Activity: No  
Transfer Facility: No  
Onsite Burner Exemption: No  
Furnace Exemption: No  
Underground Injection Activity: No  
Commercial TSD: No  
Used Oil Transporter: No  
Used Oil Transfer Facility: No  
Used Oil Processor: No  
Used Oil Refiner: No  
Used Oil Burner: No  
Used Oil Market Burner: No  
Used Oil Spec Marketer: No

#### Hazardous Waste Handler Details

Sequence No: 1  
Receive Date: 20110201  
Handler Name: HILLSIDE TIRE & BRAKE  
Source Type: Implementer  
Federal Waste Generator Code: N  
Generator Code Description: Not a Generator, Verified

**EPA Handler ID:** CAL000398962  
**Gen Status Universe:** No Report  
**Contact Name:** MATTHEW CHUN YIP MA  
**Contact Address:** 536 LISBON ST. , , DALY CITY , CA, 94014 ,  
**Contact Phone No and Ext:** 415-993-4689  
**Contact Email:** THEONEAUTO536@GMAIL.COM  
**Contact Country:**  
**County Name:** SAN MATEO  
**EPA Region:** 09  
**Land Type:**  
**Receive Date:** 20140718

#### Violation/Evaluation Summary

**Note:** NO RECORDS: As of May 2020, there are no Compliance Monitoring and Enforcement (violation) records associated with this facility (EPA ID).

#### Handler Summary

**Importer Activity:** No  
**Mixed Waste Generator:** No  
**Transporter Activity:** No  
**Transfer Facility:** No  
**Onsite Burner Exemption:** No  
**Furnace Exemption:** No  
**Underground Injection Activity:** No  
**Commercial TSD:** No  
**Used Oil Transporter:** No  
**Used Oil Transfer Facility:** No  
**Used Oil Processor:** No  
**Used Oil Refiner:** No  
**Used Oil Burner:** No  
**Used Oil Market Burner:** No  
**Used Oil Spec Marketer:** No

#### Hazardous Waste Handler Details

**Sequence No:** 1  
**Receive Date:** 20140718  
**Handler Name:** THE ONE AUTO SERVICE & PERFORMANCE  
**Source Type:** Implementer  
**Federal Waste Generator Code:** N  
**Generator Code Description:** Not a Generator, Verified
